1 CONTENT NETWORKING IN THE MOBILE INTERNET

1

Sudhir Dixit and Tao Wu

- 1.1 Introduction / 1
- 1.2 Content Networking in the Mobile Internet / 2
- 1.3 Book Overview / 4
 - 1.3.1 Chapter 2: Mobile Internet Architecture Overview / 4
 - 1.3.2 Chapter 3: Protocols for the Web and the Mobile Internet / 5
 - 1.3.3 Chapter 4: Content Caching and Multicast / 5
 - 1.3.4 Chapter 5: Characterizing Web Workload of Mobile Clients / 5
 - 1.3.5 Chapter 6: ACME: A New Mobile Content Delivery Architecture / 5
 - 1.3.6 Chapter 7: Content Adaptation for the Mobile Internet / 6
 - 1.3.7 Chapter 8: Content Synchronization / 6
 - 1.3.8 Chapter 9: Multimedia Streaming in Mobile Wireless Networks / 6
 - 1.3.9 Chapter 10: Multicast Content Delivery for Mobiles / 6

- 1.3.10 Chapter 11: Security and Digital Rights Management for Mobile Content / 7
- 1.3.11 Chapter 12: Charging for Mobile Content / 7
- 1.3.12 Chapter 13: Algorithms and Infrastructures for Location-Based Services / 7
- 1.3.13 Chapter 14: Fixed and Mobile Web Services / 8
- 1.4 Concluding Remarks / 8

2 MOBILE INTERNET ARCHITECTURE OVERVIEW

9

Harri Holma and Antti Toskala

- 2.1 Introduction / 9
- 2.2 Standardization Framework / 10
- 2.3 System Architecture and Core Network / 11
- 2.4 WCDMA Radio Access Network / 13
 - 2.4.1 WCDMA Radio Access Network Architecture / 13
 - 2.4.2 WCDMA Layer 2/3 Architecture and Principles / 14
 - 2.4.3 WCDMA Physical Layer / 18
 - 2.4.4 WCDMA beyond 2Mbps with HSDPA / 20
 - 2.4.5 Evolution of WCDMA / 21
 - 2.4.5.1 Enhanced Uplink Dedicated Channel / 22
 - 2.4.5.2 New Frequency Variants of WCDMA / 23
 - 2.4.5.3 Advanced Antenna Technologies / 23
 - 2.4.5.4 Multimedia Broadcast and Multicast Service / 24
- 2.5 GSM/GPRS/EDGE / 24
 - 2.5.1 GSM Principle / 24
 - 2.5.2 GSM Radio Access Network Architecture / 26
 - 2.5.3 GSM Service Creation Principle / 26
- 2.6 IS-95 Radio Access / 27
- 2.7 GSM/EDGE and WCDMA Operator Performance / 29
- 2.8 GSM/EDGE and WCDMA End-User Performance / 31
- References / 33

3 PROTOCOLS FOR THE WEB AND THE MOBILE INTERNET

35

Mitri Abou-Rizk

- 3.1 Introduction / 35
- 3.2 History of the World Wide Web / 35

- 3.3 The Web Today / 37
- 3.4 The Future Web / 37
- 3.5 HyperText Transfer Protocol / 38
 - 3.5.1 Definition and General Operation / 38
 - 3.5.2 HTTP Evolution / 39
 - 3.5.2.1 HTTP/0.9 / 40
 - 3.5.2.2 HTTP/1.0 / 41
 - 3.5.3 HTTP/1.1 / 44
 - 3.5.3.1 *Formats of the Request and Response Messages for HTTP/1.1* / 45
 - 3.5.3.2 *New Request Methods and Definitions* / 45
 - 3.5.3.3 *Persistent Connections* / 46
 - 3.5.3.4 *Chunked Encoding* / 47
 - 3.5.3.5 *Content Negotiations* / 47
 - 3.5.3.6 *Byte-Range Operation* / 48
 - 3.5.3.7 *Authentication* / 48
 - 3.5.3.8 *Caching* / 48
 - 3.5.3.9 *Headers* / 50
 - 3.5.4 Conclusion / 66
- 3.6 Wireless Access Protocol (WAP) / 66
 - 3.6.1 Introduction / 66
 - 3.6.2 WAP Evolution / 66
 - 3.6.2.1 WAP 1.0 Architecture / 67
 - 3.6.2.2 WAP 1.0 Components / 69
 - 3.6.3 WAP 2.0 / 78
 - 3.6.3.1 Introduction / 78
 - 3.6.3.2 WAP 2.0 Architecture and Overview / 78
 - 3.6.3.3 WAP 2.x Components / 80
 - 3.6.4 Future of WAP / 83
 - References / 84

4 CONTENT CACHING AND MULTICAST

87

Dan Li

- 4.1 Web-Based Applications / 87
 - 4.1.1 Information Dissemination / 87
 - 4.1.1.1 *Static Content* / 88
 - 4.1.1.2 *Dynamic Content* / 88
 - 4.1.1.3 *Streaming Media* / 89

4.1.2	Information Exchange /	90
4.2	Scalable Content Delivery via Multicast and Caching /	91
4.3	IP Multicast and Reliable Multicast /	93
4.3.1	Challenges Facing Reliable Multicast /	94
4.3.2	NAK-Based Recovery /	95
4.3.3	Distributed Recovery /	95
4.3.4	Router-Assisted Recovery /	98
4.3.5	FEC-Based Recovery /	100
4.3.6	State of the Art /	102
4.4	Application Layer Multicast /	103
4.4.1	Rationale for Application Layer Multicast /	104
4.4.2	Why We Still Need IP Multicast /	108
4.4.3	Functions of Application Layer Multicast /	110
4.4.4	Building the Distribution Tree /	112
4.4.5	State of the Art /	116
4.5	Web Proxy Caching /	117
4.5.1	Basics of Proxy Caching /	117
4.5.2	Content Delivery /	118
4.5.3	Cache Consistency /	120
4.5.4	Cache Cooperation /	122
4.5.5	Limitations of Previous Work /	125
4.6	Summary /	126
	References /	127

5 CHARACTERIZING WEB WORKLOAD OF MOBILE CLIENTS

135

Atul Adya, Paramvir Bahl, and Lili Qiu

5.1	Overview of Web Workload Characterization /	136
5.1.1	Motivation for Workload Characterization /	136
5.1.2	Types of Analysis /	137
5.2	Overview of Previous Work /	137
5.2.1	Wireline User Workload Characterization /	137
5.2.1.1	Content Analysis /	138
5.2.1.2	User Behavior Analysis /	139
5.2.1.3	System Load Analysis /	140
5.2.2	Wireless User Workload Characterization /	140
5.2.2.1	Analysis of WAP Traffic at Bell Mobility's PCS /	141

5.2.2.2	<i>Analysis of a Metropolitan Area Wireless Network</i>	/ 141
5.2.2.3	<i>Wireless LAN Study</i>	/ 141
5.3	Server Architecture and Data Gathering	/ 142
5.3.1	Server Architecture	/ 143
5.3.2	Description of Data Logs	/ 144
5.3.3	Types of Accesses	/ 144
5.4	Characterizing Web Browsing Workload	/ 145
5.4.1	Content Analysis	/ 145
5.4.1.1	<i>Content Size</i>	/ 146
5.4.1.2	<i>Popular Content Categories</i>	/ 146
5.4.1.3	<i>Document Popularity</i>	/ 148
5.4.2	User Behavior Analysis	/ 149
5.4.2.1	<i>Load Distribution of Different Users</i>	/ 150
5.4.2.2	<i>Distribution of Wireless User Sessions</i>	/ 153
5.4.2.3	<i>Temporal Stability</i>	/ 155
5.4.2.4	<i>Spatial Locality</i>	/ 158
5.4.3	System Load Analysis	/ 160
5.4.4	Summary of Browse Log Analyses	/ 161
5.5	Characterizing Notification Workload	/ 163
5.5.1	Content Analysis	/ 164
5.5.1.1	<i>Notification Message Size and Its Implications</i>	/ 164
5.5.1.2	<i>Popular Categories</i>	/ 164
5.5.1.3	<i>Message Popularity Analysis and Its Implications</i>	/ 167
5.5.2	User Behavior Analysis	/ 168
5.5.2.1	<i>Load Distribution of Different Users</i>	/ 169
5.5.2.2	<i>Spatial Locality</i>	/ 169
5.5.3	System Load	/ 171
5.5.4	Summary of Notification Log Analyses	/ 172
5.6	Correlation between Web Browsing and Notification	/ 174
5.6.1	Correlation in the Amount of Usage	/ 174
5.6.2	Correlation in Popular Content Categories	/ 176
5.6.3	Summary	/ 178
5.7	Comparison between Workload of Wireline Web and Mobile Web	/ 178
5.7.1	Comparison in Web Content	/ 178

5.7.2	Comparison in User Behavior /	179
5.7.3	Comparison in System Load /	179
5.8	Summary /	179
	References /	180

6 ACME: A NEW MOBILE CONTENT DELIVERY ARCHITECTURE

183

Tao Wu, Sadhna Ahuja, and Sudhir Dixit

6.1	Introduction /	183
6.2	Mobile Content Delivery Techniques and Related Work /	186
6.2.1	Content Delivery for the Internet /	186
6.2.1.1	Network Scaling /	187
6.2.1.2	End-System Acceleration /	187
6.2.1.3	Content and Protocol Optimization /	188
6.2.2	Content Delivery for the Mobile Internet /	189
6.2.3	Related Work /	189
6.3	ACME Performance Analysis /	191
6.3.1	System Description /	191
6.3.2	ACME Performance in a Slotted ALOHA System /	191
6.3.2.1	Performance of Baseline /	192
6.3.2.2	Performance of ACME /	193
6.3.2.3	Comparison /	194
6.3.3	ACME in CDMA Networks /	196
6.4	Exploiting User Interest Correlation with ACME /	197
6.4.1	The Algorithm /	197
6.4.2	Traces /	198
6.4.3	Simulations /	198
6.5	ACME in Radio Resource Management /	201
6.6	Conclusions /	201
	References /	202

7 CONTENT ADAPTATION FOR THE MOBILE INTERNET

205

Stephane Coulombe, Oskari Koskimies, and Guldo Grassel

7.1	Motivation for Adaptation /	205
7.2	Multimedia Content Types /	207
7.2.1	Media Content /	207
7.2.1.1	Textual Content /	207
7.2.1.2	Audiovisual Content /	208
7.2.2	Presentation Content /	210

- 7.2.2.1 *Stylesheets* / 210
 - 7.2.2.2 *Device-Independent Presentation Content* / 214
- 7.2.3 *Application Data* / 214
- 7.2.4 *Procedural Code* / 215
- 7.3 *Types of Adaptation* / 216
 - 7.3.1 *Format Adaptation* / 216
 - 7.3.2 *Characteristics Adaptation* / 217
 - 7.3.3 *Appearance Adaptation* / 217
 - 7.3.4 *Size Adaptation* / 219
 - 7.3.5 *Encapsulation Adaptation* / 221
- 7.4 *Methods of Adaptation* / 221
 - 7.4.1 *Multimedia Transcoding* / 221
 - 7.4.1.1 *Multimedia Transcoding Architecture* / 221
 - 7.4.1.2 *Transcoding of Audiovisual Content* / 222
 - 7.4.1.3 *Transcoding of Nonaudiovisual Content* / 223
 - 7.4.1.4 *Transcoding of Procedural Code* / 224
 - 7.4.1.5 *Advantages and Drawbacks of Transcoding* / 224
 - 7.4.2 *Content Selection* / 225
 - 7.4.2.1 *The Infopyramid* / 225
 - 7.4.2.2 *The Customizer* / 226
 - 7.4.2.3 *The Infopyramid Creation Process* / 227
 - 7.4.2.4 *Advantages and Drawbacks of Content Selection* / 227
 - 7.4.2.5 *Separating Content and Its Representation* / 228
 - 7.4.3 *Rendering at the Client* / 228
 - 7.4.4 *Hybrid Approaches* / 230
- 7.5 *Capabilities and Metadata* / 230
 - 7.5.1 *Capabilities* / 231
 - 7.5.1.1 *User-Agent Information* / 231
 - 7.5.1.2 *Composite Capability/Preference Profiles (CC/PP)* / 231
 - 7.5.1.3 *UAProf* / 233
 - 7.5.1.4 *Subscriber Databases* / 233
 - 7.5.2 *Metadata* / 236
- 7.6 *Adaptation Architectures* / 237
 - 7.6.1 *Location of Adaptation* / 237

	7.6.1.1	<i>Adaptation at the Source</i>	/ 238
	7.6.1.2	<i>Adaptation at the Destination</i>	/ 239
	7.6.1.3	<i>Adaptation at the Intermediary</i>	/ 239
	7.6.2	<i>Adaptation Architecture Configurations</i>	/ 239
7.7		<i>Application Scenarios</i>	/ 241
	7.7.1	<i>Scenario for Content Selection: Browsing</i>	/ 241
		7.7.1.1	<i>Content Selection Algorithm</i> / 242
		7.7.1.2	<i>The Infopyramid and Media Capability Descriptors</i> / 242
		7.7.1.3	<i>The Terminal's Media Capability Descriptors</i> / 244
		7.7.1.4	<i>Results of the Media Content Selection</i> / 244
		7.7.1.5	<i>Results of the Overall Adaptation</i> / 244
	7.7.2	<i>Scenario for Transcoding: Multimedia Messaging Service</i>	/ 244
		7.7.2.1	<i>MMS Applications</i> / 246
		7.7.2.2	<i>MMS Transactions</i> / 246
		7.7.2.3	<i>The MMS Conformance Document</i> / 248
		7.7.2.4	<i>The UAProf Descriptions for MMS Application</i> / 248
		7.7.2.5	<i>MMS Adaptation Example for a Weather Service</i> / 249
	7.7.3	<i>Concluding Remarks</i>	/ 250
7.8		<i>Standardization and Future Work</i>	/ 251
		<i>References</i>	/ 252

8 CONTENT SYNCHRONIZATION

255

Ganesh Sivaraman

8.1	<i>Introduction</i>	/ 255
8.2	<i>Why Mobile Devices Need Synchronization</i>	/ 257
8.3	<i>Fundamental Principles of Synchronization</i>	/ 258
	8.3.1	<i>Types of Synchronization</i> / 258
		8.3.1.1 <i>One- versus Two-Way Synchronization</i> / 258
		8.3.1.2 <i>Slow versus Fast Synchronization</i> / 259
	8.3.2	<i>Change Detection</i> / 260
	8.3.3	<i>Conflict Detection and Resolution</i> / 260
8.4	<i>Adoption of Synchronization for Mobile Devices</i>	/ 261
	8.4.1	<i>Synchronization Scenarios for Mobile Devices</i> / 261
	8.4.2	<i>Adhering to Mobile Device Constraints</i> / 262

- 8.5 Synchronization Standard / 263
 - 8.5.1 OMA Data Synchronization Overview / 264
 - 8.5.1.1 *OMA Representation* / 264
 - 8.5.1.2 *OMA Data Synchronization Protocol* / 268
- 8.6 Summary / 273
- References / 274

9 MULTIMEDIA STREAMING IN MOBILE WIRELESS NETWORKS

275

Sanjeev Verma, Muhammad Mukarram bin Tariq, Takeshi Yoshimura, and Tao Wu

- 9.1 Introduction / 275
- 9.2 QoS Issues for Streaming Applications / 275
 - 9.2.1 Application Layer QoS Control / 280
 - 9.2.1.1 *Congestion Control and Quality Adaptation* / 281
 - 9.2.1.2 *Error Control* / 283
 - 9.2.2 Network Layer QoS Control / 284
- 9.3 Streaming Media Codecs / 285
 - 9.3.1 Video Compression / 285
 - 9.3.2 Audio Compression / 286
 - 9.3.3 Codecs Used in 3GPP / 286
- 9.4 End-to-End Architecture to Provide Streaming Services in Wireless Environments / 288
 - 9.4.1 Logical Streaming Multimedia Architecture / 288
- 9.5 Protocols for Streaming Media Delivery / 291
 - 9.5.1 Protocols and Languages for Streaming Media Session Control / 291
 - 9.5.1.1 *Real-Time Streaming Protocol* / 292
 - 9.5.1.2 *Session Description Protocol* / 297
 - 9.5.1.3 *Other Session Control Protocols* / 298
 - 9.5.1.4 *Description Languages* / 298
 - 9.5.1.5 *UAProf Specification* / 303
 - 9.5.2 The Streaming Media Transport Protocols / 305
 - 9.5.2.1 *The Real-Time Transport Protocol* / 305
 - 9.5.2.2 *Other Media Transport Protocols* / 308
- 9.6 3GPP Packet-Switched Streaming Service / 308
 - 9.6.1 3GPP Packet-Switched Domain Architecture / 310
 - 9.6.2 The 3GPP PSS Framework / 312

*9.6.2.1 Streaming Media Session Setup Procedures
for PSS / 313*

- 9.7 Multimedia Services in Mobile and Wireless Environments / 315
 - 9.7.1 Differentiating Transmission Error Losses from Congestion Losses / 315
 - 9.7.2 Counteracting Handover Packet Loss / 316
 - 9.7.3 Mobility-Aware Server Selection and Request Routing in Mobile CDN Environments / 318
 - 9.7.4 Architectural Considerations to Provide Streaming Services in Integrated Cellular/WLAN Environments / 319
 - 9.7.4.1 Tight Coupling / 320
 - 9.7.4.2 Loose Coupling / 320
- 9.8 Conclusions / 321
- References / 322

10 MULTICAST CONTENT DELIVERY FOR MOBILES

327

Rod Walsh, Antti-Pentti Vainio, and Janne Aaltonen

- 10.1 Introduction / 327
 - 10.1.1 Chapter Overview / 328
- 10.2 Multicast Overview / 328
 - 10.2.1 The Justification for Multicast / 328
 - 10.2.2 Three Perspectives on Multicast / 330
 - 10.2.3 Multicast as a Communication Technique / 331
 - 10.2.4 Multicast Applications and Services / 332
 - 10.2.5 Mobile Wireless Multicast / 335
- 10.3 The Generic IP Multicast System / 336
 - 10.3.1 Common Multicast System Aspects / 336
 - 10.3.2 A Reference System Model / 336
 - 10.3.3 Three-Platform Services / 337
 - 10.3.3.1 IETF Streaming / 339
 - 10.3.3.2 IETF Filecast / 339
 - 10.3.3.3 IETF Media Discovery / 339
 - 10.3.4 IP Multicast Networking Procedure / 340
 - 10.3.5 Additional Aspects of the Mobile Wireless Environment / 342
 - 10.3.5.1 Mobility and Movement of Users / 342
 - 10.3.5.2 Errors in Radio Transmission / 345
 - 10.3.5.3 Unidirectional Downlink Bearers / 346

- 10.4 IP Datacast (IPDC) / 347
 - 10.4.1 The IPDC Concept / 347
 - 10.4.2 IPDC Services and Applications / 348
 - 10.4.3 IPDC System Architecture / 350
 - 10.4.4 Mobile Wireless Radio Networks for IPDC / 350
 - 10.4.4.1 DVB-T/XH as a Radio Access Network for IPDC / 352*
 - 10.4.5 IP Infrastructure for IPDC / 354
 - 10.4.6 The IPDC Service System / 355
 - 10.4.7 E-Commerce for IPDC / 356
 - 10.4.8 IPDC in Summary / 357
- 10.5 Multicast in Third-Generation Cellular (MBMS) / 358
 - 10.5.1 The MBMS Concept / 358
 - 10.5.2 MBMS Services and Applications / 360
 - 10.5.3 MBMS System Architecture / 361
 - 10.5.4 MBMS Radio Access Networks / 362
 - 10.5.5 MBMS in the Core Network / 364
 - 10.5.6 MBMS Service Center and Data Sources / 365
 - 10.5.7 Commercial Interfaces / 366
 - 10.5.8 MBMS in Summary / 366
- 10.6 Multicast Content Delivery for Mobiles in Summary and in the Future / 367
 - References / 368

11 SECURITY AND DIGITAL RIGHTS MANAGEMENT FOR MOBILE CONTENT

371

Deepa Kundur, Heather Yu, and Ching-Yung Lin

- 11.1 Introduction to Information Security and DRM Technologies / 371
 - 11.1.1 Information Security / 372
 - 11.1.2 Content-Based Media Security / 374
 - 11.1.3 Digital Rights Management / 375
 - 11.1.3.1 Overview / 375*
 - 11.1.3.2 DRM and Content Distribution Business Models / 381*
 - 11.1.3.3 DRM and Security / 384*
 - 11.1.3.4 General Requirements for Mobile Terminals / 384*
- 11.2 MPEG Intellectual Property Management and Protection / 385

- 11.2.1 Copy Protection on MPEG-2 Videos / 385
- 11.2.2 MPEG-4 IPMP Hook / 386
- 11.2.3 MPEG-21 and MPEG IPMP Extensions / 387
- 11.3 Emerging Technologies and Applications / 387
 - 11.3.1 State-of-the-Art MDRM Systems / 388
 - 11.3.1.1 *Nokia Music Player—Distributed DRM* / 391
 - 11.3.1.2 *NEC VS-7810—Centralized DRM* / 391
 - 11.3.1.3 *Integrated Model* / 392
 - 11.3.1.4 *MDRM Requirements* / 392
 - 11.3.2 State-of-the-Art MDRM Component Technologies / 394
 - 11.3.2.1 *Scalable and Format-Compliant Encryption for Multimedia* / 394
 - 11.3.2.2 *Public Key Watermarking System* / 398
 - 11.3.2.3 *Efficient Key Management for Multicast in the Mobile Environment* / 401
 - 11.3.2.4 *Multimedia Content Verification and Error Concealment* / 402
 - 11.3.3 Summary / 404
 - References / 404

12 CHARGING FOR MOBILE CONTENT

409

David Banjo

- 12.1 Introduction / 409
 - 12.1.1 The Scope of "Charging" / 410
- 12.2 Fixed-Line Telephony Charging / 411
- 12.3 Mobile Telephony Charging / 414
- 12.4 Aspects Pertinent to Mobile Content Charging / 415
 - 12.4.1 Revenue Chain / 416
 - 12.4.2 Subscription Models / 417
 - 12.4.3 Postpaid and Prepaid Charging / 419
 - 12.4.4 Business-to-Business (B2B) / 421
 - 12.4.5 Roaming / 422
 - 12.4.6 Multiple Access / 422
 - 12.4.7 Source of Charging Records / 422
 - 12.4.8 Multiple Servers Involved in Delivery / 423
- 12.5 Charging Concepts and Mechanisms / 424
 - 12.5.1 Creation of Charging Records / 424
 - 12.5.2 Differentiated Charging / 425

- 12.5.3 Flow-Based Charging / 426
- 12.5.4 Mediation / 428
- 12.5.5 Correlation / 428
- 12.5.6 Charging Rules / 429
- 12.5.7 Rating / 429
- 12.5.8 Advice of Charge / 429
- 12.6 Charging Interfaces / 429
- 12.7 Charging Information / 431
- 12.8 Charging Architecture and Scenarios / 433
 - 12.8.1 Charging Architecture / 433
 - 12.8.2 Charging Scenarios / 433
 - 12.8.2.1 Browsing / 433
 - 12.8.2.2 Person-to-Person Messaging / 435
 - 12.8.2.3 Download / 436
 - 12.8.2.4 Streaming Video / 436
- 12.9 Summary / 437
- References / 437

13 ALGORITHMS AND INFRASTRUCTURES FOR LOCATION-BASED SERVICES

439

Gang Wu, Xia Gao, and Keisuke Suwa

- 13.1 Introduction / 439
- 13.2 Taxonomy of Location / 441
 - 13.2.1 Physical and Symbolic Location / 441
 - 13.2.2 Absolute and Relative Location / 442
- 13.3 Location Estimation Media / 442
 - 13.3.1 Radiofrequency (RF) / 443
 - 13.3.1.1 Multipath Propagation / 443
 - 13.3.1.2 Other Interference Factors / 445
 - 13.3.2 Infrared (IR) / 445
 - 13.3.3 Ultrasound / 446
- 13.4 Location Estimation Algorithms / 447
 - 13.4.1 Triangulation / 447
 - 13.4.1.1 Time of Arrival (TOA) / 447
 - 13.4.1.2 Time Difference of Arrival (TDOA) / 448
 - 13.4.1.3 Angle of Arrival (AOA) / 449
 - 13.4.2 Scene Analysis / 450
 - 13.4.2.1 Rationale for RF-Based Scene Analysis / 450

- 13.4.2.2 *General Framework of Scene Analysis* / 451
- 13.4.3 *Proximity* / 454
- 13.5 *Location Estimation Systems* / 454
 - 13.5.1 *Indoor Location Estimation Systems* / 454
