

STEAM PLANT OPERATION

Eighth Edition

EVERETT B. WOODRUFF
HERBERT B. LAMMERS
THOMAS F. LAMMERS

Contents

Preface	xiii
Chapter 1. Steam and Its Importance	1
1.1 The Use of Steam	2
1.2 The Steam-Plant Cycle	5
1.3 The Power Plant	7
1.4 Utility Boilers for Electric Power	12
1.4.1 Coal-Fired Boilers	14
1.4.2 Oil- and Gas-Fired Boilers	19
1.4.3 Steam Considerations	19
1.4.4 Boiler Feedwater	20
1.5 Industrial and Small Power Plants	20
1.5.1 Fluidized Bed Boilers	23
1.5.2 Combined Cycle and Cogeneration Systems	25
1.6 Power Plant Costs	28
1.7 Summary	31
Questions and Problems	31
Chapter 2. Boilers	35
2.1 The Boiler	35
2.2 Fundamentals of Steam Generation	37
2.2.1 Boiling	37
2.2.2 Circulation	38
2.2.3 Steam-Water Separation	40
2.3 Fire-Tube Boilers	40
2.4 Water-Tube Boilers	46
2.5 Steam-Water Separation	56
2.6 Principles of Heat Transfer	60
2.7 Superheaters	61
2.8 Superheat Steam Temperature Control	65
2.8.1 Attemperation	65
2.8.2 Flue Gas Bypass	66
2.8.3 Flue Gas Recirculation	66
2.9 Heat-Recovery Equipment	67
2.10 Furnace Design Considerations	75

2.11	Furnace Construction	75
2.12	Industrial and Utility Boilers	84
2.13	Considerations for Coal Firing	97
2.13.1	Spreader Stokers	98
2.13.2	Pulverized-Coal Firing	98
2.13.3	Stoker versus Pulverized-Coal Firing	99
2.14	Pressurized versus Balanced-Draft Boiler Designs	100
2.15	Fluidized Bed Boilers	101
2.15.1	The Process	102
2.15.2	Comparison with Pulverized-Coal and Stoker Firing	102
2.15.3	Advantages of Fluidized Bed Combustion	103
2.15.4	Descriptions of Fluidized Bed Boilers	104
2.15.5	Emissions Control with Fluidized Bed Boilers	118
2.15.6	Bed Material	119
2.15.7	Heat Transfer	119
2.16	Modern Coal-Fired Plants—Summary	120
2.17	Process Steam and Its Application	121
2.18	Combined Cycle and Cogeneration Systems	122
2.19	Nuclear Steam Generation	128
	Questions and Problems	136
Chapter 3. Design and Construction of Boilers		139
3.1	Materials Used in Boiler Construction	140
3.2	Stresses in Tubes and Drums	143
3.3	Drum Construction	148
3.4	Welded Construction	150
3.5	Structural Support Components	155
3.6	Manholes, Handholes, and Fittings	157
3.7	Boiler Assembly	158
3.8	Heating Surface and Capacity	160
3.9	Boiler Capacity Calculation	164
	Questions and Problems	171
Chapter 4. Combustion of Fuels		175
4.1	The Combustion Process	175
4.2	The Theory of Combustion	179
4.3	The Air Supply	192
4.4	Coal	198
4.5	Fuel Oil	214
4.6	Gas	220
4.7	By-Product Fuels	222
4.8	Control of the Combustion Process	225
	Questions and Problems	231
Chapter 5. Boiler Settings, Combustion Systems, and Auxiliary Equipment		235
5.1	Boiler Settings	235
5.2	Hand Firing	238

5.3	Stokers	240
5.3.1	Underfeed Stokers	241
5.3.2	Overfeed Stokers	251
5.4	Pulverized Coal	273
5.4.1	Contact Mills	277
5.4.2	Ball Mills	284
5.4.3	Impact Mills	285
5.4.4	Mill Feeders	286
5.4.5	Gravimetric Feeders	288
5.4.6	Burners	290
5.4.7	Lighters	296
5.4.8	Flame Safety System	296
5.4.9	Operation	298
5.5	Fuel Oil	305
5.5.1	Steam- or Air-Atomizing Burners	309
5.5.2	Pressure-Type Burners	310
5.5.3	Oil Burning Characteristics	312
5.6	Gas	318
5.7	Oil- and Gas-Firing Safety Precautions	322
5.8	Automatic Operation of Boilers	323
5.9	Stacks	327
5.10	Mechanical Draft: Fans	331
5.11	Steam and Air Jets	340
5.12	Flues and Ducts	341
5.12	Ash Handling Systems	341
	Questions and Problems	345
Chapter 6. Boiler Accessories		351
6.1	Water Columns	351
6.2	Pressure Measurement	359
6.3	Temperature Measurement	362
6.4	Feedwater Regulators	362
6.5	Safety Valves	369
6.6	Blowdown Equipment	382
6.7	Nonreturn Valves	387
6.8	Steam Piping	390
6.9	Sootblowers	391
6.10	Valves	399
6.11	Instruments and Automatic Control Systems	403
	Questions and Problems	416
Chapter 7. Operation and Maintenance of Boilers		419
7.1	Boiler Startup	420
7.2	Normal Operation	423
7.2.1	Combustion Control	424
7.2.2	Ash Handling	425
7.2.3	Water Supply	426
7.2.4	Boiler Efficiency	439
7.2.5	Insulation and Lagging	443

7.3	Operating Characteristics of Fluidized Bed Boilers	443
7.3.1	Circulating Fluid Bed (CFB) Boilers	444
7.3.2	Bubbling Fluid Bed (BFB) Boilers	445
7.4	Abnormal Operation	446
7.5	Idle Boilers	450
7.6	Maintenance	454
7.7	Boiler Internal Inspection	462
7.8	Evaluating the Condition of a Boiler	465
7.9	Making Repairs	468
7.10	Inspection and Maintenance Requirements of Heat Recovery Steam Generators (HRSGs)	470
	Questions and Problems	472
Chapter 8. Pumps		477
8.1	Pumps	478
8.2	Injectors	479
8.3	Duplex Pumps	481
8.4	Power Pumps	489
8.5	Vacuum Pumps	492
8.6	Rotary Pumps	493
8.7	Centrifugal Pumps	497
8.8	Facts about Fluids and Pumping	509
8.9	Factors Affecting Pump Operation	512
8.10	Considerations for Pump Selection	513
8.11	Pump Installation and Operation	514
8.12	Pump Testing and Calculations	517
8.13	Pump Maintenance	523
	Questions and Problems	530
Chapter 9. Steam Turbines, Condensers, and Cooling Towers		533
9.1	Steam Turbines	533
9.1.1	Turbine Types and Applications	539
9.1.2	Turbine Stage Design	546
9.1.3	Major Components of a Turbine	547
9.2	Turbine Design and Construction	553
9.2.1	Thrust Bearing	563
9.2.2	Packing	565
9.2.3	Governors	567
9.2.4	Lubrication	573
9.2.5	Turbine Control	574
9.2.6	Erection of the Steam Turbine	577
9.2.7	Relief Valves and Rupture Disks for Turbines	579
9.2.8	Turbine Piping	581
9.3	Electric Generators	582
9.4	Condensers	585
9.4.1	Surface Condensers	586
9.4.2	Air-Cooled Condensers	589
9.4.3	Condenser Materials and Construction	590

9.5	Cooling Towers	593
9.5.1	Types of Cooling Towers	594
9.5.2	Design Considerations	602
9.5.3	Materials of Construction	603
9.6	Condenser Auxiliaries	603
	Questions and Problems	607
Chapter 10. Operating and Maintaining Steam Turbines, Condensers, Cooling Towers, and Auxiliaries		611
10.1	Turbines	611
10.1.1	Turbine Operation	617
10.1.2	Turbine Maintenance	621
10.1.3	Turbine Performance	627
10.2	Condensers	628
10.2.1	Surface Condenser Operation	628
10.2.2	Surface Condenser Maintenance	630
10.2.3	Air-Cooled Steam Condenser Operation	632
10.3	Cooling Towers	633
10.3.1	Operation of Cooling Towers	635
10.3.2	Maintenance of Cooling Towers	639
10.4	Auxiliaries	639
10.4.1	Traveling Screens	639
10.4.2	Pumps	641
10.4.3	Steam-Jet Ejectors and Vacuum Pumps	642
10.4.4	Vacuum Gauges	642
	Questions and Problems	643
Chapter 11. Auxiliary Steam-Plant Equipment		647
11.1	Condensate System	649
11.2	Feedwater Heaters	650
11.2.1	Closed Feedwater Heaters	651
11.2.2	Open Feedwater Heaters (Deaerators)	654
11.2.3	Operation and Maintenance of Feedwater Heaters	667
11.3	Condensate Polishing Systems	668
11.4	Raw Water Treatment	670
11.4.1	Ion-Exchange Water Conditioners	671
11.4.2	Evaporators	675
11.5	Boiler Blowdown	677
11.6	Piping System	680
11.7	Steam Traps	689
11.8	Pipeline Separators and Strainers	695
11.9	Lubricants and Lubricating Devices	698
	Questions and Problems	705
Chapter 12. Environmental Control Systems		709
12.1	Introduction	709
12.2	Environmental Considerations	709
12.3	Sources of Plant Emissions	710

12.4	Available Technologies for the Control of Emissions	712
12.4.1	SO ₂ Control	712
12.4.2	NO _x Control	713
12.4.3	Particulate Control	714
12.5	Regulatory Requirements	715
12.6	Particulate and Sulfur Dioxide Removal Requirements	716
12.6.1	Particulate Removal	716
12.6.2	Sulfur Dioxide Removal	718
12.6.3	Industrial Boilers	719
12.7	Equipment for Particulate Emission Control	720
12.7.1	Mechanical Collectors	720
12.7.2	Electrostatic Precipitators	722
12.7.3	Bag Filterhouses	729
12.8	Equipment for Sulfur Dioxide Scrubber Systems	735
12.8.1	Wet Scrubbers	736
12.8.2	Dry Scrubbers	741
12.9	Systems for Control of Nitrogen Oxides (NO _x)	751
	Questions and Problems	752
Chapter 13. Waste-to-Energy Plants		755
13.1	Introduction	755
13.2	Waste Disposal—A Worldwide Problem	759
13.3	Potential Energy from MSW	761
13.4	Landfills	762
13.5	Solid Waste Composition	763
13.6	Types of Energy-Recovery Technologies	767
13.7	Mass Burning	768
13.8	Refuse-Derived Fuel (RDF) Burning	778
13.9	Operation and Maintenance of Refuse Boilers	784
13.10	Recycling	788
13.10.1	Advantages and Disadvantages of Recycling	789
13.10.2	Economics and Quality Products from Recycling	791
13.11	Material Recovery Facilities (MRFs)	792
13.12	Waste-to-Energy Plants and Recycling	799
	Questions and Problems	800
Appendix A Unit Conversions		803
Appendix B Geometric Formulas		809
Appendix C Steam Tables and Charts		811
Appendix D Answers to Problems		825
Glossary		829
Index	839
