Heavy Metal Stress in Plants

From Biomolecules to Ecosystems

Second Edition

Springer

Contents

<i>Preface</i>	v
<i>List of Contributors</i>	vii
1. Metal Availability, Uptake, Transport and Accumulation in Plants	1
<i>Maria Greger</i>	
1.1 Heavy Metal Abundance	1
1.2 Factors Influencing Metal Availability to Plants	2
1.3 Measuring Plant Availability of Heavy Metals	3
1.4 Metal Speciation	4
1.5 Metal Uptake by Plants in Terrestrial and Aquatic Environments	5
1.6 Heavy Metal Transport and Distribution of Metals in Plants	14
1.7 Mechanisms Behind Uptake and Bioconcentration of Metals	16
1.8 Plants Have Different Potentials to Bioconcentrate Metals	17
<i>References</i>	21
2. Metal Speciation, Chelation and Complexing Ligands in Plants	28
<i>A. Pohlmeier</i>	
2.1 Introduction	28
2.2 Terminology and Definitions	28
2.3 Chemical Structure of Simple Complexes	29
2.4 Thermodynamic Stability of Simple Complexes	31
2.5 Relevant Ligands in Plants	34
2.6 Inorganic, Hard and Soft Ligands	42
2.7 Kinetics and Mechanism of Complexation	42
2.8 Mechanism of Chelation	44
<i>Acknowledgements</i>	45
<i>References</i>	45
3. Metallothioneins, Metal Binding Complexes and Metal Sequestration in Plants	47
<i>M.N.V. Prasad</i>	
3.1 Introduction	47

3.2	Metallothionein Classification and Occurrence	49
3.3	Phytochelatins	51
3.4	Induction of Phytochelatins by Heavy Metals	55
3.5	High Molecular Weight Phytochelatins and Their Role in Metal Tolerance	57
3.6	Cellular Compartmentation of Phytochelatins	59
3.7	Role of Phytochelatins in Heavy Metal Tolerance	60
3.8	Symplasmic Complexation of Metals	63
3.9	Metal Exclusion/Sequestration by Organic Acids	63
3.10	Resistance Mediated by Intracellular Sequestration	69
3.11	Enzymes	70
3.12	Phytoferritins	70
3.13	Metallothionein Genes in Plants	70
3.14	Co-stress Manifestations and Involvement of Other Proteins and Metal Transporters in Heavy Metal Tolerance	73
	<i>Acknowledgements</i>	74
	<i>References</i>	75
4.	Heavy Metal Induced Oxidative Damage in Terrestrial Plants	84
	<i>B.P. Shaw, S.K. Sahu, R.K. Mishra</i>	
4.1	Metals	84
4.2	Classification of Metals	86
4.3	Heavy Metal Pollution: Some Facts	89
4.4	Heavy Metals, the Trace Metals: Essential and Non-essential	90
4.5	Dose-Response Relationship of Trace Elements	91
4.6	Uptake of Heavy Metals	92
4.7	Toxicity of Heavy Metals in Plants: a General Consideration	95
4.8	Toxic Effects: the Biochemical Basis	97
4.9	Oxidative Phytotoxicity	100
4.10	Conclusions	118
	<i>Acknowledgements</i>	118
	<i>References</i>	119
5.	Membrane Lipid Alterations in Heavy Metal Exposed Plants	127
	<i>S. Rama Devi, M.N.V. Prasad</i>	
5.1	Introduction	127
5.2	Lipid Composition of Different Membranes	127
5.3	Modification of Membrane Lipids Under Stress	128
5.4	Lipid Peroxidation	134
	<i>Acknowledgements</i>	140
	<i>References</i>	140
6.	Photosynthesis in Heavy Metal Stressed Plants	146
	<i>B. Myśliwa-Kurczel, M.N.V. Prasad, K. Strzalka</i>	
6.1	Introduction	146
6.2	Pigment Biosynthesis and Chloroplast Structure	148

6.3	Influence of HMs on Photosynthetic Light Reactions	153
6.4	Enzymology	161
6.5	Investigation of HM Influence on Photosynthesis Using Fluorescence Techniques	164
6.6	Stomatal and Gas Exchange Functions	166
6.7	Foliar Accumulation of Heavy Metals and Senescence	167
6.8	Conclusions	169
	<i>Acknowledgements</i>	170
	<i>References</i>	170
7.	Plant Mitochondrial Respiration Under the Influence of Heavy Metals	182
	<i>R. Lösch</i>	
7.1	Introduction	182
7.2	Heavy Metal Influence on Respiratory Gas Exchange	184
7.3	Respiratory Energy Supply for Heavy Metal Exclusion from the Symplast	188
7.4	Mitochondrial Structure and Performance Under the Influence of Heavy Metals	189
	<i>Acknowledgement</i>	194
	<i>References</i>	194
8.	Ecophysiology of Plant Growth Under Heavy Metal Stress	201
	<i>Jürgen Hagemeyer</i>	
8.1	Introduction	201
8.2	What is Growth?	201
8.3	How is Growth Measured?	202
8.4	Growth Responses to Various Metals	203
8.5	Effects of Mycorrhiza	215
8.6	Further Research Topics	216
	<i>References</i>	217
9.	Structural and Ultrastructural Changes in Heavy Metal Exposed Plants	223
	<i>J. Barceló, Ch. Poschenrieder</i>	
9.1	Introduction	223
9.2	Structural and Ultrastructural Effects in Algae	224
9.3	Terrestrial Higher Plants	229
9.4	Oxidative Burst and Cell Death	235
9.5	Metal Localization, Metal Speciation, and Metal Tolerance	235
9.6	Conclusions	240
	<i>Acknowledgements</i>	240
	<i>References</i>	241
10.	Water Relations in Heavy Metal Stressed Plants	249
	<i>Ch. Poschenrieder, J. Barceló</i>	
10.1	Introduction	249
10.2	Cell Water Relations and Cell Expansion Growth	250

10.3	Whole Plant Water Relations	253
10.4	Responses to Simultaneous Drought and Metal Stress	261
10.5	Conclusions	263
	<i>Acknowledgements</i>	264
	<i>References</i>	264
11.	Heavy Metals as Essential Nutrients	271
	<i>Zdenko Rengel</i>	
11.1	Introduction	271
11.2	Physiological Functions of Micronutrients	271
11.3	Plant Responses to Micronutrient Deficiencies	275
11.4	Micronutrient Uptake from Soil and Transport in Plants	279
11.5	Genotypic Differences in Micronutrient Uptake and Utilisation by Plants	281
11.6	Role of Rhizosphere Microorganisms in Micronutrient Nutrition	283
11.7	Micronutrients in Human Nutrition: the Plant Link	284
11.8	Conclusions and Future Research	285
	<i>References</i>	285
12.	Metal Pollution and Forest Decline	295
	<i>A. Hüttermann, I. Arduini, D.L. Godbold</i>	
12.1	Sources and Pattern of Heavy Metal Pollution	295
12.2	The Role of Mycorrhiza in Heavy-Metal-Tree Interactions	298
12.3	Assessment of the Impact of Heavy Metal Pollution on Trees and Forest Ecosystems	301
12.4	Amelioration	302
	<i>References</i>	306
13.	Root and Rhizosphere Processes in Metal Hyperaccumulation and Phytoremediation Technology	313
	<i>Walter W. Wenzel, Enzo Lombi, Domy C. Adriano</i>	
13.1	Introduction	313
13.2	Phytoremediation and Metal Hyperaccumulation	314
13.3	The Rhizosphere	316
13.4	Role of Rhizosphere Processes in Hyperaccumulation and Phytoremediation of Metal-Contaminated Soils	322
13.5	Enhancement of Root-Rhizosphere Processes in Phytoremediation and Research Needs	333
	<i>Acknowledgements</i>	336
	<i>References</i>	336
14.	Phytoremediation of Metals and Radionuclides in the Environment: The Case for Natural Hyperaccumulators, Metal Transporters, Soil-Amending Chelators and Transgenic Plants	345
	<i>M.N.V. Prasad</i>	
14.1	Introduction	345

14.2	Natural Metal Hyperaccumulators	349
14.3	Mechanisms of Metal Transport and Detoxification	355
14.4	Phytoextraction	357
14.5	Phytostabilization	359
14.6	Phytovolatilization	359
14.7	Rhizofiltration	361
14.8	Constructed Wetlands (Reed Beds)	362
14.9	Chelate-Enhanced Phytoremediation	365
14.10	Improving Phytoremediating Plants and Production of Transgenics That Hyperaccumulate Metals	369
14.11	Chemical Transformation	372
14.12	Ornamentals and Vegetable Crops	374
14.13	Phytoremediation of Radionuclides	375
14.14	Commercialization of Phytoremediation	381
14.15	Advantages and Disadvantages of Phytoremediation	381
14.16	Conclusions	382
	<i>Acknowledgements</i>	383
	<i>References</i>	383
15.	Metal Removal from Sewage Sludge: Bioengineering and Biotechnological Applications	392
	<i>T.R. Sreekrishnan, R.D. Tyagi</i>	
15.1	Introduction	392
15.2	Removal of Metals from Sewage Sludges	393
15.3	Effects of Process Parameters	396
15.4	Simultaneous Sludge Digestion and Metal Leaching	401
15.5	Toxicity Reduction Through Bioleaching	402
15.6	Metal Recovery from Leachate	404
15.7	Process Economics	405
	<i>References</i>	406
16.	Species-Selective Analysis for Metals and Metalloids in Plants	409
	<i>Dirk Schaumlöffel, Joanna Szpunar, Ryszard Łobiński</i>	
16.1	Introduction	409
16.2	Metal and Metalloid Species in Plants	410
16.3	Coupled Techniques for Species-Selective Analysis	414
16.4	Conclusions	428
	<i>References</i>	428
17.	Experimental Characterisation of Metal Tolerance	434
	<i>Karin I. Köhl, Rainer Lösch</i>	
17.1	Introduction	434
17.2	Parameters	435
17.3	Statistics	437
17.4	Short-Term Root-Elongation Test	440

17.5 Long-Term Growth Test 443

17.6 Biomarkers 445

17.7 Conclusions: the Importance of Tolerance Tests 446

References 448
