

APPLIED ANIMAL NUTRITION

Feeds and Feeding

Third Edition

Peter R. Cheeke

CONTENTS

Contributors xv

Preface xvi

PART I FEEDSTUFFS AND THEIR PROPERTIES 1

Chapter 1 Introduction to Nutrients, Digestive Physiology, and Feed Analysis 3

Nutrient Categories 4

Protein 4

Carbohydrates 4

Lipids 5

Minerals 5

Vitamins 6

Water 7

Nutrient Functions 7

Structural Role 7

Sources of Energy 7

Regulatory Functions 8

Nutrient Requirements 8

Digestive Tract Physiology 9

Simple Nonruminants (Monogastrics) 9

Ruminants 13

Nonruminant Herbivores 16

Techniques Used in Evaluating Feeds 18

Feed Microscopy 18

Feed Analysis 19

Estimation of Feed Energy 21

Determination of Digestibility 22

Classification of Feedstuffs 24

Sources of Current Information on Feeds 25

Questions and Study Guide 26

References 28

Chapter 2 Concentrates: Energy Sources 29

Cereal Grains	29
General Structure of Grains	29
Corn (Maize)	30
Grain Sorghum and Millet	40
Wheat	42
Barley	45
Oats	47
Rye	49
Triticale	50
Rice	51
Other Grains	52
Teff	52
Buckwheat	52
Amaranth	54
Sprouted Grains	54
Cereal Milling By-Products	55
Wheat Milling By-Products	56
Corn Mill Feeds	57
Rice Bran	58
Other Grain Milling By-Products	58
Grain Overload of Ruminants	59
Acidosis	59
Other Deleterious Factors	61
Questions and Study Guide	61
References	62

Chapter 3 Other Concentrate Energy Feeds 69

Roots and Tubers	69
Cassava	69
Potatoes	71
Other Roots and Succulents	72
Food Processing and Industrial By-Products	74
Molasses	74
Table Sugar (Sucrose) and Other Simple Carbohydrates	77
Dried By-Product Feeds	78
Other Industrial Processing Wastes	79
Fats and Oils	79
Fish Oils and Human Health	84
Milk By-Products	85
Questions and Study Guide	86
References	86

Chapter 4 Protein Sources 91

- Oilseed Meals 91
 - Soybean Meal 92
 - Cottonseed Meal 95
 - Rapeseed and Canola Meal 99
 - Linseed Meal 101
 - Peanut Meal 102
 - Sunflower Meal 103
 - Safflower Meal 104
 - Sesame Meal 104
 - Coconut Meal and Palm Kernel Meal 104
 - Other Oilseed Meals 105
- Grain Legumes 106
 - Soybeans 106
 - Dry Beans 107
 - Fava Beans 108
 - Lupins 108
 - Field Peas and Lentils 110
 - Other Grain Legumes 111
- Milling By-Products 112
- Distillery and Brewery By-Products 112
- Animal Protein Sources 113
 - Meat Meal and Meat and Bone Meal 113
 - Blood Meal 115
 - Fish Meal 116
 - Other Fish and Marine Products 117
 - Hydrolyzed Feathermeal and Leathermeal 120
- Synthetic Amino Acids 120
- Nitrogen Sources for Ruminants 121
 - Nonprotein Nitrogen Sources 121
 - Other Nonprotein Nitrogen Sources 124
 - Nonprotein Nitrogen Utilization by Nonruminant Herbivores 125
 - Bypass, Escape, Nondegradable Proteins, and Amino Acids 126
- New and Unconventional Sources of Protein 129
 - Leaf Protein Concentrates 129
 - Single Cell Protein 130
 - Aquaculture-Produced Products 131
 - Insect Meals 131
- Questions and Study Guide 132
- References 134

Chapter 5	Roughages	145
	Forage Plants	145
	Chemical and Structural Characteristics of Forages	146
	Nutrient Components of Forages	147
	Protein and Nitrogenous Compounds	147
	Carbohydrates in Forages	148
	Minerals in Forages	148
	Vitamins in Forages	148
	Deleterious Factors	148
	Detergent System for Forage Analysis	149
	Factors Affecting Forage Quality	149
	Plant Anatomy and Morphology	149
	Temperate Versus Tropical Forages	149
	Environmental and Seasonal Factors	151
	Genetic Factors and Forage Quality	151
	Assessment of Forage Quality	152
	Digestibility and Forage Quality	152
	Feed Consumption	157
	Provision of Nutrients	157
	Forages for Pasture, Silage, and Hay	157
	Grasses as Forage	157
	Legumes as Forage	166
	Other Forages	173
	Questions and Study Guide	177
	References	178
Chapter 6	Forage Harvesting and Utilization	184
	Grazing Systems	184
	Grazing Management	185
	Mixed-Species Grazing	187
	Grazing Disease: Acute Bovine Pulmonary Emphysema	187
	Agroforestry Techniques	188
	Hay and Haymaking	189
	Nutrient Losses in Haymaking	191
	Hay Preservatives	192
	Dehydrated Forages	193
	The Use of Silage	194
	Use of Low-Quality Crop Residues	196
	Treatments to Improve Utilization of Crop Residues	197
	Other Potential Roughage Sources	201
	Wood and Wood Products	201
	Water Weeds	202
	Seaweed	203

Questions and Study Guide 204

References 204

Chapter 7 Micronutrients: Mineral and Vitamin Supplements 209

Mineral Supplements 209

Bioavailability of Minerals 222

Mineral Supplementation of Ruminants in the Tropics 224

Vitamin Supplements 224

Questions and Study Guide 233

References 235

Chapter 8 Feed Additives 238

Additives that Influence Feed Stability, Feed Manufacturing, and Properties of Feeds 240

Antifungals 240

Antioxidants 240

Pellet Binders 241

Additives that Modify Animal Growth, Feed Efficiency, Metabolism, and Performance 242

Feed Flavors 242

Digestion Modifiers 242

Metabolism Modifiers 252

Beta-Adrenergic Agents (Repartitioning Agents) 252

Growth Promotants 253

Additives that Modify Animal Health 258

Drugs 258

Environmentally Active Substances 258

Immunomodulators 258

Additives that Modify Consumer Acceptance 260

Xanthophylls 260

Saponins 260

Questions and Study Guide 261

References 262

PART II APPLIED NUTRITION: FEEDING BEHAVIOR AND WATER REQUIREMENTS 269

Chapter 9 Feeding Behavior and Regulation of Feed Intake 271

Feeding Behavior 271

Factors Affecting Feed Intake 273

Palatability and Feed Preference 273

Secondary Compounds and Palatability 274

Dietary Energy Level	275
Protein and Amino Acid Concentrations	277
Forage Composition	277
Environmental Temperature	278
Pregnancy and Lactation	280
Learning and Conditioning	280
Metabolic Body Size	281
Other Factors	283

Predicting Feed Intake 284

Questions and Study Guide 284

References 286

Chapter 10 Water 288

Nutrients and Toxic Elements in Water 290

Ecological Implications of Water Requirements of Animals 292

Questions and Study Guide 294

References 294

PART III FEED MANUFACTURING AND DIET FORMULATION 297

Chapter 11 Diet Formulation 299

Information Needed to Formulate Diets 299

Nutritional Requirements 299

Nutrient Composition of Feedstuffs 300

Nutrient Availability 300

Nonnutritive Characteristics 301

Costs of Available Feedstuffs 301

Mathematics of Diet Formulation 301

Diet Formulation by Hand 302

Diet Formulation by Computer 306

Ecological Nutrition and Nutrient Management 306

Questions and Study Guide 306

References 307

Chapter 12 Feed Manufacturing and Processing 308

Feed Manufacturing 308

Feed Processing 311

Feed Mixing 311

Pelleting 311

Other Processing Methods 313

Questions and Study Guide 315

References 316

**PART IV FEEDING AND NUTRITION OF LIVESTOCK
AND SPECIALTY ANIMALS 317**

Chapter 13 Feeding and Nutrition of Swine 319

- Nutrient Requirements 319
 - Energy Requirements 319
 - Protein and Amino Acid Requirements 323
 - Mineral Requirements 324
 - Vitamin Requirements 326
 - Water 327
- Swine Diets 328
 - Prewaning Diets 328
 - Weaning Diets 329
 - Nursery Diets 329
 - Growing-Finishing Diets 333
 - Breeding Herd Diets 333
- Special Nutritional Concerns With Swine 336
- Questions and Study Guide 340
- References 340

Chapter 14 Feeding and Nutrition of Avian Species 345

- Nutrient Requirements of Poultry 345
 - Energy Requirements 345
 - Protein and Amino Acid Requirements 346
 - Mineral Requirements 346
 - Vitamin Requirements 347
- Nutrient Requirements of Chickens 350
 - Broiler Nutrient Requirements 350
 - Layer Nutrient Requirements 353
- Nutrient Requirements of Turkeys 355
- Nutrient Requirements of Waterfowl, Ratites, and Game Birds 358
- Nutrient Requirements of Exotic Birds 363
- Special Nutritional Problems of Poultry 365
 - Leg Disorders 365
 - Fat Disorders 366
 - Gizzard Erosion 367
 - Ascites Disorders 367
 - Heat Stress 368
 - Egg Production Disorders 368
 - Other Nutritional Problems 369
- Questions and Study Guide 369
- References 370

Chapter 15 Feeding and Nutrition of Beef Cattle 373

- Nutrient Requirements 374
 - Energy Requirements 374
 - Protein Requirements 376
 - Mineral Requirements 377
 - Vitamin Requirements 378
- Feeding Beef Cattle 378
 - Grazing Management 378
 - Winter Feeding 380
 - Feeding During Lactation 380
 - Weaned Calves and Feedlot Feeding 380
- Basic Feeding Program for Beef Cattle 384
- Management to Reduce Nutritional Inputs 387
- Preparing the Cow Herd for the Winter Period 389
 - Early Weaning as a Management Tool 390
- Alternative Nutritional Management Strategies 391
 - Feeding Systems Based on Corn Stover 392
 - Feeding Systems Based on Cereal Straw 393
- Bison Feeding and Nutrition 395
- Questions and Study Guide 395
- References 396

Chapter 16 Feeding and Nutrition of Small Ruminants: Sheep, Goats, and Llamas 398

- Feeding and Nutrition of Sheep 399
- Nutrient Requirements 399
 - Energy and Protein 399
 - Minerals and Vitamins 407
 - General Nutritional Factors in Sheep Production 407
- Feeding and Nutrition of Goats 409
 - Feeding and Digestive Strategies 409
 - Mixed Grazing Programs 411
- Feeding Programs for Goats 412
 - Dairy Goats 412
 - Mohair Production 412
 - Nutritional Disorders 413
- Other Ruminants 413
- Questions and Study Guide 416
- References 417

Chapter 17 Feeding and Nutrition of Dairy Cattle 420

Nutrient Requirements of Mature Cows	420
Water	421
Dry-Matter Intake (DMI)	423
Energy	423
Proteins	424
Minerals	425
Vitamins	427
Feeding Management	428
Pasture-Based Grazing Systems for Dairy Cattle	434
Nutrient Requirements of Replacement Heifers	435
Unique Topics in Dairy Nutrition	436
Milk Fever	436
Ketosis	437
Displaced Abomasum	437
Retained Fetal Membranes	438
Mastitis	439
Dietary Fat	439
Questions and Study Guide	440
References	440

Chapter 18 Feeding and Nutrition of Horses 443

The Digestive System and Feeding Management	444
Nutrient Requirements	445
Energy	445
Protein	447
Minerals	448
Vitamins	449
Water	450
Feeding Programs for Horses	451
Maintenance Feeding	451
Reproduction	451
Feeding for Growth	452
Feeding for Athletic Performance	454
General Nutritional Problems of Horses	455
Colic Problems	455
Hoof Disorders	456
Bone Development Disorders	458
Hyperlipemia	460
Poisonous Plants and Mold Toxins	460
Equine Grass Sickness	462
Miscellaneous Nutritional Disorders	462

Nutrition of Other Equines 463

Questions and Study Guide 463

References 464

Chapter 19 Feeding and Nutrition of Rabbits 468

Nutrient Requirements 468

General Nutritional Problems of Rabbits 470

Enteritis 470

Other Nutritional Problems 472

Diets for Rabbits 473

Questions and Study Guide 473

References 473

**Chapter 20 Feeding and Nutrition of Companion Animals:
Dogs and Cats 475**

The Modern-Day Pet Food Industry 475

Types of Pet Foods 476

Nutrient Requirements of Dogs and Cats 478

Water 478

Energy 479

Carbohydrates 482

Fats 485

Proteins and Amino Acids 486

Vitamins 495

Minerals 497

Nutrient Digestion and Digestive Physiology 499

Feeding Regimens of Dogs and Cats 499

Life Cycle Nutritional Considerations 500

Maintenance 501

Growth 501

Gestation and Lactation 503

Neonatal Nutrition 504

Performance 505

Geriatrics 508

Summary and Conclusions 509

Questions and Study Guide 510

References 510

Chapter 21 Feeding and Nutrition of Fur-Bearing Animals 514

Hair Growth 514

Nutrient Requirements 518

Questions and Study Guide 520

References 521

Chapter 22 Feeding and Nutrition of Wild, Exotic, and Zoo Animals 523

Principles of Zoo Animal Nutrition 524

Natural Diets and Feeding Behavior 524

Nutritional Problems 529

Nutrition of Wild Ungulates 535

Nutrition of Other Wild Animals 540

Questions and Study Guide 541

References 541

Chapter 23 Feeding and Nutrition of Fish and Other Aquatic Organisms 548

Aquaculture 548

Aquaculture and Fish Feeding 550

Feeding and the Environment 552

Nutrient Requirements 554

Protein Needs 554

Carbohydrate Needs 556

Lipid Needs 556

Energy Needs 557

Vitamin Needs 557

Mineral Needs 558

Toxin Problems 558

Feeding Programs 559

Feed Formulation and Processing 560

Feeding Catfish 561

Feeding Salmonids 561

Feeding Tilapia 562

Feeding Shrimp and Other Crustaceans 563

Other Aquatic Species 564

Questions and Study Guide 564

References 564

Chapter 24 Epilogue: Livestock Production and Human Welfare 567

Role of Livestock in Agriculture and World Food
Production 568

Common Criticisms of Livestock Production 570

Concluding Comments 573

Questions and Study Guide 576

References 576

Appendix A 577

Appendix B 586

Index 587
