Web Applications

CONCEPTS & REAL WORLD DESIGN

Web Extended: Includes free access to additional chapters and other resources

CONTENTS

PREFACE v

- Web Extended v
- Prerequisites vi
- Chapter Dependencies vi
- Content Overview vi
- Project Thread x
- Supplements xi
- Acknowledgments xi

CHAPTER 1 INTRODUCTION TO WEB APPLICATIONS 1

- 1.1 Brief History and Overview of the Internet 1
 - 1.2 The Layers of the Internet 4
 - The Physical Layer 5
 - The Network Interface Layer 6
 - The Internetwork Layer 7
 - The Transport Layer 9
 - The Application Layer 11
 - 1.3 The World Wide Web 13
 - 1.4 The Domain Name Service 15
 - 1.5 The Uniform Resource Locator 17
 - 1.6 Basic HTTP Transactions 20
 - 1.7 Overview of Web Applications 22
 - 1.8 GET and POST Transactions 25
 - 1.9 Secure Transactions 27
 - 1.10 Server-Side Technologies for Web Applications 28
- Summary of Key Terms and Concepts 30
- Exercises 32
- Project Thread 33

CHAPTER 2 MARKUP ON THE FRONT END 35

- 2.1 What Is Markup? 35
- 2.2 XHTML and the Saga of HTML 41
- 2.3 HTML Lists 43
- 2.4 HTML Tables 47

- 2.5 The State of the Web Address 54
 - 2.6 Cascading Style Sheets 57
 - Text Styles 58
 - Types of Style Classes 60
 - Block Styles 62
 - Pseudo-classes 66
 - Page Layout with CSS 66
 - Page Layout Flow 70
 - Cascading Overview 72
- Summary of Key Terms and Concepts 74
- Exercises 75
- Project Thread 76

CHAPTER 3 PROCESSING ON THE FRONT END 77

- 3.1 HTML Forms 77
 - Control Buttons 77
 - Text Elements 79
 - Option-Creating Elements 80
 - Attribute Summaries 82
 - A Form Submission Example 84
- 3.2 The JavaScript Language 86
 - Statements 88
 - Variables 88
 - Operations 90
 - Shortcut Assignment Operators 91
 - Concatenation (Duality of +) 91
 - Conditionals 93
 - Loops 94
 - Functions 96
 - Objects 98
 - Reading and Writing to Files 98
 - Arrays 99
 - Comments 101
 - Scripts in General 101
 - Debugging Scripts 101
 - Final Language Notes 103
- 3.3 The Browser Object 103

- 3.4 Methods for the Browser Object **106**
- 3.5 Events **107**
- 3.6 The Form Object **111**
- 3.7 Processing Form Elements **117**
 - Processing Text **117**
 - Processing Options **120**
- 3.8 Form Validation Before Submission **125**
 - The Strategy for Validation Before Submission **125**
 - Menu Validation **126**
 - A Larger Validation Example **128**
- 3.9 Text Validation with the `String` Object **131**
- Summary of Key Terms and Concepts **134**
- Exercises **136**
 - Dynamic Content **136**
 - Client-Side Utilities **137**
 - Form Submission and Validation **138**
- Project Thread **140**

CHAPTER 4 INTRODUCTION TO PERL AND CGI PROGRAMMING 141

- 4.1 Executing a Perl Program Locally **141**
- 4.2 Strings and Escape Characters **145**
- 4.3 Scalar Variables **148**
- 4.4 Basic Operations: Numeric and String Contexts **152**
- 4.5 Some Useful Built-in Functions **155**
- 4.6 Standard Input **157**
- 4.7 Formatting Numeric Output **167**
- 4.8 Generating HTML Documents with Perl **160**
- 4.9 Dynamic Output **164**
- Summary of Key Terms and Concepts **168**
- Exercises **169**
 - Non-CGI Programs **169**
 - CGI Programs **170**
- Project Thread **172**

CHAPTER 5 GENERATING HTML DYNAMICALLY 173

- 5.1 Conditional Statements **173**
- 5.2 Loops and Iterative HTML Generation **177**
- 5.3 Arrays **180**
- 5.4 Hashes **188**
- 5.5 Variable Contexts and Name Spaces **193**
- 5.6 Functions **193**

- 5.7 File Operations **200**
- 5.8 External Source Files **211**
- *5.9 Advanced Perl Topics **213**
 - References to Variables **213**
 - Multidimensional Arrays **216**
 - Prototyping Functions **217**
 - Typeglobs **218**
- Summary of Key Terms and Concepts **219**
- Exercises **220**
- Project Thread **223**

CHAPTER 6 PROCESSING FORMS 227

- 6.1 CGI Environment Variables **227**
- 6.2 Query Strings **231**
- 6.3 The GET Method of Form Submission: Decoding the Query String **236**
- 6.4 The POST Method of Form Submission **240**
- 6.5 GET vs. POST **243**
- 6.6 Dynamic Web Applications **246**
- 6.7 Understanding Errors in the Client-Server Environment **253**
 - Diagnostic Example 1 **253**
 - Diagnostic Example 2 **254**
 - Diagnostic Example 3 **255**
- 6.8 Processing Checkboxes and Radio Buttons **257**
- 6.9 Processing Menus **263**
- 6.10 Processing Text Areas **270**
- Summary of Key Terms and Concepts **275**
- Exercises **277**
- Project Thread **279**

CHAPTER 7 MAINTAINING STATE IN WEB APPLICATIONS 281

- 7.1 State in Web Applications **281**
- 7.2 Hidden Form Elements for Application Logic and State **282**
- 7.3 Session State **288**
- 7.4 Temporary State Files **295**
- 7.5 State File Caching **305**
- 7.6 Password Protection **309**
- 7.7 An Example Using Logged-On State **317**
- 7.8 General State and Security Issues **325**
 - Security Issues **325**
 - Validation Certificates **326**

- Different Levels of Access Privileges **327**
- Anonymous State vs. Logged-On State **329**
- Timeouts for Sessions **330**
- Limiting Logon Attempts **333**
- *7.9 Encrypted Password Files **333**
- Summary of Key Terms and Concepts **336**
- Exercises **338**
- Project Thread **340**
-
- CHAPTER 8 COOKIES 343**
- 8.1 What Are Cookies? **343**
- 8.2 Setting and Reading Cookies **347**
- 8.3 Cookies vs. Data Embedded in Web Pages **350**
- 8.4 Persistent Cookies for Site Preferences **351**
- 8.5 Third-Party Cookies **357**
- Ad Servers **359**
- Mass Marketing and Consumer Tracking on the Web **360**
- Web Beacons **361**
- Summary of Key Terms and Concepts **362**
- Exercises **364**
- Project Thread **365**
-
- CHAPTER 9 PERL MODULES AND E-MAIL UTILITIES 367**
- 9.1 Perl Modules and Object Oriented Syntax **367**
- Loading Modules **368**
- Object-Oriented Syntax **368**
- 9.2 The CGI.pm Module **369**
- Incoming Form Data **370**
- Printing Form Elements **371**
- Tools for State-Data **372**
- CGI::SecureState **373**
- Tools for Cookies **376**
- 9.3 E-mail in Web Applications **377**
- The Mail::Sendmail Module **379**
- *9.4 E-mail via an External Program **384**
- Summary of Key Terms and Concepts **387**
- Exercises **388**
- Project Thread **390**
-
- CHAPTER 10 THE DATA TIER 391**
- 10.1 Tables and Relational Data **391**
- 10.2 Structured Text Files **392**
- 10.3 The Three-Tier Model for Web Applications **394**
- 10.4 Back-End Database Support **396**
- 10.5 SQL Primer **400**
- SQL: Creating a Table **400**
- SQL: Inserting Records **401**
- SQL: Quoting Data **401**
- SQL: Selecting Records and Subtables **402**
- SQL: Updating Data **403**
- SQL: Deleting Records **403**
- 10.6 Database Interface in Perl **404**
- DBI Objects **405**
- Connecting to the Database: The Database Handle **405**
- Issuing SQL Statements: The Query Object **406**
- Creating a New Database: The Driver Object **408**
- 10.7 State Tables **409**
- 10.8 Database-Driven Web Applications **413**
- *10.9 CSV: A Perl Database Emulator **417**
- *10.10 Perl ODBC Interface and MS Access **419**
- Creating a DSN **419**
- Connecting to a DSN Using the Perl DBD-ODBC Driver **421**
- Summary of Key Terms and Concepts **422**
- Exercises **423**
- Project Thread **426**
-
- CHAPTER 11 REGULAR EXPRESSIONS AND MATCHING 427**
- 11.1 The Binding and Matching Operators **427**
- 11.2 Regular Expressions **430**
- Metacharacters **430**
- Normal Characters **430**
- Escaped Characters **431**
- Escape Sequences That Stand for One Character **431**
- Escape Sequences That Stand for a Class of Characters **431**
- Wildcard **431**
- Escape Sequences That Match Locations **432**
- Character Classes **433**
- Alternatives **433**
- Grouping and Capturing **433**
- Other Special Variables **434**

- Quantifiers **435**
- Quantifiers Are Greedy by Default **437**
- Case-Insensitive Matching **437**
- *Back References **438**
- 11.3 Patterns in List Context **438**
- 11.4 Analyzing Log Files **441**
- 11.5 The Substitution and Transliteration Operators **443**
- 11.6 Partial Content Rendering **446**
- 11.7 Query String Decoding Revealed **452**
 - URL-Encoding Explained **454**
 - Some Security Remarks **454**
- Summary of Key Terms and Concepts **456**
- Exercises **458**
 - Pattern Practice **458**
 - Programming Exercises **458**
- Project Thread **461**

CHAPTER 12 SEARCHING IN WEB APPLICATIONS **463**

- 12.1 Database Searches **463**
- 12.2 Refining Database Searches **467**
 - LIKE and RLIKE Database Queries **468**
 - Whole-Word Searches **469**
 - Further Refinement Possibilities **472**
- 12.3 Secondary Processing of Database Searches **473**
- 12.4 Limiting the Number of Search Results **476**
- 12.5 Scanning Directories **480**
- 12.6 File and Directory Testing **483**
- 12.7 Recursive Web Site Searches **485**
- 12.8 Embedding Web Searches in Your Pages **490**
- *12.9 Regular Expression Database Searches Without RLIKE **493**
- Summary of Key Terms and Concepts **494**
- Exercises **495**
- Project Thread **497**

CHAPTER 13 A COMPLETE EXAMPLE AND SECURITY SUMMARY **499**

- 13.1 Designing the Functionality of an Online Store **499**
- 13.2 Designing the Application's Data Tier **501**
- 13.3 Building the Application **505**

- Logging On **507**
- The Search **512**
- Product Detail **520**
- The Shopping Cart **522**
- Checking Out **528**
- 13.4 Incorporating an Auxiliary Signup Utility **536**
- 13.5 Inventory Administration **539**
- 13.6 Web Application Security **541**
 - Verification of Logged-On State **542**
 - A Patch for the Decoding Routine **542**
 - Purifying File Names **543**
 - Using the system Statement **544**
 - The eval Statement and Backquotes **544**
 - Risks in Pattern Matching **544**
 - URL-Encoding for State Data **545**
 - A Note on Long Session IDs **546**
 - Web Applications That Send E-mails **546**
 - Web Applications That Save Any Data on the Server **546**
 - SQL Statements **546**
- Summary of Key Terms and Concepts **547**
- Exercises **548**
- Project Thread **549**

APPENDIX A HTML BASICS **751**

- A.1 HTML Language and Document Structure **751**
- A.2 Creating and Viewing a Page **752**
- A.3 Inline and Block Elements **754**
- A.4 HTML Attributes **756**
- A.5 Hyperlinks **761**
- A.6 Graphics **765**
- A.7 The body and head Elements **767**
- A.8 Frames **770**
- A.9 Deprecated Elements and Attributes **775**
 - Deprecated Elements **775**
 - Deprecated Attributes **776**
- A.10 Logical Elements **777**

APPENDIX B JAVASCRIPT REFERENCE **779**

- B.1 Core Objects/Functions/Literals **779**
- B.2 Browser Objects (DOM Level 0) **781**
- B.3 Style Properties in HTML DOM **785**
- B.4 Reserved Words in JavaScript **786**

APPENDIX C FILE PERMISSIONS 787

- C.1 UNIX Systems **787**
- C.2 Windows Systems **788**
- C.3 Using FTP to Set Permissions **789**

INDEX 805**THE WEB EXTENSIONS ARE LISTED BELOW****CHAPTER 14 ALTERNATIVE WEB PROGRAMMING: PHP (WEB EXTENSION) 551**

- 14.1 Hypertext Preprocessors **551**
- 14.2 Introduction to PHP **553**
 - PHP Scripts **553**
 - PHP Statements **555**
 - Printed Output **555**
 - Comments **555**
 - Variables **555**
 - Operators **556**
 - Constants **556**
 - Control Structures **556**
 - Arrays and Associative Arrays **556**
 - Error Messages and Warnings **558**
 - Configuring with `php.ini` **560**
- 14.3 Functions, File Operations, and Pattern Matching **561**
 - Defining a Function **561**
 - Variable Scope in Functions **562**
 - Reference Parameters **562**
 - Including Auxiliary Files **563**
 - Reading and Writing Files **564**
 - File Testing **565**
 - Reading Directories **566**
 - Regular Expressions **566**
- 14.4 Environment Variables, Form Data, and E-mail **567**
 - Environment Variables and Form Data **567**
 - E-mail **569**
 - An Example **570**

- 14.5 Session Variables and Cookies **574**
 - PHP Sessions **574**
 - An Example **576**
 - Cookies **578**
- 14.6 Database Interface **581**
- 14.7 A Database-Driven PHP Application **583**
- Summary of Key Terms and Concepts **586**
- Exercises **588**
- Project Thread **588**

CHAPTER 15 ALTERNATIVE WEB PROGRAMMING: ASP (WEB EXTENSION) 589

- 15.1 Hypertext Preprocessors **589**
- 15.2 Introduction to ASP **589**
 - ASP Scripts **589**
 - ASP Statements **591**
 - Printed Output **591**
 - Comments **592**
 - Variables **592**
 - Operators **592**
 - Constants **593**
 - Control Structures **593**
 - Arrays **594**
 - Collections **594**
 - Error Messages **596**
- 15.3 Functions, File Operations, and Pattern Matching **597**
 - Defining Functions and Subroutines **597**
 - Variable Scope in Functions **600**
 - Reference Parameters **600**
 - Including Auxiliary Files **600**
 - Objects for File Operations **600**
 - File Operations **600**
 - File Testing **602**
 - Reading Directories **603**
 - Regular Expressions **603**
- 15.4 Environment Variables, Form Data, and E-mail **604**
 - Environment Variables and Form Data **605**
 - E-mail **605**
 - An Example **606**
- 15.5 Session Variables and Cookies **610**
 - ASP Sessions **610**
 - An Example **611**
 - Cookies **613**

- 15.6 Database Interface **615**
 - 15.7 A Database-Driven ASP Application **616**
 - 15.8 Overview of ASP.NET **618**
 - HTML Server Controls **619**
 - Web Server Controls **620**
 - Custom Controls **621**
 - Validation Controls **621**
 - Global.asax Configuration File **621**
 - Caching services **622**
 - Summary of Key Terms and Concepts **622**
 - Exercises **624**
 - Project Thread **625**
-
- CHAPTER 16 INTRODUCTION TO XML (WEB EXTENSION) 627**
-
- 16.1 Well-Formed XML **627**
 - Rules for Elements **628**
 - Rules for Attributes **628**
 - Rules for the Data **628**
 - Differences Between XML and XHTML **629**
 - PCDATA and CDATA **631**
 - Whitespace Characters in PCDATA **632**
 - The XML Declaration **633**
 - Processing Instructions **633**
 - Comments **633**
 - Attributes vs. Elements **634**
 - 16.2 Validated XML **635**
 - Document Type Definitions (DTDs) **635**
 - Document Type Declarations **636**
 - XHTML DTDs **637**
 - Validating Parsers **639**
 - XML Schemas **639**
 - 16.3 XML Namespaces **640**
 - Uniform Resource Identifiers **641**
 - Default Namespaces **642**
 - Qualified Names **643**
 - Namespace Prefixes **644**
 - Overriding Default Namespaces **646**
 - Qualifying Attributes **647**
 - Ill-Formed Namespace Use **647**
 - 16.4 The Document Object Model **648**
 - DOM Nodes, Properties, and Methods **648**
 - Fundamental Node Types **649**
 - Node **650**
 - Document Node **650**
 - Element Node **650**
 - Attribute Node **651**
 - Text Node **651**
 - NodeList Node **651**
 - NamedNodeMap Node **651**
 - 16.5 DOM2 Additions **652**
 - 16.6 DOM in the Browser **652**
 - Scripting the DOM in Netscape 6 **653**
 - Scripting the DOM in Internet Explorer 5+ **654**
 - The Browser Sniff **655**
 - Full DOM Reference **655**
 - Tree-Traversing Methods and Iteration in the DOM **658**
 - Recursive Traversal of the DOM **661**
 - 16.7 DOM on the Server **665**
 - Using XML::DOM in Perl **666**
 - Extracting Data Using the DOM **666**
 - Creating XML from Raw Data **668**
 - Summary of Key Terms and Concepts **673**
 - Exercises **675**
 - Project Thread **676**
-
- CHAPTER 17 XML IN WEB APPLICATIONS (WEB EXTENSION) 677**
-
- 17.1 XML for Mobile Data **677**
 - 17.2 XML and CSS **678**
 - 17.3 XPath Basics **680**
 - 17.4 XSLT **682**
 - XSLT Stylesheets **682**
 - The XSLT value-of Element **683**
 - The XSLT for-each Element **685**
 - The XSLT sort Element **686**
 - The XSLT strip-space Element **688**
 - The XSLT if Element **689**
 - The XSLT choose Element **689**
 - Putting It All Together **690**
 - 17.5 XSLT in Web Applications **692**
 - 17.6 Other Uses for XML **699**
 - Summary of Key Terms and Concepts **702**
 - Exercises **703**
 - Project Thread **705**

**CHAPTER 18 JAVASCRIPT IN WEB APPLICATIONS
(WEB EXTENSION) 707**

- 18.1 Returning JavaScript from CGI Programs **707**
- 18.2 Regular Expressions in JavaScript **710**
- 18.3 Working with Browser Windows **716**
 - Targeting CGI Output to Frames **717**
 - Targeting CGI Output to New Windows **717**
- 18.4 Advanced Window Topics **723**
 - Sharing Data Among Windows **723**
 - Overwriting Documents in Secondary Windows **727**
- 18.5 Generating JavaScript Dynamically in CGI Programs **729**
 - Initializing JavaScript Variables with Perl Variables **730**
 - JavaScript Loop Conditions Determined by Perl Variables **733**

Summary of Key Terms and Concepts **738**

Exercises **739**

**CHAPTER 19 DHTML OVERVIEW (WEB
EXTENSION) 741**

- 19.1 The Evolution of JavaScript **741**
 - Netscape 2 **741**
 - Netscape 3 and Internet Explorer 3 **741**
 - Netscape 4 and Explorer 4 **742**
 - The Standardization of DHTML **742**
 - "Modern" Browsers **743**
 - 19.2 DHTML in a Nutshell **743**
 - 19.3 The Future of DHTML **749**
- Summary of Key Terms and Concepts **750**
- Exercises **750**

**APPENDIX D INSTALLING PERL AND PERL
MODULES (WEB EXTENSION) 791**

- D.1 Installing Perl on UNIX/Linux Systems **791**
- D.2 Installing Perl on Windows Systems **792**
 - Web Server Software **792**
 - Installing Active State Perl on Windows **792**
- D.3 Installing MacPerl on Mac OS 9 **795**
- D.4 Easy Installation of Perl Modules on Windows and UNIX/Linux **795**
- D.5 Manual Installation of Perl Modules on Windows and UNIX/Linux **796**
- D.6 Perl Modules Used or Mentioned in This Book **798**

**APPENDIX E INSTALLING PHP (WEB
EXTENSION) 799**

- E.1 UNIX/Linux **799**
- E.2 Windows **799**
- E.3 PHP Configuration File `php.ini` **799**

**APPENDIX F INSTALLING ASP (WEB
EXTENSION) 801**

- F.1 Windows **801**
- F.2 UNIX/Linux **801**

**APPENDIX G INSTALLING MYSQL (WEB
EXTENSION) 803**

- G.1 Windows **803**
- G.2 Red Hat Linux **803**
- G.3 UNIX **803**
