

# Handbook of Minerals as Nutritional Supplements

CRC Series in  
Modern Nutrition  
Science

**Robert A. DiSilvestro**

# Table of Contents

<b>Chapter 1</b>	<b>Calcium</b>	<b>1</b>
Overview of Function		1
Overview of Metabolism		1
Nutritional Status Assessment		2
Bioavailability from Foods and Supplements		3
Typical Intakes versus Needs		7
Current Research on Supplement Use		7
Rickets		7
Bone in Children and Adolescents without Rickets		7
Osteoporosis Prevention and Treatment in Adults		8
Hyperparathyroidism		10
Blood Pressure		11
Blood Lipid Alterations		12
Colon Cancer		12
Weight Loss		13
Toxicity		13
Summary and Conclusions		17
<b>Chapter 2</b>	<b>Magnesium</b>	<b>23</b>
Overview of Function		23
Overview of Metabolism		25
Nutritional Status Assessment		25
Bioavailability from Foods and Supplements		27
Typical Intakes Versus Needs		33
Current Research on Supplement Use		34
Parenteral Pharmacological Uses		34
Overt Hypomagnesemia (Low Serum Magnesium)		34
Blood Pressure		35
Serum Lipids in Non-Diabetic Subjects		37
Prevention of Cardiovascular Disease in Non-Diabetic Subjects		38
Diabetes		41
Stress		44
Exercise		47
Negative		49
Positive		50
Osteoporosis Prevention or Restriction		52
Chronic Fatigue		52
Asthma		53

Beta-Thalassemia/Sickle Cell Anemia.....	53
Kidney Stones .....	54
Pregnancy: Premature/Low Birth Weight Outcomes .....	57
Premenstrual Syndrome (PMS) .....	58
Mitral Valve Prolapse.....	59
Other Applications .....	59
Toxicity .....	60
Summary and Conclusions.....	61
<b>Chapter 3 Potassium .....</b>	<b>79</b>
Overview of Function.....	79
Overview of Physiology.....	80
Nutritional Status Assessment.....	80
Bioavailability from Foods and Supplements.....	81
Typical Intakes Versus Needs.....	81
Current Research on Supplement Use .....	82
Hypertension .....	83
Kidney Stones .....	84
Cramps .....	85
Potassium and Exercise Performance.....	85
Potassium and Stroke Risk .....	85
Potassium and Osteoporosis .....	86
Toxicity .....	86
Summary and Conclusions.....	86
<b>Chapter 4 Iron .....</b>	<b>91</b>
Overview of Function.....	91
Overview of Metabolism.....	92
Nutritional Status Assessment.....	92
Bioavailability from Foods and Supplements.....	93
<i>Typical Intakes Versus Needs</i> .....	96
Current Research on Supplement Use .....	97
General Comments on Doses and Uses .....	97
Treatment and Prevention of Anemia in Individuals without Other Discernable Health Problems.....	99
Community Interventions for Anemia Treatment and Prevention.....	99
Premature/Low Birth Weight Infants.....	101
Renal Dialysis Patients .....	101
Cancer Patients.....	102
The Elderly.....	102
Iron Deficiency without Anemia.....	103
Pregnancy .....	105
Cognitive and Behavioral Development.....	107
Infections.....	108

Exercise Performance.....	110
Miscellaneous Health Problems.....	112
Toxicity .....	114
Summary and Conclusions.....	117

<b>Chapter 5 Zinc.....</b>	<b>131</b>
Overview of Function.....	131
Overview of Metabolism.....	132
Nutritional Status Assessment.....	133
Bioavailability from Foods and Supplements.....	135
Typical Intakes Versus Needs.....	137
Current Research on Supplement Use .....	139
Overt Deficiency Correction in Children.....	139
Correction of Marginal Zinc Deficiency in Young Children.....	139
Selected Breast-Fed Infants .....	140
Premature Infants .....	140
Immune Function .....	141
Down's Syndrome.....	143
Macular Degeneration.....	143
Acne .....	144
Wound Healing.....	145
Zinc-Carnosine and Ulcers.....	145
Rheumatoid Arthritis/Crohn's Disease .....	146
Cancer Prevention .....	147
Exercise .....	148
Hepatitis .....	149
Osteoporosis Prevention.....	149
Renal Dialysis Patients .....	150
Cardiovascular Disease .....	152
Diabetes.....	153
Pregnancy .....	154
Zinc Lozenges and Colds .....	154
Toxicity .....	156
Copper Deficiency.....	156
Immunosuppression .....	156
Prostate Cancer .....	156
Alzheimer's Disease.....	157
Summary and Conclusions.....	159

<b>Chapter 6 Copper.....</b>	<b>175</b>
Overview of Function.....	175
Overview of Metabolism.....	175
Nutritional Status Assessment.....	176
Bioavailability from Foods and Supplements.....	177

Typical Intakes Versus Needs .....	178
Current Research on Supplement Use .....	181
Toxicity .....	183
Summary and Conclusions .....	186
<b>Chapter 7 Selenium</b> .....	193
Overview of Function.....	193
Overview of Metabolism.....	194
Nutritional Status Assessment.....	194
Bioavailability from Foods and Supplements.....	195
Typical Intakes Versus Needs.....	196
Current Research on Supplement Use .....	198
Geographical Populations with Severe Selenium Deficiency.....	198
Cancer .....	199
Cardiovascular Disease.....	202
Arthritis .....	202
Pancreatitis .....	203
Human Immunodeficiency Virus (HIV).....	204
Male Infertility .....	205
Pregnancy Miscarriages.....	206
Mood .....	207
Immune Function.....	208
Asthma .....	208
Ketogenic Diet in Epilepsy Patients.....	209
Miscellaneous Health Problems.....	209
General Antioxidant Effects.....	210
Toxicity.....	210
Summary and Conclusions.....	211
<b>Chapter 8 Manganese</b> .....	219
Overview of Function.....	219
Overview of Metabolism.....	220
Nutritional Status Assessment.....	220
Bioavailability from Foods and Supplements.....	220
Typical Intakes Versus Needs.....	221
Current Research on Supplement Use .....	222
Manganese and Epilepsy.....	224
Toxicity.....	224
Summary and Conclusions.....	226
<b>Chapter 9 Chromium</b> .....	229
Overview of Function.....	229
Overview of Metabolism.....	229

Nutritional Status Assessment .....	230
Bioavailability from Foods and Supplements .....	230
Typical Intakes Versus Needs .....	231
Current Research on Supplement Use .....	231
Body Weight and Composition Alterations .....	232
Improved Glucose Tolerance .....	234
Beneficial Alterations in Blood Lipid Profiles .....	236
Indirect Antioxidant Actions .....	236
Toxicity .....	236
Summary and Conclusions .....	237
<b>Chapter 10 Other Minerals .....</b>	<b>241</b>
Phosphorus .....	241
Iodine .....	242
Ultratrace Minerals .....	243
<b>Glossary .....</b>	<b>249</b>
<b>Index .....</b>	<b>251</b>
