Database Systems:

DESIGN, IMPLEMENTATION, & MANAGEMENT

Peter Rob • Carlos Corral

PART I DATABASE CONCEPTS

CHAPTER 1 DATABASE SYSTEMS

1.1 Data vs. Information	4
1.2 Introducing the Database and the DBMS	6
1.2.1 Types of Databases	7
1.3 Why Database Design Is Important	8
1.4 The Historical Roots of the Database: Files and File Systems	9
1.5 Problems with File System Data Management	10
1.5.1 Structural and Data Dependence	13
1.5.2 Field Definitions and Naming Conventions	15
1.5.3 Data Redundancy	16
1.6 Database Systems	17
1.6.1 The Database System Environment	18
1.6.2 DBMS Functions	19
1.6.3 Managing the Database System: a Shift in Focus	21
1.6.4 Database Design and Modeling	24
Summary	24
Key Terms	25
Review Questions	25
Problems	26

CHAPTER 2 DATA MODELS

2.1 The Importance of Data Models	28
2.2 Data Model Basic Building Blocks	30
2.3 Business Rules	31
2.4 The Evolution of Data Models	32
2.4.1 The Hierarchical Model	33
2.4.2 The Network Model	34
2.4.3 The Relational Model	38
2.4.4 The Entity Relationship Model	41
2.4.5 The Object Oriented Model	45
2.4.6 Other Models	49
2.4.7 Data Models: A Summary	52
2.5 Degrees of Data Abstraction	53
2.5.1 The Conceptual Model	55
2.5.2 The Internal Model	57
2.5.3 The External Model	59
2.5.4 The Physical Model	60
Summary	62
Key Terms	64
Review Questions	65
Problems	66

CHAPTER 3 THE RELATIONAL DATABASE MODEL	74
3.1 A Logical View of Data	76
3.1.1 Tables and Their Characteristics	76
3.2 Keys	80
3.3 Integrity Rules Revisited	85
3.4 Relational Database Operators	86
3.5 The Data Dictionary and the System Catalog	92
3.6 Relationships Within the Relational Database	95
3.6.1 The 1:1 Relationship	95
3.6.2 The 1:M Relationship	97
3.6.3 The M:N Relationship	99
3.7 Data Redundancy Revisited	104
3.8 Indexes	106
Summary	108
Key Terms	109
Review Questions	109
Problems	111
CHAPTER 4 ENTITY RELATIONSHIP (ER) MODELING	122
4.1 The Entity Relationship (ER) Model	124
4.1.1 Entities	124
4.1.2 Attributes	124
4.1.3 Relationships	130
4.1.4 Connectivity and Cardinality	131
4.1.5 Relationship Strength	133
4.1.6 Relationship Participation	135
4.1.7 Relationship Strength and Weak Entities	139
4.1.8 Relationship Degree	142
4.1.9 Composite Entities	147
4.1.10 Entity Supertypes and Subtypes	150
4.2 A Comparison of ER Modeling Symbols	153
4.3 Developing an ER Diagram	157
4.4 The Challenge of Database Design: Conflicting Goals	166
Summary	168
Key Terms	169
Review Questions	169
Problems	172
CHAPTER 5 NORMALIZATION OF DATABASE TABLES	182
5.1 Database Tables and Normalization	184
5.1.1 The Need for Normalization	184
5.1.2 Conversion to First Normal Form	188
5.1.3 Conversion to Second Normal Form	191
5.1.4 Conversion to Third Normal Form	192
5.1.5 Improving the Design	194
5.1.6 Limitations on System-Assigned Keys	198
5.1.7 The Boyce-Codd Normal Form (BCNF)	199

5.2 Normalization and Database Design	202
5.3 Higher-Level Normal Forms	206
5.4 Denormalization	208
Summary	209
Key Terms	212
Review Questions	212
Problems	213

PART III ADVANCED DESIGN AND IMPLEMENTATION

CHAPTER 6 INTRODUCTION TO STRUCTURED QUERY LANGUAGE (SQL)	224
6.1 Introduction to SQL	226
6.2 Data Definition Commands	228
6.2.1 The Database Model	228
6.2.2 Creating the Database	231
6.2.3 The Database Schema	231
6.2.4 Data Types	232
6.2.5 Creating Table Structures	235
6.2.6 SQL Constraints	239
6.2.7 SQL Indexes	241
6.3 Data Manipulation Commands	243
6.3.1 Adding Table Rows	243
6.3.2 Saving Table Changes	245
6.3.3 Listing Table Rows	246
6.3.4 Updating Table Rows	247
6.3.5 Restoring Table Contents	248
6.3.6 Deleting Table Rows	249
6.3.7 Inserting Table Rows with a Select Subquery	249
6.4 SELECT Queries	251
6.4.1 Selecting Rows WITH Conditional Restrictions	251
6.4.2 Arithmetic Operators: the Rule of Precedence	257
6.4.3 Logical Operators: AND, OR, and NOT	258
6.4.4 Special Operators	260
6.5 Advanced Data Definition Commands	264
6.5.1 Changing a Column's Data Type	264
6.5.2 Changing a Column's Data Characteristics	265
6.5.3 Adding a Column	265
6.5.4 Dropping a Column	266
6.5.5 Advanced Data Updates	266
6.5.6 Copying Parts of Tables	269
6.5.7 Adding Primary and Foreign Key Designations	271
6.5.8 Deleting a Table from the Database	272
6.6 Advanced SELECT Queries	272
6.6.1 Ordering a Listing	272
6.6.2 Listing Unique Values	275
6.6.3 Aggregate Functions	276
6.6.4 Grouping Data	280
6.7 Virtual Tables: Creating a View	284
6.8 Joining Database Tables	286
6.8.1 Joining Tables with an Alias	288
6.8.2 Recursive Joins	288

6.8.3	Outer Joins	290
6.9	Converting an ER Model into a Database Structure	291
6.9.1	General Rules Governing Relationships Among Tables	295
Summary		298
Key Terms		299
Review Questions		299
Problems		304
CHAPTER 7	ADVANCED SQL	318
7.1	Relational Set Operators	320
7.1.1	UNION	321
7.1.2	UNION ALL	322
7.1.3	INTERSECT	323
7.1.4	MINUS	324
7.1.5	Syntax Alternatives	326
7.2	SQL Join Operators	327
7.2.1	CROSS JOIN	329
7.2.2	NATURAL JOIN	329
7.2.3	JOIN With USING Clause	330
7.2.4	JOIN ON Clause	331
7.2.5	Outer Joins	332
7.3	Subqueries and Correlated Queries	335
7.3.1	WHERE Subqueries	337
7.3.2	IN Subqueries	338
7.3.3	HAVING Subqueries	339
7.3.4	Multirow Subquery Operators: ANY and ALL	340
7.3.5	FROM Subqueries	341
7.3.6	Attribute List Subqueries	342
7.3.7	Correlated Subqueries	344
7.4	SQL Functions	347
7.4.1	Date and Time Functions	347
7.4.2	Numeric Functions	350
7.4.3	String Functions	350
7.4.4	Conversion Functions	351
7.5	Oracle Sequences	353
7.6	Updatable Views	356
7.7	Procedural SQL	359
7.7.1	Triggers	364
7.7.2	Stored Procedures	373
7.7.3	PL/SQL Processing with Cursors	378
7.7.4	PL/SQL Stored Functions	381
7.8	Embedded SQL	381
Summary		386
Key Terms		388
Review Questions		388
Problems		389

CHAPTER 8 DATABASE DESIGN	394
8.1 Changing Data into Information	396
8.2 The Information System	396
8.3 The Systems Development Life Cycle (SDLC)	398
8.3.1 Planning	398
8.3.2 Analysis	399
8.3.3 Detailed Systems Design	400
8.3.4 Implementation	400
8.3.5 Maintenance	401
8.4 The Database Life Cycle (DBLC)	401
8.4.1 The Database Initial Study	401
8.4.2 Database Design	406
8.4.3 Implementation and Loading	420
8.4.4 Testing and Evaluation	425
8.4.5 Operation	425
8.4.6 Maintenance and Evolution	425
8.5 A Special Note About Database Design Strategies	427
8.6 Centralized vs. Decentralized Design	428
Summary	431
Key Terms	432
Review Questions	432
Problems	433

PART IV ADVANCED DATABASE CONCEPTS

CHAPTER 9 TRANSACTION MANAGEMENT AND CONCURRENT CONTROL	436
9.1 What is a Transaction?	438
9.1.1 Evaluating Transaction Results	439
9.1.2 Transaction Properties	442
9.1.3 Transaction Management with SQL	442
9.1.4 The Transaction Log	443
9.2 Concurrency Control	444
9.2.1 Lost Updates	444
9.2.2 Uncommitted Data	446
9.2.3 Inconsistent Retrievals	447
9.2.4 The Scheduler	448
9.3 Concurrency Control with Locking Methods	449
9.3.1 Lock Granularity	450
9.3.2 Lock Types	452
9.3.3 Two-Phase Locking to Ensure Serializability	454
9.3.4 Deadlocks	455
9.4 Concurrency Control with Time Stamping Methods	456
9.4.1 Wait/Die and Wound/Wait Schemes	456
9.5 Concurrency Control with Optimistic Methods	457
9.6 Database Recovery Management	458
9.6.1 Transaction Recovery	459
Summary	462
Key Terms	464
Review Questions	464
Problems	465

CHAPTER 10	DISTRIBUTED DATABASE MANAGEMENT SYSTEMS	468
10.1	The Evolution of Distributed Database Management Systems	470
10.2	DDBMS Advantages	471
10.3	DDBMS Disadvantages	472
10.4	Distributed Processing and Distributed Databases	473
10.5	Characteristics of Distributed Database Management Systems	475
10.6	DDBMS Components	477
10.7	Levels of Data and Process Distribution	478
10.7.1	Single-Site Processing, Single-Site Data (SPSD)	479
10.7.2	Multiple-Site Processing, Single-Site Data (MPSD)	479
10.7.3	Multiple-Site Processing, Multiple-Site Data (MPMD)	481
10.8	Distributed Database Transparency Features	482
10.9	Distribution Transparency	483
10.10	Transaction Transparency	485
10.10.1	Distributed Requests and Distributed Transactions	485
10.10.2	Distributed Concurrency Control	489
10.10.3	Two-Phase Commit Protocol	489
10.11	Performance Transparency and Query Optimization	490
10.12	Distributed Database Design	492
10.12.1	Data Fragmentation	492
10.12.2	Data Replication	495
10.12.3	Data Allocation	497
10.13	Client/Server vs. DDBMS	498
10.14	C. J. Date's Twelve Commandments for Distributed Databases	499
	Summary	499
	Key Terms	500
	Review Questions	501
	Problems	502

CHAPTER 11	OBJECT ORIENTED DATABASES	504
11.1	Object Orientation and Its Benefits	506
11.2	The Evolution of Object Oriented Concepts	506
11.3	Object Oriented Concepts	507
11.3.1	Objects: Components and Characteristics	507
11.3.2	Object Identity	508
11.3.3	Attributes (Instance Variables)	508
11.3.4	Object State	510
11.3.5	Messages and Methods	510
11.3.6	Classes	511
11.3.7	Protocol	513
11.3.8	Superclasses, Subclasses, and Inheritance	514
11.3.9	Method Overriding and Polymorphism	517
11.3.10	Abstract Data Types	519
11.3.11	Object Classification	520
11.4	Characteristics of an Object Oriented Data Model	520
11.4.1	Object Schemas: The Graphical Representation of Objects	521
11.4.2	Class-Subclass Relationships	524
11.4.3	Interobject Relationships: Attribute-Class Links	525
11.4.4	Late and Early Binding: Use and Importance	531
11.4.5	Support for Versioning	533

11.5 OODM and Previous Data Models: Similarities and Differences	533
11.5.1 Object, Entity, and Tuple	533
11.5.2 Class, Entity Set, and Table	534
11.5.3 Encapsulation and Inheritance	534
11.5.4 Object ID	535
11.5.5 Relationships	535
11.5.6 Access Methods	535
11.6 Object Oriented Database Management Systems	536
11.6.1 Features of an Object Oriented DBMS	538
11.6.2 Oracle Object Examples	540
11.7 How Object Orientation Affects Database Design	545
11.8 OODBMS: Advantages and Disadvantages	547
11.9 How OO Concepts Have Influenced the Relational Model	548
11.10 The Next Generation of Database Management Systems	550
Summary	550
Key Terms	551
Review Questions	551
Problems	552
CHAPTER 12 THE DATA WAREHOUSE	556
12.1 The Need for Data Analysis	558
12.2 Decision Support Systems	559
12.2.1 Operational Data Versus Decision Support Data	560
12.2.2 DSS Database Requirements	564
12.3 The Data Warehouse	567
12.3.1 DSS Architectural Styles	570
12.3.2 Twelve Rules That Define a Data Warehouse	572
12.4 Online Analytical Processing	572
12.4.1 Multidimensional Data Analysis Techniques	573
12.4.2 Advanced Database Support	574
12.4.3 Easy-to-Use End-User Interface	575
12.4.4 Client/Server Architecture	575
12.4.5 OLAP Architecture	576
12.4.6 Relational OLAP	579
12.4.7 Multidimensional OLAP	582
12.4.8 Relational vs. Multidimensional OLAP	584
12.5 Star Schemas	585
12.5.1 Facts	585
12.5.2 Dimensions	585
12.5.3 Attributes	585
12.5.4 Attribute Hierarchies	588
12.5.5 Star Schema Representation	590
12.5.6 Star Schema Performance-Improving Techniques	591
12.6 Implementing a Data Warehouse	595
12.6.1 The Data Warehouse as an Active Decision Support Framework	595
12.6.2 A Company-Wide Effort That Requires User Involvement	595
12.6.3 Satisfy the Trilogy: Data, Analysis, and Users	596
12.6.4 Apply Database Design Procedures	596
12.7 Data Mining	597
Summary	601
Key Terms	602
Review Questions	603
Problems	604

CHAPTER 13 DATABASES IN ELECTRONIC COMMERCE	610
13.1 What is Electronic Commerce?	613
13.2 The Road to Electronic Commerce	613
13.3 The Impact of E-Commerce	615
13.3.1 E-Commerce Benefits	616
13.3.2 E-Commerce Disadvantages	617
13.4 E-Commerce Styles	617
13.4.1 Business to Business (B2B)	618
13.4.2 Business to Consumers (B2C)	621
13.4.3 Intranets and Extranets	621
13.5 E-Commerce Architecture	622
13.5.1 Basic Internet Services	623
13.5.2 Business-Enabling Services	626
13.5.3 E-Commerce Business Services	628
13.6 Security	628
13.6.1 Authentication	629
13.6.2 Encryption	631
13.6.3 Transaction Security	631
13.6.4 Resource Security	633
13.7 Web Payment Processing	635
13.7.1 Digital Cash	635
13.7.2 Credit Card Processing	635
13.7.3 Electronic Wallets	636
13.8 Database Design for E-Commerce Applications	637
13.9 Extensible Markup Language (XML)	648
13.9.1 Document Type Definitions (DTDs) and XML Schemas	650
13.9.2 XML Presentation	653
13.9.3 XML Applications	655
Summary	657
Key Terms	658
Review Questions	658
Problems	659
CHAPTER 14 WEB DATABASE DEVELOPMENT	660
14.1 Internet Technologies and Databases	662
14.2 Typical Uses of Internet Databases	663
14.3 Web-to-Database Middleware: Server-Side Extensions	664
14.3.1 Web Server Interfaces	665
14.3.2 Open Database Connectivity (ODBC)	667
14.4 The Web Browser	669
14.4.1 Client-Side Extensions	669
14.5 Using a Web-to-Database Production Tool: ColdFusion	670
14.5.1 How ColdFusion Works	671
14.5.2 The RobCor Sample Database	672
14.5.3 Creating a Simple Query with CFQUERY and CFOUTPUT	674
14.5.4 Creating a Simple Query with CFQUERY and CFTABLE	678
14.5.5 Creating a Dynamic Search Page	679
14.5.6 The Web as a Stateless System	683

14.5.7	Inserting Data	684
14.5.8	Data Updates	689
14.5.9	Deleting Data	696
14.6	Internet Database Systems: Special Considerations	702
14.6.1	What Data Types Are Supported?	702
14.6.2	Data Security	703
14.6.3	Transaction Management	704
14.6.4	Denormalization of Database Tables	704
Summary		705
Key Terms		706
Review Questions		706
Problems		707

PART VI DATABASE ADMINISTRATION

CHAPTER 15	DATABASE ADMINISTRATION	710
15.1	Data as a Corporate Asset	712
15.2	The Need for and Role of Databases in an Organization	713
15.3	Introduction of a Database: Special Considerations	714
15.4	The Evolution of the Database Administration Function	715
15.5	The Database Environment's Human Component	719
15.5.1	The DBA's Managerial Role	721
15.5.2	The DBA's Technical Role	728
15.6	Database Administration Tools	734
15.6.1	The Data Dictionary	734
15.6.2	CASE Tools	736
15.7	Developing a Data Administration Strategy	738
15.8	The DBA at Work: Using Oracle for Database Administration	740
15.8.1	Oracle Database Administration Tools	741
15.8.2	The Default Login	742
15.8.3	Ensuring an Automatic RDBMS Start	742
15.8.4	Using the Storage Manager to Create Tablespaces and Datafiles	743
15.8.5	Managing the Database Objects: Tables, Views, Triggers, and Procedures	746
15.8.6	Managing Users and Establishing Security	747
15.8.7	Customizing the Database Initialization Parameters	749
15.8.8	Creating a New Database	750
Summary		755
Key Terms		757
Review Questions		757

APPENDIXES ON CD-ROM

APPENDIX A	DESIGNING DATABASES WITH VISIO PROFESSIONAL: A TUTORIAL
APPENDIX B	AN INTRODUCTION TO UNIFIED MODELING LANGUAGE (UML)
APPENDIX C	DATABASE PERFORMANCE TUNING

APPENDIX D THE UNIVERSITY LAB: CONCEPTUAL DESIGN

APPENDIX E THE UNIVERSITY LAB: CONCEPTUAL DESIGN VERIFICATION, LOGICAL DESIGN, AND IMPLEMENTATION

APPENDIX F CLIENT/SERVER SYSTEMS

APPENDIX G CLIENT/SERVER NETWORK INFRASTRUCTURE

APPENDIX H THE HIERARCHICAL DATABASE MODEL

APPENDIX I THE NETWORK DATABASE MODEL
