1 Introduction 1

PART I DETECTION AND QUANTIFICATION IN THE LABORATORY 7

2 Conceptual Foundations 9

2.1 Chemical Measurement Process / 9
2.2 Calibration and Evaluation Functions / 11
2.3 Sensitivity / 12
2.4 Accuracy and Precision / 12
2.5 Detection and Quantification (Quantitation) / 14
2.5.1 Conceptual Definitions of the Three Limits / 14
2.5.2 Interpretation of the Intervals Defined by the Critical Level, Detection Limit, and Quantitation Limit / 16
2.6 Between-Laboratory Environment / 17
2.6.1 Bias and Variation Within a Single Laboratory / 17
2.6.2 Bias and Variation Between Laboratories / 18
2.6.3 Currie's Schematic / 18

3 Statistical Foundations and Review 21

3.1 Hypothesis Testing / 21
3.1.1 Truth and Certainty of Belief / 22
3.1.2 Statistical Yardstick for Hypothesis Testing / 24
3.1.3 Statistical Significance and Practical Importance / 26

3.2 Interval Estimation / 27
3.2.1 Confidence Intervals / 27
3.2.2 Prediction Intervals / 30
3.2.3 Statistical Tolerance Intervals / 32

4 Calibration-Based Regression Models 34

4.1 Calibration Designs / 34
4.2 Ordinary Least-Squares Estimation / 34
4.3 Weighted Least-Squares Estimation / 35
4.4 Estimating the Weights / 36
4.4.1 Rocke and Lorenzato Model / 36
4.4.2 Exponential Model / 38
4.4.3 Linear Model / 39
4.5 Iteratively Reweighted Least-Squares Estimation / 39
4.6 OLS Prediction Intervals / 40
4.7 OLS Tolerance Intervals / 40
4.8 WLS Prediction Intervals / 41
4.9 WLS Tolerance Intervals / 42
4.10 Illustration / 42

5 Single-Concentration-Based Detection Limit Methods 48

5.1 Introduction / 48
5.2 Kaiser–Currie Method / 49
5.3 U.S. EPA 40CFR, Part 136 (GLASER et al.) / 50
5.4 Prediction Limits / 52
5.5 Tolerance Limits / 52
5.6 Simultaneous Control of False Positive and False Negative Rates / 53
5.7 Limitations / 54
5.8 Illustration / 56

6 Single-Concentration-Based Quantification Limit Methods 57

6.1 Introduction / 57
6.2 Currie's Determination Limit / 58
6.3 ACS Limit of Quantitation / 58
6.4 EPA Practical Quantification Limit / 58
6.5 EPA Minimum Level / 59
6.6 Illustration / 59
6.7 Discussion / 60

7 Calibration-Based Detection Limit Methods 61

7.1 Introduction / 61
7.2 Models for Constant Variance (Hubaux and Vos) / 62
7.3 Procedure Due to Clayton and Co-workers / 64
7.4 Generalization to Multiple Future Detection Decisions / 65
7.5 Nonconstant Variance / 66
7.6 Variance Proportional to Concentration / 66
7.7 Modeling Observed Variance / 67
7.8 Iteratively Reweighted Least Squares / 68
7.9 Illustration / 69
7.10 Between-Laboratory Detection Estimate / 70
7.10.1 Interlaboratory Detection Estimate and the ASTM / 72
7.10.2 IDE Approach / 73

8 Calibration-Based Quantification Limit Methods 79

8.1 Introduction / 79
8.2 Alternative Minimum Level / 79
8.3 Alternative Formulations / 82
8.4 Estimator Due to Gibbons and Co-workers / 84
8.5 Interlaboratory Quantitation Estimate / 85
8.5.1 IQE Approach / 86

9 Significant Digits 90

9.1 Introduction / 90
9.2 Measurement Uncertainty Intervals from Calibration / 90
9.3 Common Use of Significant Digits / 92
9.4 Pair of Problems Due to Having Ten Fingers and Their Solutions / 92
9.4.1 Order-of-Magnitude Uncertainty Range: Fractions of Significant Digits / 93
9.4.2 Order-of-Magnitude Relative Uncertainty: Bounding Relationship / 94
9.5 Definition of Detection: At Least Zero Significant Digits / 96
9.6 Definition of Quantitation: At Least One Significant Digit / 98
9.6.1 Use of QL_{ID} / 99
9.6.2 Development of QL_{ID} / 99
9.6.3 Graphical Example of Computing QL_{ID} / 100

9.7 Reporting Measurement and Uncertainty / 101
9.7.1 Adorning a Measurement with Uncertainty / 101
9.7.2 Measurement, Standard Deviation, Radical, and Degrees of Freedom: MRDS Format / 102

10 Experimental Design of Detection and Quantification Limit Studies and Related Studies **104**

10.1 Introduction / 104
10.2 Basic Considerations and Recommendations / 105
10.3 Variance Components / 108
10.4 Youden Pairs / 111
10.5 Matrix Effects and Blanks / 113
10.5.1 Matrix Effects / 113
10.5.2 Blanks / 115
10.6 Blind Studies / 116

11 Between-Laboratory Detection and Quantification Limit Estimators **117**

11.1 Introduction / 117
11.2 Naive Estimators / 118
11.3 Approximate Estimator / 118
11.4 More Sophisticated Approach / 118
11.4.1 Random-Effects Model for Homogeneous Errors / 119
11.4.2 Random-Effects Model for Heterogenous Errors / 120
11.5 Applications / 122
11.6 Illustration / 123

PART II DETECTION AND QUANTIFICATION IN THE FIELD 129

12 Comparison of a Single Measurement to a Regulatory Standard **131**

12.1 Introduction / 131
12.2 Determining Regulatory Compliance / 132
12.2.1 Case I: STD = 0 / 132
12.2.2 Case II: $0 < \text{STD} < L_Q$ / 132
12.2.3 Case IIa: $0 < \text{STD} \leq L_C$ / 133

12.2.4 Case IIb: $0 < L_C < \text{STD} < L_Q$ / 133
12.2.5 Case III: $L_Q \leq \text{STD}$ / 133

12.3 Confidence Interval for True Concentration / 134
12.4 Illustration / 134

13 Censored Data **136**

13.1 Introduction / 136
13.2 Conceptual Foundation / 137
13.3 Simple Substitution Methods / 139
13.4 Maximum Likelihood Estimators / 139
13.5 Restricted Maximum Likelihood Estimators / 143
13.6 Linear Estimators / 144
13.7 Alternative Linear Estimators / 145
13.8 Delta Distributions / 153
13.9 Regression Methods / 155
13.10 Substitution of Expected Values of Order Statistics / 157
13.11 Comparison of Estimators / 158
13.12 Further Simulation Results / 161
13.13 Summary / 162

14 Testing Distributional Assumptions **164**

14.1 Introduction / 164
14.2 Simple Graphical Approach / 165
14.3 Shapiro–Wilk Test / 166
14.4 Shapiro–Francia Test / 171
14.5 D'Agostino's Test / 171
14.6 Methods Based on Moments of a Normal Distribution / 173
14.7 Multiple Independent Samples / 175
14.8 Testing Normality in Censored Samples / 177
14.9 Kolmogorov–Smirnov Test / 181
14.10 Summary / 182

15 Testing for Outliers **183**

15.1 Introduction / 183
15.2 Rosner's Test / 184
15.3 Skewness Test / 187
15.4 Kurtosis Test / 188
15.5 Shapiro–Wilk Test / 188
15.6 E_m-statistic / 188
15.7 Dixon's Test / 190

15.8 Illustration / 191
15.9 Summary / 193

16 Detecting Trend **194**

16.1 Introduction / 194
16.2 Sen's Test / 195
16.3 Mann–Kendall Test / 197
16.4 Seasonal Kendall Test / 200
16.5 Statistical Properties / 203
16.6 Summary / 203

17 Detection Monitoring **204**

17.1 Introduction / 204
17.2 Groundwater Detection Monitoring / 204
17.3 Statistical Prediction Intervals / 206
17.3.1 Single Location and Constituent / 206
17.3.2 Multiple Locations / 207
17.3.3 Verification Resampling / 208
17.3.4 Multiple Constituents / 209
17.3.5 Problem of Nondetects / 209
17.3.6 Nonparametric Prediction Limits / 210
17.4 Intrawell Comparisons / 211
17.5 Illustration / 212
17.6 Methods to be Avoided / 213
17.6.1 Analysis of Variance / 213
17.6.2 Cochran's Approximation to the Behrens–Fisher *t*-Test / 215
17.7 Summary / 217

18 Assessment and Corrective Action Monitoring: Overview **218**

18.1 Introduction / 218
18.2 Strategy / 219
18.3 Application to Specific Media / 223
18.3.1 Soils: Evaluation of Individual Source Areas (PAOCs) / 223
18.3.2 Soils: Area- or Site-wide Evaluations / 224
18.3.3 Groundwater: Aquifer / 224
18.3.4 Groundwater: Groundwater–Surface Water Interface / 226

18.3.5 Groundwater: Long-Term Monitoring / 226
18.3.6 Groundwater: Natural Attenuation Evaluation / 227
18.3.7 Waste Stream Sampling / 228

18.4 Summary / 228

19 Assessment and Corrective Action Monitoring: Comparison to a Standard **229**

19.1 Introduction / 229
19.2 LCL or UCL? / 230
19.3 Normal Confidence Limits for the Mean / 231
19.4 Lognormal Confidence Limits for the Median / 232
19.5 Lognormal Confidence Limits for the Mean / 232
19.5.1 Exact Method / 232
19.5.2 Approximating Land's Coefficients / 233
19.5.3 Approximate Lognormal Confidence Limit Methods / 238

19.6 Nonparametric Confidence Limits for the Median / 242
19.7 Confidence Limits for Other Percentiles of the Distribution / 243
19.7.1 Normal Confidence Limits for a Percentile / 243
19.7.2 Lognormal Confidence Limits for a Percentile / 244
19.7.3 Nonparametric Confidence Limits for a Percentile / 244

20 Assessment and Corrective Action Monitoring: Comparison to Background **252**

20.1 Introduction / 252
20.2 Normal Prediction Limits for $m = 1$ Future Measurements at Each of k Locations / 253
20.3 Normal Prediction Limits for the Mean(s) of $m > 1$ Future Measurements at Each of k Locations / 258
20.4 Lognormal Prediction Limits for $m = 1$ Future Measurements at Each of k Locations / 262
20.5 Lognormal Prediction Limits for the Median of $m > 1$ Future Measurements at Each of k Locations / 264
20.6 Lognormal Prediction Limits for the Mean of $m > 1$ Future Measurements at Each of k Locations / 265
20.7 Nonparametric Prediction Limits for $m = 1$ Future Measurements in Each of k Locations / 267
20.8 Nonparametric Prediction Limits for the Median of $m > 1$ Future Measurements at Each of k Locations / 267

21 Assessment and Corrective Action Monitoring: Case Studies **273**

21.1 Case Study 1: Long-Term Monitoring / 273
21.2 Case Study 2: Soil PAOC and Soil Phase III Evaluation / 274
21.2.1 PAOC 2 / 274
21.2.2 PAOC 18 / 276
21.2.3 Results / 276
21.3 Case Study 3: Site-wide Groundwater Evaluation / 277

22 Review of Available Computer Software **280**

23 Summary **281**

APPENDIX: LAND'S TABLES 283
