

FAILURE CRITERIA IN FIBRE REINFORCED POLYMER COMPOSITES: The World-Wide Failure Exercise

A Composites Science and
Technology Compendium

Editors:
M.J. Hinton, A.S. Kaddour, P.D. Soden

Contents

Preface	v
About the editors	vii
Section 1 The World-Wide Failure Exercise: Its Origin, Concept and Content	1
Chapter 1.1 The world-wide failure exercise: Its origin, concept and content <i>M.J. Hinton, A.S. Kaddour and P.D. Soden</i>	2
Section 2 Test Cases, Lamina Data and Experimental Results Under Biaxial Loads	29
Chapter 2.1 Lamina properties, lay-up configurations and loading conditions for a range of fibre reinforced composite laminates <i>P.D. Soden, M.J. Hinton and A.S. Kaddour</i>	30
Chapter 2.2 Biaxial test results for strength and deformation of a range of E-glass and carbon fibre reinforced composite laminates: Failure exercise benchmark data <i>P.D. Soden, M.J. Hinton and A.S. Kaddour</i>	52
Section 3 Description of the Individual Failure Theories by their Originators	97
Chapter 3.1 Prediction of composite laminate fracture: Micromechanics and progressive fracture <i>P.K. Gotsis, C.C. Chamis and L. Minnetyan</i>	98
Chapter 3.2 Failure criteria for use in the design environment <i>G.C. Eckold</i>	121
Chapter 3.3 Stress-based Grant–Sanders method for predicting failure of composite laminates <i>E.C. Edge</i>	140
Chapter 3.4 Predicting transverse crack formation in cross-ply laminates <i>L.N. McCartney</i>	157
Chapter 3.5 Predictions of the original and truncated maximum-strain failure models for certain fibrous composite laminates <i>L.J. Hart-Smith</i>	179
Chapter 3.6 Predictions of a generalized maximum-shear-stress failure criterion for certain fibrous composite laminates <i>L.J. Hart-Smith</i>	219
Chapter 3.7 Failure analysis of FRP laminates by means of physically based phenomenological models <i>A. Puck and H. Schürmann</i>	264

Chapter 3.8	Prediction of laminate failure with the Rotem failure criterion <i>A. Rotem</i>	298
Chapter 3.9	Prediction of failure envelopes and stress/strain behavior of composite laminates <i>C.T. Sun and J.X. Tao</i>	316
Chapter 3.10	A progressive quadratic failure criterion for a laminate <i>K-S. Liu and S. W. Tsai</i>	334
Chapter 3.11	A strain-energy based failure criterion for non-linear analysis of composite laminates subjected to biaxial loading <i>W.E. Wolfe and T.S. Butalia</i>	353
Chapter 3.12	The strength of multilayered composites under a plane-stress state <i>P.A. Zinoviev, S.V. Grigoriev, O. V. Lebedeva and L. R. Tairova</i>	379
Chapter 3.13	Predicting the nonlinear response and progressive failure of composite laminates <i>T.A. Bogetti, C.P.R. Hoppel, V.M. Harik, J.F. Newill and B.P. Burns</i>	402
Chapter 3.14	The predictive capability of failure mode concept-based strength criteria for multidirectional laminates <i>R.G. Cuntze and A. Freund</i>	429
Chapter 3.15	Composite laminate failure analysis using multicontinuum theory <i>J.S. Mayes and A.C. Hansen</i>	490
Chapter 3.16	A bridging model prediction of the ultimate strength of composite laminates subjected to biaxial loads <i>Z.M. Huang</i>	518
Chapter 3.17	Expanding the capabilities of the Ten-Percent Rule for predicting the strength of fibre-polymer composites <i>L.J. Hart-Smith</i>	597
Section 4	A Comparative Study of Failure Theories and Predictions for Fibre Polymer Composite Laminates: Part (A)	643
Chapter 4.1	A comparative study of failure theories and predictions for fibre polymer composite laminates: Part (A) <i>A.S. Kaddour, M.J. Hinton and P.D. Soden</i>	644
Section 5	Comparison Between the Individual Theoretical Predictions and Experimental Results	702
Chapter 5.1	Application of progressive fracture analysis for predicting failure envelopes and stress-strain behaviors of composite laminates: A comparison with experimental results <i>P.K. Gotsis, C.C. Chamis and L. Minnetyan</i>	703
Chapter 5.2	Failure criteria for use in the design environment <i>G.C. Eckold</i>	726
Chapter 5.3	A comparison of theory and experiment for the stress-based Grant-Sanders method <i>E.C. Edge</i>	739

Chapter 5.4	Comparison between theories and test data concerning the strength of various fibre-polymer composites <i>L.J. Hart-Smith</i>	770
Chapter 5.5	Prediction of ply crack formation and failure in laminates <i>L.N. McCartney</i>	810
Chapter 5.6	Failure analysis of FRP laminates by means of physically based phenomenological models <i>A. Puck and H. Schürmann</i>	832
Chapter 5.7	The Rotem failure criterion: Theory and practice <i>A. Rotem</i>	877
Chapter 5.8	The prediction of failure envelopes and stress/strain behavior of composite laminates: Comparison with experimental results <i>C.T. Sun, J. Tao and A.S. Kaddour</i>	890
Chapter 5.9	A progressive quadratic failure criterion, part B <i>A. Kuraishi, S.W. Tsai, K.S. Liu</i>	903
Chapter 5.10	A strain-energy-based non-linear failure criterion: Comparison of numerical predictions and experimental observations for symmetric composite laminates <i>T.S. Butalia and W.E. Wolfe</i>	922
Chapter 5.11	A coupled analysis of experimental and theoretical results on the deformation and failure of composite laminates under a state of plane stress <i>P.A. Zinoviev, O.V. Lebedeva and L.P. Tairova</i>	943
Chapter 5.12	Predicting the nonlinear response and failure of composite laminates: Correlation with experimental results <i>T.A. Bogetti, C.P.R. Hoppel, V.M. Harik, J.F. Newill and B.P. Burns</i>	961
Chapter 5.13	The predictive capability of failure mode concept-based strength criteria for multi-directional laminates – Part B <i>R.G. Cuntze</i>	976
Chapter 5.14	A comparison of multicontinuum theory based failure simulation with experimental results <i>J.S. Mayes and A.C. Hansen</i>	1026
Chapter 5.15	Correlation of the bridging model predictions of the biaxial failure strengths of fibrous laminates with experiments <i>Z-M. Huang</i>	1045
Section 6	Predictive Capabilities of Nineteen Failure Theories and Design Methodologies for Polymer Composite Laminates. Part B: Comparison With Experiments	1072
Chapter 6.1	Predictive capabilities of nineteen failure theories and design methodologies for polymer composite laminates. Part B: Comparison with experiments <i>A.S. Kaddour, M.J. Hinton and P.D. Soden</i>	1073

Section 7	Recommendations for Designers and Researchers Resulting from the World-Wide Failure Exercise	1222
Chapter 7.1	Recommendations for designers and researchers resulting from the world-wide failure exercise <i>P.D. Soden, A.S. Kaddour and M.J. Hinton</i>	1223
Author Index	1253
