# Mechatronic Reliability

Electric Failures  
Mechanical-Electrical Coupling  
Domain Switching  
Mass-Flow Instabilities

Springer

# Contents

<b>Introduction.....</b>	<b>1</b>
0.1 Mechatronic failure of information devices .....	1
0.2 Three levels of mechatronic coupling .....	3
0.3 Bottlenecks for reliability of information devices .....	4
0.4 Mechatronic reliability.....	7
0.5 Book outline.....	10
<b>Part I Electric Failures.....</b>	<b>13</b>
<b>Chapter 1 Electric fracture .....</b>	<b>15</b>
1.1 Cracking under electric field.....	15
1.2 Fracture toughness anisotropy.....	19
1.3 Asymmetric field effect on fracture toughness.....	21
1.4 Grain size effect of fracture toughness .....	25
<b>Chapter 2 Electrically induced fatigue cracking .....</b>	<b>29</b>
2.1 Fatigue crack growth above coercive field.....	29
2.2 Fatigue crack growth below coercive field.....	37
2.3 Models for electrically induced fatigue cracking .....	44
<b>Chapter 3 Current induced mass-flow instability .....</b>	<b>49</b>
3.1 Electromigration .....	49
3.2 Mass-flow instability of polycrystalline lines .....	57
3.3 Mass-flow instability of bamboo lines .....	66
<b>Part II Mechatronic Coupling.....</b>	<b>69</b>
<b>Chapter 4 Piezoelectrics .....</b>	<b>71</b>
4.1 Piezoelectric behavior .....	71

## IV    Contents

4.2	Governing equations for linear piezoelectrics .....	75
4.3	Defects and boundary conditions .....	78
4.4	Two-dimensional crack solutions .....	82
4.5	Crack kinking.....	88
<b>Chapter 5</b>	<b>Relaxor ferroelectrics.....</b>	<b>97</b>
5.1	Physics of relaxor ferroelectrics .....	97
5.2	Constitutive relations of relaxor ferroelectrics .....	100
5.3	Field concentration near defects and electrodes .....	106
5.4	Stress concentration .....	111
5.5	Cracking and stress intensity factors .....	114
<b>Chapter 6</b>	<b>Ferroelectrics.....</b>	<b>120</b>
6.1	Atomic model of ferroelectrics .....	120
6.2	180° and 90° domain switching.....	129
6.3	Domain characterization .....	132
6.4	Constitutive laws of ferroelectrics.....	138
<b>Part III</b>	<b>Reliability in Domain Switching .....</b>	<b>147</b>
<b>Chapter 7</b>	<b>Theory and experiments of domain switch .....</b>	<b>149</b>
7.1	Switching criteria .....	149
7.2	Domain bands .....	153
7.3	Crack tip domain switching.....	170
7.4	Indentation of ferroelectric single crystals .....	179
<b>Chapter 8</b>	<b>Fracture toughness and polarization .....</b>	<b>182</b>
8.1	Small scale domain switching .....	182
8.2	In-plane poling .....	187
8.3	Effect of permeability .....	200
8.4	Anti-plane poling .....	206
8.5	Fracture toughness modified by polarization .....	214
8.6	Vickers indents for poled ferroelectrics.....	216
<b>Chapter 9</b>	<b>Cyclic switch and fatigue cracking .....</b>	<b>219</b>
9.1	Crack tip switching under positive and negative fields .....	219
9.2	Stress intensity factors under positive and negative fields .....	222
9.3	Fatigue cracking driven by cyclic switch .....	225
9.4	Steady state model .....	232

<b>Part IV Mass-Flow Reliability.....</b>	237
<b>Chapter 10 Mass-flow under mechatronic fields.....</b>	239
10.1 Mass-flow formula.....	239
10.2 Chemical potential and energetic forces.....	241
10.3 Distributed dislocations for constrained mass-flow.....	244
<b>Chapter 11 Microstructural evolution.....</b>	248
11.1 Buckling of dislocation loops.....	248
11.2 Evolution and instability of voids.....	253
11.3 Waviness of interconnects .....	260
11.4 Hillocks and sinks .....	267
<b>Chapter 12 Mass-flow instability.....</b>	276
12.1 Passivation cracking.....	276
12.2 Voiding within interconnects.....	278
12.3 Open circuit failure for single crystal and bamboo lines .....	283
12.4 Open and short circuit failures for polycrystalline lines .....	291
<b>Concluding Remarks .....</b>	298
<b>Acknowledgements .....</b>	300
<b>References.....</b>	302
<b>Subject Indices .....</b>	319
