

ICHTHYOLOGY HANDBOOK

Editors

B G Kapoor
Bhavna Khanna

Springer

Contents

- 1. Evolution; Phylogeny; Classification** 1
 1. Introduction 1
 2. Overview of Piscine Evolution and Phylogeny 2
 - 2.1 Extinct Forms 4
 - 2.2 Extant Forms 7
 3. Special Emphases: Holocephali; Dipnoi; Coelacanth 15
 4. Development and Phylogeny 20
 5. Classification of Some Living Fishes 21

- 2. Morphometrics; Taxonomy; Meristic Variation** 31
 1. Morphometrics 31
 - 1.1 Introduction 31
 - 1.2 An Overview 31
 2. Analysis and Applications 34
 3. Biochemical and Serological Techniques of Taxonomy 35
 4. Miscellaneous Information 35
 5. Environmental influences on Morphology 36

- 3. Integument; Dermal Skeleton; Coloration and Pigment Cells; Epidermal Breeding Tubercles and Bony Contact Organs; Biotoxins; Alarm Pheromones** 39
 1. Integument 39
 - 1.1 Introduction 39
 - 1.2 Cuticle (External Mucoïd Layer; Mucous Cuticle) 42
 - 1.3 Epidermis: Cell Types 42
 - 1.4 Innervation 51
 2. Dermis 51
 - 2.1 Dermal Skeleton: Scales 52
 3. Coloration and Pigment Cells (Chromatophores) 65
 4. Epidermal Breeding Tubercles and Bony Contact Organs 77
 5. Biotoxins: Zootoxins or Animal Poisons 79
 6. Alarm Pheromones (Schreckstoff System) 84

- 4. Minerals and Tissues: Bone and Cartilage; An Overview of Endoskeleton** 87
1. Introduction 87
 2. Evolution, Environment, Minerals and Tissues 88
 3. Teleostean Cartilage 99
 4. Endoskeleton 100
 - 4.1 Axial skeleton: Skull; Vertebral Column 100
 - 4.2 Appendicular Skeleton (Fins and Fin Girdles) 113
 - 4.3 Median Fins 117
 5. Anatomy of Rays and Spines of Fins 118
 - 5.1 Structure of Fin Rays 120
 6. Collateral Information to Skeleton 120
- 5. Swimming Muscles: Myotomal Muscle Fibres** 123
1. Introduction 123
 2. Somatic Muscles: Organization of Muscle Fibres 124
 - 2.1 Fins 124
 - 2.2 Myotomal Muscles: Axial Segmental Body Propulsive Muscles 125
 - 2.3 Ultrastructural Characteristics of Myotomal Muscle Fibres 128
 - 2.4 Distribution of Capillaries in the Somatic Musculature 132
 - 2.5 Innervation 132
 3. Mechanical Properties of Muscles 136
 4. Regulation of Muscle Contractility 136
 5. Metabolism 137
 6. Fibre Recruitment during Swimming 142
 - 6.1 Aerobic and Anaerobic Scaling in Fish 145
 7. Fish Muscle Growth 147
 - 7.1 Regeneration 147
 - 7.2 Myosatellite Cells 147
 - 7.3 Rapid Somatic Growth and Muscle Damage 148
- 6. Locomotion: Propulsion System** 149
1. Introduction 149
 2. Determinants of Locomotion 151
 3. Body Form, Locomotion and Foraging in Aquatic Vertebrates 151
 4. Body and Fin Form 152
 - 4.1 Performance Criteria 153
 - 4.2 Non-Swimming Locomotion 162
 5. Propulsive Anatomy 163
 - 5.1 Trunk 163
 - 5.2 Innervation and Co-ordination of Trunk Muscles 166
 - 5.3 Metabolism 166
 6. Escape Response 167

7. Digestive System; Growth; Gastrointestinal Hormones; Age Determination

169

1. Introduction 169
2. Resource Use and Feeding: The Overall Picture of Exploitation of Environment 171
3. Gut 190
 - 3.1 Mouth: Emphases-Predigestive Mechanisms, Dentition, Filter Equipment and Aids 190
 - 3.2 Post-Branchial Gut: Orientation, Structure and Function 208
 - 3.3 Associated Glands 227
4. Ontogenetic Aspects of Nutritional Requirements 230
 - 4.1 Vitamin D 231
5. Nutritional Energetics 232
6. Growth 234
 - 6.1 Scaling of Metabolism 240
7. Gastrointestinal Hormones (Gastrointestinal Endocrine System; Endocrine Cells; Non-Absorptive Cells) 241
8. Supplemental Functions of Gut 243
9. Age Determination 243
 - 9.1 Elasmobranchs 243
 - 9.2 Teleosts 246
 - 9.3 Sturgeons 248

8. Cardiovascular System

249

1. Introduction 249
2. Gross Morphology, Anatomy, Fine Structure, Innervation of Heart 250
 - 2.1 Multiple Ventral Aortae 262
 - 2.2 Carotid Labyrinth 262
 - 2.3 Dipnoan Heart 262
3. Cardiac Physiology 266
 - 3.1 Background 266
 - 3.2 Overview of Cardiovascular and Haemodynamic Energetics with Emphasis to Teleost Fish: The Heart as a Pump 267
4. Roles of Pericardium, Conus and Bulbous Arteriosus 273
 - 4.1 Role of Pericardium in Cardiac Performance and Venous Return 273
 - 4.2 Roles of Conus Arteriosus and Bulbous Arteriosus 275
 - 4.3 Venous Return 275
 - 4.4 Atrial Contraction: Essential for Ventricular Filling 275
 - 4.5 Ventricular Function in Fishes 275
5. Blood Distribution 276
 - 5.1 Overview of Skeletal Muscle Circulation 278
 - 5.2 Circulation in Air-Breathers 278
 - 5.3 Circulatory Adaptations in Haemoglobinless Icefish 278
6. Heat-Exchange Retial Systems 281
7. Cardiac Physiology in Tunas 282

8. Relationship between Cardiac Energy Metabolism and Cardiac Work Demand in Fishes 284
9. Afferent Inputs Associated with Cardiovascular Control of Fish 288
10. Secondary Vascular System 288
11. Fish Blood Cells 294
12. Chemical Properties of Blood 303
13. Blood and Extracellular Fluid Volume Regulations: Role of Renin-Angiotensin System, Kallikrein-Kinin System, and Atrial Natriuretic Peptides 305

9. Respiratory System

308

1. Introduction 308
2. General Structure and Organization: An Overview 310
3. Biochemical Aspects of Gills 314
4. Construction of Gill Lamella 315
5. Vascularization of Respiratory Surfaces 317
6. Innervation Pattern of Gills of a Teleost 323
7. Breathing 323
8. Control Systems 329
9. Dipnoi-Mechanics of Gill and Lung Ventilation 337
10. Ventilation in *Polypterus*, *Acipenser* and *Amia* 338
11. Secondary Air Breathing in Fishes 339
 - 11.1 An Overview 339
 - 11.2 Designs of Air Breathing Organs 343
 - 11.3 Development, Origin and Evolution of Neo-morphic Air Breathing Organs in Teleosts 352
12. Periodic Breathing in Bimodal Exchange 353
13. Amphibious Fishes 356
14. Adaptations to Resist Desiccation 360
15. Aestivation and Suctional Breathing in Lungfish *Protopterus aethiopicus* 361
16. Ventilation of External Respiratory Sites 362
17. Cough (Expulsion Reflex) 363
18. Modifications of Gills in Relation to Environment 364
19. Gill Morphometry and Scaling 367
20. Blood Respiratory Adaptations 368
21. Pseudobranch 369

10. Swim Bladder and Weberian Apparatus

373

1. Introduction 373
2. Position and Occurrence of the Swim Bladder 373
3. Structure: An Overview 374
4. Composition of Swim Bladder Gases 382

5. Gas Exchange through the Pneumatic Duct-the Conduit	384
6. Countercurrent Concentration and Gas Secretion in Swim Bladder	386
7. Gas Resorption	389
8. Functions	390
8.1 Audition	390
8.2 Buoyancy	393
8.3 The Connection between the Swim Bladder and the Ear: Weberian Apparatus	397
8.4 Sound Production	401
9. Control of Swim Bladder Hydrostatic Function	401
10. Swim Bladder and Hydrostatic Equilibrium	402
11. Excretory System; Acid-Base Regulation; Ion Exchange	404
1. Introduction	404
2. Kidney: Structure and Function	405
2.1 Agnatha	406
2.2 Chondrichthyes	408
2.3 Osteichthyes	412
3. Dipnoi	431
4. Excretion of Nitrogenous Compounds	432
5. Urea Synthesis and Strategies For Survival	446
6. Energetics of Osmotic Regulation in Ureotelic and Hypoosmotic Fishes	442
7. Acid-Base Regulation	447
8. Ion Exchange	452
9. Auxiliary Organs of Osmoregulation	454
12. Reproductive System; Rhythms; Physiological Aging (Senescence) in Fish; Development; Phenotypic Variability in Fish Populations	458
1. Introduction	458
2. Gonads; Fertilization; Social Control of Sexual Maturation; Allied Aspects	459
3. Maternal-Foetal, Relationships	479
4. Intromittent Organ and Other Specialized Structures in Males	497
5. Parental Care Behaviour and Allied Aspects: Reproductive Guilds	499
6. Diversity in Reproductive Patterns and Behaviour	511
6.1 Sex Change as an Alternative Life-History Style	512
6.2 Hermaphroditism	514
6.3 Social Control of Primary Sex Differentiation	516
7. Role of Hormones and Sex Pheromones	517
7.1 Endocrine Control of Reproduction	517
7.2 Sex Pheromones	521
8. Reproductive Effort; Fecundity; Rhythmic Behaviour	523
9. Physiological Aging (Senescence) in Fish	530

10. Terminology of Intervals in Fish Development 531
 11. Phenotypic Variability in Fish Populations 533

13. Endocrine System

536

1. Introduction 536
2. Pituitary Gland (Hypophysis) 538
 - 2.1 Pituitary Hormones 545
3. Neurohypophysis 558
4. Thyroid Gland 560
5. Ultimobranchial Body 567
6. Stannius Corpuscles (Corpuscles of Stannius) (CS) 569
7. Interrenal Tissue 571
8. Chromaffin Tissue 576
9. Pancreatic Islets (Endocrine Pancreas); Islets of Langerhans 579
10. Caudal Neurosecretory System: Neurohormones from Fish Tails 585
11. Gonads 589
12. Kidney: Renin-Angiotensin System 593
13. Kallikrein-Kinin System 597
14. Natriuretic Peptide Hormones 597
15. Prostaglandins (PGs) 597
16. Pineal Organ (The Pineal and Melatonin; Regulators of Circadian Function) (Internal "Zeitgeber") 598
17. Gastrointestinal Tract 605
18. Juxtatesticular Body 605
19. Pseudobranchial Neurosecretory System 605

14. Nervous System

606

1. Introduction 606
2. Variation in Anamniote Nervous Systems 607
3. An Overview of Brain Organization in Cyclostomata 607
4. Central Nervous System in Gnathostomatous Fish: Actinopterygians 609
 - 4.1 Brain Stem 609
 - 4.2 Cerebellum 615
 - 4.3 Optic Tectum and Tegmentum 616
 - 4.4 Diencephalon and Pretectum 621
 - 4.5 Telencephalon 625
 - 4.6 Brain Organization in the Cartilaginous Fishes—A Note 626
 - 4.7 Brain Organization of the Coelacanth *Latimeria chalumnae*:
 General Observations 628
5. Monoamine-Containing Neuronal Systems in the Teleostean Brain 631
6. Spinal and Cranial Nerves 632
7. Autonomic Nerves 633
 - 7.1 Agnathous Fish 634
 - 7.2 Gnathostomatous Fish 634

15. Receptors

639

1. Introduction 639
2. Eye (Optic Organ) 641
 - 2.1 Overview 641
 - 2.2 Eye in Fish Groups 644
 - 2.3 Photovisual Pigments and Visual Sensitivity 660
 - 2.4 Bioluminescence and Vision (Visual Adaptations to Dim Light and Bioluminescence) 663
 - 2.5 Visual Alarm Signals 667
3. Inner Ear (Otic Organ) 667
 - 3.1 Introduction 667
 - 3.2 Inner Ear in Fish Groups 669
4. Mechanosensory Lateral Line 681
 - 4.1 Introduction 681
 - 4.2 Lateral Line System in Different Fish 681
5. Chemoreceptors (Chemical Senses) 702
 - 5.1 Introduction 702
 - 5.2 Olfactory System 703
 - 5.3 Gustatory System 723
 - 5.4 Solitary Chemosensory Cells 732
6. Pineal Complex 736
 - 6.1 Introduction 736
7. Temperature (Thermobiology) 742
 - 7.1 Endothermy 743
8. Electroreceptors 746
9. Overview of Sensory Adaptations of deep-sea and Antarctic Fishes 746

16. Sound Production, Detection and Communication

748

1. Introduction 748
2. Sonic Mechanisms 748
3. Mechanisms of Fish Audition (Acoustic-Field Detection and Processing) 756
4. Neural Control of Teleost Sound Production 760
5. Utilization of Acoustical Cues 763

17. Electric Organs and Electroreceptors

767

1. Electric Organs 767
 - 1.1 Introductory Overview 767
 - 1.2 Comparative Morphology of Electric Organs 772
 - 1.3 Electrical Function of Electric Organs 773
 - 1.4 Physiology of the Generating Cells, Electrocytes 774
 - 1.5 Electric Organ Discharge (EOD) 776
 - 1.6 Fine Structure of Electrocytes 781
 - 1.7 Neural Control of Electric Organs 783

2. Electroreceptors (Electrosensory System) 787
 - 2.1 Introduction 787
 - 2.2 Somatic Distribution of Electroreceptors 793
 - 2.3 Relation of Electroreceptors to the Lateral Line Nerve 797
 - 2.4 Electroreception in the Central Nervous System 800
 - 2.5 Behavioural Functions of Electroreception 801
3. Evolution 805
4. Conclusions 806

18. Bioluminescence

810

1. Introduction 810
2. Distribution of Luminous Fish 810
3. (A) Anatomical Distribution of Light Organs 811
3. (B) Taxonomic Distribution of Luminescence 812
4. Bacterial Luminescence (Extrinsic Luminescence) 812
 - 4.1 Taxonomic Distribution of Bacterial Luminescence, Microanatomy and Operation of Luminous Organs 813
5. Non-bacterial Bioluminescence (Intracellular Luminescence; Intrinsic Luminescence) 823
 - 5.1 Taxonomic Distribution of Intracellular Luminescence, Microanatomy and Operation of Luminous Organs 823
6. Evolution of Photogenic Control 829
7. Functions of Luminescence 833
 - 7.1 Intraspecific Communication 834
 - 7.2 Interspecific Functions 835
8. Origin and Evolution of Bacterial Photophores 838
9. Evolutionary Establishment of Bioluminescence-General 838
10. Conclusions 839

19. Lymphomyeloid (Lymphohaemopoietic) System; Immune Defence Mechanisms; Fish Pathology; Teratology; Regeneration; Wound Healing

840

1. Introduction 840
2. Lymphomyeloid Tissues in Various Groups of Fishes 841
3. Some Properties of Lymphomyeloid Tissues Content of Enzymes 847
Immune Defence Mechanisms 848
4. Introduction 848
5. Non-Specific Humoral Defence 848
6. Non-Specific Cellular Defence 849
7. Humoral Immunity: Antigen-Specific Immune Responses 849
8. Antiparasitic Immunity 850
9. Peritoneal Exudate Cells 851
10. Cell Lysis 852
Fish Pathology 852

11. Introduction 852
12. Diseases—An Overview 854
 - 12.1 Diseases Caused by Microorganisms 855
 - 12.2 Diseases Caused by Protistans 859
 - 12.3 Diseases Caused by Protophytans 860
 - 12.4 Diseases Caused by Cnidarians 861
 - 12.5 Diseases Caused by Helminths 861
 - 12.6 Diseases Caused by Crustaceans 862
 - 12.7 Diseases Caused by Neoplasia ("Neoplasms or Tumors") 864
 - 12.8 Diseases Caused by Environmental Stressors 865
 - 12.9 Nutritional Fish Diseases 874
13. Control of Fish Diseases 876
 - 13.1 Fish Vaccination 879
 - 13.2 Genetic Aspects and Disease Resistance 880
 - 13.3 Immunostimulants 882
14. Teratology 883
15. Genetic Abnormalities and Experimentally Induced Lesions 884
16. Regeneration of Tissues with Focus on Internal Organs in Fish: 884
An Overview
17. Wound healing 885

20. Adaptations to Unique Habitats

887

1. Hydrodynamic Adaptations 887
 - 1.1 Adhesive Organs 887
 - 1.2 Streamlining and Boundary Layer 890
2. Desert Fishes (Warm Springs) (Heat Resistance) 891
3. Pressure Adaptation (Deep-Water Fishes) 893
4. Polar Environment (Cold Adaptation: Freezing Resistance) 898
 - 4.1 Freeze Tolerance and Freeze Avoidance 899
5. An Overview of Biology of Antarctic Fish 903
6. Caves 906

21. Migration; Schools (Shoals); Habitat Maintenance

909

1. Migration 909
 - 1.1 Introduction 909
 - 1.2 Movement of Fish in Relation to Water Currents 910
 - 1.3 Movement Patterns 918
 - 1.4 Evolution of Migration and Some Life History Parameters in Marine Fishes 921
 - 1.5 Evolution of Diadromy 921
2. Fish Migration in Rivers 926
3. Feeding Migrations 926
4. Overwintering 928
5. Physiology of Migration 929
6. Energetics of Migration 934

- 7. Schools (Shoals) 935
- 8. Habitat Maintenance 937

22. Nuclear and Cytogenetic Studies; Atavism 940

- 1. Introduction 940
- 2. Molecular Genetic Markers 940
 - 2.1 Duplicate Isozymes Loci in Fishes 941
- 3. Chromosomes 943
 - 3.1 Chromosome Numbers and Morphology 943
 - 3.2 DNA Per Cell Content 944
 - 3.3 Chromosome Banding 944
- 4. Mitochondrial and Nuclear DNA 945
- 5. Sexuality and Sex Determination 947
- 6. Atavism 950
- 7. Developmental Genetics of Teleosts 950
 - 7.1 Gene Expression in Teleosts 951
