

ENVIRONMENTAL TOXICOLOGY

*Second
Edition*

Biological and Health Effects of Pollutants

Ming-Ho Yu

CRC PRESS

Contents

CHAPTER 1 INTRODUCTION	1
1.1 Study of Environmental Toxicology	1
1.2 Worldwide Development in Recent Decades	1
1.3 Environmental Pollution and Law	3
1.4 Importance of Environmental Toxicology	4
1.5 Toxicity Testing – A Brief Review	6
1.5.1 Introduction	6
1.5.2 The Dose–Response Relationship	7
1.6 References	10
1.7 Review Questions	10
CHAPTER 2 ENVIRONMENTAL CHANGE AND HEALTH	13
2.1 Our Changing Environment	13
2.1.1 Introduction	13
2.1.2 Global Climate Changes	13
2.1.3 Air Pollution	15
2.1.3.1 Introduction	15
2.1.3.2 Air Pollution and Developing Economies	16
2.1.4 Water Pollution	17
2.1.5 Soil Pollution	19
2.2 The Changing Disease Pattern	20
2.3 Examples of Environmental Diseases	22
2.3.1 Introduction	22
2.3.2 Cancer	22
2.3.3 Birth Defects	24
2.3.4 Reproductive Damage	24
2.3.5 Respiratory Diseases	25
2.3.6 Heavy-Metal Induced Diseases	27
2.4 References	28
2.5 Review Questions	30
CHAPTER 3 OCCURRENCE OF TOXICANTS	31
3.1 Introduction	31
3.2 Visible Smoke or Smog	31
3.3 Offensive Odors	32
3.4 Agricultural Damage	34

3.5	Intoxication of Animals	34
3.6	Injuries to Humans	35
3.7	Acute and Chronic Effects	36
3.7.1	Introduction	36
3.7.2	Acute Effects	36
3.7.2.1	Meuse Valley, Belgium, 1930	36
3.7.2.2	Donora, Pennsylvania, U.S., 1948	37
3.7.2.3	Poza Rica, Mexico, 1950	37
3.7.2.4	London, England, 1952	37
3.7.2.5	New York, U.S., 1953	37
3.7.2.6	Los Angeles, California, U.S., 1954	37
3.7.2.7	New Orleans, Louisiana, U.S., 1955	38
3.7.2.8	Worldwide Episode, 1962	38
3.7.2.9	Tokyo, Japan, 1970	38
3.7.2.10	Bhopal, India, 1984	39
3.7.2.11	Chernobyl, USSR, 1986	39
3.7.2.12	Prince William Sound, Alaska, U.S., 1989	41
3.7.2.13	Gas Well Accident, Gaoqiao, China, 2003	41
3.7.3	Chronic Effects	42
3.8	References	43
3.9	Review Questions	43

CHAPTER 4 TOXIC ACTION OF POLLUTANTS 45

4.1	Introduction	45
4.2	Plants	45
4.2.1	Sources of Pollution	45
4.2.2	Pollutant Uptake	45
4.2.3	Transport	47
4.2.4	Plant Injury	47
4.3	Mammalian Organisms	49
4.3.1	Exposure	49
4.3.2	Uptake	49
4.3.3	Transport	50
4.3.4	Storage	51
4.3.5	Metabolism	51
4.3.6	Excretion	51
4.4	Mechanism of Action	52
4.4.1	Disruption or Destruction of Cellular Structure	52
4.4.2	Chemical Combination with a Cell Constituent	53
4.4.3	Effect on Enzymes	53
4.4.3.1	Enzyme Inhibition by Inactivation of Cofactor	54
4.4.3.2	Enzyme Inhibition by Competition with Cofactor	55
4.4.3.3	Enzyme Inhibition by Binding to the Active Site	56
4.4.3.4	Enzyme Activity Depression by Toxic Metabolite	56

4.4.4	Secondary Action as a Result of the Presence of a Pollutant	57
4.4.4.1	Allergic Response to Pollen	57
4.4.4.2	Carbon Tetrachloride	58
4.4.4.3	Chelation	58
4.4.4.4	Metal Shift	59
4.4.5	Free-Radical-Mediated Reactions	59
4.4.6	Endocrine Disruption	60
4.5	References	62
4.6	Review Questions	63

CHAPTER 5 FACTORS AFFECTING XENOBIOTIC ACTION 65

5.1	Introduction	65
5.2	Physicochemical Properties	65
5.3	Dose or Concentration	65
5.4	Duration and Mode of Exposure	66
5.5	Environmental Factors	67
5.5.1	Temperature	67
5.5.2	pH	67
5.5.3	Humidity	68
5.6	Interaction	68
5.6.1	Synergism, Additive and Potentiation	68
5.6.2	Antagonism	69
5.7	Biological Factors	70
5.7.1	Plants	70
5.7.2	Animals and Humans	70
5.7.2.1	Genetic Factors	70
5.7.2.2	Developmental Factors	71
5.7.2.3	Diseases	71
5.7.2.4	Behavioral Factors	71
5.7.2.5	Gender	72
5.8	Nutritional Factors	72
5.8.1	Introduction	72
5.8.2	Fasting and Starvation	73
5.8.3	Proteins	73
5.8.4	Carbohydrates	75
5.8.5	Lipids	75
5.8.6	Vitamin A	76
5.8.7	Vitamin D	77
5.8.8	Vitamin E (α -tocopherol)	77
5.8.9	Vitamin C (Ascorbic acid)	78
5.8.10	Minerals	80
5.9	References	81
5.10	Review Questions	83

CHAPTER 6	BIOTRANSFORMATION – METABOLISM OF XENOBIOTICS	85
6.1	Introduction	85
6.2	Types of Biotransformation	85
6.3	Mechanism of Biotransformation	88
6.4	Characteristics of Biotransformation	89
6.5	Consequence of Biotransformation	90
6.5.1	Biotransformation of Endogenous Substances	90
6.5.2	Activation of Xenobiotics	91
6.6	Factors Affecting Biotransformation	93
6.7	Characteristics of the Cytochrome P450s	95
6.7.1	Induction	95
6.7.2	Genetic Polymorphisms	96
6.8	References	96
6.9	Review Questions	97
CHAPTER 7	DEFENSE RESPONSES TO TOXICANTS	99
7.1	Introduction	99
7.2	Responses of Humans and Animals	99
7.2.1	The Respiratory Tract	99
7.2.1.1	Nasopharynx	100
7.2.1.2	Tracheobronchial Areas	100
7.2.1.3	Alveoli	101
7.2.2	Gastrointestinal Tract	103
7.2.3	Membranes	104
7.2.4	Liver	105
7.2.5	Kidneys	105
7.3	Responses of Plants	108
7.4	References	109
7.5	Review Questions	109
CHAPTER 8	AIR POLLUTION – INORGANIC GASES	111
8.1	Introduction	111
8.2	Sulfur Dioxide	111
8.2.1	Sources of SO ₂	111
8.2.2	Characteristics of SO ₂	112
8.2.3	Effects on Plants	112
8.2.4	Effects on Animals	115
8.2.5	Health Effects	116
8.3	Nitrogen Dioxide	117
8.3.1	Forms and Formation of Nitrogen Oxides	117
8.3.2	Major Reactive N Species in the Troposphere	118
8.3.3	Effects on Plants	118

8.3.4	Health Effects	119
8.3.5	Biological Effects	120
8.4	Ozone	121
8.4.1	Sources	121
8.4.2	Photochemical Smog	122
8.4.3	Effects on Plants	123
8.4.4	Effects on Animals and Humans	124
8.4.5	Biological Effects	125
8.5	Carbon Monoxide	127
8.5.1	Introduction	127
8.5.2	Formation	128
8.5.3	Human Exposure	129
8.5.4	Health Effects	129
8.6	References	131
8.7	Review Questions	133

CHAPTER 9 AIR POLLUTION – PARTICULATE MATTER 135

9.1	Introduction	135
9.2	Characteristics	135
9.3	Formation of Particulates	136
9.3.1	Physical Processes	136
9.3.2	Chemical Processes	136
9.4	Health Effects	137
9.5	Silica	138
9.5.1	Silicosis	139
9.5.2	Pathogenesis	139
9.6	Beryllium	141
9.6.1	Sources of Exposure	141
9.6.2	Health Effects	142
9.6.3	Biological Effects	142
9.6.4	Therapy	142
9.7	Asbestos	143
9.7.1	Chemical and Physical Properties	144
9.7.2	Use	144
9.7.3	Exposure	144
9.7.4	Health Effects	145
9.8	References	146
9.9	Review Questions	147

CHAPTER 10 ENVIRONMENTAL FLUORIDE 149

10.1	Introduction	149
10.2	Occurrence and Forms of Fluoride	149
10.2.1	Introduction	149
10.2.2	Air	150

10.2.3	Natural Waters	150
10.2.4	Minerals and Soils	150
10.2.5	Foods	151
10.3	Industrial Sources of Fluoride Pollution	152
10.3.1	Introduction	152
10.3.2	Manufacture of Phosphate Fertilizers	152
10.3.3	Manufacture of Aluminum	153
10.3.4	Manufacture of Steel	153
10.3.5	Combustion of Coal	154
10.4	Effects on Plants	154
10.5	Effects on Animals	157
10.5.1	Introduction	157
10.5.2	Acute Effects	157
10.5.3	Chronic Effects	157
10.6	Effects on Humans	161
10.6.1	Daily Intake	161
10.6.2	Absorption	162
10.6.3	Acute Effects	162
10.6.4	Chronic Effects	162
10.7	Biochemical Effect	163
10.7.1	In Plants	163
10.7.2	In Animals and Humans	165
10.8	Nutritional Factors Affecting Fluoride Toxicity	167
10.9	References	168
10.10	Review Questions	170

CHAPTER 11 VOLATILE ORGANIC COMPOUNDS 171

11.1	Introduction	171
11.2	Sources	171
11.3	Petroleum Hydrocarbons	172
11.3.1	Alkanes	173
11.3.1.1	Properties and Use	173
11.3.1.2	Health Effects	174
11.3.2	Alkenes	174
11.3.2.1	Properties and Use	174
11.3.2.2	Health Effects	175
11.3.3	Aromatic Hydrocarbons	175
11.3.3.1	Benzene	175
11.3.3.2	Toluene	177
11.3.3.3	Xylenes	177
11.4	Polycyclic Aromatic Hydrocarbons	178
11.4.1	Introduction	178
11.4.2	Sources	178
11.4.3	Physical and Chemical Properties	179
11.4.4	Transport	179

11.4.5 Exposure	180
11.4.6 Metabolism	181
11.5 References	182
11.6 Review Questions	184

CHAPTER 12 SOIL AND WATER POLLUTION – ENVIRONMENTAL METALS AND METALLOIDS

185

12.1 Introduction	185
12.2 Lead	186
12.2.1 Characteristics and Use of Lead	186
12.2.2 Sources of Lead Exposure	186
12.2.2.1 Airborne Lead	186
12.2.2.2 Waterborne Lead	187
12.2.2.3 Lead in Food	188
12.2.2.4 Lead in Soils	188
12.2.3 Lead Toxicity	188
12.2.3.1 Lead Toxicity to Plants	188
12.2.3.2 Lead Poisoning in Animals and Fish	189
12.2.3.3 Health Effects of Lead in Humans	189
12.2.4 Biological Effects of Lead	191
12.2.5 Lead and Nutrition	192
12.3 Cadmium	194
12.3.1 Introduction	194
12.3.2 Characteristics and Use of Cadmium	194
12.3.3 Exposure to Cadmium	195
12.3.3.1 Airborne Cadmium	195
12.3.3.2 Waterborne Cadmium	195
12.3.3.3 Cadmium Pollution of Soils	196
12.3.3.4 Cadmium in Food	196
12.3.4 Metabolism of Cadmium	196
12.3.5 Cadmium Toxicity	197
12.3.5.1 Toxic Effects on Plants	197
12.3.5.2 Effects of Cadmium on Animals	198
12.3.5.3 Effects of Cadmium on Humans	199
12.3.6 Biological Effects of Cadmium	201
12.3.7 Cadmium and Nutrition	202
12.4 Mercury	203
12.4.1 Introduction	203
12.4.2 Extraction and Uses of Mercury	203
12.4.3 Sources of Mercury Pollution	204
12.4.4 Biotransformation of Mercury	204
12.4.4.1 Biomethylation of Mercury	205
12.4.4.2 Demethylation of Methylmercury	205

12.4.4.3	Methylmercury Biosynthesis and Diffusion into Cells	205
12.4.5	Toxicity of Mercury	206
12.4.5.1	Effects of Mercury on Algae	206
12.4.5.2	Effects of Mercury on Plants	206
12.4.5.3	Effects of Mercury on Animals	206
12.4.5.4	Effects of Mercury on Human Health	207
12.4.6	Biological Effects of Mercury	209
12.4.7	Mercury and Nutrition	210
12.5	Nickel	210
12.5.1	Introduction	210
12.5.2	Sources of Environmental Nickel Pollution	211
12.5.3	Health Effect of Nickel	211
12.6	Arsenic	213
12.6.1	Occurrence and Properties of Arsenic	213
12.6.2	Uses of Arsenic	214
12.6.3	Sources of Exposure to Arsenic	214
12.6.4	Human Exposure to Arsenic	215
12.6.5	Animal Exposure to Arsenic	215
12.6.6	Distribution of Arsenic in the Body	216
12.6.7	Toxicity of Arsenic	216
12.6.7.1	Toxicity to Plants	216
12.6.7.2	Toxicity of Arsenic to Animals and Humans	216
12.6.8	Biological Effects of Arsenic	218
12.7	References	220
12.8	Review Questions	224

CHAPTER 13 PESTICIDES AND RELATED MATERIALS 227

13.1	Introduction	227
13.2	Insecticides	227
13.2.1	Introduction	227
13.2.2	Chlorinated Hydrocarbons	228
13.2.2.1	Introduction	228
13.2.2.2	DDT	228
13.2.3	Organophosphorus Compounds	232
13.2.3.1	Introduction	232
13.2.3.2	Toxicity of Organophosphorus Compounds	233
13.2.3.3	Action of Acetylcholinesterase and Organophosphates	234
13.2.4	Carbamates	235
13.3	Herbicides	236
13.4	Polychlorinated Biphenyls	238
13.4.1	Introduction	238
13.4.2	Properties of PCBs	239
13.4.3	Uses of PCBs	239

13.4.4	Environmental Contamination by PCBs	239
13.4.4.1	Wildlife Exposure to PCBs	240
13.4.4.2	Human Exposure to PCBs	241
13.4.5	Metabolism of PCBs	241
13.4.6	Toxicity of PCBs	242
13.4.7	Biological Effects of PCBs	243
13.5	Polybrominated Biphenyls	244
13.5.1	Introduction	244
13.5.2	Chemistry of PBBs	244
13.5.3	Toxicity of PBBs	245
13.5.4	Biological Effects of PBBs	245
13.6	Dioxins	246
13.6.1	Introduction	246
13.6.2	Exposure to Dioxins	246
13.6.3	Toxicity of Dioxins	247
13.6.3.1	Toxicity of Dioxins in Animals	247
13.6.3.2	Toxicity of Dioxins in Birds	248
13.6.3.3	Toxicity of Dioxins in Humans	248
13.6.4	Gene Regulation by Dioxins	249
13.6.5	Environmental Degradation of TCDD	251
13.7	References	251
13.8	Review Questions	253

CHAPTER 14 ENDOCRINE DISRUPTION 255

14.1	Introduction	255
14.2	Review of Hormonal Function	255
14.3	Characteristics of Endocrine Disrupters	258
14.4	Mode of Action	260
14.5	Examples of Endocrine Disruption	261
14.5.1	Induction of Developmental Toxicity	262
14.5.2	Estrogen Mimics	262
14.5.3	Induction of Sterility	263
14.5.4	Antiandrogens	263
14.5.5	Induction of Imposex	264
14.5.6	Hypothyroidism	264
14.6	Hormonal Cancers	264
14.6.1	Introduction	264
14.6.2	Hormonal Cancers in Farmers	265
14.7	Testing Estrogenicity	266
14.8	References	266
14.9	Review Questions	267

CHAPTER 15	MUTAGENIC POLLUTANTS	269
15.1	Introduction	269
15.2	Types of Mutation	270
15.2.1	Chromosomal Aberrations	270
15.2.2	Gene Mutations	271
15.3	Effect of Mutations	271
15.4	Induction of Mutation	272
15.4.1	UV Light	272
15.4.2	Ionizing Radiations	273
15.4.3	Chemical Mutagens	274
15.4.3.1	Alkylating Agents	274
15.4.3.2	Intercalating Agents	275
15.4.3.3	Metals	275
15.5	References	277
15.6	Review Questions	278
CHAPTER 16	ENVIRONMENTAL CANCER	279
16.1	Introduction	279
16.2	Causes of Cancer	279
16.3	Stages in the Development of Cancer	281
16.4	Metastasis	283
16.5	Classification of Carcinogens	283
16.5.1	Radiation	283
16.5.2	Chemical Carcinogens	284
16.6	Metabolism of Chemical Carcinogens	285
16.6.1	Free Radicals	285
16.6.2	DDT	286
16.6.3	Vinyl Chloride	287
16.6.4	Alkylating Agents	287
16.6.5	Polycyclic Aromatic Hydrocarbons	289
16.6.5.1	Benzo[a]pyrene	289
16.6.6	Halogenated Aromatic Hydrocarbons	290
16.7	DNA Repair	292
16.8	References	292
16.9	Review Questions	294
CHAPTER 17	ECOLOGICAL RISK ASSESSMENT	295
17.1	Introduction	295
17.2	Basic Components of Risk Assessment	296
17.3	Use of Ecological Risk Assessment	296
17.4	Importance of Ecological Risk Assessment	297
17.5	Frameworks for Ecological Risk Assessment	298
17.5.1	Problem Formulation	298

17.5.2 Analysis	299
17.5.3 Risk Characterization	300
17.6 Usefulness of Ecological Risk Assessment Predictions	301
17.7 References	302
17.8 Review Questions	302
<i>Appendix 1 Glossary</i>	<i>303</i>
<i>Appendix 2 PCB Nomenclature</i>	<i>311</i>
<i>Appendix 3 Carcinogens Listed in the Tenth Report on Carcinogens, 2002</i>	<i>317</i>
<i>Appendix 4 A Case Study – United Heckathorn Assessment</i>	<i>323</i>
Index	327
