

COMPUTER NETWORKING

Stanford H. Rowe
Marsha L. Schuh

CONTENTS

PART ONE INTRODUCTION

2

Chapter 1 Introduction and Overview

4

- 1-1 Introduction 5
- 1-2 Why Study Networks? 6
- 1-3 The Scope of This Book 7
- 1-4 Introductory Terminology 8
 - Definition of Communications* 8
 - Definition of Telecommunications* 9
 - Definition of Network* 9
 - Acronyms* 9
- 1-5 Basic Elements of a Network 10
- 1-6 A Brief History of Telecommunications Networks 12
 - The Telegraph Network* 12
 - Early Telephone Networks* 13
 - Early Teleprinting Services* 13
 - Radio Teleprinting* 16
 - The Telephone Network* 16
 - Analog and Digital Telephone Services* 17
- 1-7 Contemporary Examples of Networks 19
- SUMMARY 20
- REVIEW QUESTIONS 20
- PROBLEMS AND PROJECTS 9
- CASE STUDY: Communicating with Employees 24

- 2-1 Introduction 27
- 2-2 Definition of Network 27
- 2-3 Networks Classified by Geography 28
 - Local Area Networks (LANs)* 28
 - Wide Area Networks (WANs)* 29
 - Metropolitan Area Networks (MANs)* 29
- 2-4 Networks Classified by Topology 31
 - Star Networks* 31
 - Hierarchical Networks* 32
 - Mesh Networks* 33
 - Bus Networks* 33
 - Ring Networks* 34
- 2-5 Networks Classified by Ownership 35
 - Private Networks* 35
 - Public Networks* 36
- 2-6 Other Types of Networks 36
 - Value Added Networks (VANs)* 36
 - Wireless Networks* 37
 - Backbone Networks* 37
- 2-7 Voice Networks 37
 - The Public Switched Telephone Network (PSTN)* 37
 - Private Voice Networks* 40
- 2-8 Hybrid Networks 40
- 2-9 Interconnecting Networks 41
- SUMMARY 42
- REVIEW QUESTIONS 42
- PROBLEMS AND PROJECTS 45
- CASE STUDY: Grove and Howe, CPA 46

- 3-1 Introduction 49
- 3-2 Definition of Architectures and Standards 49
- 3-3 Why Have Network Architectures? 50
- 3-4 Two Viewpoints About Standards 52
- 3-5 Standards and Standards-Making Organizations 53
- 3-6 The V. and X. Standards 55
- 3-7 Advantages and Disadvantages of Standards 56
- 3-8 Communications Architectures 57
- 3-9 The ISO's OSI Reference Model 57
 - Objectives* 57
 - The Seven Layers of the OSI Model* 59

3-10	TCP/IP Architecture	61
3-11	The Architecture of the Internet	63
3-12	Manufacturers' Architectures	64
3-13	A Caveat About Architectures and Standards	64
3-14	Advantages and Disadvantages of Layered Architectures	65
	SUMMARY	66
	REVIEW QUESTIONS	66
	PROBLEMS AND PROJECTS	69
	CASE STUDY: Standardizing the Network Architecture	70

Chapter 4 Introduction to Protocols

72

4-1	Introduction	73
4-2	A Definition and the Need for Protocols	73
4-3	A Simple Protocol Suite	74
4-4	Protocol Layers	75
4-5	Protocol Functions	77
	<i>Encapsulation</i>	77
	<i>Fragmentation and Reassembly</i>	77
	<i>Connection Control</i>	78
	<i>Ordered Delivery</i>	79
	<i>Flow Control</i>	79
	<i>Error Control</i>	79
	<i>Addressing</i>	80
	<i>Multiplexing</i>	80
	<i>Transmission Services</i>	80
4-6	Transport Protocols	81
4-7	Data Link Protocols	81
	SUMMARY	82
	REVIEW QUESTIONS	82
	PROBLEMS AND PROJECTS	86
	CASE STUDY: Telecommunications Without Layers	86

PART TWO DATA COMMUNICATIONS

88

Chapter 5 Data Coding

90

5-1	Introduction	91
5-2	Two-State Phenomena	91
5-3	Data Coding	91
5-4	Machine Codes	92
5-5	Parity Checking	94
5-6	Escape Mechanisms	94

5-7	Specific Codes	95
	<i>American National Standards Institute (ASCII)</i>	95
	<i>Extended Binary Coded Decimal Interchange Code (EBCDIC)</i>	96
	<i>Unicode</i>	96
	<i>Other Coding Systems</i>	98
5-8	Code Efficiency	98
5-9	Code Conversion	98
5-10	Data Compression/Compaction	99
	<i>Character Compression/Huffman Coding</i>	100
	<i>Run Length Encoding</i>	100
	<i>Character Stripping</i>	100
	SUMMARY	101
	REVIEW QUESTIONS	101
	PROBLEMS AND PROJECTS	105
	CASE STUDY: Computers in a University Library	105

Chapter 6 Data Communication Fundamentals 108

6-1	Introduction	100
6-2	Definitions of Analog and Digital	110
6-3	Analog Signals	110
	<i>Signal Frequency</i>	111
	<i>Bandwidth</i>	112
	<i>Signal Amplitude</i>	112
	<i>Signal Phase</i>	116
6-4	Attributes of Voice Signals	116
6-5	Frequency Division Multiplexing (FDM)	117
6-6	Modulation	117
6-7	Circuit Signaling Rate	118
6-8	Circuit Speed	119
6-9	Digital Signals	120
6-10	Signal and Transmission Combinations	122
	<i>Analog Transmission of Analog Signals</i>	123
	<i>Digital Transmission of Analog Signals</i>	123
	<i>Digital Transmission of Digital Signals</i>	125
	<i>Analog Transmission of Digital Signals</i>	126
6-11	Modems	126
	<i>Phase Modulation (PM)</i>	130
	<i>Quadrature Amplitude Modulation (QAM)</i>	132
	<i>Trellis Code Modulation (TCM)</i>	133
	<i>V.32 and V.32bis Modem Standards</i>	134
	<i>V.33 Modem Standard</i>	135
	<i>V.34 and V.34bis Modem Standards</i>	135
	<i>V.90 Modem Standard</i>	135

	<i>V.92 Modem Standard</i>	136
	<i>Modem Data Compression</i>	137
	<i>Higher Speeds</i>	138
	<i>Modems for Fiber-Optic Circuits</i>	138
	<i>Cable Modems</i>	139
	<i>Null Modems</i>	139
6-12	DTE-DCE Interface Standards	140
	<i>RS-232-C</i>	140
	<i>RS-232-D</i>	142
	<i>RS-449</i>	143
	<i>RS-336</i>	143
	<i>X.21 and X.21bis</i>	143
	<i>Current Loop</i>	144
6-13	Why Digital Transmission Is Superior	144
6-14	Other Ways of Classifying Transmission	146
	<i>Type of Signal Transmitted: Baseband and Broadband</i>	146
	<i>Data Flow</i>	146
	<i>Type of Physical Connection</i>	147
	<i>Timing</i>	148
6-15	Spread Spectrum Transmission	150
	SUMMARY	152
	REVIEW QUESTIONS	152
	PROBLEMS AND PROJECTS	155
	CASE STUDY: Eckles, Feinman, and Mackenzie—Part 1	156

Chapter 7 Data Link Control Protocols **158**

7-1	Introduction	160
7-2	Data Link Protocol Functions	160
7-3	Desirable Attributes of Data Link Protocols	161
7-4	Protocol Implementation	161
7-5	Predetermined Communications Parameters	161
7-6	Protocol Concepts: A General Model	162
7-7	Line Access	162
	<i>Contention</i>	162
	<i>Polling</i>	162
	<i>Token Passing</i>	163
7-8	Message Format	163
7-9	Flow Control	164
	<i>Stop-and-Wait Flow Control</i>	165
	<i>Sliding Window Flow Control</i>	165
7-10	Asynchronous Data Link Protocols	166
	<i>Point-to-Point Protocol (PPP)</i>	167
	<i>The XMODEM Protocol</i>	168
	<i>Other Asynchronous Protocols</i>	168

7-11	Synchronous Data Link Protocols	169
	<i>Character-Oriented Protocols</i>	169
	<i>Byte-Count-Oriented Protocols</i>	169
	<i>Bit-Oriented Protocols</i>	170
	<i>The Binary Synchronous Communications (BSC) Protocol (BISYNC)</i>	170
	<i>The Digital Data Communications Message Protocol (DDCMP)</i>	173
	<i>The High-Level Data Link Control (HDLC) Protocol</i>	175
7-12	Other Data Link Protocols	181
	<i>Link Access Procedure, Balanced (LAPB)</i>	181
	<i>Link Access Procedure, D-Channel (LAPD)</i>	181
	<i>Link Access Procedure for Frame-Mode Bearer Services (LAPF)</i>	181
	<i>Asynchronous Transfer Mode (ATM)</i>	181
7-13	Protocol Conversion	181
	SUMMARY	182
	REVIEW QUESTIONS	183
	PROBLEMS AND PROJECTS	186
	CASE STUDY: Eckles, Feinman, and MacKenzie—Part 2	187

Chapter 8 Transmission Media

188

8-1	Introduction	188
8-2	Conducted Media	189
	<i>Unshielded Twisted Pair Wire</i>	190
	<i>Shielded Twisted Pair Wire</i>	193
	<i>Coaxial Cable</i>	194
8-3	Optical Fiber	195
8-4	Wireless Media	200
	<i>Microwave Radio</i>	200
	<i>Satellite</i>	201
	<i>Infrared</i>	205
	<i>Free Space Optics (FSO)</i>	205
8-5	Wireless Communications for LANs	205
8-6	Summary of Media Characteristics	206
	SUMMARY	207
	REVIEW QUESTIONS	207
	PROBLEMS AND PROJECTS	211
	CASE STUDY: Burkhardt Vacuum and Sewing Machine	212

Chapter 9 Communications Circuits

214

9-1	Introduction	216
9-2	Communications Circuits	216
9-3	The Environment in Which Circuits Operate	217
9-4	Types of Circuits	217
	<i>Point-to-Point Circuits</i>	217

	<i>Multipoint Circuits</i>	218
	<i>Two-Wire and Four-Wire Circuits</i>	218
	<i>Analog Circuits</i>	219
	<i>Digital Circuits</i>	219
	<i>T-Carrier Systems</i>	220
	<i>Fractional T-1</i>	221
	<i>Digital Subscriber Line (DSL)</i>	221
	<i>Cable TV (CATV) Circuits</i>	223
	<i>Satellite Circuits</i>	223
9-5	<i>Circuit Acquisition and Ownership</i>	224
	<i>Private Circuits</i>	224
	<i>Leased Circuits</i>	224
9-6	<i>Circuit Switching</i>	225
9-7	<i>Packet Switching</i>	227
	<i>Connection Types</i>	228
9-8	<i>Multiplexing</i>	228
	<i>Time Division Multiplexing (TDM)</i>	229
	<i>Statistical Time Division Multiplexing (STDM)</i>	230
	<i>Concentration</i>	231
	<i>Inverse Concentration</i>	231
9-9	<i>Circuit Error Conditions</i>	232
	<i>Background Noise</i>	232
	<i>Impulse Noise</i>	232
	<i>Attenuation</i>	232
	<i>Attenuation Distortion</i>	233
	<i>Envelope Delay Distortion</i>	233
	<i>Phase Jitter</i>	233
	<i>Echo</i>	233
	<i>Crosstalk</i>	234
	<i>Dropouts</i>	234
9-10	<i>The Impact of Errors</i>	234
9-11	<i>Error Prevention</i>	235
	<i>Line Conditioning</i>	235
	<i>Shielding</i>	235
	<i>Improving Connections</i>	236
9-12	<i>Error Detection</i>	236
	<i>Echo Checking</i>	236
	<i>Vertical Redundancy Checking (VRC) or Parity Checking</i>	236
	<i>Longitudinal Redundancy Checking (LRC)</i>	237
	<i>Cyclic Redundancy Checking (CRC)</i>	237
9-13	<i>Error Correction</i>	238
	<i>Retransmission</i>	238
	<i>Stop and Wait ARQ</i>	238
	<i>Continuous ARQ</i>	239

Forward Error Correction (FEC)	239
SUMMARY	240
REVIEW QUESTIONS	240
PROBLEMS AND PROJECTS	243
CASE STUDY: Eckles, Feinman, and Mackenzie—Part 3	244

PART THREE COMMUNICATIONS NETWORKS	246
---	------------

Chapter 10 Local Area Networks (LANs)	248
--	------------

10-1	Introduction	250
10-2	Characteristics of LANs	250
10-3	Architecture	252
	<i>Peer-to-Peer Networks</i>	252
	<i>Client-Server Networks</i>	253
	<i>Client/Server Computing</i>	253
	<i>File Servers</i>	254
	<i>Print Servers</i>	255
	<i>Communications Servers</i>	255
	<i>Applications Servers</i>	255
	<i>Web Servers</i>	256
10-4	LAN Applications	256
	<i>Information Sharing</i>	256
	<i>Hardware Sharing</i>	257
	<i>Software Sharing</i>	257
	<i>Service</i>	258
	<i>Local Control</i>	258
10-5	LAN Standards	258
10-6	LAN Access Control	259
	<i>Logical Link Control (LLC)</i>	259
	<i>Medium Access Control (MAC)</i>	260
10-7	MAC Protocols	260
	<i>Carrier Sense Multiple Access with Collision Detection (CSMA/CD)</i>	260
	<i>Carrier Sense Multiple Access with Collision Avoidance (CSMA/CA)</i>	262
	<i>Token Passing Protocol</i>	262
10-8	LAN Topologies	263
10-9	LAN Media and Cabling	265
	<i>Wiring Cost</i>	266
	<i>Wiring Documentation</i>	266
10-10	LAN Transmission Techniques	267

10-11	LAN Hardware	268
	<i>The Network Interface Card (NIC)</i>	268
	<i>Hubs</i>	269
10-12	Expanding the LAN	270
	<i>Repeaters</i>	270
	<i>Bridges</i>	270
	<i>Switches</i>	272
	<i>Routers</i>	275
	<i>Brouters</i>	275
	<i>Gateways</i>	276
10-13	Wireless Media and Layout	280
	SUMMARY	282
	REVIEW QUESTIONS	282
	PROBLEMS AND PROJECTS	284
	CASE STUDY: Picture Archiving Communications Systems	284

Chapter 11 LAN Systems

286

11-1	Introduction	287
11-2	Ethernet	288
	<i>10Base-5: Thick Ethernet</i>	290
	<i>10Base-2: Thin Ethernet</i>	290
	<i>10Base-T</i>	290
	<i>10Base-F</i>	290
	<i>100Base-T: Fast Ethernet</i>	290
	<i>Gigabit Ethernet</i>	291
	<i>10 Gigabit Ethernet</i>	292
11-3	Token Ring	293
11-4	The Fiber Distributed Data Interface (FDDI) Standard	295
11-5	ARCNET	298
11-6	LocalTalk	298
11-7	Asynchronous Transfer Mode (ATM) LANs	301
11-8	Wireless LANs	302
	<i>IEEE 802.11</i>	302
	<i>802.11 Wireless Security Issues</i>	304
	<i>Bluetooth</i>	305
	<i>HiperLAN2</i>	307
	<i>Wireless Summary</i>	308
	<i>Network Storage</i>	310
	<i>Network Attached Storage (NAS)</i>	310
	<i>Storage Area Networks (SANs)</i>	311
	<i>Fibre Channel</i>	312
	SUMMARY	314
	REVIEW QUESTIONS	314

Chapter 12 LAN Installation and Operation**318**

-
- 12-1 Introduction 319
 - 12-2 LAN Selection Criteria 319
 - 12-3 LAN Performance 322
 - Protocol* 322
 - Speed of Transmission* 322
 - Amount of Traffic* 322
 - Error Rates* 322
 - Efficiency of LAN Software* 323
 - Speed of the Server Computers and Disks* 323
 - 12-4 Installing a LAN 323
 - 12-5 Managing the LAN 324
 - 12-6 LAN Software 326
 - Software for the Client Workstation* 326
 - Software for the Server* 327
 - Novell NetWare* 328
 - Microsoft Windows Servers* 329
 - UNIX* 331
 - LINUX* 333
 - 12-7 LAN Security 334
 - 12-8 Virtual Private Networks (VPNs) 335
 - 12-9 Home Networking 337
 - Ethernet* 339
 - Wireless Networks* 339
 - Phone Line Networks* 339
 - Power Line Networks* 339
 - 12-10 Components of a Home Network 340
 - Hardware* 340
 - Connections* 341
 - Software* 343
 - SUMMARY** 344
 - REVIEW QUESTIONS** 344
 - PROBLEMS AND PROJECTS** 346
 - CASE STUDY: Home, Home on the Network, Where Seldom Is Heard. . .** 347

Chapter 13 Wide Area Networks (WANs)**350**

-
- 13-1 Introduction 352
 - 13-2 Wide Area Network Topology 352

13-3	Network Signaling	352
13-4	Packet Data Networks (PDNs)	353
	<i>Packet Transmission Through the PDN</i>	353
	<i>Packet Switching Techniques</i>	353
13-5	Routing Traffic in a Network	357
	<i>Connection-Oriented and Connectionless Routing</i>	357
	<i>Centralized Routing</i>	357
	<i>Distributed Routing</i>	358
	<i>Static and Dynamic Routing</i>	358
	<i>Broadcast Routing</i>	358
	<i>Routers</i>	359
13-6	Congestion Control	359
13-7	Delays in Networks and Queuing	360
13-8	Specific WAN Systems	361
	<i>X.25</i>	362
	<i>Frame Relay</i>	363
	<i>Asynchronous Transfer Mode (ATM)</i>	364
	<i>Synchronous Optical Network (SONET)</i>	367
	<i>Integrated Services Digital Network (ISDN)</i>	368
	<i>Switched Multimegabit Data Service (SMDS)</i>	369
	<i>Virtual Private Networks (VPN)</i>	370
	SUMMARY	371
	REVIEW QUESTIONS	371
	PROBLEMS AND PROJECTS	374
	CASE STUDY: Eckles, Feinman, and Mackenzie—Part 4	374

PART FOUR INTERNETWORKING

376

Chapter 14 Internetworking

378

14-1	Introduction	380
14-2	Principles of Internetworking	380
14-3	Internet Hardware	381
14-4	TCP/IP Protocol Suite	381
14-5	Requests for Comment (RFCs)	383
14-6	Internet Protocol (IP)	384
	<i>Classful IP Addressing</i>	384
	<i>Subnetting and Subnet Masks</i>	387
	<i>Classless Inter-Domain Routing (CIDR)</i>	389
14-7	Domain Name System (DNS)	390
	<i>Top Level Domains</i>	390
	<i>Resolving a Domain Name</i>	390

- 14-8 Internet Protocol, version 6 (IPv6) 392
 - Addressing* 393
 - Other Improvements in IPv6* 396
- 14-9 Transmission Control Protocol (TCP) 396
 - Connection Establishment* 398
 - Information Transfer* 398
 - TCP Congestion Control* 400
 - Connection Release* 401
 - TCP Header* 401
- 14-10 User Datagram Protocol (UDP) 403
- 14-11 Sockets and Client-Server Communication 404
- 14-12 Other Protocols 406
 - Address Resolution Protocol (ARP)* 406
 - Dynamic Host Configuration Protocol (DHCP)* 406
 - File Transfer Protocol (FTP) and Trivial File Transfer Protocol (TFTP)* 407
 - HTTP and Secure Hypertext Transfer Protocol (HTTPS)* 407
 - Internet Control Message Protocol (ICMP)* 407
 - Post Office Protocol, v3 (POP3) and Internet Message Access Protocol, v4 (IMAP4)* 407
 - Simple Mail Transfer Protocol (SMTP)* 407
 - Telnet* 408
- 14-13 Internetworking Tools and Applications 408
 - Name Server Lookup (nslookup)* 408
 - Whois* 408
 - Ping* 409
 - Traceroute* 410
 - Finger* 411
 - SUMMARY 411
 - REVIEW QUESTIONS 411
 - PROBLEMS AND PROJECTS 414
 - CASE STUDY: *E Pluribus Unum*—Internetworking the Networks at Lordsburg University 415

Chapter 15 The Internet

416

- 15-1 Introduction 417
- 15-2 History of the Internet 418
 - The 1950s* 418
 - The 1960s* 418
 - The 1970s* 425
 - The 1980s* 429
 - The 1990s* 430
- 15-3 Description of the Internet 432

- 15-4 Connecting to the Internet 434
 - Access Hardware* 434
 - Final-Mile Delivery Technology* 435
 - The Final-Mile Delivery Channel* 435
 - Internet Service Providers (ISPs)* 435
 - Backbones and Connections* 435
- 15-5 Types of Connection 436
 - Dial-up Networking (DUN)* 437
 - Integrated Services Digital Networks (ISDN)* 437
 - Digital Subscriber Line (DSL)* 439
 - Cable Access* 439
 - WebTV* 440
 - Wireless and Satellite Connections* 441
- 15-6 Intranets and Extranets 442
- 15-7 Network Address Translation (NAT) 444
 - SUMMARY 445
 - REVIEW QUESTIONS 445
 - PROBLEMS AND PROJECTS 448
 - CASE STUDY: To Unplug or Not to Unplug?
 - Going Wireless on Campus 449

Chapter 16 Internet Applications

450

- 16-1 Introduction 451
- 16-2 World Wide Web 452
 - Uniform Resource Locator (URL)* 452
 - Hypertext Transfer Protocol (HTTP)* 452
 - Hypertext Markup Language (HTML)* 453
- 16-3 Client-Server Computing 453
- 16-4 Browsers and Browsing 455
- 16-5 Creating Web Pages 455
 - Hypertext Markup Language (HTML)* 455
 - Extensible Markup Language (XML)* 459
- 16-6 Internet and Web Applications 459
 - Electronic Mail (E-mail)* 459
 - Mailing Lists* 463
 - Distribution Lists and Broadcast Messages* 463
 - Usenet/Newsgroups* 463
 - Chat and Instant Messaging* 465
 - Internet Telephony* 468
 - Internet Radio* 470
- 16-7 Internet Tools 471
 - File Transfer Protocol (FTP)* 471

Telnet	473
Search Tools	474
SUMMARY	479
REVIEW QUESTIONS	480
PROBLEMS AND PROJECTS	483
CASE STUDY: Helen's Search for Roots	484

PART FIVE NETWORK MANAGEMENT **486**

Chapter 17 Network Security **488**

17-1	Introduction	489
17-2	Why Network Security Is Needed	490
17-3	Management's Responsibility	491
17-4	Types of Threats	492
17-5	Encryption	493
	<i>Monoalphabetic Ciphers</i>	494
	<i>Polyalphabetic Ciphers</i>	494
	<i>Transposition Ciphers</i>	497
	<i>Bit-Level Encryption</i>	498
	<i>The Data Encryption Standard (DES)</i>	498
	<i>Asymmetric Key Encryption</i>	499
	<i>Pretty Good Privacy (PGP)</i>	500
	<i>Other Encryption Systems</i>	500
	<i>Voice Scrambling</i>	500
17-6	Digital Signatures	501
17-7	Digital Certificates	503
17-8	IP Security (IPsec)	504
17-9	Secure Socket Layer (SSL)	505
17-10	Viruses	506
17-11	Network Access Control	507
	<i>User Identification and Passwords</i>	507
	<i>Firewalls</i>	509
17-12	Physical Security	510
17-13	Personnel Security	510
17-14	Disaster Recovery Planning	511
17-15	Wireless Network Security	513
17-16	Security for Home Networks	514
	SUMMARY	514
	REVIEW QUESTIONS	515

Chapter 18 Network Design and Implementation 520

- 18-1 Introduction 521
- 18-2 The Network Design and Implementation Process 521
- 18-3 Requirements Phase 522
- 18-4 Investigating Alternatives 523
- 18-5 Network Design 524
- 18-6 Selection of Equipment and Vendors 527
 - Calculation of Costs* 528
- 18-7 Preparation for Implementation 531
- 18-8 Implementation 532
 - Installation* 532
 - Testing* 533
 - Training* 533
- 18-9 Cutover 534
- 18-10 Post Implementation Audit 535
- 18-11 Considerations for WAN Design 535
- 18-12 Considerations for LAN Design 536
- 18-13 Considerations for Internetwork Design 537
 - SUMMARY 537
 - REVIEW QUESTIONS 538
 - PROBLEMS AND PROJECTS 541
 - CASE STUDY: The Patent Department's LAN 542

Chapter 19 Network Management and Operation 544

- 19-1 Introduction 545
- 19-2 Definition and Scope of Network Management and Network Operation 545
- 19-3 Why It Is Important to Manage the Network 547
- 19-4 Network Management in Small Organizations 548
- 19-5 The Functions of Network Management 548
 - Staffing* 548
 - Organizing* 549
 - Planning* 550
 - Directing* 552
 - Controlling* 552
- 19-6 Network Operation and the Network Operations Group 554
- 19-7 Problem Management 557
 - Problem Resolution Levels* 557

	<i>Escalation Procedures</i>	557
