

# Handbook of **SEED PHYSIOLOGY**

## Applications to Agriculture

Roberto L. Benech-Arnold • Rodolfo A. Sánchez  
Editors

## CONTENTS

<b>About the Editors</b>	<b>xi</b>
<b>Contributors</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>SECTION I: GERMINATION IN THE SOIL AND STAND ESTABLISHMENT</b>	
<b>Chapter 1. Seedbed Preparation—The Soil Physical Environment of Germinating Seeds</b>	<b>3</b>
<i>Amos Hadas</i>	
Introduction	3
Environmental Requirements of Germinating Seed	5
Soil Environment—Physical Aspects	9
Seedbed Preparation, Characterization of Seedbed Attributes, and Seedbed Environment Conditions and Seed Germination	20
Water Uptake by Seeds and Seedlings	24
Seed-Soil Water Relationships	27
Modeling Seed Germination and Seedbed Physical Attributes	29
Concluding Remarks	36
<b>Chapter 2. The Use of Population-Based Threshold Models to Describe and Predict the Effects of Seedbed Environment on Germination and Seedling Emergence of Crops</b>	<b>51</b>
<i>William E. Finch-Savage</i>	
Introduction	51
Imbibition	54
Germination	56
Other Germination Models	72
Postgermination Seedling Growth	72
Threshold Models: Prediction of Germination and Emergence Patterns in the Field	74

Summary and Conclusions	83
Appendix	84
<b>Chapter 3. Seed and Agronomic Factors Associated with Germination Under Temperature and Water Stress</b>	<b>97</b>
<i>Mark A. Bennett</i>	
Introduction	97
Seed Coats	98
Seed Size	99
Seed Water Uptake	101
Radicle Emergence and Root System Development	104
Genetic Links to Germination Temperature Limits	105
Seed Production and Seed Vigor	106
Sowing Depths and Planter Technology	108
Tillage Systems and Soil Structure Effects	109
Interactions with Seed Treatments and Other Crop Protection Chemicals	110
Screening Protocols for Germination Tolerance to Low Temperature and Water Stress	112
Concluding Remarks	114
<b>Chapter 4. Methods to Improve Seed Performance in the Field</b>	<b>125</b>
<i>Peter Halmer</i>	
Introduction	125
Changing Seed Form and Lot Composition	126
Physiological Enhancement	132
Physiological Responses to Enhancement	139
Ecological Aspects of Seed Hydration	155
Conclusions and Future Directions	156
<b>SECTION II: DORMANCY AND THE BEHAVIOR OF CROP AND WEED SEEDS</b>	
<b>Chapter 5. Inception, Maintenance, and Termination of Dormancy in Grain Crops: Physiology, Genetics, and Environmental Control</b>	<b>169</b>
<i>Roberto L. Benech-Arnold</i>	
Introduction	169
Physiology of Dormancy in the Cereal Grain	170

Physiology of Dormancy in the Sunflower Seed	177
The Expression of Dormancy in Grain Crops	180
Removing Dormancy at an Industrial Scale	182
Genetics and Molecular Biology of Dormancy in Grain Crops	183
Environmental Control of Dormancy in Grain Crops	188
Concluding Remarks	190
<b>Chapter 6. Preharvest Sprouting of Cereals</b>	<b>199</b>
<i>Gary M. Paulsen</i>	
<i>Andrew S. Auld</i>	
Introduction	199
The Preharvest Sprouting Process	201
Physiological Control of Preharvest Sprouting	204
Quality of Products from Sprouted Cereals	206
Measurement of Preharvest Sprouting	209
Controlling Sprouting by Breeding	212
Controlling Sprouting in the Field	214
<b>Chapter 7. The Exit from Dormancy and the Induction of Germination: Physiological and Molecular Aspects</b>	<b>221</b>
<i>Rodolfo A. Sánchez</i>	
<i>R. Alejandra Mella</i>	
Introduction	221
The Effects of Light Photoreceptors	222
Embryo Growth Potential	224
Endosperm Weakening	226
Termination of Dormancy: Its Relationship with the Synthesis and Signaling of Gibberellins and ABA	233
Concluding Remarks	235
<b>Chapter 8. Modeling Changes in Dormancy in Weed Soil Seed Banks: Implications for the Prediction of Weed Emergence</b>	<b>245</b>
<i>Diego Batlla</i>	
<i>Betina Claudia Kruk</i>	
<i>Roberto L. Benech-Arnold</i>	
Introduction	245
Dormancy: Definitions and Classification	246

How Is Dormancy Level Expressed?	247
Environmental Factors Affecting Dormancy Level of Seed Populations	248
Factors That Terminate Dormancy	250
Conceptualizing the System with Modeling Purposes	252
Modeling Dormancy Changes in Weed Seed Banks As Affected by the Environment	253
Concluding Remarks	264

### **SECTION III: SEED LONGEVITY AND STORAGE**

#### **Chapter 9. Orthodox Seed Deterioration and Its Repair 273**

*Miller B. McDonald*

Introduction	273
The First Seed	273
Seed Deterioration	275
Mechanisms of Orthodox Seed Deterioration	280
Free Radical Production	281
Free Radicals and Their Effects on Lipids	282
How Do Free Radicals Cause Lipid Peroxidation?	282
What Is the Influence of Seed Moisture Content on Free Radical Assault?	283
Do Free Radicals Attack Only Lipids?	285
Why Suspect Free Radical Attack on Mitochondria?	285
How Are Seeds Protected Against Free Radical Attack?	288
Raffinose Oligosaccharides and Their Protective Role	291
Repair of Seed Damage	292
Model of Seed Deterioration and Repair During Priming/ Hydration	295
Conclusions	296

#### **Chapter 10. Recalcitrant Seeds 305**

*Patricia Berjak*

*Norman W. Pammenter*

Seed Characteristics—The Broad Picture	305
Seed Behavior	306
The Suite of Interacting Processes and Mechanisms Involved in Desiccation Tolerance	312
Drying Rate and Causes of Damage in Recalcitrant Seeds	317

## **SECTION IV: INDUSTRIAL QUALITY OF SEEDS**

<b>Chapter 11. Processing Quality Requirements for Wheat and Other Cereal Grains</b>	<b>349</b>
<i>Colin W. Wrigley</i>	
<i>Ferenc Bekes</i>	
Introduction	349
The Range of Grain Species Used Industrially	349
Cereal Grains and Our Diet	352
Uses of Cereal Grains	357
Wheat-Grain Quality Traits: A Molecular Basis	368
Grain Hardness	380
Starch Properties	380
Conclusion	382
<b>Chapter 12. Grain Quality in Oil Crops</b>	<b>389</b>
<i>Leonardo Velasco</i>	
<i>Begoña Pérez-Vich</i>	
<i>José M. Fernández-Martínez</i>	
Introduction	389
Components of Grain Quality in Oil Crops and Factors Influencing Them	391
Oil Quality	392
Meal Quality	406
Breeding and Production Strategies	412
<b>Chapter 13. The Malting Quality of Barley</b>	<b>429</b>
<i>Roxana Savin</i>	
<i>Valeria S. Passarella</i>	
<i>José Luis Molina-Cano</i>	
Introduction	429
Grain Structural Components That Affect Malting Quality	433
Genotypic and Environmental Factors Affecting Malting Quality	437
Achieving Barley-Grain Quality Targets	443
Conclusions	448
<b>Index</b>	<b>457</b>
