H. Lüth

# Solid-State Physics

An Introduction to Principles  
of Materials Science

Third Extensively Updated  
and Enlarged Edition

Springer

# Contents

<b>1</b>	<b>Chemical Bonding in Solids</b>	1
1.1	The Periodic Table of the Elements	1
1.2	Covalent Bonding	4
1.3	Ionic Bonding	9
1.4	Metallic Bonding	13
1.5	The Hydrogen Bond	15
1.6	The van der Waals Bond	15
	Problems	16
<b>2</b>	<b>Structure of Solid Matter</b>	21
2.1	The Crystal Lattice	22
2.2	Point Symmetry	25
2.3	The 32 Crystal Classes (Point Groups)	27
2.4	The Significance of Symmetry	28
2.5	Simple Crystal Structures	31
2.6	Phase Diagrams of Alloys	36
2.7	Defects in Solids	45
	Problems	48
<b>3</b>	<b>Diffraction from Periodic Structures</b>	51
3.1	General Theory of Diffraction	51
3.2	Periodic Structures and the Reciprocal Lattice	57
3.3	The Scattering Conditions for Periodic Structures	58
3.4	The Bragg Interpretation of the Laue Condition	60
3.5	Brillouin Zones	63
3.6	The Structure Factor	64
3.7	Methods of Structure Analysis	67
	Problems	70
	<b>Panel I: Diffraction Experiments with Various Particles</b>	72
	<b>Panel II: X-Ray Interferometry and X-Ray Topography</b>	79
<b>4</b>	<b>Dynamics of Atoms in Crystals</b>	85
4.1	The Potential	86
4.2	The Equation of Motion	87
4.3	The Diatomic Linear Chain	88
4.4	Scattering from Time-Varying Structures – Phonon Spectroscopy	93

4.5	Elastic Properties of Crystals . . . . .	96
Problems . . . . .		106
<b>Panel III: Raman Spectroscopy</b> . . . . .		109
<b>5</b>	<b>Thermal Properties</b> . . . . .	115
5.1	The Density of States . . . . .	115
5.2	The Thermal Energy of a Harmonic Oscillator . . . . .	118
5.3	The Specific Heat Capacity . . . . .	120
5.4	Effects Due to Anharmonicity . . . . .	122
5.5	Thermal Expansion . . . . .	123
5.6	Heat Conduction by Phonons . . . . .	127
Problems . . . . .		131
<b>Panel IV: Experiments at Low Temperatures</b> . . . . .		133
<b>6</b>	<b>“Free” Electrons in Solids</b> . . . . .	137
6.1	The Free-Electron Gas in an Infinite Square-Well Potential . . . . .	138
6.2	The Fermi Gas at $T=0\text{K}$ . . . . .	142
6.3	Fermi Statistics . . . . .	144
6.4	The Specific Heat Capacity of Electrons in Metals . . . . .	147
6.5	Electrostatic Screening in a Fermi Gas – The Mott Transition .	152
6.6	Thermionic Emission of Electrons from Metals . . . . .	154
Problems . . . . .		158
<b>7</b>	<b>The Electronic Bandstructure of Solids</b> . . . . .	161
7.1	General Symmetry Properties . . . . .	161
7.2	The Nearly Free-Electron Approximation . . . . .	165
7.3	The Tight-Binding Approximation . . . . .	169
7.4	Examples of Bandstructures . . . . .	175
7.5	The Density of States . . . . .	179
7.6	Density of States in Non-Crystalline Solids . . . . .	181
Problems . . . . .		184
<b>Panel V: Photoemission Spectroscopy</b> . . . . .		186
<b>8</b>	<b>Magnetism</b> . . . . .	191
8.1	Diamagnetism and Paramagnetism . . . . .	191
8.2	The Exchange Interaction . . . . .	196
8.3	Exchange Interaction Between Free Electrons . . . . .	199
8.4	The Band Model of Ferromagnetism . . . . .	201
8.5	The Temperature Behavior of a Ferromagnet in the Band Model	205
8.6	Ferromagnetic Coupling for Localized Electrons . . . . .	209
8.7	Antiferromagnetism . . . . .	211
8.8	Spin Waves . . . . .	215
Problems . . . . .		219
<b>Panel VI: Magnetostatic Spin Waves</b> . . . . .		221
<b>Panel VII: Surface Magnetism</b> . . . . .		227

<b>9</b>	<b>Motion of Electrons and Transport Phenomena</b>	231
9.1	Motion of Electrons in Bands and the Effective Mass	231
9.2	Currents in Bands and Holes	235
9.3	Scattering of Electrons in Bands	237
9.4	The Boltzmann Equation and Relaxation Time	241
9.5	The Electrical Conductivity of Metals	245
9.6	Thermoelectric Effects	251
9.7	The Wiedemann-Franz Law	254
9.8	Electrical Conductivity of Localized Electrons	256
	Problems	258
	<b>Panel VIII: Quantum Oscillations and the Topology of Fermi Surfaces</b>	260
<b>10</b>	<b>Superconductivity</b>	267
10.1	Some Fundamental Phenomena Associated with Superconductivity	267
10.2	Phenomenological Description by Means of the London Equations	272
10.3	Instability of the "Fermi Sea" and Cooper Pairs	275
10.4	The BCS Ground State	280
10.5	The Excitation Spectrum of a Superconductor	288
10.6	Consequences of the BCS Theory and Comparison with Experimental Results	293
10.7	Supercurrents and Critical Currents	297
10.8	Coherence of the BCS Ground State and the Meissner-Ochsenfeld Effect	300
10.9	Quantization of Magnetic Flux	305
10.10	Type II Superconductors	309
10.11	"High-Temperature" Superconductors	316
	Problems	325
	<b>Panel IX: One-Electron Tunneling in Superconductor Junctions</b>	328
	<b>Panel X: Cooper-Pair Tunneling – The Josephson Effect</b>	338
<b>11</b>	<b>Dielectric Properties of Materials</b>	347
11.1	The Dielectric Function	347
11.2	Absorption of Electromagnetic Radiation	350
11.3	The Dielectric Function for a Harmonic Oscillator	353
11.4	Longitudinal and Transverse Normal Modes	355
11.5	Surface Waves on a Dielectric	358
11.6	Reflectivity of a Dielectric Half-Space	360
11.7	The Local Field	361
11.8	The Polarization Catastrophe and Ferroelectrics	363
11.9	The Free-Electron Gas	365
11.10	Interband Transitions	367
11.11	Excitons	374
11.12	Dielectric Energy Losses of Electrons	376

<b>Problems</b> . . . . .	379
<b>Panel XI: Spectroscopy with Photons and Electrons</b> . . . . .	383
<b>Panel XIII: Infrared Spectroscopy</b> . . . . .	386
<b>Panel XIII: The Frustrated Total Reflection Method</b> . . . . .	389
<b>12 Semiconductors</b> . . . . .	391
12.1 Data for a Number of Important Semiconductors . . . . .	392
12.2 Charge Carrier Density in Intrinsic Semiconductors . . . . .	396
12.3 Doping of Semiconductors . . . . .	400
12.4 Carrier Densities in Doped Semiconductors . . . . .	404
12.5 Conductivity of Semiconductors . . . . .	409
12.6 The <i>p–n</i> Junction and the Metal/Semiconductor Schottky Contact	415
12.7 Semiconductor Heterostructures and Superlattices . . . . .	431
12.8 Important Semiconductor Devices . . . . .	444
<b>Problems</b> . . . . .	458
<b>Panel XIV: The Hall Effect</b> . . . . .	461
<b>Panel XV: Cyclotron Resonance in Semiconductors</b> . . . . .	464
<b>Panel XVI: Shubnikov-de Haas Oscillations and Quantum Hall Effect</b> . . . . .	467
<b>Panel XVII: Semiconductor Epitaxy</b> . . . . .	476
<b>References</b> . . . . .	483
<b>Subject Index</b> . . . . .	495
<b>Periodic Table of the Elements</b> (Inside front cover)	
<b>Table of Constants and Equivalent Values</b> (Inside back cover)
