Handbook of Ion Chromatography

Third, Completely Revised
and Enlarged Edition

Volume 1

Table of Contents

Foreword V

Preface XIII

Volume 1

1	Introduction	1
1.1	Historical Perspective	1
1.2	Types of Ion Chromatography	3
1.3	The Ion Chromatographic System	5
1.4	Advantages of Ion Chromatography	7
1.5	Selection of Separation and Detection Systems	9
2	Theory of Chromatography	13
2.1	Chromatographic Terms	13
2.1.1	Asymmetry Factor A_s	14
2.2	Parameters for Assessing the Quality of a Separation	15
2.2.1	Resolution	15
2.2.2	Selectivity	16
2.2.3	Capacity Factor	17
2.3	Column Efficiency	17
2.4	The Concept of Theoretical Plates (Van-Deemter Theory)	19
2.5	Van-Deemter Curves in Ion Chromatography	24
3	Anion Exchange Chromatography (HPIC)	27
3.1	General Remarks	27
3.2	The Ion-Exchange Process	27
3.3	Thermodynamic Aspects	29
3.4	Stationary Phases	34
3.4.1	Polymer-Based Anion Exchangers	35
3.4.1.1	Styrene/Divinylbenzene Copolymers	35
3.4.1.2	Polymethacrylate and Polyvinyl Resins	47

3.4.2	Latex-Agglomerated Anion Exchangers	54
3.4.2.1	Review of Different Latex-Agglomerated Anion Exchangers	57
3.4.3	Silica-Based Anion Exchangers	86
3.4.4	Other Materials for Anion Separations	86
3.4.4.1	Crown Ether and Cryptand Phases	86
3.4.4.2	Alumina Phases	95
3.5	Eluants for Anion Exchange Chromatography	98
3.6	Suppressor Systems in Anion Exchange Chromatography	103
3.6.1	Suppressor Columns	104
3.6.2	Hollow Fiber Suppressors	108
3.6.3	Micromembrane Suppressors	111
3.6.4	Self-Regenerating Suppressors	115
3.6.5	Suppressors with Monolithic Suppression Beds	120
3.7	Anion Exchange Chromatography of Inorganic Anions	121
3.7.1	Overview	121
3.7.2	General Parameters Affecting Retention	123
3.7.3	Experimental Parameters Affecting Retention When Applying Suppressor Systems	123
3.7.3.1	Choice of Eluant	124
3.7.3.2	Eluant Concentration and pH Value	137
3.7.3.3	Influence of Organic Solvents	144
3.7.4	Experimental Parameters Affecting Retention When Applying Direct Conductivity Detection	145
3.7.4.1	Choice of Eluant	145
3.7.4.2	System Peaks	153
3.7.4.3	Eluant Concentration and pH Value	156
3.7.5	Polarizable Anions	159
3.8	Anion Exchange Chromatography of Organic Anions	168
3.8.1	Organic Acids	168
3.8.2	Polyvalent Anions	184
3.9	Gradient Elution Techniques in Anion Exchange Chromatography of Inorganic and Organic Anions	191
3.9.1	Theoretical Aspects	192
3.9.2	Choice of Eluants	194
3.9.3	Possibilities for Optimizing Concentration Gradients	201
3.9.4	Isoconductive Techniques	204
3.10	Carbohydrates	205
3.10.1	Sugar Alcohols	209
3.10.2	Monosaccharides	212
3.10.3	Oligosaccharides	226
3.10.4	Polysaccharides	231
3.10.5	Carbohydrates Derived from Glycoproteins	236

3.10.5.1	Compositional and Structural Analysis	240
3.10.5.2	Chosen Examples	254
3.11	Amino Acids	257
3.12	Proteins	267
3.13	Nucleic Acids	275
4	Cation Exchange Chromatography (HPIC)	279
4.1	Stationary Phases	279
4.1.1	Polymer-Based Cation Exchangers	280
4.1.1.1	Styrene/Divinylbenzene Copolymers	280
4.1.1.2	Ethylvinylbenzene/Divinylbenzene Copolymers	282
4.1.1.3	Polymethacrylate and Polyvinyl Resins	296
4.1.2	Latexed Cation Exchangers	298
4.1.3	Silica-Based Cation Exchangers	303
4.2	Eluants in Cation Exchange Chromatography	308
4.3	Suppressor Systems in Cation Exchange Chromatography	310
4.3.1	Suppressor Columns	310
4.3.2	Hollow Fiber Suppressors	311
4.3.3	Micromembrane Suppressors	312
4.3.4	Self-Regenerating Suppressors	313
4.3.5	Suppressors with Monolithic Suppression Beds	318
4.4	Cation Exchange Chromatography of Alkali Metals, Alkaline-Earth Metals, and Amines	318
4.5	Transition Metal Analysis	325
4.5.1	Basic Theory	326
4.5.2	Transition Metal Analysis with Non-Suppressed Conductivity Detection	330
4.5.3	Transition Metal Analysis with Spectrophotometric Detection	331
4.6	Analysis of Polyamines	344
4.7	Gradient Techniques in Cation Exchange Chromatography of Inorganic and Organic Cations	349
5	Ion-Exclusion chromatography (HPICE)	359
5.1	The Ion-Exclusion Process	359
5.2	Stationary Phases	361
5.3	Eluants in Ion-Exclusion Chromatography	365
5.4	Suppressor Systems in Ion-Exclusion Chromatography	366
5.5	Analysis of Inorganic Acids	368
5.6	Analysis of Organic Acids	372
5.7	HPICE/HPIC-Coupling	375
5.8	Analysis of Alcohols and Aldehydes	379

5.9	Amino Acid Analysis	382
5.9.1	Separation of Amino Acids	384
5.9.2	Post-Column Derivatizations of Amino Acids	389
5.9.3	Sample Preparation	391
6	Ion-Pair Chromatography (MPIC)	393
6.1	Survey of Existing Retention Models	394
6.2	Suppressor Systems in Ion-Pair Chromatography	399
6.3	Experimental Parameters that Affect Retention	400
6.3.1	Type and Concentration of Lipophilic Counter Ions in the Mobile Phase	400
6.3.2	Type and Concentration of the Organic Modifier	403
6.3.3	Inorganic Additives	406
6.3.4	pH Effects and Temperature Influence	408
6.4	Analysis of Surface-Inactive Ions	409
6.5	Analysis of Surface-Active Ions	424
6.6	Applications of the Ion-Suppression Technique	440
6.7	Applications of Multi-Dimensional Ion Chromatography on Multimode Phases	444
7	Detection Methods in Ion Chromatography	461
7.1	Electrochemical Detection Methods	461
7.1.1	Conductivity Detection	461
7.1.1.1	Theoretical Principles	462
7.1.1.2	Application Modes of Conductivity Detection	469
7.1.2	Amperometric Detection	474
7.1.2.1	Fundamental Principles of Voltammetry	475
7.1.2.2	Amperometry	478
7.2	Spectrometric Detection Methods	498
7.2.1	UV/Vis Detection	498
7.2.1.1	Direct UV/Vis Detection	498
7.2.1.2	UV/Vis Detection in Combination with Derivatization Techniques	499
7.2.1.3	Indirect UV Detection	510
7.2.2	Fluorescence Detection	514
7.3	Other Detection Methods	521
7.4	Hyphenated Techniques	522
7.4.1	IC-ICP Coupling	523
7.4.2	IC-MS Coupling	530

Volume 2

8	Quantitative Analysis	549
8.1	General	549
8.2	Analytical Chemical Information Parameters	550
8.3	Determination of Peak Areas	551
8.3.1	Manual Determination of Peak Areas and Peak Heights	552
8.3.2	Electronic Peak Area Determination	554
8.4	Statistical Quantities	557
8.4.1	Mean Value	558
8.4.2	Standard Deviation	558
8.4.3	Scatter and Confidence Interval	559
8.5	Calibration of an Analytical Method (Basic Calibration)	560
8.5.1	Acquisition of the Calibration Function	561
8.5.1.1	Method Characteristic Parameters of a Linear Calibration Function	561
8.5.1.2	Method Parameters of a Calibration Function of 2 nd Degree	564
8.5.2	Testing of the Basic Calibration	565
8.5.3	Testing the Precision	566
8.5.3.1	Homogeneity of Variances	566
8.5.3.2	Outlier Tests	567
8.5.4	Calibration Methods	569
8.5.4.1	Area Normalization	569
8.5.4.2	Internal Standard	570
8.5.4.3	External Standard	571
8.5.4.4	Standard Addition	572
8.6	Detection Criteria, Limit of Detection, Limit of Determination	574
8.6.1	Determination of Detection Criteria, Limit of Detection	574
8.7	The System of Quality Control Cards	578
8.7.1	Types of Quality Control Cards and their Applications	579
9	Applications	587
9.1	Ion Chromatography in Environmental Analysis	588
9.2	Ion Chromatography in Power Plant Chemistry	626
9.2.1	Analysis of Conditioned Waters	634
9.2.2	Cooling Water Analysis	640
9.2.3	Flue Gas Scrubber Solutions	644
9.2.4	Analysis of Chemicals	648
9.3	Ion Chromatography in the Semiconductor Industry	651
9.3.1	High-Purity Water Analysis	652
9.3.2	Surface Contaminations	654
9.3.3	Solvents	658

9.3.4	Acids, Bases, and Etching Agents	664
9.3.5	Other Applications	673
9.4	Ion Chromatography in the Electroplating Industry	678
9.4.1	Analysis of Inorganic Anions	679
9.4.2	Analysis of Metal Complexes	686
9.4.3	Analysis of Organic Acids	688
9.4.4.	Analysis of Inorganic Cations	689
9.4.5	Analysis of Organic Additives	690
9.5	Ion Chromatography in the Detergent and Household Product Industry	697
9.5.1	Detergents	697
9.5.2	Household Products	704
9.6	Ion Chromatography in the Food and Beverage Industry	711
9.6.1	Beverages	713
9.6.2	Dairy Products	733
9.6.3	Meat Processing	739
9.6.4	Baby Food	742
9.6.5	Groceries and Luxuries	746
9.6.6	Sweeteners	752
9.7	Ion Chromatography in the Pharmaceutical Industry	756
9.7.1	Fermentation	772
9.8	Ion Chromatography in Clinical Chemistry	781
9.9	Oligosaccharide Analysis of Membrane Coupled Glycoproteins	797
9.10	Other Applications	803
9.11	Sample Preparation and Matrix Problems	823
