Preface / xi

List of Symbols / xiii

Chapter 1 Introduction and Approach to Problem / 1

- 1.1 Introduction / 1
- 1.2 Speckle patterns: an historical retrospect / 2
- 1.3 Laser speckle phenomenon / 6
- 1.4 Speckle statistics / 9
- 1.5 Reduction and exploitation of speckle noise / 15
- 1.6 State of the shearographic art / 22

Chapter 2 Shearographic Metrology / 27

- 2.1 Fundamentals of the optical setup for shearography / 30
- 2.2 Refraction and interference of light waves passing a shearing element (through a low-incline glass wedge) / 35
- 2.3 Relationship between the mechanics of components and the fringe interpretation of the shearogram / 38
- 2.4 Generation of a shearogram / 45
- 2.5 Conventional shearography / 49
- 2.6 Fringe readout by Fourier filtering / 52

Chapter 3 Simple Digital Shearography / 55

- 3.1 Real-time observation of a shearogram / 56
- 3.2 Fringe interpretation of a shearogram / 57
- 3.3 Shearograms of elementary components / 62
 - 3.3.1 Bending strain of a cantilever / 62
 - 3.3.2 Tensile strain / 64
 - 3.3.3 Steadily varying cross section of a tensile bar / 64
 - 3.3.4 Torsion of a tube / 65
 - 3.3.5 Evaluation of the shearograms / 67
- 3.4 Rigid-body motion / 69

Chapter 4 Phase-Shifting Shearography / 73

- 4.1 Fundamentals of the phase-shifting technique / 73
- 4.2 Arrangement of phase-shifting shearography / 75

- 4.3 Calculation of the relative phase change Δ in a shearogram / 77
- 4.4 The cranked tensile bar $h/6$ as a calibration object / 84
- Chapter 5 Evaluation of the Interferogram / 93
 - 5.1 Filtering of the phase map / 93
 - 5.2 Demodulation / 100
 - 5.3 Determination of the absolute magnitude of the fringe order independent of boundary conditions / 107
 - 5.3.1 General method for determining the absolute magnitude of the fringe order independent of the boundary conditions created by static loading / 107
- Chapter 6 Nondestructive Testing of Materials / 117
 - 6.1 Principle of shearographic testing of materials / 117
 - 6.2 Phase-shifting shearography for nondestructive testing / 120
 - 6.3 The experimental setup for NDT / 122
 - 6.3.1 Introduction / 122
 - 6.3.2 Laser diodes for interferometric measurements / 124
 - 6.3.3 Experimental results by laser diode measurement / 126
 - 6.3.4 General process of interferometric analysis / 128
 - 6.3.5 Conclusions / 130
 - 6.4 Applications of interferometric NDT / 130
 - 6.4.1 Investigations of GFRP and CFRP components / 130
 - 6.4.2 Types of loading for detecting emerging defects / 131
 - 6.4.3 Investigation of compound materials and sintered metals / 140
 - 6.5 Conclusions / 142
- Chapter 7 Strain Measurement / 145
 - 7.1 Introduction / 145
 - 7.2 State of the art with respect to strain measurement / 145
 - 7.3 State of shearographic strain measurement / 145
 - 7.3.1 Geometrical relations / 147
 - 7.3.2 Optical relations / 148
 - 7.4 Determination of the pure in-plane strains and the pure out-of-plane component using two illuminating beams / 149
 - 7.5 Complete determination of the 2D deformation tensor / 154
 - 7.5.1 Principle and setup for the direct measurement of $\partial u/\partial x$, $\partial u/\partial y$, $\partial v/\partial x$, $\partial v/\partial y$, and $\partial w/\partial x$, $\partial w/\partial y$ for a single external loading / 154
 - 7.5.2 Feasibility of the arrangement / 159
 - 7.5.3 Operation of the Shearwin program / 161

- 7.6 Application of shearographic strain measurement / 167
 - 7.6.1 Full-field and direct strain measurement / 167
 - 7.6.2 Shearographic strain measurement using a tensile testing machine / 175
 - 7.6.3 Shearographic investigation of strain concentration at a crack tip / 182
 - 7.6.4 Shearographic investigation of local strain on the surface of concrete / 186
- 7.7 Shape identification by the shearographic technique / 191
- 7.8 Complete determination of flexural strains in thin plates under a single loading / 193

Chapter 8 Vibration Analysis Using Continuous-Wave Lasers / 203

- 8.1 Introduction / 203
- 8.2 Real-time observation of vibration by continuous-wave illumination / 205
 - 8.2.1 Real-time subtraction with a fixed reference frame / 206
 - 8.2.2 Real-time subtraction with a continuously refreshed reference frame / 209
 - 8.2.3 Quality assurance applications of real-time observation using time-averaged shearography / 212
 - 8.2.4 General method for determining the absolute fringe order independent of the boundary conditions created by dynamic loading / 215
 - 8.2.5 Industrial applications investigated by time-averaged digital speckle pattern shearing interferometry / 218
 - 8.2.6 Accuracy of time-averaged interferometry / 220
 - 8.2.7 Single- and multi-(composite) mode vibration / 220
- 8.3 Quantitative evaluation of a digital shearogram of a vibrating object / 222
 - 8.3.1 Stroboscopic illumination used in conjunction with the phase-shifting technique / 223
 - 8.3.2 Implementation of the arrangement for measuring vibrations by stroboscopic illumination / 226
 - 8.3.3 Determination of the vibration mode and the dynamic bending and shear strains of the shearogram / 228
- 8.4 Numerical evaluation of stroboscopically illuminated shearograms / 236
 - 8.4.1 Phase maps for different trigger positions / 237
 - 8.4.2 Determination of the displacement field from the deformation gradients / 241
 - 8.4.3 Theory and development of an advanced analysis program / 242
 - 8.4.4 Conclusions / 243

Chapter 9	Digital Shearography for Quantifying Heat Flow Rate / 245
9.1	Measurement tool / 245
9.2	Measurement principle / 246
9.3	Experimental investigation / 249
9.4	Quantitative evaluation / 253
9.5	Optimization of a heat exchanger / 257
9.6	Conclusions and outlook / 261
Chapter 10	Analysis of Deviations / 263
10.1	Comparison of results obtained by different experimental methods / 263
10.2	Shearing amount / 270
10.3	Sensitivity vector / 274
	10.3.1 Out-of-plane measurement / 276
	10.3.2 In-plane measurement / 279
10.4	Phase shifting / 281
10.5	Demodulation / 285
10.6	Rigid-body motion / 285
10.7	Speckle size and numerical aperture / 287
10.8	Measurement range of shearography / 288
Chapter 11	Assessment of Digital Speckle Pattern Shearing Interferometry / 295
11.1	State of the art / 295
11.2	Sources of measurement error using strain gauges / 296
11.3	Applications of digital shearography / 299
	Patent Applications for Digital Shearography / 301
	Index / 303
