

THIN FILM TRANSISTORS

MATERIALS AND PROCESSES

VOLUME 1: AMORPHOUS SILICON THIN FILM TRANSISTORS

edited by

YUE KUO

Kluwer Academic Publishers

Table of Contents

Table of Contents	v
List of Contributors	ix
Preface.....	x

CHAPTER 1 Introduction 1

Yue Kuo

1. Brief History of Thin Film Transistors	1
2. a-Si:H TFT LCDs.....	5
3. Unique a-Si:H TFT Issues	10
4. Chapter Flow in the Book.....	10
References.....	13

CHAPTER 2 a-Si:H TFT Thin Film and Substrate Materials..... 15

Andrew J. Flewitt and William I. Milne

1. Introduction.....	15
2. Semiconductors	16
3. Dielectrics.....	40
4. Substrates	53
5. Characterization Techniques	56
6. Summary.....	68
References	69
List of Symbols.....	75

CHAPTER 3 Device Physics, Compact Modeling, and Circuit

Applications of a-Si:H TFTs 79

Arokia Nathan, Peyman Servati, Karim S. Karim, Denis Striakhilev, and Andrei Sazonov

1. Introduction.....	79
2. Density of States and Electronic Transport.....	82
3. Device Physics and Compact Modeling	90
4. Threshold Voltage Metastability	133
5. Parameter Extraction	140
6. Circuit Applications.....	155

7. Summary.....	168
References	170
List of Symbols.....	176
CHAPTER 4 a-Si:H TFT Structures	183
<i>Yue Kuo</i>	
1. Introduction.....	183
2. Basic Structures	183
3. Simplified Structures and Processes	188
4. Unique Structures and Processes.....	192
5. Redundant Structures	195
6. Summary.....	198
References	200
List of Symbols.....	202
CHAPTER 5 Deposition of Intrinsic and Doped Semiconductor Thin Films for a-Si:H TFT	203
<i>Yue Kuo</i>	
1. Introduction.....	203
2. Semiconductor Layer Deposition	206
3. Doped Amorphous and Microcrystalline Silicon	223
4. Summary.....	231
References	233
List of Symbols.....	239
CHAPTER 6 Deposition of Dielectric Thin Films for a-Si:H TFT.....	241
<i>Yue Kuo</i>	
1. Introduction.....	241
2. Selection of Dielectric Materials and Deposition Methods.....	242
3. PECVD SiN _x Dielectric Layer.....	244
4. Yield Issues Related to Dielectrics.....	263
5. Summary.....	265
References	267
List of Symbols.....	271
CHAPTER 7 Plasma Etching in a-Si:H TFT Array Fabrication.....	273
<i>Yue Kuo</i>	
1. Introduction.....	273
2. Topics in Plasma Etching of a-Si:H TFTs	278

3. Summary	306
References	307
CHAPTER 8 Metallization in a-Si:H TFT Array Fabrication	313
<i>Ken-ichi Onisawa, Shinji Takayama, Yuzo Shigesato, Takuya Takahashi</i>	
1. Introduction	313
2. Basic Understanding of Conductor Lines in TFT LCDs	314
3. Conductor Requirements for a-Si:H TFTs	318
4. Conducting Materials for TFT Array	321
5. Key Issues in Conducting Materials for Advanced TFT Array Fabrication	324
6. Conductor Deposition for TFT Arrays	337
7. Wet Etching of Conductors for a-Si:H TFT Arrays	347
8. Summary	364
References	366
List of Symbols	375
CHAPTER 9 Catalytic Chemical Vapor Deposition of a-Si:H TFT	377
<i>Hideki Matsumura, Akira Izumi, and Atsushi Masuda</i>	
1. Introduction: Cat-CVD vs. PECVD	377
2. History of Cat-CVD	378
3. Fundamentals of Cat-CVD Technology	379
4. Performance of Cat-CVD a-Si:H TFT	386
5. Summary	391
References	392
List of Symbols	394
CHAPTER 10 a-Si:H TFT-Based Active Matrix Flat-Panel Imagers for Medical X-ray Applications	395
<i>Larry Antonuk</i>	
1. Introduction and Background	395
2. Basic Design and Operation of AMFPs	404
3. Detailed Functioning and Properties of AMFPs	431
4. Summary and Outlook	468
References	472
List of Symbols	482
CHAPTER 11 Non-LCD Applications of a-Si:H TFTs	485
<i>Yue Kuo</i>	
1. Introduction	485

2. Medical Imagers	485
3. Flat Panel Displays.....	486
4. Contact Imagers, Scanners, and Printers.....	491
5. Photo-Transistors.....	495
6. Chemical Sensors	497
7. Circuits on Various Substrates	500
8. Summary.....	503
References	504
Index.....	507
