# Contents

PREFACE TO THE SECOND EDITION	viii	6.4. Pipeline Networks	96
PREFACE TO THE FIRST EDITION	ix	6.5. Optimum Pipe Diameter	98
CONTRIBUTORS	x	6.6. Non-Newtonian Fluids	100
CHAPTER 0 RULES OF THUMB: SUMMARY	xi	6.7. Gases	106
CHAPTER 1 INTRODUCTION		6.8. Liquid-Gas Flow in Pipelines	109
1.1. Process Design	1	6.9. Granular and Packed Beds	111
1.2. Equipment	1	6.10. Gas-Solid Transfer	115
1.3. Categories of Engineering Practice	1	6.11. Fluidization of Beds of Particles with Gases	116
1.4. Sources of Information for Process Design	2	References	123
1.5. Codes, Standards, and Recommended Practices	2	CHAPTER 7 FLUID TRANSPORT EQUIPMENT	125
1.6. Material and Energy Balances	3	7.1. Piping	125
1.7. Economic Balance	4	7.2. Pump Theory	127
1.8. Design Safety Factors	6	7.3. Pump Characteristics	130
1.9. Safety of Plant and Environment	7	7.4. Criteria for Selection of Pumps	132
1.10. Steam and Power Supply	8	7.5. Equipment for Gas Transport	135
1.11. Design Basis	9	7.6. Theory and Calculations of Gas Compression	143
1.12. Laboratory and Pilot Plant Work	12	7.7. Ejector and Vacuum Systems	156
References	15	References	163
CHAPTER 2 FLOWSHEETS	17	CHAPTER 8 HEAT TRANSFER AND HEAT EXCHANGERS	165
2.1. Block Flowsheets	17	8.1. Conduction of Heat	165
2.2. Process Flowsheets	17	8.2. Mean Temperature Difference	167
2.3. Process and Instrumentation Diagrams (P&ID)	19	8.3. Heat Transfer Coefficients	169
2.4. Utility Flowsheets	19	8.4. Data of Heat Transfer Coefficients	176
2.5. Drawing of Flowsheets	19	8.5. Pressure Drop in Heat Exchangers	179
References	30	8.6. Types of Heat Exchangers	179
Appendix 2.1	31	8.7. Shell-and-Tube Heat Exchangers	185
CHAPTER 3 PROCESS CONTROL	37	8.8. Condensers	191
3.1. Feedback Control Loop	37	8.9. Reboilers	197
3.2. Control Loop Performance and Tuning Procedures	39	8.10. Evaporators	202
3.3. Single Stream Control	40	8.11. Fired Heaters	203
3.4. Unit Operation Control	44	8.12. Insulation of Equipment	215
References	58	8.13. Refrigeration	218
CHAPTER 4 DRIVERS FOR MOVING EQUIPMENT	59	References	224
4.1. Motors	59	CHAPTER 9 DRYERS AND COOLING TOWERS	225
4.2. Steam Turbines and Gas Expanders	60	9.1. Interaction of Air and Water	225
4.3. Combustion Gas Turbines and Engines	63	9.2. Rate of Drying	228
References	66	9.3. Classification and General Characteristics of Dryers	232
CHAPTER 5 TRANSFER OF SOLIDS	67	9.4. Batch Dryers	234
5.1. Slurry Transport	67	9.5. Continuous Tray and Conveyor Belt Dryers	236
5.2. Pneumatic Conveying	69	9.6. Rotary Cylindrical Dryers	240
5.3. Mechanical Conveyors and Elevators	74	9.7. Drum Dryers for Solutions and Slurries	241
5.4. Solids Feeders	86	9.8. Pneumatic Conveying Dryers	246
References	86	9.9. Flash and Ring Dryers	249
CHAPTER 6 FLOW OF FLUIDS	89	9.10. Fluidized Bed Dryers	250
6.1. Properties and Units	89	9.11. Spray Dryers	261
6.2. Energy Balance of a Flowing Fluid	90	9.12. Cooling Towers	267
6.3. Liquids	92	References	276
		CHAPTER 10 MIXING AND AGITATION	277
		10.1. A Basic Stirred Tank Design	277
		10.2. Vessel Flow Patterns	279
		10.3. Agitator Power Requirements	281
		10.4. Impeller Pumping	281
		10.5. Tank Blending	281

- 10.6. Heat Transfer 287
- 10.7. Vortex Depth 288
- 10.8. Solid Suspension 289
- 10.9. Solids Dissolving 294
- 10.10. Gas-Liquid Dispersions 295
- 10.11. Liquid-Liquid (L-L) Dispersions 298
- 10.12. Pipeline Mixers 303
- 10.13. Compartment Columns 307
- 10.14. Fast Competitive/Consecutive (C/C) Reactions 315
- 10.15. Scale-Up 321
  - Nomenclature 325
  - References 326

#### CHAPTER 11 SOLID-LIQUID SEPARATION 329

- 11.1. Processes and Equipment 329
- 11.2. Liquid-Particle Characteristics 330
- 11.3. Theory of Filtration 330
- 11.4. Resistance to Filtration 337
- 11.5. Thickening and Clarifying 341
- 11.6. Laboratory Testing and Scale-Up 342
- 11.7. Illustrations of Equipment 343
- 11.8. Applications and Performance of Equipment Filters 349
  - References 358

#### CHAPTER 12 DISINTEGRATION, AGGLOMERATION, AND SIZE SEPARATION OF PARTICULATE SOLIDS 359

- 12.1. Screening 359
- 12.2. Commercial Classification with Streams of Air or Water 366
- 12.3. Size Reduction 367
- 12.4. Equipment for Size Reduction 368
- 12.5. Particle Size Enlargement 379
  - References 395

#### CHAPTER 13 DISTILLATION AND GAS ABSORPTION 397

- 13.1. Vapor-Liquid Equilibria 397
- 13.2. Single-Stage Flash Calculations 399
- 13.3. Evaporation or Simple Distillation 403
- 13.4. Binary Distillation 404
- 13.5. Batch Distillation 415
- 13.6. Multicomponent Separation: General Considerations 418
- 13.7. Estimation of Reflux and Number of Trays (Fenske-Underwood-Gilliland Method) 420
- 13.8. Absorption Factor Shortcut Method of Edmister 423
- 13.9. Separations in Packed Towers 423
- 13.10. Basis for Computer Evaluation of Multicomponent Separations 429
- 13.11. Special Kinds of Distillation Processes 437
- 13.12. Tray Towers 451
- 13.13. Packed Towers 457
- 13.14. Efficiencies of Trays and Packings 460
  - References 481

#### CHAPTER 14 EXTRACTION AND LEACHING 483

- 14.1. Introduction 483
- 14.2. Equilibrium Relations 484
- 14.3. Calculation of Stage Requirements 490

- 14.4. Countercurrent Operation 493
- 14.5. Leaching of Solids 497
- 14.6. Numerical Calculation of Multicomponent Extraction 499
- 14.7. Equipment for Extraction 503
- 14.8. Pilot Testing 521
  - References 521

#### CHAPTER 15 ADSORPTION AND ION EXCHANGE 523

- 15.1. Adsorption Equilibria 523
- 15.2. Ion Exchange Equilibria 525
- 15.3. Adsorption Behavior in Packed Beds 528
- 15.4. Gas Adsorption Cycles 533
- 15.5. Adsorption Design and Operating Practices 536
- 15.6. Parametric Pumping 537
- 15.7. Ion Exchange Design and Operating Practices 539
- 15.8. Production Scale Chromatography 541
- 15.9. Equipment and Processes 542
  - References 553

#### CHAPTER 16 CRYSTALLIZATION FROM SOLUTIONS AND MELTS 555

- 16.1. Some General Crystallization Concepts 556
- 16.2. Importance of the Solubility Curve in Crystallizer Design 557
- 16.3. Solubilities and Equilibria 557
- 16.4. Crystal Size Distribution 559
- 16.5. The Process of Crystallization 561
- 16.6. The Ideal Stirred Tank 567
- 16.7. Kinds of Crystallizers 571
- 16.8. Melt Crystallization and Purification 577
  - References 582

#### CHAPTER 17 CHEMICAL REACTORS 583

- 17.1. Design Basis and Space Velocity 583
- 17.2. Rate Equations and Operating Modes 583
- 17.3. Material and Energy Balances of Reactors 588
- 17.4. Nonideal Flow Patterns 589
- 17.5. Selection of Catalysts 594
- 17.6. Types and Examples of Reactors 600
- 17.7. Heat Transfer in Reactors 612
- 17.8. Classes of Reaction Processes and Their Equipment 622
  - References 641

#### CHAPTER 18 PROCESS VESSELS 643

- 18.1. Drums 643
- 18.2. Fractionator Reflux Drums 644
- 18.3. Liquid-Liquid Separators 644
- 18.4. Gas-Liquid Separators 645
- 18.5. Storage Tanks 654
- 18.6. Mechanical Design of Process Vessels 656
- 18.7. Bins and Hoppers 661
  - References 662

#### CHAPTER 19 MEMBRANE SEPARATIONS 665

- 19.1. Membrane Processes 665
- 19.2. Liquid-Phase Separations 671
- 19.3. Gas Permeation 672

- 19.4. Membrane Materials and Applications 672
- 19.5. Membrane Cells and Equipment Configurations 674
- 19.6. Industrial Applications 675
- 19.7. Subquality Natural Gas 675
- 19.8. The Enhancement of Separation 678
- 19.9. Permeability Units 681
- 19.10. Derivations and Calculations for Single-Stage Membrane Separations 685
- References 691

## CHAPTER 20 GAS-SOLID SEPARATION AND OTHER TOPICS 693

- 20.1. Gas-Solid Separations 693
- 20.2. Foam Separation and Froth Flotation 701
- 20.3. Sublimation and Freeze Drying 703
- 20.4. Separations by Thermal Diffusion 704
- 20.5. Electrochemical Synthesis 706
- 20.6. Fermentation Processing 713
- References 717

## CHAPTER 21 COSTS OF INDIVIDUAL EQUIPMENT 719

## APPENDIX A UNITS, NOTATION, AND GENERAL DATA 729

## APPENDIX B EQUIPMENT SPECIFICATION FORMS 739

## APPENDIX C QUESTIONNAIRES OF EQUIPMENT SUPPLIERS 785

## INDEX 805
