## SECTION I SECURITY CONCEPTS

<b>1</b>	<b>Using Models.....</b>	<b>3</b>
	Introduction: Understanding, Selecting, and Applying Models .....	3
	Understanding Assets.....	4
	Layered Security .....	6
	Using Models in Security .....	8
	Security Models for Information Systems .....	11
	Shortcomings of Models in Security.....	15
	Security in Context .....	19
	Reference .....	22
<b>2</b>	<b>Defining Information Security.....</b>	<b>23</b>
	Confidentiality, Integrity, and Availability .....	23
	Information Attributes.....	26
	Intrinsic versus Imputed Value .....	28
	Information as an Asset .....	30
	The Elements of Security .....	32
	Confidentiality.....	32
	Integrity .....	36
	Availability.....	38
	Security Is Security Only in Context.....	40
<b>3</b>	<b>Information as an Asset .....</b>	<b>41</b>
	Introduction .....	41
	Determining Value .....	44
	Managing Information Resources .....	50
	References.....	55
<b>4</b>	<b>Understanding Threat and Its Relation to Vulnerabilities .....</b>	<b>57</b>
	Introduction .....	57
	Threat Defined .....	58
	Analyzing Threat .....	63

Assessing Physical Threats .....	64
Infrastructure Threat Issues.....	66
<b>5 Assessing Risk Variables: The Risk Assessment Process .....</b>	<b>71</b>
Introduction .....	71
Learning to Ask the Right Questions about Risk.....	76
The Basic Elements of Risk in IT Systems .....	83
Information as an Asset .....	83
Defining Threat for Risk Management.....	84
Defining Vulnerabilities for Risk Management.....	86
Defining Safeguards for Risk Management.....	89
The Risk Assessment Process .....	90
<b>SECTION II THE McCUMBER CUBE METHODOLOGY</b>	
<b>6 The McCumber Cube.....</b>	<b>99</b>
Introduction .....	99
The Nature of Information.....	101
Critical Information Characteristics .....	102
Confidentiality .....	102
Integrity.....	103
Availability .....	103
Security Measures.....	104
Technology .....	105
Policy and Practice .....	105
Education, Training, and Awareness (Human Factors) .....	106
The Model .....	107
Overview.....	107
Use of the Model .....	108
References.....	110
<b>7 Determining Information States and Mapping</b>	
<b>Information Flow .....</b>	<b>111</b>
Introduction .....	111
Information States: A Brief Historical Perspective .....	112
Automated Processing: Why Cryptography Is Not Sufficient.....	115
Simple State Analysis .....	116
Information States in Heterogeneous Systems .....	119
Boundary Definition .....	122
Decomposition of Information States.....	122
Step 1: Defining the Boundary .....	123
Step 2: Make an Inventory of All IT Resources .....	125
Step 3: Decompose and Identify Information States .....	126
Developing an Information State Map .....	127
Reference .....	129
<b>8 Decomposing the Cube for Security Enforcement .....</b>	<b>131</b>
Introduction .....	131

A Word about Security Policy.....	133
Definitions .....	134
The McCumber Cube Methodology .....	135
The Transmission State .....	137
Transmission: Confidentiality.....	137
Transmission: Integrity .....	139
Transmission: Availability.....	139
The Storage State .....	140
Storage: Confidentiality .....	140
Storage: Integrity .....	142
Storage: Availability.....	144
The Processing State .....	145
Processing: Confidentiality.....	147
Processing: Integrity .....	148
Processing: Availability.....	150
Recap of the Methodology.....	150

<b>9 Information State Analysis for Components and Subsystems .....</b>	<b>153</b>
Introduction .....	153
Shortcomings of Criteria Standards for Security Assessments.....	154
Applying the McCumber Cube Methodology for Product Assessments .....	156
Steps for Product and Component Assessment .....	157
Information Flow Mapping .....	158
Define the Boundary .....	158
Take an Inventory of Information Resources and Components.....	158
Decompose and Identify All Information States .....	158
Cube Decomposition Based on Information States .....	159
Call Out the Information State Column .....	159
Decompose Blocks by Attribute .....	160
Identify Existing and Potential Vulnerabilities .....	160
Develop Security Architecture .....	161
Describe Required Safeguards.....	161
Cost Out Architecture Components and Enforcement Mechanisms.....	162
Recap of the Methodology for Subsystems, Products, and Components.....	162
