

INTERNATIONAL EDITION

Environmental and
Natural Resource Economics

SIXTH EDITION

Tom Tietenberg

PREFACE XXI

CHAPTER 1 Visions of the Future 1

Introduction 1

The Self-Extinction Premise 1

The Use of Models 3

Thinking about the Future 3

Example 1.1 The Dangers of Prognostication 4

The Basic Pessimist Model 4

Conclusions of the Pessimist Model 5

The Nature of the Model 6

The Basic Optimist Model 8

Conclusions of the Optimist Model 8

The Nature of the Model 8

The Road Ahead 10

The Issues 10

An Overview of the Book 11

Summary 13

Further Reading 14

Additional References 14

Discussion Questions 15

CHAPTER 2 Valuing the Environment: Concepts 16

Introduction 16

The Human Environment Relationship 17

The Environment as an Asset 17

The Economic Approach 19

Normative Criteria for Decision-Making 19

Evaluating Predefined Options 19

Example 2.1 Nature Knows Best 21

Finding the Optimal Outcome 25

Static Efficiency 26

Dynamic Efficiency 28

Applying the Concepts 28

Pollution Control 28

Example 2.2 Does Reducing Pollution Make Economic Sense? 29

Preservation versus Development 30

Summary 30*Example 2.3 Choosing Between Preservation and Development in Australia* 31

Further Reading 32

Additional References 32

Discussion Question 32

Problem 32

Appendix 33

The Simple Mathematics of Dynamic Efficiency 33

**CHAPTER 3 Valuing the Environment:
Methods 34****Introduction 34****Valuing Benefits 35**

Types of Values 37

Example 3.1 Valuing the Northern Spotted Owl 38

Classifying Valuation Methods 38

Valuing Human Life 42*Example 3.2 Valuing Damage From Groundwater Contamination Using Averting Expenditures* 43*Example 3.3 Valuing Diesel Odor Reduction by Contingent Ranking* 44

Issues in Benefit Estimation 44

Primary versus Secondary Effects 44*Example 3.4 The Value of Wildlife Viewing* 45*Tangible versus Intangible Benefits* 47

Approaches to Cost Estimation 47

The Survey Approach 47*The Engineering Approach* 47*The Combined Approach* 48

The Treatment of Risk 48

Choosing the Discount Rate 50

Example 3.5 The Importance of the Discount Rate 51

A Critical Appraisal 52

Cost-Effectiveness Analysis 54**Impact Analysis 55***Example 3.6 NO₂ Control in Chicago: An Example of Cost-Effectiveness Analysis* 56

Summary	57
Further Reading	58
Additional References	59
Discussion Questions	60
Problems	60

CHAPTER 4 Property Rights, Externalities, and Environmental Problems 61

Introduction 61

Property Rights 62

Property Rights and Efficient Market Allocations 62

Efficient Property Right Structures 62

Example 4.1 Pollution in Centrally Planned Economies 63

Producer's Surplus, Scarcity Rent, and Long-Run Competitive Equilibrium 65

Externalities as a Source of Market Failure 67

The Concept Introduced 67

Types of Externalities 68

Example 4.2 Shrimp Farming Externalities in Thailand 69

Improperly Designed Property Rights Systems 70

Other Property Rights Regimes 70

Public Goods 72

Example 4.3 Public Goods Privately Provided: The Nature Conservancy 75

Imperfect Market Structures 76

Divergence of Social and Private Discount Rates 77

Government Failure 78

Example 4.4 Religion as the Source of Environmental Problems 79

The Pursuit of Efficiency 79

Private Resolution through Negotiation 79

The Courts: Property Rules and Liability Rules 81

Legislative and Executive Regulation 83

An Efficient Role for Government 83

Summary 84

 Further Reading 84

 Additional References 85

 Discussion Questions 86

 Problems 86

CHAPTER 5 Sustainable Development: Defining the Concept 88

Introduction 88

A Two-Period Model 89

Defining Intertemporal Fairness 93

Are Efficient Allocations Fair? 94

Applying the Sustainability Criterion 95

Implications for Environmental Policy 97

*Example 5.1 Nauru: Weak Sustainability in the
Extreme 97*

Summary 98

Further Reading 99

Additional References 100

Discussion Questions 100

Problems 100

Appendix 101

The Mathematics of the Two-Period Model 101

CHAPTER 6 The Population Problem 102

Introduction 102

Historical Perspective 103

World Population Growth 103

Population Growth in the United States 104

Effects of Population Growth on Economic
Development 105

Effects of Economic Development on Population
Growth 112

The Economic Approach to Population Control 113

Example 6.1 The Value of an Averted Birth 115

*Example 6.2 Fertility Decline in Korea: A Case
Study 119*

*Example 6.3 Achieving Fertility Declines in Low Income
Countries: The Case of Kerala 121*

*Example 6.4 Income-Generating Activities as Fertility
Control: Bangladesh 123*

Summary 122

Further Reading 124

Additional References 124

Discussion Questions 126

Problems 126

CHAPTER 7 The Allocation of Depletable and Renewable Resources: An Overview 127

Introduction 127

A Resource Taxonomy 128

Example 7.1 The Pitfalls in Misusing Reserve Data 131

Efficient Intertemporal Allocations 133

The Two-Period Model Revisited 133

The N-Period Constant-Cost Case 134

Transition to a Renewable Substitute 134

Increasing Marginal Extraction Cost 138

Exploration and Technological Progress 139

Market Allocations 140

Appropriate Property Right Structures 140

Example 7.2 Technological Progress in the Iron Ore Industry 141

Environmental Costs 142

Summary 144

Further Reading 145

Additional References 145

Problems 145

Appendix 146

Extensions of the Basic Depletable Resource Model 146

The N-Period, Constant-Cost, No-Substitute Case 146

Constant Marginal Cost with an Abundant Renewable Substitute 147

Increasing Marginal Cost Case 149

Including Environmental Cost 150

CHAPTER 8 Depletable, Nonrecyclable Energy Resources: Oil, Gas, Coal, and Uranium 151

Introduction 151

Natural Gas: Price Controls 152

Example 8.1 Price Controls and Substitution Bias 156

Oil: The Cartel Problem 158

Example 8.2 Optimal OPEC Pricing 159

Price Elasticity of Demand 160

Income Elasticity of Demand 160

Example 8.3 Are Soft Energy Paths Doomed? 161

Non-OPEC Suppliers 162

Compatibility of Member Interests 163

Oil: National Security Problem 165

Transition Fuels: Environmental Problems 168

Electricity 173

The Long Run 175

Example 8.4 Electricity Deregulation in California: What Happened? 176

Summary 179

Further Reading 180

Additional References 180

Discussion Questions 182

Problems 182

CHAPTER 9 Recyclable Resources: Minerals, Paper, Glass, Etc. 183

Introduction 183

An Efficient Allocation of Recyclable Resources 184

Extraction and Disposal Cost 184

Example 9.1 Population Density and Recycling: The Japanese Experience 185

Recycling: A Closer Look 186

Recycling and Virgin Ore Depletion 186

Example 9.2 Lead Recycling 187

The Strategic-Material Problem Revisited 188

General Principles 188

Government Response 188

Cobalt: A Case Study 189

Substitution and Vulnerability 189

Waste Disposal and Pollution Damage 191

Disposal Cost and Efficiency 191

The Disposal Decision 191

Disposal Costs and the Scrap Market 193

Public Policies 194

Example 9.3 Pricing Trash in Marietta, Georgia 196

Pollution Damage 198

Example 9.4 Implementing the "Take-Back" Principle 199

Tax Treatment of Minerals 201

Product Durability 202

Functional Obsolescence 202

Fashion Obsolescence 202

Durability Obsolescence 203

Summary 205

Further Reading 206

Additional References	207
Discussion Questions	208
Problems	208

CHAPTER 10 Replenishable but Depletable Resources: Water 209

Introduction	209
The Potential for Water Scarcity	210
The Efficient Allocation of Scarce Water	212
Surface Water	212
Groundwater	213
The Current Allocation System	215
Riparian and Prior Appropriation Doctrines	215
Sources of Inefficiency	216
<i>Restrictions on Transfers</i>	216
<i>Federal Reclamation Projects</i>	218
<i>Water Pricing</i>	218
<i>Common Property Problems</i>	219
Potential Remedies	219
<i>Example 10.1 Using Economic Principles to Conserve Water in California</i>	221
<i>Example 10.2 Protecting Instream Uses through Acquiring Water Rights</i>	222
<i>Example 10.3 Water Pricing in Zurich, Switzerland</i>	223
Summary	226
<i>Example 10.4 Politics and the Pricing of Scarce Water</i>	227
Further Reading	228
Additional References	228
Discussion Questions	229
Problems	230

CHAPTER 11 Reproducible Private-Property Resources: Agriculture 231

Introduction	231
Global Scarcity	232
Formulating the Global Scarcity Hypothesis	233
Testing the Hypothesis	235
Outlook for the Future	235
<i>Technological Progress</i>	236
<i>Allocation of Agricultural Land</i>	236
<i>Energy Costs</i>	237
<i>Environmental Costs</i>	237

The Role of Agricultural Policies 239**A Summing Up 240****Distribution of Food Resources 240**

Defining the Problem 240

Domestic Production in LDCs 241

The Undervaluation Bias 243

*Example 11.1 The Price Responsiveness of Supply:
Thailand 244*

Feeding the Poor 245

*Example 11.2 Perverse Government Intervention:
The Case of Colombia 245***Feast and Famine Cycles 247****Summary 250**

Further Reading 251

Additional References 251

Discussion Questions 253

Problems 253

**CHAPTER 12 Storable, Renewable Resources:
Forests 254****Introduction 254****Defining Efficient Management 256**

Special Attributes of the Timber Resource 256

The Biological Dimension 256

The Economics of Forest Harvesting 257

Extending the Basic Model 261

Sources of Inefficiency 263

Global Inefficiencies 263

*Biodiversity 263**Global Warming 263*

Poverty and Debt 264

Perverse Incentives 265

*Example 12.1 Externalities in Forest Management:
Waldsterben 267***Implementing Efficient Management 268***Example 12.2 Providing Sustainable Forestry Through
Certification 271**Debt-Nature Swaps 271**Extractive Reserves 272**Establishing Conservation Easements 272**Example 12.3 Success Stories in Conserving Tropical
Forests 273*

Royalty Payments 273

*Example 12.4 Does Pharmaceutical Demand Offer
Sufficient Protection to Biodiversity? 274*

Example 12.5 Trust Funds for Habitat Preservation 275

Summary 276

Further Reading 277
 Additional References 277
 Discussion Questions 278
 Problems 279

Appendix 279

The Harvesting Decision: Forests 279

CHAPTER 13 **Renewable Common-Property Resources: Fisheries and Other Species** 281

Introduction 281

Efficient Allocation 281

The Biological Dimension 283
 Static Efficient Sustainable Yield 284
 Dynamic Efficient Sustainable Yield 286

Appropriability and Market Solutions 288

Example 13.1 Property Rights and Fisheries: Oysters 290
Example 13.2 Free-Access Harvesting of the Minke Whale 292
Example 13.3 Harbor Gangs of Maine 293

Public Policy Toward Fisheries 293

Aquaculture 293
 Raising the Real Cost of Fishing 295
 Taxes 297
 Individual Transferable Quotas (ITQs) 297
Example 13.4 Efficient Versus Market Exploitation of Lobsters 298
 The 200-Mile Limit 302
 The Economics of Enforcement 302
Example 13.5 The Relative Effectiveness of Transferable Quotas and Traditional Size and Effort Restrictions in the Atlantic Sea Scallop Fishery 303
 Extension to Other Species 304
Example 13.6 Local Approaches to Wildlife Protection: Zimbabwe 305

Summary 306

Further Reading 306
 Additional References 307
 Discussion Questions 308
 Problems 309

Appendix 309

The Harvesting Decision: Fisheries 309

CHAPTER 14 Generalized Resource Scarcity 312**Introduction 312****Factors Mitigating Resource Scarcity 313**

- Exploration and Discovery 313
- Technological Progress 314
- Substitution 314

Detecting Resource Scarcity 316

Example 14.1 Resource Scarcity in Historical Perspective: Timber 316

Criteria for an Ideal Scarcity Indicator 317

Applying the Criteria 317

The Physical Indicators 317

Resource Prices 318

Scarcity Rent 319

Marginal Discovery Cost 320

Marginal Extraction Cost 320

Evidence on Resource Scarcity 321

Physical Indicators 321

Economic Indicators 327

Extraction Cost 327

Example 14.2 Geochemically Scarce Metals: How Would the Economy React? 328

Studies of Resource Price Trends 330

Example 14.3 The Bet 331

Discovery Cost 332

Juxtaposing Alternative Measures 332

Summary 333

Further Reading 333

Additional References 334

CHAPTER 15 Economics of Pollution Control: An Overview 336**Introduction 336****Pollutant Taxonomy 337****Defining the Efficient Allocation of Pollution 338**

Stock Pollutants 338

Fund Pollutants 340

Market Allocations of Pollution 342**Efficient Policy Responses 343**

Example 15.1 Environmental Taxation in China 344

Cost-Effective Policies for Uniformly Mixed Fund Pollutants 345

- Defining A Cost-Effective Allocation 345
- Cost-Effective Pollution Control Policies 346
- Emission Standards 347
- Emission Charges 347
- Transferable Emission Permits 350

Cost-Effective Policies for Nonuniformly Mixed Surface Pollutants 351

- The Single-Receptor Case 351
- Policy Approaches* 354
- The Many-Receptors Case 356

Other Policy Dimensions 357

- Example 15.2 Energy-Demand Uncertainty and the Cost of Being Wrong: Permits Versus Charges* 359

Summary 359

- Further Reading 361
- Additional References 361
- Discussion Questions 362
- Problems 362

Appendix 363

- The Simple Mathematics of Cost-Effective Pollution Control 363
- Policy Instruments 364

CHAPTER 16 Stationary-Source Local Air Pollution 365

Introduction 365

Conventional Pollutants 366

- The Command-and-Control Policy Framework 366
- The Efficiency of the Command-and-Control Approach 370
- The Threshold Concept* 370
- The Level of the Ambient Standard* 370
- Example 16.1 The Particulate and Smog Ambient Standards Controversy* 371
- Uniformity* 372
- Timing of Emission Flows* 372
- Concentration versus Exposure* 372
- Cost-Effectiveness of the Command-and-Control Approach 373
- Air Quality 375

Innovative Approaches 376

- The Emissions Trading Program* 376
- The Emission Reduction Credit* 376
- The Offset Policy* 376

<i>The Bubble Policy</i>	377
<i>Netting</i>	377
<i>Banking</i>	377
<i>The Effectiveness of Emissions Trading</i>	377
<i>Example 16.2 The Bubble and Offset Policies in Action</i>	378
Smog Trading	380
Emission Charges	381
Hazardous Pollutants	383
Summary	385
<i>Example 16.3 Efficient Regulation of Hazardous Pollutants: The Benzene Case</i>	386
Further Reading	387
Additional References	387
Discussion Questions	389
Problems	389

CHAPTER 17 **Regional and Global Air Pollutants: Acid Rain and Atmospheric Modification** 390

Introduction 390

Regional Pollutants 391

Acid Rain 391

Example 17.1 Adirondack Acidification 393

Example 17.2 The Sulfur Allowance Program 398

Example 17.3 Why and How do Environmentalists Buy Pollution? 399

Global Pollutants 400

Ozone Depletion 400

Global Warming 404

Example 17.4 Tradable Permits for Ozone-Depleting Chemicals 405

Example 17.5 Ethics, Risk Aversion, and the Greenhouse Effect 407

Summary 412

Further Reading 414

Additional References 414

Problems 416

CHAPTER 18 **Mobile-Source Air Pollution** 417

Introduction 417

Economies of Mobile-Source Pollution 419

Implicit Subsidies 419

Externalities 419

Consequences 421

Policy Toward Mobile Sources 422

- History 422
- Structure of the U.S. Approach 422
 - Certification Program* 423
 - Associated Enforcement Programs* 423
 - Lead* 424
 - Local Responsibilities* 425
- Example 18.1 Project XL—The Quest for Effective, Flexible Regulation* 425
- Alternative Fuels and Vehicles 425
- European Approaches 426

An Economic and Political Assessment 426

- Example 18.2 Car Sharing: Better Use of Automotive Capital?* 427
- Technology Forcing and Sanctions 428
- Differentiated Regulation 428
- Uniformity of Control 429
- Example 18.3 Setting the National Automobile Emissions Standards* 430
- The Deterioration of New-Car Emission Rates 431
 - Inspection and Maintenance Programs* 431
 - Other Local Strategies* 431
- Lead Phaseout Program 433
- Alternative Fuels 433
- Example 18.4 Getting the Lead Out: The Lead Phaseout Program* 434
- Air Quality 434
 - Ozone* 434
 - Carbon Monoxide* 435
 - Lead* 435

Possible Reforms 435

- Example 18.5 Innovative Mobile-Source Pollution Control Strategies: Singapore and Hong Kong* 437

Summary 438

- Example 18.6 Counterproductive Policy Design* 439
- Further Reading 440
- Additional References 441
- Discussion Questions 442

CHAPTER 19 Water Pollution 443**Introduction 443****Nature of Water Pollution Problems 444**

- Types of Waste-Receiving Water 444
- Sources of Contamination 444
 - Rivers and Lakes* 445
- Example 19.1 Incidents of Groundwater Pollution* 445
 - Ocean Pollution* 446

Types of Pollutants	446
<i>Fund Pollutants</i>	447
<i>Stock Pollutants</i>	448
Traditional Water Pollution Control Policy	449
Early Legislation	449
Subsequent Legislation	450
<i>Point Sources</i>	450
<i>Nonpoint Sources</i>	451
The Safe Drinking Water Act	452
Ocean Pollution	452
<i>Oil Spills</i>	452
<i>Ocean Dumping</i>	453
Citizen Suits	453
Efficiency and Cost-Effectiveness	453
Ambient Standards and the Zero-Discharge Goal	453
National Effluent Standards	454
<i>Enforcement Problems</i>	455
<i>Allocating Control Responsibility</i>	455
<i>The European Experience</i>	458
Municipal Waster Treatment Subsidies	459
<i>The Allocation of Funds</i>	459
<i>Example 19.2 Marketable Emission Permits on the Fox River</i>	460
<i>Operation and Maintenance</i>	460
<i>Capital of Costs</i>	461
Pretreatment Standards	461
Nonpoint Pollution	461
<i>Costs</i>	461
<i>Example 19.3 Cost-Effective Pretreatment Standards</i>	462
Oil Spills	463
<i>Example 19.4 Anatomy of an Oil Spill Suit: Amoco Cadiz</i>	464
<i>Citizen Suits</i>	465
An Overall Assessment	466
Summary	467
Further Reading	468
Additional References	469
Discussion Questions	471
Problem	471

CHAPTER 20 Toxic Substances 472

Introduction	472
Nature of Toxic Substance Pollution	473
Health Effects	474
<i>Cancer</i>	474
<i>Reproductive Effects</i>	474
Policy Issues	475
<i>Number of Substances</i>	475

<i>Latency</i>	476
<i>Uncertainty</i>	476
Market Allocations and Toxic Substances	477
Occupational Hazard	477
<i>Example 20.1 Susceptible Populations in the Hazardous Workplace</i>	480
Product Safety	480
Third Parties	481
Current Policy	482
Common Law	482
<i>Example 20.2 Judicial Remedies in Toxic Substance Control: The Kepone Case</i>	483
<i>Negligence</i>	483
<i>Strict Liability</i>	484
Criminal Law	484
Statutory Law	485
<i>Federal Food, Drug, and Cosmetic Act</i>	485
<i>Occupational Safety and Health Act</i>	486
<i>Federal Environmental Pesticide Control Act</i>	486
<i>Resource Conservation and Recovery Act</i>	487
<i>Toxic Substances Control Act</i>	487
<i>Comprehensive Environmental Response, Compensation, and Liability Act</i>	487
International Agreements	488
An Assessment of the Legal Remedies	489
The Common Law	489
<i>Judicial-Legislative Complementarity</i>	489
<i>Limitations of Judicial Remedies</i>	490
<i>Joint and Several Liability Doctrine</i>	492
The Statutory Law	493
<i>Balancing the Costs</i>	493
<i>Example 20.3 Weighing the Risks: Saccharin</i>	494
<i>Degree and Form of Intervention</i>	495
<i>Scale</i>	496
Performance Bonds: An Innovative Proposal	496
<i>Example 20.4 Performance Bonds for Brominated Flame Retardants</i>	497
Summary	497
Further Reading	498
Additional References	499
Discussion Questions	500

CHAPTER 21 Environmental Justice 501

Introduction	501
The Incidence of Hazardous Waste Siting Decisions	502
History	502
The Economics of Site Location	503

The Policy Response 504

The Incidence of Pollution Control Costs: Individual Industries 505

A Competitive Industry 505

Incidence 505

Scale Effects 507

New-Source Bias 508

Example 21.1 The Effects of Environmental Controls on the Tissue Industry 509

Monopoly 510

The Generation of Pollutants 511

The Incidence on Households 512

Air Pollution 512

Automobile Control 512

Stationary Source Control 513

A Combined Assessment 514

Water Pollution 515

Point Sources 515

Nonpoint Sources 516

Implications for Policy 517

Example 21.2 Distributional Impacts of RECLAIM 519

Summary 520

Further Reading 521

Additional References 521

Discussion Questions 523

CHAPTER 22 Development, Poverty, and the Environment 524

Introduction 524

The Growth Process 526

The Nature of the Process 526

Increases in Inputs 526

Technological Progress 527

Potential Sources of Reduced Growth 527

Reduced Input Flows 527

Example 22.1 The Generalized Cobb-Douglas Production Function 528

Limits on Technological Progress 530

The Curse of Natural Resources 530

Environmental Policy 531

Example 22.2 The "Natural Resource Curse" Hypothesis 532

Example 22.3 Jobs versus the Environment: What is the Evidence? 533

Energy 534

Outlook for the Near Future	535
Population Impacts	536
The Information Economy	536
The Growth-Development Relationship	537
Conventional Measures	537
Alternative Measures	540
Growth and Poverty: The Industrialized Nations	542
The Effects on Income Inequality	542
Poverty in the Less Industrialized Nations	543
<i>Example 22.4 Does Money Buy Happiness?</i>	543
Appropriateness of the Traditional Model	544
Scale	544
Forms of Development	545
Barriers to Development	545
Population Growth	545
Land Ownership Patterns	546
Trade Policies	546
Debt	548
Summary	549
Further Reading	550
Additional References	550
Discussion Questions	552

CHAPTER 23 The Quest for Sustainable Development 553

Introduction	553
Sustainability of Growth	554
Market Allocations	556
Efficiency and Sustainability	557
<i>Example 23.1 Resource Depletion and Economic Sustainability: Malaysia</i>	559
Trade and the Environment	561
A Menu of Opportunities	562
Agriculture	562
Energy	563
Waste Reduction	564
<i>Example 23.2 Sustainable Development: Three Success Stories</i>	565
Managing the Transition	566
<i>Example 23.3 Controlling Land Development with TDRs</i>	567
Prospects for International Cooperation	567
Opportunities for Cooperation	568
Restructuring Incentives	569

- The Full-Cost Principle* 570
- The Cost-Effectiveness Principle* 572
- The Property Rights Principle* 573
- The Sustainability Principle* 574
- The Information Principle* 575

Forced Transition 575

- Example 23.4 Reputational Strategies for Pollution Control in Indonesia* 576

Defining the Target 576

Institutional Structure 577

- Population Stabilization* 577

- Stock and Throughput Stabilization* 577

- Ensuring Distributional Fairness* 578

Administration 578

Summary 579

Further Reading 579

Additional References 580

Discussion Questions 582

CHAPTER 24 Visions of the Future Revisited 583

Addressing the Issues 583

Conceptualizing the Problem 584

Institutional Responses 586

- Example 24.1 Private Incentives for Sustainable Development: Can Adopting Sustainable Practices be Profitable?* 587

Sustainable Development 589

- Example 24.2 Public/Private Partnerships: The Kalundborg Experience* 591

A Concluding Comment 593

PROBLEM SET ANSWERS 595
