

Administrator's Advantage Series

The
**Real-World Network
Troubleshooting
Manual**

*Tools, Techniques,
and Scenarios*

- Discusses real-world scenarios, from basic to advanced, including what to do if Windows services don't start, servers drop out from the network, workstations drop off of the network, or inbound external e-mail stops working
- Features proven, field-tested, troubleshooting techniques that can help you fix your network and prevent problems from happening in the first place
- Teaches the skills needed to go from basic network administrator to troubleshooting guru
- Includes a companion CD-ROM with Symantec's troubleshooting tools, all the Web links from the book, and other troubleshooting resources

Preface	xix
1 An Introduction to Troubleshooting	1
Chapter Preview	1
Basic Troubleshooting Tips	2
Problem Isolation	2
Cut the Problem in Half—A Binary Search Example	3
General Troubleshooting Rules	10
Don't Make a Bad Situation Worse	10
Be Conservative	11
Be Mindful of Downtime Costs	12
Isolate the Problem	12
Try the Latest Drivers	12
Update the Firmware	12
Don't Upgrade over an Existing Operating System	13
Ask, "What's Changed?"	13
When You Become Stuck, Retrace Your Steps	14
Verify the Obvious	14
Don't Become Discouraged	14
Be Persistent	14
Try Something Else	15
Try One Solution at a Time	15
Always Work Toward Building Critical Mass	15
Don't Panic	16
Walk Away from the Problem for a While	16
The More Painful the Experience, the Less Likely You Will	
Forget the Solution	17
Realize that Troubleshooting Can Be Very Scary	17
Take Good Notes	17

Know When You're In Over Your Head	18
Know What to Do When You Don't Know What to Do	18
Sometimes You Have to Punt, but Only as a Last Resort	18
Practice Your Troubleshooting Skills Regularly	19
Document the Solution	20
Use Good Hardware	20
Contacting Technical Support	20
Chapter Summary	21
Review Questions	23
2 Network Printing	25
Chapter Preview	25
Printer Sizing	26
Dedicated Print Servers	28
Queue Configuration	28
Installation of Additional Printer Drivers	29
Web-Based Printing	30
Garbled Printing	32
Troubleshooting Scenarios	34
Scenario 1: A Network Printer Cannot Be Added on Windows XP	35
Scenario 2: Users Are Unable to Print to a Network Printer	36
Scenario 3: Users Cannot Print to Network Printers	38
Scenario 4: Users Receive a "Printer Installation Failed" Error Message When Attempting to Install a Printer from Their Web Browsers	40
Chapter Summary	41
Review Questions	42
3 Workstation Troubleshooting	45
Chapter Preview	45
Troubleshooting Categories	46
Troubleshooting the Windows Operating System	47
Basic Workstation Network Troubleshooting Tools	48
Ping/Pathping	48
Ipconfig(NT, 2000, XP)/WinIPCfg(Win 9X)	52
IPConfig /flushdns and IPConfig /registerdns	53
Troubleshooting Scenarios	54
Scenario 1: Workstation Cannot Connect to Windows Server	54

Scenario 2: Workstation Cannot Connect to Windows Server	58
Scenario 3: Workstations Drop Off the Network	61
Scenario 4: Workstation Cannot Use Resources on Windows 2000 Server	66
Scenario 5: Workstation Cannot Connect to the Network Server	71
Scenario 6: Workstation Cannot Connect to the Network Server	73
Scenario 7: Workstation Takes a Long Time to Log in to the Server	77
Scenario 8: Workstation Is Unable to Surf the Internet	81
Scenario 9: Workstation Is Generally Unstable	82
Scenario 10: Unable to Add a Networked HP2000C Printer to a Windows XP Workstation	84
Scenario 11: In Outlook 2002, Typing a Partial Name in the To: Field Defaults to the Wrong User	86
Scenario 12: User Is Unable to Install NAV Corporate Edition on a Workstation	88
Chapter Summary	89
Review Questions	90
4 Windows Server Troubleshooting	93
Chapter Preview	93
Server Hardware	94
Disk Configuration	95
Memory	98
Processor	98
Uninterruptible Power Supply (UPS)	99
Server Software	100
Operating System	100
Disk Partitions	100
i386 Setup Files and Service Pack Integration	100
Terminal Server in Remote Administration Mode	101
Domain Controllers	102
DNS Configuration	102
IP Addresses and DHCP Servers	105
Virus Protection	106
Server Backup	106
Server Problem Categories	108
Server Troubleshooting Tools	109
Server Event Viewer	109

Task Manager	109
Performance Monitor	110
Server Recovery Tools When the Server Doesn't Start	122
Windows Server Startup Disk	122
Safe Mode	123
Last Known Good Configuration	124
Recovery Console	124
Restoring a Windows Server	133
Troubleshooting Scenarios	134
Scenario 1: Data Fabric Server Does Not Boot	134
Scenario 2: Unable to Access Files from a Windows 2003 Server	136
Scenario 3: Inaccessible Boot Device Error Stop 0000007B	142
Scenario 4: After a Complete System Restore, net view, net use, and Browsing My Network Places Do Not Work (Continuation from Scenario 3)	146
Scenario 5: Server Disappears and Reappears in My Network Places	149
Scenario 6: Users Cannot Connect to the Server	151
Scenario 7: Users Complain of Slow Server Performance	154
Scenario 8: SCSI Bus Timeout Errors on HP DLT 70 Tape Drive	155
Chapter Summary	157
Review Questions	158
5 SQL Server 2000 Troubleshooting	159
Chapter Preview	159
SQL Server Basics	160
SQL Server Versions	161
Hardware Selection	161
SQL Server Structure	162
Physical File Location for Databases	163
Connecting to SQL Server	164
Backup/Maintenance of SQL Server	166
Backup Types	166
Backup Strategy	167
Differential versus Transaction Log Backups	167
Database Maintenance Plans	168
Best Practices Analyzer	169
SQL Server Security	169
Database Administrators	171

Troubleshooting Scenarios	171
Scenario 1: Users Cannot Access the SQL Server	171
Scenario 2: Poor Performance on the SQL Server	176
Scenario 3: SQL Server Runs Especially Slow When Restarted, and Has Poor Overall Performance	177
Scenario 4: Access Application Cannot Update Records on SQL Server 2000	179
Chapter Summary	181
Review Questions	182
6 Exchange Server Troubleshooting	183
Chapter Preview	183
Exchange Databases	184
EDB Files	184
STM Files	184
Log Files	184
16-GB Database Limitation for the Standard Version of Exchange	185
Exchange 2000/2003 Enterprise Edition:	
Distribute the Mail Store Across Several Physical Databases	186
Exchange Server Performance	186
Monitor Disk Space	186
Proper Exchange Server Placement	187
Exchange Server Placement on a WAN	187
Exchange Clustering	187
Back It Up!	188
Virus Protection	188
Exchange Server and Internet Mail	189
Register Your Domain	189
Mail Exchange (MX) Records	189
Internet Mail Connector in Exchange 5.5	190
Firewall Configuration	190
Telnet to Exchange Server on Port 25 for Testing	190
Setup Authoritative Name Servers	190
Spam	191
Anti-Spam Filtering	191
Is Your Exchange Server an Open Relay?	192
What If My Server Is Marked as an Open Relay?	192
Outlook Web Access	193

Install Secure Sockets Layer Certificate on OWA	194
OWA Architecture	194
Firewall Configuration	196
OWA with an SSL Proxy	196
Make Sure Your Firewall Supports WebDAV for Exchange 2000/2003	198
Troubleshooting Scenarios	199
Scenario 1: Exchange Server Is Running Very Slow	199
Scenario 2: Exchange 2000 Server Unable to Deliver Mail to Specific Domains	204
Scenario 3: Windows 2003 Server Event Viewer Displays Event 9582	208
Scenario 4: Exchange Is Unable to Receive Internet Mail	210
Scenario 5: Users Are Unable to Open Their Messages on Exchange 2003	212
Scenario 6: Users Cannot Send Scheduling Information to Each Other	216
Scenario 7: Outlook Web Access Inbox Is Empty	218
Scenario 8: Exchange Server Is Unavailable	219
Scenario 9: Public Folders Do Not Fully Replicate On Exchange 2000 Server	221
Chapter Summary	222
Review Questions	223
7 Wide Area Networks and IP Routing	225
Chapter Preview	225
TCP/IP Basics	226
Address Format	226
Reserved Addresses	226
Subnet Mask	227
Default Gateway	227
DNS Servers	228
Selecting a WAN Topology and Carrier	228
Types of WAN Connections	228
WAN Considerations	230
Active Directory	231
Global Catalog Servers	231
Active Directory Sites and Services and Site Replication	231
Increase Remote Application Performance with Terminal Server	238
IP Routing	240
Static versus Dynamic Routing	240
Static Route Example	241

Troubleshooting Routes Using Windows Computers	242
Using Windows Server as a Router	245
Cisco Routers	246
Connecting to the Router	246
Setting Passwords	247
Recover a Lost Password	247
Basic Commands	247
Document the Router Configuration	247
Making Remote Changes	248
Cisco 2600 Frame Relay Router Configuration	248
Troubleshooting Cisco Routers with the show Command	253
WAN Documentation	253
Troubleshooting Scenarios	254
Scenario 1: Users In Los Angeles Have Difficulty Accessing Servers In Chicago and New York	254
Scenario 2: New User Is Unable to Access Exchange Mailbox	257
Scenario 3: Users Are Unable to Access Remote Servers	259
Scenario 4: Users Are Unable to Access Company Web Site	260
Chapter Summary	263
Review Questions	263
8 Wireless Networking	265
Chapter Preview	265
Wireless Standards	266
Wireless Authentication Methods	267
No Authentication	267
Media Access Control Address	267
Wired Equivalent Privacy (WEP) Key Authentication	267
Remote Authentication Dial-In User Service (RADIUS) Authentication	267
RADIUS Authentication with Certificates or Smart Cards	268
Wireless Encryption	268
No Encryption	268
WEP	268
Wireless Virtual Private Network	269
Cisco's Lightweight Extensible Authentication Protocol (LEAP) or Extensible Authentication Protocol- Transport Layer Security (EAP-TLS)	269
Wi-Fi Protected Access	269

Purchasing AP Equipment	269
Preparing the Wireless Network Infrastructure	270
Perform a Site Survey	270
Plan Your Public Key Infrastructure	270
Decide on the Authentication Method for Your Wireless Clients	270
WLAN Diagram	271
Set Up the Certificate Server	272
Issue Computer Certificates	278
Install User Certificates	281
Install and Configure IAS (RADIUS)	287
Configure Wireless Access with Group Policy	293
Configure APs to Work with IAS Server	296
Client-Side Setup	297
Wireless Clients and Windows Firewall	298
Wireless Client Configuration on Windows XP	298
Upgrading the Firmware on a Cisco AP1200	298
Troubleshooting Steps for Wireless Clients	306
Setting Up WPA for Home Users	308
Configure the Cisco AP1200	308
Configure the Windows XP Workstation	311
Wireless Tools	313
NetStumbler	313
WEPCracking Tools	313
Troubleshooting Scenarios	313
Scenario 1: Internet Connection Running Very Slow	313
Scenario 2: Hacker Attacks Web Site	315
Scenario 3: Wireless Users Cannot Connect to the Network	317
Scenario 4: Unable to Flash the Cisco AP1200 Using HTTP	319
Scenario 5: Unable to Authenticate to Cisco AP1200 Using WPA	
With Pre-shared Key (PSK)	320
Chapter Summary	322
Review Questions	322
9 Firewall Troubleshooting	325
Chapter Preview	325
Are Firewalls Necessary?	326
Firewall Topology	327
Selecting the Proper Firewall	328

Packet Filtering versus Stateful Inspection Firewalls	328
Packet Filtering versus Stateful Inspection—An Analogy	329
Number of Ports	329
Number of Users	330
Traffic Load	330
Virtual Private Network (VPN) Traffic	330
Fault Tolerance	330
Proper Configuration	331
Dangerous Ports for Windows	331
Firewall Maintenance	333
Stay Current with Patches/Firmware	333
Review the Logs on a Regular Basis	333
Firewall Backup	334
Run Port Scans on a Regular Basis	334
Have a Hacking Recovery Plan In Place	334
Basic Firewall Troubleshooting Tools	337
Firewall Log Files	337
Syslog Servers	338
Troubleshooting Scenarios	338
Scenario 1: Unable to Access Online Banking Site	338
Scenario 2: Unable to Access the Internet	341
Scenario 3: Users Are Unable to Connect to the Internet	343
Scenario 4: Problems with a SonicWALL Pro 4060	346
Scenario 5: PIX Firewall Scrambles Rules	350
Chapter Summary	354
Review Questions	354
10 Virtual Private Network Troubleshooting	357
Chapter Preview	357
What Is a VPN?	358
VPN Limitations	359
Video Conferencing and Voice over IP (VoIP)	360
Implementing a VPN	361
What's Required for a VPN?	361
Expected Throughput	361
Fully Meshed Network	361
VPN Topology for Remote Users	362
Ordering Internet Services—Get Static IP Addresses	363

ISP Blocking VPNs?	363
Cross-Vendor Firewall VPNs?	363
Fixed versus Dynamic IP Addresses	364
Mobile Client Software	364
Defining the VPN Connection on the Firewall	365
Setting up a VPN with a Dynamic IP Address on One Side	367
VPN Troubleshooting Tools	368
Firewall Log	368
Troubleshooting Scenarios	368
Scenario 1: VPN Going Up and Down	369
Scenario 2: VPN Tunnel Goes Down	370
Scenario 3: Two Mobile Clients on Same Laptop	372
Scenario 4: Cannot Establish a VPN With a Dynamic IP Address	374
Scenario 5: Unable to Communicate Across a VPN	378
Scenario 6: Unable to Communicate Across a VPN	376
Chapter Summary	382
Review Questions	382
Appendix A: Answers to Review Questions	385
Appendix B: About the CD-ROM	387
Index	389
