

# LEES' LOSS PREVENTION IN THE PROCESS INDUSTRIES

VOLUME **1**

HAZARD IDENTIFICATION,  
ASSESSMENT AND CONTROL  
THIRD EDITION

Edited by

**SAM MANNAN**

# Contents of Volume 1

<b>1 Introduction</b>	<b>1/1</b>		
1.1 Management Leadership	1/1		
1.2 Industrial Safety and Loss Trends	1/1		
1.3 Safety and Environment Concerns	1/1		
1.4 Loss Prevention-1	1/4		
1.5 Large Single-stream Plants	1/5		
1.6 Loss Prevention-2	1/8		
1.7 Total Loss Control	1/10		
1.8 Quality Assurance	1/11		
1.9 Total Quality Management	1/11		
1.10 Risk Management	1/12		
1.11 Safety-critical Systems	1/13		
1.12 Environment	1/13		
1.13 Professional Institutions and Bodies	1/13		
1.14 Responsible Care	1/13		
1.15 Academic and Research Activities	1/13		
1.16 Overview	1/13		
<b>2 Hazard, Incident and Loss</b>	<b>2/1</b>		
2.1 The Incident Process	2/2		
2.2 Standard Industrial Classification	2/4		
2.3 Injury Statistics	2/5		
2.4 Major Disasters	2/11		
2.5 Major Process Hazards	2/12		
2.6 Fire Loss Statistics	2/15		
2.7 Fire and Explosion	2/16		
2.8 Causes of Loss	2/20		
2.9 Down-time Losses	2/20		
2.10 Trend of Injuries	2/22		
2.11 Trend of Losses	2/22		
2.12 Case Histories	2/27		
<b>3 Legislation and Law</b>	<b>3/1</b>		
3.1 US Legislation	3/2		
3.2 US Regulatory Agencies	3/3		
3.3 Codes and Standards	3/3		
3.4 Occupational Safety and Health Act 1970	3/4		
3.5 US Environmental Legislation	3/4		
3.6 US Toxic Substances Legislation	3/4		
3.7 US Accidental Chemical Release Legislation	3/5		
3.8 US Transport Legislation	3/5		
3.9 Regulatory Support	3/5		
<b>4 Major Hazard Control</b>	<b>4/1</b>		
4.1 Superstar Technologies	4/2		
4.2 Hazard Monitoring	4/4		
4.3 Risk Issues	4/4		
4.4 Risk Perception	4/4		
4.5 Risk Management	4/9		
4.6 Hazard Control Policy	4/13		
4.7 Nuclear Hazard Control	4/13		
4.8 Process Hazard Control: Background	4/14		
4.9 Process Hazard Control: Advisory Committee on Major Hazards	4/15		
4.10 Process Hazard Control: Major Hazards Arrangements	4/17		
4.11 Process Hazard Control: Planning	4/21		
4.12 Process Hazard Control: European Community	4/30		
4.13 Process Hazard Control: USA	4/31		
<b>5 Economics and Insurance</b>	<b>5/1</b>		
5.1 Economics of Loss Prevention	5/2		
5.2 Cost of Losses	5/2		
5.3 Cost of Prevention	5/4		
5.4 Level of Loss Prevention Expenditure	5/5		
5.5 Insurance of Process Plant	5/7		
5.6 Property Insurance	5/11		
5.7 Business Interruption Insurance	5/16		
5.8 Other Insurance Aspects	5/17		
5.9 Notation	5/19		
<b>6 Management and Management Systems</b>	<b>6/1</b>		
6.1 Management Attitude	6/2		
6.2 Management Commitment and Leadership	6/4		
6.3 Management Organization	6/4		
6.4 Competent People	6/5		
6.5 Systems and Procedures	6/5		
6.6 Project Safety Reviews	6/5		
6.7 Management of Change	6/5		
6.8 Standards and Codes of Practice	6/6		
6.9 Pressure Systems	6/6		
6.10 Documentation	6/6		
6.11 Audit System	6/6		
6.12 Independent Checks	6/6		
6.13 Major Hazards	6/9		
6.14 Quality Management	6/9		
6.15 Safety Management	6/9		
6.16 Policy	6/9		
6.17 Organization	6/10		
6.18 Planning	6/12		
6.19 Measurement	6/12		
6.20 Control	6/13		
6.21 Audit	6/13		
6.22 Process Knowledge	6/13		
6.23 Safety Strategies	6/14		
6.24 Human Factors	6/14		
6.25 Contractors	6/15		
6.26 Safety Management Systems	6/15		
6.27 Process Safety Management	6/15		
6.28 CCPS Management Guidelines	6/16		

6.29 Regulatory Control	6/19	8.19 Process Safety Review System	8/57
6.30 STATAS	6/20	8.20 Choice of Method	8/62
		8.21 Filtering and Follow-up	8/62
		8.22 Safety Review Systems	8/62
		8.23 Hazard Ranking Methods	8/69
		8.24 Hazard Warning Analysis	8/70
		8.25 Plant Safety Audits	8/70
		8.26 Other Methods	8/70
		8.27 Quality Assurance	8/74
		8.28 Quality Assurance: Completeness	8/74
		8.29 Quality Assurance: QUASA	8/75
		8.30 Notation	8/79
<b>7 Reliability Engineering</b>	<b>7/1</b>	<b>9 Hazard Assessment</b>	<b>9/1</b>
7.1 Development of Reliability Engineering	7/5	9.1 Background	9/05
7.2 Reliability Engineering in the Process Industries	7/6	9.2 Hazard Analysis	9/06
7.3 Definition of Reliability	7/6	9.3 Risk Assessment	9/07
7.4 Meanings of Probability	7/7	9.4 Event Data	9/11
7.5 Some Probability Relationships	7/7	9.5 Fault Trees	9/12
7.6 Some Reliability Relationships	7/10	9.6 Event Trees	9/30
7.7 Failure Distributions	7/12	9.7 Cause-Consequence Diagrams	9/31
7.8 Reliability of Some Standard Systems	7/19	9.8 Dependent Failures	9/32
7.9 Reliability of Complex Systems	7/21	9.9 Expert Judgement	9/41
7.10 Markov Models	7/24	9.10 Rare Events and External Threats	9/47
7.11 Joint Density Functions	7/29	9.11 Human Factors and Human Error	9/49
7.12 Monte Carlo Simulation	7/29	9.12 Management Aspects	9/51
7.13 Availability	7/32	9.13 Hazard Models	9/52
7.14 Bayes' Theorem	7/38	9.14 Domino Effects	9/53
7.15 Renewal Theory	7/39	9.15 Hazard Model Systems	9/54
7.16 Replacement Models	7/41	9.16 Population Characteristics	9/56
7.17 Models of Failure: Strength-load Interaction	7/41	9.17 Modification of Exposure	9/64
7.18 Models of Failure: Some Other Models	7/44	9.18 Injury Relations	9/67
7.19 Failure Behaviour and Regimes	7/45	9.19 Presentation of Results	9/71
7.20 Failure Data Analysis	7/47	9.20 Confidence in Results	9/77
7.21 Reliability in Design	7/59	9.21 Risk Criteria	9/82
7.22 Reliability Prediction	7/60	9.22 Guide Assessments	9/92
7.23 Reliability Growth, Testing and Demonstration	7/61	9.23 Hazard Impact Model	9/98
7.24 Maintainability	7/62	9.24 Simplified Assessment Methods	9/104
7.25 Maintenance Activities and Policies	7/63	9.25 Decay Relations	9/105
7.26 Reliability-centred Maintenance	7/66	9.26 Hazard Warning	9/108
7.27 Life Cycle Costing	7/67	9.27 Computer Aids	9/119
7.28 Notation	7/69	9.28 Risk Assessment Debate	9/120
		9.29 Overview	9/122
<b>8 Hazard Identification</b>	<b>8/1</b>	<b>10 Plant Siting and Layout</b>	<b>10/1</b>
8.1 Safety Audits	8/2	10.1 Plant Siting	10/2
8.2 Management System Audits	8/5	10.2 Plant Layout	10/2
8.3 Checklists	8/11	10.3 Layout Generation	10/3
8.4 Materials Properties	8/11	10.4 Layout Techniques and Aids	10/5
8.5 Pilot Plants	8/13	10.5 Layout Planning and Development	10/6
8.6 Hazard Indices	8/13	10.6 Site Layout Features	10/7
8.7 Hazard Studies	8/26	10.7 Plot Layout Considerations	10/10
8.8 What If? Analysis	8/29	10.8 Equipment Layout	10/12
8.9 Event Tree and Fault Tree Analysis	8/29	10.9 Pipework Layout	10/13
8.10 Preliminary Hazard Analysis	8/29	10.10 Storage Layout	10/14
8.11 Screening Analysis Techniques	8/30	10.11 Separation Distances	10/15
8.12 Hazard and Operability Studies	8/31		
8.13 Failure Modes, Effects and Criticality Analysis	8/51		
8.14 Sneak Analysis	8/53		
8.15 Computer HAZOP	8/54		
8.16 Human Error Analysis	8/55		
8.17 Scenario Development	8/55		
8.18 Consequence Modelling	8/57		

10.12 Hazardous Area Classification	10/20	12.21 Overpressure Protection: Installation of Relief Devices	12/65
10.13 Hazard Assessment	10/22	12.22 Flare and Vent Systems	12/67
10.14 Hazard Models	10/22	12.23 Blowdown and Depressuring Systems	12/72
10.15 Fire Protection	10/25	12.24 Pressure Containment	12/72
10.16 Effluents	10/27	12.25 Containment of Toxic Materials	12/73
10.17 Drain Systems	10/28	12.26 Pressure Systems for Chlorine	12/75
10.18 Blast-Resistant Structures	10/29	12.27 Failure in Pressure Systems	12/79
10.19 Control Buildings	10/29	12.28 Fracture Mechanics	12/87
10.20 Toxics Protection	10/30	12.29 Probabilistic Fracture Mechanics	12/92
10.21 Modular Plants	10/31	12.30 Failure of Vessels, Equipment and Machinery	12/92
10.22 Notation	10/33		
<b>11 Process Design</b>	<b>11/1</b>	<b>13 Control System Design</b>	<b>13/1</b>
11.1 The Design Process	11/2	13.1 Process Characteristics	13/2
11.2 Conceptual - Front End Design	11/8	13.2 Control System Characteristics	13/4
11.3 Detailed Engineering	11/10	13.3 Instrument System Design	13/4
11.4 Design Assessments	11/11	13.4 Process Computer Control	13/8
11.5 Licensors, Vendors and Contractors	11/13	13.5 Control of Batch Processes	13/12
11.6 Inherently Safer Design	11/13	13.6 Control of Particular Units	13/14
11.7 Unit Processes	11/24	13.7 Computer Integrated Manufacturing	13/17
11.8 Unit Operations and Equipments	11/28	13.8 Instrument Failure	13/17
11.9 Operating Conditions	11/32	13.9 Trip Systems	13/25
11.10 Utilities	11/34	13.10 Interlock Systems	13/43
11.11 Particular Chemicals	11/41	13.11 Programmable Logic Systems	13/47
11.12 Particular Processes and Plants	11/53	13.12 Programmable Electronic Systems	13/48
11.13 Operational Deviations	11/60	13.13 Software Engineering	13/54
11.14 Impurities	11/64	13.14 Safety-related Instrument Systems	13/60
11.15 CCPS Engineering Design Guidelines	11/64	13.15 CCPS Safe Automation Guidelines	13/62
		13.16 Emergency Shut-down Systems	13/65
<b>12 Pressure System Design</b>	<b>12/1</b>	13.17 Level of Automation	13/67
12.1 Pressure Systems	12/5	13.18 Toxic Storage Instrumentation	13/68
12.2 Pressure System Components	12/8	13.19 Notation	13/69
12.3 Steels and Their Properties	12/8		
12.4 Pressure Vessel Design	12/15	<b>14 Human Factors and Human Error</b>	<b>14/1</b>
12.5 Joining, Fastening and Welding	12/17	14.1 Human Factors in Process Control	14/4
12.6 Pressure Vessel Standards and Codes	12/18	14.2 Human Factors in System Design	14/4
12.7 Pipework and Valves	12/22	14.3 Themes in Human Factors	14/5
12.8 Heat Exchangers	12/32	14.4 Process Operator Functions	14/7
12.9 Fired Heaters and Furnaces	12/34	14.5 Process Operator Studies	14/7
12.10 Process Machinery	12/36	14.6 Allocation of Function	14/10
12.11 Insulation	12/41	14.7 Information Display	14/11
12.12 Overpressure Protection	12/43	14.8 Alarm Systems	14/13
12.13 Overpressure Protection: Pressure Relief Devices	12/47	14.9 Fault Administration	14/16
12.14 Overpressure Protection: Relief System Design	12/50	14.10 Malfunction Detection	14/18
12.15 Overpressure Protection: Fire Relief	12/51	14.11 Computer-based Aids	14/19
12.16 Overpressure Protection: Vacuum and Thermal Relief	12/53	14.12 Human Information Processing	14/21
12.17 Overpressure Protection: Special Situations	12/56	14.13 Task Analysis	14/27
12.18 Overpressure Protection: Disposal	12/57	14.14 Job Design	14/35
12.19 Overpressure Protection: Pressure Relief Valves	12/60	14.15 Personnel Selection	14/35
12.20 Overpressure Protection: Bursting Discs	12/64	14.16 Training	14/36
		14.17 Training: ACSNI Study Group Report	14/38
		14.18 Human Factors and Industrial Safety	14/44
		14.19 Human Error	14/44

14.20 Models and Classifications of Human Error	14/46	15.16 Passive Dispersion: Models	15/103
14.21 Human Error in Process Plants	14/48	15.17 Passive Dispersion: Dispersion over Particular Surfaces	15/116
14.22 Prevention and Mitigation of Human Error	14/51	15.18 Passive Dispersion: Dispersion in Particular Conditions	15/121
14.23 Assessment of Human Error	14/53	15.19 Passive Dispersion: Dispersion Parameters	15/121
14.24 Assessment of Human Error: Task Analytic Approach	14/53	15.20 Dispersion of Jets and Plumes	15/134
14.25 Assessment of Human Error: Process Operation	14/54	15.21 Dispersion of Two-phase Flashing Jets	15/152
14.26 Assessment of Human Error: Qualitative Methods	14/57	15.22 Dense Gas Dispersion	15/155
14.27 Assessment of Human Error: <i>Human Reliability Analysis Handbook</i>	14/59	15.23 Dispersion of Dense Gas: Source Terms	15/160
14.28 Assessment of Human Error: Success Likelihood Index Method (SLIM)	14/73	15.24 Dispersion of Dense Gas: Models and Modelling	15/164
14.29 Assessment of Human Error: Human Error Assessment and Reduction Technique (HEART)	14/74	15.25 Dispersion of Dense Gas: Modified Conventional Models	15/167
14.30 Assessment of Human Error: Method of Dougherty and Fragola	14/74	15.26 Dispersion of Dense Gas: Van Ulden Model	15/168
14.31 Assessment of Human Error: CCPS Method	14/80	15.27 Dispersion of Dense Gas: British Gas/Cremer and Warner Model	15/172
14.32 Assessment of Human Error: Other Methods	14/80	15.28 Dispersion of Dense Gas: DENZ and CRUNCH	15/175
14.33 Assessment of Human Error: Performance Shaping Factors	14/82	15.29 Dispersion of Dense Gas: SIGMET	15/179
14.34 Assessment of Human Error: Human Error Data	14/84	15.30 Dispersion of Dense Gas: SLAB and FEM3	15/181
14.35 Assessment of Human Error: SRD Human Error Guides	14/87	15.31 Dispersion of Dense Gas: HEGADAS and Related Models	15/182
14.36 Assessment of Human Error: Benchmark Exercise	14/87	15.32 Dispersion of Dense Gas: DEGADIS	15/189
14.37 Assessment of Human Error: ACSNI Study Group Report	14/88	15.33 Dispersion of Dense Gas: SLUMP and HEAVYGAS	15/191
14.38 CCPS Human Error Prevention Guidelines	14/90	15.34 Dispersion of Dense Gas Dispersion: <i>Workbook</i> Model	15/191
14.39 Human Factors at Sizewell B	14/91	15.35 Dispersion of Dense Gas: DRIFT and Related Models	15/200
14.40 Notation	14/92	15.36 Dispersion of Dense Gas: Some Other Models and Reviews	15/202
		15.37 Dispersion of Dense Gas: Field Trials	15/204
		15.38 Dispersion of Dense Gas: Thorney Island Trials	15/215
<b>15 Emission and Dispersion</b>	<b>15/1</b>	15.39 Dispersion of Dense Gas: Physical Modelling	15/223
15.1 Emission	15/02	15.40 Dispersion of Dense Gas: Terrain, Obstructions and Buildings	15/236
15.2 Two-phase Flow	15/14	15.41 Dispersion of Dense Gas: Validation and Comparison	15/249
15.3 Two-phase Flow: Fauske Models	15/26	15.42 Dispersion of Dense Gas: Particular Gases	15/252
15.4 Two-phase Flow: Leung Models	15/30	15.43 Dispersion of Dense Gas: Plumes from Elevated Sources	15/256
15.5 Vessel Depressurization	15/33	15.44 Dispersion of Dense Gas: Plumes from Elevated Sources – PLUME	15/266
15.6 Pressure Relief Valves	15/39	15.45 Concentration and Concentration Fluctuations	15/269
15.7 Vessel Blowdown	15/42	15.46 Flammable Gas Clouds	15/279
15.8 Vessel Rupture	15/45	15.47 Toxic Gas Clouds	15/287
15.9 Pipeline Rupture	15/54		
15.10 Vaporization	15/56		
15.11 Dispersion	15/69		
15.12 Meteorology	15/74		
15.13 Topography	15/98		
15.14 Dispersion Modelling	15/100		
15.15 Passive Dispersion	15/102		

15.48	Dispersion over Short Distances	15/290
15.49	Hazard Ranges for Dispersion	15/293
15.50	Transformation and Removal Processes	15/295
15.51	Infiltration into Buildings	15/301
15.52	Source and Dispersion Modelling: CCPS Guidelines	15/305
15.53	Vapour Release Mitigation: Containment and Barriers	15/306
15.54	Vapour Cloud Mitigation: CCPS Guidelines	15/317
15.55	Fugitive Emissions	15/318
15.56	Leaks and Spillages	15/323
15.57	Notation	15/324

## 16 Fire 16/1

16.1	Fire	16/2
16.2	Flammability of Gases and Vapours	16/14
16.3	Combustion Phenomena	16/26
16.4	Flammability of Aerosols	16/53
16.5	Ignition Sources	16/56
16.6	Self-heating	16/66
16.7	Static Electricity	16/82
16.8	Electrical Equipment	16/128
16.9	Hazardous Area Classification	16/135
16.10	Ignition Models	16/146
16.11	Fire in Process Plant	16/154
16.12	Flames	16/159
16.13	Radiant Heat Transfer	16/160
16.14	Vapour Cloud Fires	16/172

16.15	Fireballs	16/176
16.16	Fireballs from Explosives	16/188
16.17	Pool Fires	16/190
16.18	Flares	16/207
16.19	Jet Flames	16/214
16.20	Engulfing Fires	16/223
16.21	Effects of Fire: Damage	16/235
16.22	Effects of Fire: Injury	16/239
16.23	Fire Protection of Process Plant	16/252
16.24	Passive Fire Protection	16/255
16.25	Fire fighting Agents	16/261
16.26	Fire Protection Using Water: Extinguishment and Control	16/263
16.27	Fire Protection Using Water: Exposure Protection	16/267
16.28	Fire Protection Using Foam	16/269
16.29	Fire Protection Using Dry Chemicals	16/272
16.30	Fire Protection Using Vaporizing Liquids	16/273
16.31	Fire Protection Using Inert Gas	16/276
16.32	Fire Protection Using Special Methods	16/276
16.33	Fire Protection Using Portable Extinguishers	16/277
16.34	Fire Protection Applications	16/277
16.35	Fire Fighting in Process Plant	16/279
16.36	Fire and Fire Protection in Buildings	16/283
16.37	Fire Protection in Transport	16/290
16.38	Fire Hazard	16/291
16.39	Hazard Range of Fire	16/292
16.40	Notation	16/295
