

# LEES' LOSS PREVENTION IN THE VOLUME 2 PROCESS INDUSTRIES

HAZARD IDENTIFICATION,  
ASSESSMENT AND CONTROL  
THIRD EDITION

Edited by  
**SAM MANNAN**

# Contents of Volume 2

<b>17 Explosion</b>	<b>17/1</b>	<b>1746 Dust Explosion Prevention</b>	<b>17/263</b>
17.1 Explosion	17/5	1747 Dust Explosion Protection	17/266
17.2 Detonation	17/6	1748 Dust Explosion Venting	17/268
17.3 Explosives	17/18	1749 Dust-handling Plant	17/281
17.4 Explosion Energy	17/21	1750 Dust Fires	17/286
17.5 Deflagration inside Plant	17/31	1751 Explosion Hazard	17/288
17.6 Detonation inside Vessels and Pipes	17/34	1752 Hazard Range of Explosions	17/292
17.7 Explosions in Closed Vessels	17/36	1753 Notation	17/293
17.8 Explosions in Buildings	17/46		
17.9 Explosions in Large Enclosures	17/48	<b>18 Toxic Release</b>	<b>18/1</b>
17.10 Explosion Prevention	17/49	18.1 Toxic Effects	18/2
17.11 Explosion Protection	17/52	18.2 Toxic Substances	18/8
17.12 Explosion Venting of Vessels	17/60	18.3 Toxicity Assessment	18/9
17.13 Explosion Venting of Ducts and Pipes	17/81	18.4 Control of Toxic Hazard: Regulatory Controls	18/14
17.14 Explosion Relief of Buildings	17/87	18.5 Hygiene Standards	18/16
17.15 Explosion Relief of Large Enclosures	17/90	18.6 Hygiene Standards: Occupational Exposure Limits	18/18
17.16 Venting of Reactors	17/94	18.7 Carcinogens	18/21
17.17 Venting of Reactors and Vessels: DIERS	17/97	18.8 Dusts	18/25
17.18 Venting of Reactors and Vessels: Vent Flow	17/100	18.9 Metals	18/26
17.19 Venting of Reactors and Vessels: Vent Sizing	17/102	18.10 Emergency Exposure Limits	18/26
17.20 Venting of Reactors and Vessels: Leung Model	17/106	18.11 Gas Toxicity	18/27
17.21 Venting of Reactors and Vessels: ICI Scheme	17/108	18.12 Gas Toxicity: Experimental Determination	18/28
17.22 Venting of Reactors: Relief Disposal	17/111	18.13 Gas Toxicity: Physiological Factors	18/29
17.23 Venting of Reactors: CCPS Work	17/117	18.14 Gas Toxicity: Toxicity Data	18/33
17.24 Venting of Storage Vessels	17/118	18.15 Gas Toxicity: Vulnerability Model	18/34
17.25 Explosive Shock in Air	17/119	18.16 Gas Toxicity: Major Industrial Gases	18/36
17.26 Condensed Phase Explosions	17/122	18.17 Gas Toxicity: MHP Studies	18/41
17.27 Vessel Burst Explosions	17/128	18.18 Gas Toxicity: Chlorine	18/42
17.28 Vapour Cloud Explosions	17/134	18.19 Gas Toxicity: Green Book Relations	18/55
17.29 Boiling Liquid Expanding Vapour Explosions	17/167	18.20 Gas Toxicity: Probit Equations	18/55
17.30 Explosions in Process Plant	17/174	18.21 Gas Toxicity: HSE Dangerous Dose	18/56
17.31 Effects of Explosions	17/177	18.22 Gas Toxicity: Combustion Gases	18/58
17.32 Explosion Damage to Structures	17/181	18.23 Ultratoxic Substances	18/59
17.33 Explosion Damage to Housing	17/193	18.24 Plant Design for Toxic Substances	18/59
17.34 Explosion Damage by Missiles	17/196	18.25 Toxic Gas Detection	18/60
17.35 Explosion Damage to Plant by Missiles	17/214	18.26 Toxic Release Response	18/60
17.36 Explosion of a Cased Explosive	17/216	18.27 Toxic Release Case Histories	18/61
17.37 Explosion of an Explosive Load	17/221	18.28 Toxic Release Risk	18/64
17.38 Explosion Injury to Persons Outdoors	17/223	18.29 Chlorine Hazard Assessment	18/66
17.39 Explosion Injury to Persons Indoors	17/230	18.30 Other Chemicals Hazard Assessment	18/75
17.40 Explosion Injury from Flying Glass	17/233	18.31 Hazard Assessment Methodology	18/76
17.41 Explosion Injury from Penetrating Fragments	17/243	18.32 Notation	18/77
17.42 Explosion Injury from Penetrating Fragments: Model of Gilbert, Lees and Scilly	17/245		
17.43 Dust Explosions	17/249	<b>19 Plant Commissioning and Inspection</b>	<b>19/1</b>
17.44 Dust Explosibility Characteristics	17/252	19.1 Plant Commissioning	19/2
17.45 Dust Ignition Sources	17/260	19.2 Plant Inspection	19/14
		19.3 Pressure Vessel Inspection	19/20

19.4	Pressure Piping Systems Inspection	19/24	21.18	Major Shut-downs	21/39
19.5	Non-destructive Testing	19/25	21.19	Maintenance Information Systems	21/41
19.6	Materials Verification	19/29	21.20	Spares Inventory	21/42
19.7	Pressure Testing	19/29	21.21	Computer Systems	21/43
19.8	Leak Testing and Detection	19/31	21.22	Modifications to Equipment	21/44
19.9	Plant Monitoring	19/32	21.23	Managing Change	21/47
19.10	Performance Monitoring	19/34	21.24	Some Modification Problems	21/50
19.11	Condition Monitoring	19/34	21.25	Major Plant Expansions	21/50
19.12	Vibration Monitoring	19/39	21.26	Notation	21/51
19.13	Corrosion Monitoring	19/42			
19.14	Acoustic Emission Monitoring	19/44	22	Storage	22/1
19.15	Plant Monitoring: Specific Equipment	19/47	22.1	General Considerations	22/4
19.16	Pipeline Inspection and Monitoring	19/47	22.2	Petroleum Products Storage	22/5
19.17	Notation	19/48	22.3	Storage Tanks and Vessels	22/5
			22.4	Storage Layout	22/13
20	Plant Operation	20/1	22.5	Venting and Relief	22/16
20.1	Operating Discipline	20/2	22.6	Fire Prevention and Protection	22/19
20.2	Operating Procedures and Instructions	20/2	22.7	LPG Storage	22/20
20.3	Emergency Procedures	20/6	22.8	LPG Storage: Pressure Storage	22/20
20.4	Handover and Permit Systems	20/8	22.9	LPG Storage: Refrigerated Storage	22/33
20.5	Operator Training	20/8	22.10	LNG Storage	22/35
20.6	Plant Patrols	20/9	22.11	LNG Storage: Refrigerated Storage	22/36
20.7	Modifications to the Process	20/9	22.12	Hydrogen Storage	22/40
20.8	Operation and Maintenance	20/9	22.13	Toxics Storage	22/40
20.9	Start-up and Shut-down	20/9	22.14	High Toxic Hazard Materials: CCPS Guidelines	22/42
20.10	Start-up of Refinery Units	20/11	22.15	Chlorine Storage	22/42
20.11	Shut-down of Refinery Units	20/12	22.16	Ammonia Storage	22/46
20.12	Operation of Fired Heaters	20/13	22.17	Ammonia Storage: Pressure Storage	22/48
20.13	Operation of Driers	20/14	22.18	Ammonia Storage: Refrigerated Storage	22/49
20.14	Operation of Storage	20/14	22.19	Ammonia Storage: Stress Corrosion Cracking	22/51
20.15	Operational Activities and Hazards	20/16	22.20	Other Chemicals Storage	22/53
20.16	Sampling	20/18	22.21	Bunds	22/55
20.17	Trip Systems	20/20	22.22	Underground Storage Tanks	22/58
20.18	Identification Measures	20/20	22.23	Glass Reinforced Plastic Storage	22/59
20.19	Exposure of Personnel	20/20	22.24	Filling Ratio	22/61
20.20	Security	20/21	22.25	Loading and Unloading Facilities	22/61
20.21	Notation	20/22	22.26	Loading and Unloading Facilities: Particular Chemicals	22/65
21	Equipment Maintenance and Modification	21/1	22.27	Drum and Cylinder Storage	22/65
21.1	Management of Maintenance	21/2	22.28	Warehouses	22/66
21.2	Hazards of Maintenance	21/5	22.29	Warehouses: Particular Chemicals Storage	22/70
21.3	Preparation for Maintenance	21/6	22.30	Storage Case Histories	22/71
21.4	Isolation	21/7	22.31	Storage Risk	22/72
21.5	Purging	21/10	22.32	LPG Storage Hazard Assessment	22/73
21.6	Cleaning	21/10	22.33	LNG Storage Hazard Assessment	22/76
21.7	Confined Spaces	21/12	22.34	Ammonia Storage Hazard Assessment	22/77
21.8	Permit Systems	21/14	22.35	Notation	22/77
21.9	Maintenance Equipment	21/21			
21.10	Flanged Joints	21/25	23	Transport	23/1
21.11	Hot Work	21/27	23.1	General Considerations	23/6
21.12	Tank Cleaning, Repair and Demolition	21/33	23.2	International Codes	23/7
21.13	On-Line Repairs	21/35	23.3	Classification, Packaging and Labelling	23/9
21.14	Maintenance of Particular Equipment	21/36	23.4	Transport Containers	23/12
21.15	Equipment Removal	21/38	23.5	Road Transport	23/14
21.16	Deteriorated Equipment	21/38			
21.17	Some Maintenance Problems	21/39			

23.6 Road Transport Environment	23/17	25.3 Occupational Hygiene	25/7
23.7 Rail Transport	23/32	25.4 COSHH Regulations 1988	25/11
23.8 Rail Transport Environment	23/34	25.5 Dust Hazards	25/15
23.9 Road and Rail Tunnels	23/37	25.6 Asbestos Dust	25/16
23.10 Waterway Transport	23/37	25.7 Ventilation	25/17
23.11 Pipeline Transport	23/37	25.8 Skin Disease	25/20
23.12 Marine Transport: Shipping	23/42	25.9 Physico-chemical Hazards	25/20
23.13 Marine Transport: Regulatory Controls	23/46	25.10 Ionizing Radiation Hazards	25/22
23.14 Marine Transport: Ports and Harbours	23/50	25.11 Non-ionizing Radiation Hazards	25/23
23.15 Marine Transport: Shipboard Fire and Fire Protection	2/52	25.12 Machinery Hazards	25/24
23.16 Marine Transport: Liquefied Flammable Gas	23/57	25.13 Electricity Hazards	25/26
23.17 Marine Transport: Chemicals	23/61	25.14 Other Activities and Hazards	25/26
23.18 Marine Transport Environment	23/62	25.15 Personal Protective Equipment	25/29
23.19 Air Transport	23/69	25.16 Respiratory Protective Equipment	25/30
23.20 Transport Emergency Planning and Spill Control	23/69	25.17 Rescue and First Aid	25/33
23.21 Transport Case Histories	23/73	25.18 Notation	25/34
23.22 Transport Risk	23/77		
23.23 Transport Hazard Assessment	23/79	<b>26 Accident Research</b>	<b>26/1</b>
23.24 Road Transport Hazard Assessment	23/79	26.1 General Considerations	26/2
23.25 Rail Transport Hazard Assessment	23/80	26.2 Definition of Accidents	26/3
23.26 Tunnel Transport Hazard Assessment	23/81	26.3 Classification of Accidents	26/3
23.27 Pipeline Transport Hazard Assessment	23/82	26.4 Causes of Accidents	26/3
23.28 Marine Transport Hazard Assessment	23/83	26.5 Accident Models	26/3
23.29 Transport Hazard Assessment: Comparative Risk	23/86	26.6 Accident Proneness Plan	26/5
23.30 Security Issues	23/86	26.7 Human Error	26/6
23.30 Notation	23/89	26.8 Risk-taking	26/6
		26.9 Social Factors	26/6
		26.10 Accident Prevention	26/8
		26.11 Safety Training	26/8
		26.12 Major Hazards Research	26/8
<b>24 Emergency Planning</b>	<b>24/1</b>		
24.1 Introduction	24/3	<b>27 Information Feedback</b>	<b>27/1</b>
24.2 On-site Emergency Planning	24/3	27.1 The Learning Process	27/2
