Preface		***xiii***
1	***Introduction to Statistical Science***	***1***
1.1	*The Scientific Method: A Process for Learning*	*3*
1.2	*The Role of Statistics in the Scientific Method*	*4*
1.3	*Main Approaches to Statistics*	*5*
1.4	*Purpose and Organization of This Text*	*8*
2	***Scientific Data Gathering***	***13***
2.1	*Sampling from a Real Population*	*14*
2.2	*Observational Studies and Designed Experiments*	*17*
	Monte Carlo Exercises	*22*
3	***Displaying and Summarizing Data***	***29***
3.1	*Graphically Displaying a Single Variable*	*29*
3.2	*Graphically Comparing Two Samples*	*37*
3.3	*Measures of Location*	*39*

3.4 *Measures of Spread* 42
3.5 *Displaying Relationships Between Two or More Variables* 44
3.6 *Measures of Association for Two or More Variables* 46
Exercises 50

4 *Logic, Probability, and Uncertainty* 55
4.1 *Deductive Logic and Plausible Reasoning* 56
4.2 *Probability* 58
4.3 *Axioms of Probability* 59
4.4 *Joint Probability and Independent Events* 60
4.5 *Conditional Probability* 62
4.6 *Bayes' Theorem* 63
4.7 *Assigning Probabilities* 68
4.8 *Odds Ratios and Bayes Factor* 69
Exercises 73

5 *Discrete Random Variables* 75
5.1 *Discrete Random Variables* 76
5.2 *Probability Distribution of a Discrete Random Variable* 78
5.3 *Binomial Distribution* 81
5.4 *Hypergeometric Distribution* 83
5.5 *Joint Random Variables* 84
5.6 *Conditional Probability for Joint Random Variables* 88
Exercises 92

6 *Bayesian Inference for Discrete Random Variables* 95
6.1 *Two Equivalent Ways of Using Bayes' Theorem* 100
6.2 *Bayes' Theorem for Binomial with Discrete Prior* 102
6.3 *Important Consequences of Bayes' Theorem* 105
Exercises 106
Computer Exercises 108

7 **Continuous Random Variables** 111
- 7.1 Probability Density Function 113
- 7.2 Some Continuous Distributions 116
- 7.3 Joint Continuous Random Variables 122
- 7.4 Joint Continuous and Discrete Random Variables 123
- Exercises 126

8 **Bayesian Inference for Binomial Proportion** 129
- 8.1 Using a Uniform Prior 130
- 8.2 Using a Beta Prior 131
- 8.3 Choosing Your Prior 133
- 8.4 Summarizing the Posterior Distribution 136
- 8.5 Estimating the Proportion 139
- 8.6 Bayesian Credible Interval 140
- Exercises 143
- Computer Exercises 145

9 **Comparing Bayesian and Frequentist Inferences for Proportion** 147
- 9.1 Frequentist Interpretation of Probability and Parameters 147
- 9.2 Point Estimation 149
- 9.3 Comparing Estimators for Proportion 151
- 9.4 Interval Estimation 153
- 9.5 Hypothesis Testing 155
- 9.6 Testing a One-Sided Hypothesis 157
- 9.7 Testing a Two-Sided Hypothesis 159
- Exercises 164
- Monte Carlo Exercises 166

10 **Bayesian Inference for Normal Mean** 169
- 10.1 Bayes' Theorem for Normal Mean with a Discrete Prior 169
- 10.2 Bayes' Theorem for Normal Mean with a Continuous Prior 175

10.3 Choosing Your Normal Prior 179
10.4 Bayesian Credible Interval for Normal Mean 181
10.5 Predictive Density for Next Observation 184
Exercises 186
Computer Exercises 190

11 Comparing Bayesian and Frequentist Inferences for Mean 193
11.1 Comparing Frequentist and Bayesian Point Estimators 193
11.2 Comparing Confidence and Credible Intervals for Mean 196
11.3 Testing a One-Sided Hypothesis about a Normal Mean 198
11.4 Testing a Two-Sided Hypothesis about a Normal Mean 202
Exercises 206

12 Bayesian Inference for Difference between Means 209
12.1 Independent Random Samples from Two Normal Distributions 210
12.2 Case 1: Equal Variances 210
12.3 Case 2: Unequal Variances 215
12.4 Bayesian Inference for Difference Between Two Proportions Using Normal Approximation 218
12.5 Normal Random Samples from Paired Experiments 220
Exercises 224

13 Bayesian Inference for Simple Linear Regression 235
13.1 Least Squares Regression 236
13.2 Exponential Growth Model 240
13.3 Simple Linear Regression Assumptions 241
13.4 Bayes' Theorem for the Regression Model 244
13.5 Predictive Distribution for Future Observation 248
Exercises 252

14 Robust Bayesian Methods 261
14.1 Effect of Misspecified Prior 262

14.2 Bayes' Theorem with Mixture Priors 263
Exercises 273

A Introduction to Calculus 275

B Use of Statistical Tables 295

C Using the Included Minitab Macros 307

D Using the Included R Functions 317

E Answers to Selected Exercises 329

References 349
