# PRINCIPLES OF CROP PRODUCTION

Theory, Techniques, and Technology

Second Law.

GEORGE ACQUAAH

#### Preface xxv

### PART ONE Underlying Principles 1

#### Chapter 1: Crop Production and Society 3

	Purpose 3
	Expected Outcomes 3
	Key Terms 3
	To the Student 4
1.1	Before Agriculture, People Survived by Hunting and Gathering Food 4
1.2	Agriculture Is an Invention 5
1.3	Agriculture Provides Food, Feed, and Fiber for Society 7
	1.3.1 Food Value of Crops 7
	1.3.2 The Crops That Feed the World 8
1.4	Crop Production: An Art, a Science, and a Business 14
	1.4.1 The Art of Crop Production 14
	1.4.2 Crop Production as a Science 17
	1.4.3 Crop Production as a Business 19
1.5	Evolution of Modern Agriculture 22
	1.5.1 Era of Resource Exploitation (Before 1900) 22
	1.5.2 Era of Resource Conservation and Regeneration (Early 1900's) 22
	1.5.3 Era of Resource Substitution (Mid 1900's) 22
	1.5.4 Era of Information 23
1.6	The Rich History of U.S. Agriculture 23
	1.6.1 The Success of U.S. Agriculture is Based on Sound Policy 24

1.7.1 Most U.S. Farms Are Classified as "Small," Grossing Less Than \$50,000 Annually 24 1.7.2 Less Than 25% of U.S. Land is Cropland 26 1.7.3 Most U.S. Farms Specialize in Animal Production 29 1.7.4 Most U.S. Farms Are Operated by Individuals 32 1.7.5 Most U.S. Farms are Operated by Individuals 32 1.7.6 Most U.S. Farms are Operated by Individuals 32 1.7.6 Most U.S. Farmland Is Under Some Form of Private Ownership, Full, or Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Sector Is Dynamic 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51 Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identifying Grass Plants 60 2.3.1 Identifying Grass Plants 60		1.7	Structure of U.S. Agriculture 24
1.7.2 Less Than 25% of U.S. Land is Cropland 26 1.7.3 Most U.S. Farms Specialize in Animal Production 29 1.7.4 Most U.S. Farms Are Operated by Individuals 32 1.7.5 Most U.S. Farmland Is Under Some Form of Private Ownership, Full, or Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Comment Sources 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51 Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.3 Operational Classification Systems 56 2.3 Usual Identifying Grass Plants 60 2.3.1 Identifying Grass Plants 60			1.7.1 Most U.S. Farms Are Classified as "Small," Grossing Less Than \$50,000
1.7.3 Most U.S. Farms Specialize in Animal Production 29 1.7.4 Most U.S. Farms Are Operated by Individuals 32 1.7.5 Most U.S. Farmland Is Under Some Form of Private Ownership, Full, or Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51 Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.3 Operational Classification Systems 56 2.3 Visual Identifying Grass Plants 60 2.3.1 Identifying Grass Plants 60			Annually 24
1.7.4 Most U.S. Farms Are Operated by Individuals 32 1.7.5 Most U.S. Farmland Is Under Some Form of Private Ownership, Full, or Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2 Taxomony Is a Work in Progress 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Visual Identifying Broadleaf (Foliage) Plants 60 2.3.1 Identifying Broadleaf (Foliage) Plants 60 2.3.2 Identifying Grass Plants 63			
1.7.5 Most U.S. Farmland Is Under Some Form of Private Ownership, Full, or Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51 Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identifying Broadleaf (Foliage) Plants 60 2.3.1 Identifying Broadleaf (Foliage) Plants 60			1.7.3 Most U.S. Farms Specialize in Animal Production 29
Part Ownership 33 1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34 1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Taxomony Is a Work in Progress 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identifying Broadleaf (Foliage) Plants 60 2.3.1 Identifying Grass Plants 63			1.7.4 Most U.S. Farms Are Operated by Individuals 32
1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a Farm 34  1.8 The USDA Recognizes Ten Farming Sections 35 1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51 Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3.1 Identifying Broasleaf (Foliage) Plants 60 2.3.2 Identifying Grass Plants 63			•
1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3.1 Identifying Grass Plants 63			1.7.6 About Half of the People Who Own U.S. Farmlands Do Not Operate a
1.9 Agricultural Regions of the United States 36 1.10 The U.S. Farm Sector Is Dynamic 38 1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3.1 Identifying Grass Plants 63		1.8	The USDA Recognizes Ten Farming Sections 35
1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identifying Broadleaf (Foliage) Plants 60 2.3.1 Identifying Broadleaf (Foliage) Plants 60 2.3.2 Identifying Grass Plants 63		1.9	
1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38 1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38 1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38 1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39 1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39 1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identifying Broadleaf (Foliage) Plants 60 2.3.1 Identifying Broadleaf (Foliage) Plants 60 2.3.2 Identifying Grass Plants 63		1.10	The U.S. Farm Sector Is Dynamic 38
1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and Government Sources 38  1.10.3 About a Dozen States Generate More Than Half the Net U.S. Farm Income 38  1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39  1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39  1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46  References and Suggested Reading 47  Selected Internet Sites for Further Review 48  Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51  Expected Outcomes 51  Key Terms 51  To the Student 52  2.1 What Is Plant Taxonomy? 52  2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55  2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56  2.2.3 Operational Classification Systems 56  2.3.1 Identifying Broadleaf (Foliage) Plants 60  2.3.2 Identifying Broadleaf (Foliage) Plants 60  2.3.1 Identifying Grass Plants 63			1.10.1 U.S. Farm Labor Consists Largely of Family Workers 38
Income 38  1.10.4 The Balance Sheet for U.S. Agriculture Shows a Lower Debt-to-Asset Ratio in the 1990's Than the 1980's 39  1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39  1.10.6 People with All Kinds of Backgrounds Undertake Farming 40  Summary 46  References and Suggested Reading 47  Selected Internet Sites for Further Review 48  Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51  Expected Outcomes 51  Key Terms 51  To the Student 52  2.1 What Is Plant Taxonomy? 52  2.2.1 Taxomony Is a Work in Progress 52  2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55  2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56  2.2.3 Operational Classification Systems 56  2.3.1 Identifying Broadleaf (Foliage) Plants 60  2.3.2 Identifying Grass Plants 63			1.10.2 U.S. Producers Have Access to Agricultural Credit from Commercial and
Ratio in the 1990's Than the 1980's 39  1.10.5 Many U.S. Farmers Derive Considerable Income from Off-Farm Sources 39  1.10.6 People with All Kinds of Backgrounds Undertake Farming 40 Summary 46 References and Suggested Reading 47 Selected Internet Sites for Further Review 48 Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51 Expected Outcomes 51 Key Terms 51 To the Student 52 2.1 What Is Plant Taxonomy? 52 2.2 Taxomony Is a Work in Progress 52 2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55 2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56 2.2.3 Operational Classification Systems 56 2.3 Visual Identification of Plants Requires Familiarity with Plant Morphology 59 2.3.1 Identifying Broadleaf (Foliage) Plants 60 2.3.2 Identifying Grass Plants 63			
Sources 39  1.10.6 People with All Kinds of Backgrounds Undertake Farming 40  Summary 46  References and Suggested Reading 47  Selected Internet Sites for Further Review 48  Outcomes Assessment 48  Chapter 2: Plant Morphology 51  Purpose 51  Expected Outcomes 51  Key Terms 51  To the Student 52  2.1 What Is Plant Taxonomy? 52  2.2 Taxomony Is a Work in Progress 52  2.2.1 Flowering Plants Belong to the Division Magnoliophyta 55  2.2.2 Classifying and Naming Plants Is a Science Governed by International Rules 56  2.2.3 Operational Classification Systems 56  2.3 Visual Identification of Plants Requires Familiarity with Plant Morphology 59  2.3.1 Identifying Broadleaf (Foliage) Plants 60  2.3.2 Identifying Grass Plants 63

#### Chapter 3: Fundamental Plant Growth Processes 99

3.1

Purpose 99
Expected Outcomes 99
Key Terms 100
To the Student 100
The Plant Is a Metabolic Machine 100

	3.2	Photosynthesis: Harnessing Light Energy to Make Food 101
		3.2.1 Life On Earth Is Mostly Solar-Powered 101
		3.2.2 The Site of Photosynthesis Is the Chloroplast, with Chlorophyll As Chief
		Pigment 101
		3.2.3 Photosynthesis Occurs in Two Phases 101
		3.2.4 Carbon Dioxide Enters the Plant by Diffusion 102
		3.2.5 Light Reactions Depend on Visible Light 103
		3.2.6 Sugar Synthesis Uses Energy (ATP) and Reducing Power (NADPH)
		from the Light Phase 105
		3.2.7 Carbon Dioxide Assimilation Is Affected by Environmental Factors 106
		3.2.8 Photosynthetic Rate Is Affected by Growth and Development Needs of
		Plants 110
	3.3	Cellular Respiration: Harvesting Chemical Energy from Food Molecules 110
	5.5	3.3.1 Not All Harvested Energy Directly Impacts Biomass 111
		3.3.2 Aerobic Respiration Occurs in Three Stages 111
		3.3.3 Cells Can Extract Nearly Half of the Potential Energy of Organic
		Molecules Used As Fuel 114
		3.3.4 Harvesting Energy Under Anaerobic Conditions Is Inefficient 115
		C C)
		<u>.</u>
		3.3.6 Transpiration 116
		3.3.7 How Water Moves In Plants 117
		3.3.8 Translocation 118
		3.3.9 Summary of Photosynthesis-Related Crop Management Practices 118

#### Chapter 5: Crop Improvement 143

Purpose 143

Expected Outcomes 143

Key Terms 143

To the Student 143

- 5.1 The Science of Genetics 144
  - 5.1.1 Genes Control the Expression of Heritable Traits 144
  - 5.1.2 One or a Few Genes Control Some Traits; Several to Many Genes Control Others 146
  - 5.1.3 Certain Genes May Interfere with the Expression of Other Genes 146
  - 5.1.4 Genes Interact with the Environment to Produce a Visible Trait 146
  - 5.1.5 DNA Is the Genetic Material 146
- 5.2 Plant Breeders Genetically Manipulate Plants to Produce New Traits 150
  - 5.2.1 Plant Breeders Are Guided by Genetic Principles in Their Work 150
  - 5.2.2 Conventional Plant Breeding Follows Certain Basic Steps 150
     5.2.3 Conventional Plant Breeding Has Certain Limitations 152
- 5.3 Methods of Breeding Depend on the Breeding System of the Plants 152
  - 5.3.1 Some Plants Are Predominantly Self-Pollinated, While Others Are Predominantly Cross-Pollinated Species 152
  - 5.3.2 Common Plant Breeding Methods 154
- 5.4 Common Plant Breeding Objectives 157
  - 5.4.1 Crop Yield Is Often the Ultimate Goal of Crop Improvement 157
  - 5.4.2 Breeding Strategies for Increased Crop Productivity 157
- 5.5 Biotechnology Exceeds Conventional Breeding Methods 165
  - 5.5.1 Biotechnology Is Used to Solve a Variety of Problems in Crop Production 167

#### Chapter 9: Pl

9.1 Hydrologic Cycle 279

- 9.1.1 Three Forces Are Involved in Soil Water Movement and Retention 280
- 9.1.2 Water Uptake by Plants Occurs Largely without Energy Expenditure 282
- 9.1.3 Not All Forms of Soil Water Are Available to Plants 283
- 9.1.4 Some Plants Use Water More Efficiently Than Others 283
- 9.1.5 Soil Water Content Can Be Measured in a Variety of Ways 285
- 9.2 Goals of Soil Water Management 286
  - 9.2.1 What Is Dryland Agriculture? 286
  - 9.2.2 Crop Production Under Rainfed Conditions Depends on the Hydrologic Cycle 287

- 9.2.3 In Rainfed Crop Production, Distribution or Variability in Rainfall Patterns Is More Important Than the Total Amount of Rainfall 288 9.2.4 Dryland Practices 288
- 9.3 Irrigated Crop Production 290
- - Irrigation Water Should Be Free From Pollutants 291 9.3.1
  - 9.3.2 Irrigation Water May Be Applied in One of Several Ways 292
  - 9.3.3 Methods of Irrigation 293
  - 9.3.4 Sprinkler Irrigation 294
  - 9.3.5 Furrow Irrigation Is the Most Common Gravity Irrigation Method Used in U.S. Crop Production 298
  - 9.3.6 Center-Pivot Irrigation Systems Are the Most Widely Used Pressurized Irrigation Systems in U.S. Crop Production 299
  - 9.3.7 Irrigation Water Should Be Well Managed for Profitability of Crop Production 301

#### Chapter 10: Pests in Crop Production 310

Purpose 310

Expected Outcomes 310

Key Terms 310

To the Student 311

- 10.1 Concept of Disease 312
- 10.2 Classification of Plant Diseases 313
  - 10.2.1 Viruses Are Obligate Parasites 314
  - 10.2.2 Almost All Pathogenic Plant Bacteria Are Rod-Shaped (Bacilli) 314
  - 10.2.3 Mycoplasma-Like Organisms 314
  - 10.2.4 Fungi Cause Most of the Important Infectious Diseases of Crop Plants 314
  - 10.2.5 Nematodes 315
  - 10.2.6 Parasitic Plants 316
- 10.3 Nature of Disease 317
  - 10.3.1 Inoculation 317
  - 10.3.2 Penetration 318
  - 10.3.3 Infection 318
  - 10.3.4 Dissemination 318
  - 10.3.5 Overwintering or Oversummering 318
- Plants Have Certain Defense Mechanisms to Ward Off Pathogenic Invasion 319 10.4 Some Plants Are Genetically Equipped to Resist Certain Diseases 319 10.4.1
- 10.5 How Pathogens Affect Crop Productivity 321
  - 10.5.1 Photosynthesis 321
  - 10.5.2 Respiration 321
  - 10.5.3 Translocation 322 10.5.4 Growth 322

  - 10.5.5 Plant Death 322
  - 10.5.6 Economic Product 322
- 10.6 Insect Pests 322
  - 10.6.1 Lifecycle 323
  - 10.6.2 Mouthparts and Feeding Habits 325

10.6.4 Types of Insect Damage and Their Impact on Plant Economic Products 326 10.7 Other Crop Pests 326 10.7.1 Mites 326 10.7.2 Vertebrates 326 10.7.3 Storage Pests 326 10.8.1 Economic Importance of Weeds 327 10.8.1 Economic Importance of Weeds 327 10.8.2 Useful Role of Weeds in an Agroecosystem 327 10.8.3 Classification of Weeds 328 10.8.4 Weed Species Are Persistent in the Landscape 328 10.8.5 Troublesome Weeds 330 10.8.6 Managing Weeds in Crop Production 330 10.9 Nonpathogenic Causes of Plant Disease 331 10.9.10 Temperature 331 10.9.2 Moisture 332 10.9.3 Air 332 10.9.4 Nutritional Deficiency and Toxicity 332 10.9.5 Herbicide Injury 332 10.10 Principles of Pest Management 332 10.10.1 Pest Attack May Be Prevented by Employing Certain Methods 333 10.10.2 Designing a Pest Management Strategy Involves Certain Considerations 334 10.11 Methods of Pest Management 335 10.11.1 Biological Pest Management 337 10.11.2 Cultural Pest Management 337 10.11.3 Legislative Pest Management 338 10.11.4 Physical/Mechanical Pest Management 338 10.11.5 Chemical Pest Management 348 10.11.7 Pesticide Injury to Crops 348 10.11.8 Factors Affecting Persistence of Soil-Residual Herbicides 349 10.11 Integrated Pest Management (IPM) 350		10.6.3 Insect Damage Varies with Plant Growth Stage 325

## Chapter 11: Agricultural Production Systems 361

Purpose 361
Expected Outcomes 361
Key Terms 361
To the Student 362
11.1 What Is a Crop Production System 362
11.1.1 Inputs 362
11.1.2 Biological Processes 362
11.1.3 Depletion of Inputs 362

	11.2	Natural Ecosystem Versus Agroecosystem 363
	11.3	Crop Farms and Fields Are Agroecosystems 365
	11.4	Plant Populations (and Mixtures) and Competition 367
	11.5	Monoculture 370
		11.5.1 Advantages of Monoculture 371
		11.5.2 Disadvantages of Monoculture 371
	11.6	Polyculture 371
		11.6.1 Complementation 372
		11.6.2 Competition 373
	11.7	Types of Polyculture 374
		11.7.1 Mixtures 374
		11.7.2 Intercropping 374
		11.7.3 Strip Cropping 375
		11.7.4 Overlap Planting Systems 375
		11.7.5 Nurse Crop 376
		11.7.6 Crop Rotation 376
		11.7.7 Fertility Restorative Cropping 378
	11.8	Agroforestry 380
		11.8.1 What Is Agroforestry 380
		11.8.2 Agroforestry Practices 380
		Summary 390
		References and Suggested Reading 390
		Selected Internet Sites for Further Review 390
		Outcomes Assessment 391
Chapter 12:	Organ	ic Crop Production 393
Chapter 12.	O'gun	<del>-</del>
		Purpose 393
		Expected Outcomes 393
		Key Terms 393
		To the Student 393
	12.1	What Is Organic Farming? 394
		12.1.1 Definition of Organic Farming 394
		12.1.2 "Organic" Versus "Natural" 394
		12.1.3 Goals of Organic Farming 395
	12.2	Principles of Organic Farming Systems 395
	12.3	
	12.4	1 0
	12.5	Organic Farming Practices 399
		12.5.1 Practices for Increasing Soil Fertility 399
		12.5.2 Practices for Diseases and Insect Pest Control 401
		12.5.3 Practices Used for Weed Control 401

12.5.4 Practices for Conserving Soil and Its Properties 402

Basic Conventional Farming Versus Basic Organic Farming 404

Constraints on Organic Farming Technology 404

References and Suggested Reading 405 Selected Internet Sites for Further Review 405

12.6 Certification and Standards 402

Summary 405

Markets and Marketing 403

Outcomes Assessment 405

Chapter 13: Transgenics in Crop Production 40	Chapter	13:	Transgenics	in	Crop	Production	40
---	---------	-----	-------------	----	------	------------	----

Purpose 408

Expected Outcomes 408

Key Terms 408

To the Student 408

World Transgenic Crop Production 409 13.1

13.1.1 Acreage 409 13.1.2 Crops 409

13.2 U.S. Transgenic Crop Production 410

13.3 Traits Incorporated into Transgenic Crop Varieties 410

13.3.1 Herbicide Tolerance 411

13.3.2 Engineering Insect Resistance in Crops 415

#### Chapter 14: Rangeland and Pastures and Their Management

Purpose 425

Expected Outcomes 425

Key Terms 425

To the Student 426

14.1 Kinds of Grazinglands 426

14.2 Rangelands 426

14.3 Range Condition Classes 431

14.4 Pastures 431

14.5 Kinds of Pasture 432

14.6 Pasture Species and Mixtures 433

14.7 Selecting Pasture Species 433

14.8 Establishing a Permanent Pasture 435

14.8.1 Land Preparation 435

14.8.2 Seedbed Preparation 435

14.8.3 Time of Seeding 435

14.8.4 Methods of Seeding 436

14.8.5 Seeding Depth 436

14.8.6 Fertilization 436

14.8.7 Irrigation 436

14.8.8 Weeds 436

14.9 Rangeland and Pasture Management Concepts 437

14.10 Grazing Systems and Their Management 437

14.10.1 Continuous Stocking 437

14.10.2 Rotational Stocking 439

14.10.3 Specialized Grazing Systems 439

14.11 Poisonous Plants in the Rangeland 440

14.12 Bloating 440

14.13 Pasturing Winter Wheat 441

14.14 Pasture Renovation 441

Summary 442

References and Suggested Reading 442

#### Chapter 15: Tillage Systems and Farm Energy 444

Purpose 444
Expected Outcomes 444
Key Terms 444
To the Student 445
