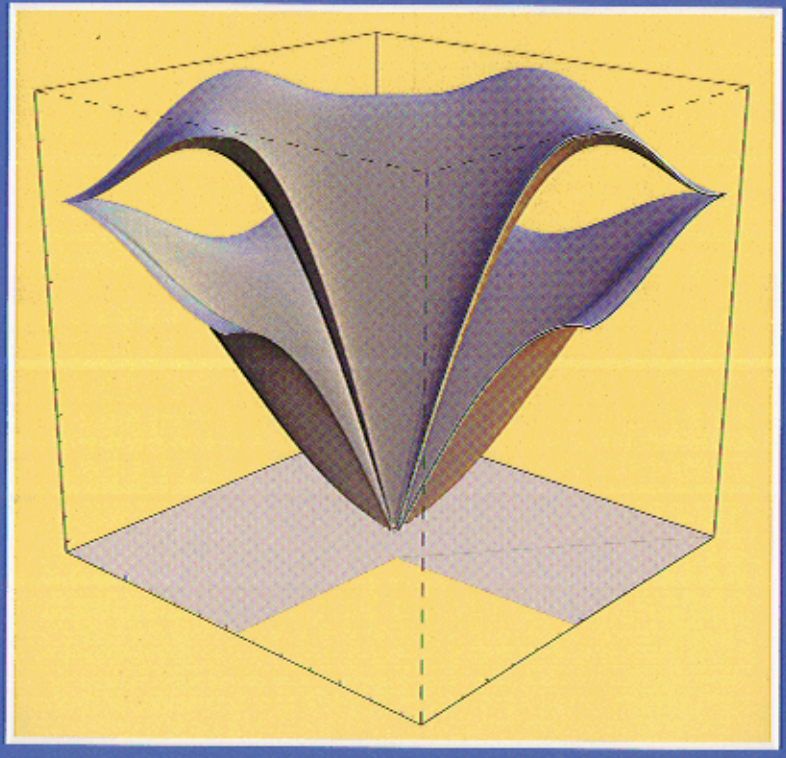
Semiconductors for Micro- and Nanotechnology

An Introduction for Engineers



Contents

Contents 7

Preface 13

Chapter 1 Introduction 15

The System Concept 16
Popular Definitions and Acronyms 19
Semiconductors versus Conductors and Insulators *19*
The Diode Family *20*
The Transistor Family *20*
Passive Devices *21*
Microsystems: MEMS, MOEMS, NEMS, POEMS, etc. *21*
Sources of Information 24
Summary for Chapter 1 24
References for Chapter 1 25

Chapter 2 The Crystal Lattice System 27

Observed Lattice Property Data 29
Silicon 33
Silicon Dioxide 36
Silicon Nitride 37
Gallium Arsenide 37
Crystal Structure 39
Symmetries of Crystals 40
Elastic Properties: The Stressed Uniform Lattice 48
Statics 48
The Vibrating Uniform Lattice 64
Normal Modes 64
Phonons, Specific Heat, Thermal Expansion 81
Modifications to the Uniform Bulk Lattice 88
Summary for Chapter 2 91
References for Chapter 2 92

Chapter 3 The Electronic System 95

Quantum Mechanics of Single Electrons 96
Wavefunctions and their Interpretation 97
The Schrödinger Equation 102
Free and Bound Electrons, Dimensionality Effects 106
Finite and Infinite Potential Boxes 106
Continuous Spectra 112
Periodic Boundary Conditions 115
Potential Barriers and Tunneling 115
The Harmonic Oscillator 118
The Hydrogen Atom 123
Transitions Between Electronic States 127
Fermion number operators and number states 130
Periodic Potentials in Crystal 132
The Bloch Functions 132
Formation of Band Structure 133
Types of Band Structures 136
Effective Mass Approximation 139
Summary for Chapter 3 140
References for Chapter 3 141

Chapter 4 The Electromagnetic System 143

Basic Equations of Electrodynamics 144
Time-Dependent Potentials *149*
Quasi-Static and Static Electric and Magnetic Fields *151*
Basic Description of Light 158
The Harmonic Electromagnetic Plane Wave *158*
The Electromagnetic Gaussian Wave Packet *160*
Light as Particles: Photons *162*
Waveguides 164
Example: The Homogeneous Glass Fiber *166*
Summary for Chapter 4 167
References for Chapter 4 168

Chapter 5 Statistics 169

Systems and Ensembles 170
Microcanonical Ensemble *171*
Canonical Ensemble *174*
Grand Canonical Ensemble *176*
Particle Statistics: Counting Particles 178
Maxwell-Boltzmann Statistics *178*
Bose-Einstein Statistics *180*
Fermi-Dirac Statistics *181*
Quasi Particles and Statistics *182*
Applications of the Bose-Einstein Distributions 183
Electron Distribution Functions 184
Intrinsic Semiconductors *184*
Extrinsic Semiconductors *187*
Summary for Chapter 5 190
References for Chapter 5 190

Chapter 6 Transport Theory 191

The Semi-Classical Boltzmann Transport Equation 192
The Streaming Motion *193*
The Scattering Term *195*
The BTE for Phonons *197*
Balance Equations for Distribution Function Moments *197*

Relaxation Time Approximation *201*
Local Equilibrium Description **204**
Irreversible Fluxes and Thermodynamic Forces *205*
Formal Transport Theory *212*
The Hall Effect *216*
From Global Balance to Local Non-Equilibrium **219**
Global Balance Equation Systems *220*
Local Balance: The Hydrodynamic Equations *220*
Solving the Drift-Diffusion Equations *222*
Kinetic Theory and Methods for Solving the BTE *227*
Summary for Chapter 6 ..... **231**
References for Chapter 6 ..... **231**

Chapter 7 Interacting Subsystems 233

Phonon-Phonon **235**
Phonon Lifetimes *235*
Heat Transport *236*
Electron-Electron **239**
The Coulomb Potential (Poisson Equation) *240*
The Dielectric Function *241*
Screening *242*
Plasma Oscillations and Plasmons *243*
Electron-Phonon **245**
Acoustic Phonons and Deformation Potential Scattering ..*246*
Optical Phonon Scattering *249*
Piezoelectricity *251*
Piezoelectric Transducers *258*
Stress Induced Sensor Effects: Piezoresistivity *260*
Thermoelectric Effects *262*
Electron-Photon **267**
Intra- and Interband Effects *268*
Semiconductor Lasers *270*
Phonon-Photon **276**
Elasto-Optic Effect *276*
Light Propagation in Crystals: Phonon-Polaritons *277*
Inhomogeneities **279**
Lattice Defects *280*
Scattering Near Interfaces (Surface Roughness, ... *281*

Phonons at Surfaces *284*
The PN Junction *300*
Metal-Semiconductor Contacts *313*
Summary for Chapter 7 ..... **324**
References for Chapter 7 ..... **324**

Index **327**
