Contents

<i>Preface</i>	xiii
<i>Acknowledgements</i>	xiv
1 Introduction	1
Aims of this chapter	1
The mouse as a digitiser	1
Terms used throughout the book	2
Opening AutoCAD 2004	3
Calling tools in AutoCAD 2004	5
The A3_template.dwt	5
The AutoCAD coordinate system	5
Examples of elementary drawings	6
First example – with Line and Circle tools	6
Second example – with Line and Ellipse tools	8
Third example – with the Line tool	9
Fourth example – with the Circle tool	9
Fifth example – with the Arc tool	9
Making use of the SNAP and ORTHO buttons	10
The Active Assistance dialog	11
Calling Help with the F1 key	11
The Erase tool – example	12
Undo and Redo tools	13
Regen	13
Saving drawings	13
Revision tips	14
Exercises	15
2 The Zoom tools	17
Aims of this chapter	17
The Zoom tools	17
The variety of zooms	18
The Aerial View window	21
The Pan tool	22
The wheel of a type of mouse	22
Revision tips	23
Exercises	23

3	Templates	24
	Aims of this chapter	24
	A template for use with this book	24
	Setting Limits	24
	Setting Units	25
	Setting Grid	25
	Setting Snap	26
	Setting Text Style	26
	Setting Dimension Style	27
	Setting Layers	30
	Saving the template	32
	Another template	33
	Revision tips	35
4	Accuracy when drawing	36
	Aims of this chapter	36
	The Circle and Arc tools	36
	First example – Circle – the Ttr response	36
	Second example – the Arc tool prompts	37
	Constructions using absolute coordinates	37
	First example	38
	Second example	38
	Constructions involving relative coordinate entry	39
	First example – relative coordinate entry	39
	Second example – relative coordinate entry	40
	Tracking	41
	Example – tracking	41
	Object Snaps	41
	Example – using osnap abbreviations	43
	AutoSnap	44
	Polar tracking	45
	An example of a drawing involving decimals	45
	Snap, Ortho and Grid	46
	Revision tips	47
	Exercises	47
5	More tools from the Draw toolbar	51
	Aims of this chapter	51
	The Polyline tool	51
	First example – Polyline – Width	51
	Second example – Polyline – Arc	52
	Third example – Polyline – Circle	53
	Fourth example – Polyline – Arrows	53
	Fifth example – Polyline – Fill	54
	The Construction Line tool	55
	Example – Construction Line	56
	The Polygon tool	57
	Examples – Polygons	58

The Rectangle tool	59
Examples – Rectangle tool	59
The Ellipse tool	60
Examples – Ellipse	61
The set variable PELLIPSE	62
The Revcloud tool	62
Example – Revcloud	62
The Spline tool	63
The Point tool	64
Revision tips	65
Exercises	65
6 The Modify tools	70
Aims of this chapter	70
The Modify toolbar	70
The Copy Object tool	70
First example – Copy Object – single copy	71
Second example – Copy Object – multiple copy	71
The Mirror tool	72
First example – Mirror	72
The variable MIRRTEXT	73
The Offset tool	73
First example – Offset	73
Other examples – Offset	74
The Array tool	74
First example – Rectangular array	74
Second example – Polar array	75
The Move tool	77
The Rotate tool	78
Examples – Rotate	78
The Scale tool	79
Examples – Scale	79
The Stretch tool	79
Examples – Stretch	79
The Trim tool	80
First example – Trim No extend	80
Second example – Trim Extend	81
The Extend tool	82
Examples – Extend	82
The Break tools	83
Examples – Break	84
The Chamfer tool	85
Examples – Chamfer	85
The Fillet tool	86
Examples – Fillet	86
Revision tips	87
Exercises	87

7	Dialogs, menus, text	91
	Aims of this chapter	91
	Dialogs	91
	The Options dialog	91
	Warning windows	92
	Menus	92
	Some sub-menus from drop-down menus	94
	Some right-click menus	95
	Text	97
	First example – Multiline Text	97
	Second example – Single line text	98
	Text fonts	99
	Checking spelling	99
	First example – the dedit tool	100
	Second example – the Check Spelling tool	101
	The variable TEXTFILL	102
	Text symbols	102
	Revision tips	103
	Exercises	104
8	Layers and other features	105
	Aims of this chapter	105
	Layers	105
	Icons in the Layers popup list	106
	Limit to number of layers in a drawing	106
	The Options dialog	107
	Screen colours	107
	Lineweights	108
	The Polyline Edit tool	109
	Examples – Edit Polyline	109
	The Multiple option of Edit Polyline	110
	Express tools	111
	Grips	111
	Examples – Grips	112
	Revision tips	113
9	The DesignCenter and MDE	114
	Aims of this chapter	114
	The AutoCAD DesignCenter	114
	Dragging drawings from the DesignCenter	115
	Previews	117
	The Tree View Toggle icon	117
	The Multiple Document Environment (MDE)	118
	The Properties palette	118
	Revision tips	121
	Exercises	121
10	Types of technical drawings	123
	Aims of this chapter	123
	Orthographic projection	123

Number of views in an orthographic projection	124
Rules for orthographic projections	126
Lines in technical drawings	126
Examples of orthographic projections	127
Isometric projection	127
Isoplanes	128
Examples of isometric drawings	130
Revision tips	133
Exercises	134
11 Hatching	138
Aims of this chapter	138
The Hatch tool	138
The parts of the Hatch Boundary and Fill dialog	138
Other hatch palettes	138
Other sub-dialogs	138
Examples of hatching	139
Hatching from the command line	146
The hatching of sections in technical drawings	146
Revision tips	147
Exercises	148
12 Dimensioning	151
Aims of this chapter	151
The Dimension toolbar	151
Examples of adding dimensions using the tools	151
The meanings of the symbols	158
Dimensioning from the command line	160
Dimensions are associative	162
Revision tips	163
Exercises	163
13 Blocks and Inserts	165
Aims of this chapter	165
The Make Block tool	165
Example – making a block	166
The Insert Block tool	167
Written blocks (wblocks)	169
Example – constructing a written block	169
Example – insertion of blocks	171
The flyout from the Insert Block tool icon	172
External references (Xrefs)	172
Example – external references	172
Inserting raster images	174
Example – Image tool	174
Attributes	176
Example – Attributes	176
Editing the attribute	178
Revision tips	180
Exercises	180

14 Building drawing	183
Aims of this chapter	183
Types of building drawing	183
First example – drawings for 63 Pheasant Drive	183
Construction of floor layout drawings	183
Hatching	184
Exercises	185
15 Edit tools, DXF and EPS files	190
Aims of this chapter	190
Example of using the Edit tools	190
First example – Copy	190
Second example – Copy Link	191
Third example – Paste	191
Fourth example – Encapsulated Postscript file	192
OLE (Object Linking and Embedding)	193
DXF files	193
Example – DXF file	195
Revision tips	196
Exercises	196
16 The Solids tools	198
Aims of this chapter	198
3D Solid models	198
3D Views	198
The UCS	199
The Solids toolbar	200
Examples of using the Solids tools	200
The UCS	206
The UCS icon	207
Some examples of using the UCS	208
Revision tips	211
Exercises	211
17 More advanced 3D models	215
Aims of this chapter	215
The Extrude tool	215
First example – Extrude	215
Second example – Extrude	217
Third example – Extrude	217
Fourth example – Extrude	220
The Revolve tool	222
First example – Revolve	222
Second example – Revolve	223
Third example – Revolve	224
The Slice tool	225
Example – Slice	225
The Section tool	226
Example – Section	226

The Setup Profile tool	227
First example – Setup Profile	227
Second example – Setup Profile	229
Revision tips	230
Exercises	232
18 Viewports	237
Aims of this chapter	237
Viewports	237
The variables UCSFOLLOW and UCSVP	238
Example of constructions in viewports	239
First example – Four: Equal setup	239
Second example – Three: Left setup	240
Third example – Four: Left	242
Example – moving viewports	242
Revision tips	243
Exercises	244
19 Rendering	247
Aims of this chapter	247
Introduction	247
Rendering options	247
The Render tools	248
Rendering lighting	248
Rendering without adding lights	248
Types of rendering lights	249
Lighting icons	251
Examples of rendering	251
Revision tips	257
Exercises	257
An example of using Paper Space	260
20 3D surface models	263
Aims of this chapter	263
Introduction	263
Examples of models using surface tools	263
First example – 3D Face	263
Second example – 3D Face	264
Third example – Box	265
Fourth example – Wedge	266
Fifth example – Pyramid	266
Sixth example – Cone	267
Seventh example – Sphere	267
Eighth example – Dome and Dish	268
Ninth example – Torus	269
Tenth example – Edge Surface	270
Eleventh example – Revolved Surface	271
Twelfth example – Tabulated Surface	271
Thirteenth example – Ruled Surface	272

Revision notes	273
Exercises	273
Rendering surface models	277
21 More 3D solid models	278
Aims of this chapter	278
First example	278
Second example	281
Third example	283
Fourth example	287
Fifth example	289
Exercises	291
22 Internet tools	296
Aims of this chapter	296
Emailing drawings	296
Example – creating a web page	296
Browsing the Web	299
The eTransmit tool	300
23 Design and AutoCAD 2004	302
Ten reasons for using AutoCAD	302
The place of AutoCAD 2004 in designing	302
The design chart	303
Enhancements in AutoCAD 2004	304
System requirements for running AutoCAD 2004	305
Appendix A Printing and plotting	306
Introduction	306
An example of a printout	307
Appendix B List of tools	310
Introduction	310
2D tools	310
3D tools	314
Internet tools	315
Appendix C Some set variables	316
Introduction	316
Some of the set variables	316
Appendix D Computing terms	318
<i>Index</i>	323
