

FLUID MECHANICS AND ITS APPLICATIONS

Haym Benaroya and Timothy Wei (Eds.)

IUTAM Symposium on  
**Integrated Modeling of Fully  
Coupled Fluid Structure Interactions  
Using Analysis, Computations  
and Experiments**

**IUTAM**

	<i>Page Number</i>
<b>I Welcome to the IUTAM Symposium</b>	<b>ix</b>
<i>Organizers: H. Benaroya, T. Wei, Rutgers University</i>	
<b>II Welcome to Rutgers University: J. Flanagan, Vice President for Research, Rutgers University</b>	<b>xi</b>
<b>1. Survey of Naval Computational Needs in Fluid-Structure Interaction (Plenary)</b>	<b>1</b>
<i>P. Palo, U.S. Navy</i>	
<b>2. Novel Use of a Bandwidth Measure for Vortex Induced Vibrations Case Study: The Foinaven Dynamic Umbilical</b>	<b>27</b>
<i>F. Trarieux, University College London; G. J. Lyons, BPP Technical Services, Ltd.</i>	
<b>3. Chaotic Vibration-Based Damage Detection in Fluid-Structural Systems</b>	<b>43</b>
<i>B. I. Epureanu, University of Michigan</i>	
<b>4. Comparison of Two Seafloor Observatory Mooring Designs</b>	<b>59</b>
<i>S. Han, M. Grosenbaugh, Woods Hole Oceanographic Institute</i>	
<b>5. Nonlinear Dynamics of Very High Dimensional Fluid-Structural Systems (Plenary)</b>	<b>73</b>
<i>E. Dowell, D. M. Tang, Duke University</i>	
<b>6. Flapping Membranes for Thrust Production</b>	<b>115</b>
<i>J. M. Jiménez, J. H. J. Buchholz, A. E. Staples, J. J. Allen, A. J. Smits, Princeton University</i>	
<b>7. Experimental Study of a Tethered Cylinder in a Free Stream</b>	<b>125</b>
<i>J. Carberry, K. Ryan, J. Sheridan, Monash University</i>	
<b>8. The Effect of Changed Mass Ratio on the Motion of a Tethered Cylinder</b>	<b>135</b>
<i>K. Ryan, M. C. Thompson, K. Hourigan, Monash University</i>	
<b>9. Self-excited Oscillation of Equilateral Triangular Wedge</b>	<b>145</b>
<i>S. Srigrarom, Nanyang Technological University; M. Kurosaka, University of Washington</i>	

	<i>Page Number</i>
10. <b>A Critical Review of the Intrinsic Nature of VIV (Plenary)</b> <i>T. Sarpkaya</i> , Naval Postgraduate School	159
11. <b>A Numerical Study on the Rectilinear Oscillations of a Circular Cylinder</b> <i>S.Kocabiyik, Q. Al-Mdallal</i> , Memorial University of Newfoundland	163
12. <b>Three-Dimensional Modeling of Flow-Induced Vibration for an Elastic Cylinder in a Cross Flow</b> <i>Y. Liu, R. M. C. So, C. Zhang</i> , The Hong Kong Polytechnic University	175
13. <b>Correlation Length and Force Phasing of a Rigid Cylinder Subject to VIV</b> <i>D. Lucor, J. Foo, G. E. Karniadakis</i> , Brown University	187
14. <b>Self-Excited Oscillations of Vertical and Horizontal Cylinders in Presence of a Free-Surface</b> <i>D. Rockwell, M. Ozgoren, N. Saelim</i> , Lehigh University	201
15., <b>High Mode Number VIV Experiments (Plenary)</b> <i>J. K. Vandiver, H. Marcollo</i> , Massachusetts Institute of Technology	211
16. <b>Nonlinear Dynamics of Slender Cylinders Supported at Both Ends and Subjected to Axial Flow</b> <i>Y. Modarres-Sadeghi, M. P. Paidoussis, C. Semler, P. Picot</i> , McGill University.	233
17. <b>Some Quandaries and Paradoxes in Fluid-Structure Interactions with Axial Flow (Plenary)</b> <i>M. P. Paidoussis</i> , McGill University	247
18. <b>Closed-Loop Control of the Resonant Flow-Structure Interaction Using PID Controllers</b> <i>M. M. Zhang, L. Cheng, Y. Zhou</i> , The Hong Kong Polytechnic University	267
19. <b>Vortex-Induced Vibration Structural Response under Parametric Excitation</b> <i>K.Y. Billah, O. Ahmad</i> , Stevens Institute of Technology	279

	<i>Page Number</i>
<b>20. Frequency Response and the Existence of a Critical Mass for an Elastically-Mounted Cylinder</b> <i>R. Govardham</i> , Indian Institute of Science; <i>C. H. K. Williamson</i> , Cornell University	<b>289</b>
<b>21. Two-Degree of Freedom VIV of a Circular Cylinder Pinned at One End</b> <i>C. M. Leong</i> , <i>H. Benaroya</i> , <i>T. Wei</i> , Rutgers University	<b>301</b>
<b>22. Vortex-Induced Vibrations of Slender Structures in Shear Flow: A Review (Plenary)</b> <i>M. S. Triantafyllou</i> , <i>F. S. Hover</i> , <i>A. H. Techet</i> , <i>D. K. P. Yue</i> , Massachusetts Institute of Technology	<b>313</b>
<b>23. A Tuned Liquid Damper Model</b> <i>J. B. Frandsen</i> , Louisiana State University	<b>329</b>
<b>24. Unstable Phenomena of a Thin Cylindrical Shell Subjected to Axial Leakage Flow</b> <i>K. Fujita</i> , <i>A. Shintani</i> , Osaka Prefecture University	<b>331</b>
<b>25. Acoustic Scattering from a Coated Elastic Shell: Exact Vs. Approximate Theory</b> <i>A. Norris</i> , Rutgers University	<b>353</b>
<b>26. A Study of the Vibration of Fluid Coupled Coaxial Cylindrical Shell</b> <i>E. Gavrilova</i> , St. Ivan Rilski University of Mining & Geology	<b>363</b>
<b>27. Stability and Non-Linear Dynamics of Clamped Circular Cylindrical Shells in Contact with Flowing Fluid</b> <i>K. N. Karagiozis</i> , <i>M. P. Paidoussis</i> , <i>E. Grinevich</i> , <i>A. K. Misra</i> , <i>M. Amabili</i> , McGill University	<b>375</b>
<b>28. Forced Dynamic Uplift of Floating Plates</b> <i>K. Dempsey</i> , <i>I. Vasileva</i> , Clarkson University	<b>391</b>
<b>29. Low-Dimensional Feedback Control of the von Karman Vortex Street at a Reynolds Number of 100</b> <i>S. Siegel</i> , <i>K. Cohen</i> , <i>T. McLaughlin</i> , U.S. Air Force Academy	<b>401</b>
<b>30. Stochastic Bifurcations of the Duffing-Mathieu Equations with Time Delays</b> <i>M. S. Fofana</i> , <i>Z. Hou</i> , Worcester Polytechnic Institute; <i>S.T. Ariaratnam</i> , University of Waterloo	<b>413</b>

	<i>Page Number</i>
<p><b>31. Numerical and Experimental Investigation of a Streamwise Oscillating Cylinder Wake in the Presence of a Downstream Cylinder</b>  <i>Z. Guo</i>, Huazhong University of Science and Technology;  <i>Y. Zhou</i>, The Hong Kong Polytechnic University</p>	415
<p><b>32. Control of Cylinder Drag and Lift Force Amplitude in Turbulent Crossflow</b>  <i>S. A. Isaev</i>, Academy of Civil Aviation; <i>Z. L. Zhdanov</i>, Luikov Heat and Mass Transfer Institute</p>	425
<p><b>33. An Eulerian-Lagrangian Marker and Micro Cell Method for Simulating Fluid Interaction with Solid/Porous Bodies (Plenary)</b>  <i>R. Bidoae</i>, <i>R. M. Ciobotaru</i>, <i>P. E. Raad</i>, Southern Methodist University</p>	439
<p><b>34. A New Lagrangian-Eulerian Shell-Fluid Coupling Algorithm Based on Level Sets</b>  <i>F. Cirak</i>, California Institute of Technology; <i>R. Radovitzky</i>, Massachusetts Institute of Technology</p>	453
<p><b>35. Application of Higher Order Runge-Kutta Time Integrators in Partitioned Fluid-Structure Interaction Simulations</b>  <i>S. van Zuijlen</i>, <i>H. Bijl</i>, Delft University of Technology</p>	467
<p><b>36. Vortex Shedding for Flow Over a Square Cylinder Close to a Moving Ground</b>  <i>S. Bhattacharyya</i>, <i>D. K. Maiti</i>, Indian Institute of Technology</p>	479
<p><b>37. Extended Hamilton's Principle for Fluid-Structure Interaction</b>  <i>H. Benaroya</i>, <i>T. Wei</i>, Rutgers University</p>	491
<p><b>38. Estimation of Pressure Fields Using Velocity Measurements</b>  <i>M. Krane</i>, <i>P. Dong</i>, <i>T. Wei</i>, Rutgers University</p>	507
<p><b>39. Implicit Multigrid Computations of Unsteady Multiphase Flows in Varying Cross-Sectional Area Channels</b>  <i>S. Gökaltun</i>, <i>H. Saygin</i>, Istanbul Technical University;  <i>M. Muradoğlu</i>, Koc University</p>	509
<p><b>40. Dynamic Stability of Stochastic Delay Systems</b>  <i>M. S. Fofana</i>, <i>Y. Yong</i>, Worcester Polytechnic Institute</p>	521
