

SIMULATION MODELING HANDBOOK

A Practical Approach

Christopher A. Chung

CRC PRESS

Contents

1	Introduction	
1.1	Introduction	1-1
1.2	Simulation Modeling and Analysis	1-2
1.3	Other Types of Simulation Models	1-3
1.4	Purposes of Simulation	1-3
1.5	Advantages to Simulation.....	1-4
1.6	Disadvantages to Simulation.....	1-5
1.7	Other Considerations	1-6
1.8	Famous Simulation Quotes.....	1-7
1.9	Basic Simulation Concepts.....	1-8
1.10	Additional Basic Simulation Issues.....	1-18
1.11	Summary	1-18
	Chapter Problems	1-19
2	Problem Formulation	
2.1	Introduction	2-1
2.2	Formal Problem Statement	2-1
2.3	Orientation	2-4
2.4	Project Objectives	2-6
2.5	Summary	2-10
	Chapter Problems	2-11
3	Project Planning	
3.1	Introduction	3-1
3.2	Project Management Concepts	3-2
3.3	Simulation Project Manager Functions.....	3-6
3.4	Developing the Simulation Project Plan	3-13
3.5	Compressing Projects	3-18
3.6	Example Gantt Chart.....	3-20
3.7	Advanced Project Management Concepts.....	3-20
3.8	Project Management Software Packages	3-31
3.9	Summary	3-32
	Chapter Problems	3-35
	Sample LRC	3-37
	Sample Gantt Chart	3-38
4	System Definition	
4.1	Introduction	4-1
4.2	System Classifications	4-2

4.3	High-Level Flow Chart Basics.....	4-5
4.4	Components and Events to Model.....	4-8
4.5	Data to Be Included in the Model.....	4-23
4.6	Output Data	4-26
4.7	Summary	4-29
	Chapter Problems.....	4-29

5 Input Data Collection and Analysis

5.1	Introduction	5-1
5.2	Sources for Input Data	5-2
5.3	Collecting Input Data	5-4
5.4	Deterministic versus Probabilistic Data	5-6
5.5	Discrete vs. Continuous Data	5-7
5.6	Common Input Data Distributions	5-7
5.7	Less Common Distributions	5-15
5.8	Offset Combination Distributions	5-18
5.9	Analyzing Input Data	5-19
5.10	How Much Data Needs to Be Collected	5-25
5.11	What Happens If I Cannot Fit the Input Data?	5-26
5.12	Software Implementations for Data Fitting.....	5-27
5.13	Summary	5-28
	Chapter Questions.....	5-29

6 Model Translation

6.1	Introduction	6-1
6.2	Simulation Program Selection	6-2
6.3	Model Translation Section Content	6-3
6.4	Program Organization.....	6-8
6.5	Summary	6-13
	Chapter Problems.....	6-14
	Model Translation Check List	6-15

7 Verification

7.1	Introduction	7-1
7.2	Divide-and-Conquer Approach	7-2
7.3	Animation.....	7-3
7.4	Advancing the Simulation Clock Event by Event.....	7-8
7.5	Writing to an Output File	7-8
7.6	Summary	7-10
	Chapter Problems.....	7-11

8 Validation

8.1	Introduction	8-1
8.2	Assumptions.....	8-2

8.3	Simplifications.....	8-2
8.4	Oversights.....	8-3
8.5	Limitations	8-3
8.6	Need for Validation.....	8-4
8.7	Two Types of Validation.....	8-4
8.8	Face Validity	8-4
8.9	Statistical Validity.....	8-5
8.10	Validation Data Analysis Process.....	8-7
8.11	When a Model Cannot Be Statistically Validated and What to Do about It	8-16
8.12	Summary	8-17
	Chapter Problems.....	8-18

9 Experimental Design

9.1	Introduction	9-1
9.2	Factors and Levels.....	9-2
9.3	Two Alternative Experimental Designs	9-2
9.4	One-Factor Experimental Designs.....	9-5
9.5	Two-Factor Experimental Designs.....	9-6
9.6	Multifactor Experimental Designs.....	9-7
9.7	2k Experimental Designs.....	9-9
9.8	Experimental Alternative Factor Interactions.....	9-11
9.9	Refining the Experimental Alternatives.....	9-11
9.10	Summary	9-11
	Chapter Problems.....	9-12

10 Analysis

10.1	Introduction	10-1
10.2	Terminating System Analysis.....	10-2
10.3	Nonterminating System Analysis.....	10-22
10.4	Summary	10-30
	Chapter Problems.....	10-30

11 Project Reports and Presentations

11.1	Introduction	11-1
11.2	Written Report Guidelines	11-2
11.3	Executive Summary	11-2
11.4	Equations.....	11-2
11.5	Importing Screen Captures.....	11-2
11.6	Presentation Guidelines.....	11-4
11.7	Presentation Media	11-4
11.8	Electronic Presentation Software Issues.....	11-6
11.9	Actual Presentation.....	11-9
11.10	Summary	11-12
	Chapter Questions.....	11-12

12 Training Simulators

12.1	Introduction	12-1
12.2	Problem Formulation	12-6
12.3	Project Planning.....	12-7
12.4	System Definition.....	12-9
12.5	Input Data Collection.....	12-14
12.6	Model Translation.....	12-21
12.7	Verification	12-24
12.8	Validation.....	12-24
12.9	Implementation.....	12-39
12.10	Summary	12-42
	Chapter Problems	12-42

13 Examples

13.1	Combined Continuous and Discrete Simulation Models in the High-Speed Food Industry	13-2
	<i>Abu M. Huda and Christopher A. Chung</i>	
13.2	Operation of Airport Security Checkpoints under Increased Threat Conditions	13-9
13.3	Modeling and Analysis of Commercial Aircraft Passenger Loading Sequencing	13-20
	<i>Somasundaram Gopalakrishnan (Christopher A. Chung, Advisor)</i>	
13.4	Multitheater Movie Complex	13-41
13.5	Will-Call Operations Simulation Modeling and Analysis	13-52
	<i>Erick C. Jones</i>	

14 ARENA User's Minimanual

14.1	Introduction	14-2
14.2	ARENA User Interface.....	14-2
14.3	Frequently Used Model Blocks	14-4
14.4	Frequently Used Experiment Elements.....	14-8
14.5	General Approach for Developing a Simple Nonanimated Model.....	14-14
14.6	Building the Model.....	14-14
14.7	Filling in the Experimental Data	14-15
14.8	Filling in the Model Data	14-17
14.9	Running the Model.....	14-18
14.10	Basic Animation of the Model	14-19
14.11	Additional Queue Techniques	14-25
14.12	Modeling Transporters	14-32
14.13	Modeling Conveyors	14-46
14.14	Outputting Data to a File for Validation or Comparison Purposes	14-58
14.15	Input Analyzer	14-60
14.16	Output Analyzer	14-66

15 Simulation Using AutoMod and AutoStat

Matt Rohrer

15.1	Introduction	15-2
15.2	Introduction to the AutoMod Tutorial	15-3
15.3	Using the Mouse	15-4
15.4	Section 1: Getting Started	15-4
15.5	Section 2: Building a Model.....	15-7
15.6	Section 3: Changing Views.....	15-17
15.7	Section 4: Adding Queues and Resources.....	15-22
15.8	Section 5: Completing the Conveyor System.....	15-28
15.9	Section 6: Creating an AGV System	15-40
15.10	Defining and Placing Control Points	15-48
15.11	Defining Vehicles	15-51
15.12	Scheduling Vehicles	15-53
15.13	Adding the Inspection, Labeling, Repair, and Rejection Processes	15-58
15.14	AutoMod Tutorial Summary	15-63
15.15	Basic Statistical Analysis Using AutoStat	15-64
15.16	Why Use AutoStat?	15-64
15.17	Calculating Confidence Intervals	15-64
15.18	Performing Statistical Analysis with AutoStat	15-65
15.19	Opening a Model in AutoStat	15-66
15.20	Defining a Single Scenario Analysis	15-68
15.21	Making Runs	15-69
15.22	Defining Responses	15-70
15.23	Displaying the Results	15-70
15.24	Statistical Analysis Using AutoStat Summary.....	15-75

16 Simpak User's Manual

16.1	Introduction	16-1
	<i>Charles E. Donaghey and Randal W. Sitton</i>	
16.2	Random Variate Routines.....	16-2
16.3	Schedule Initializer Subprogram (INITIAL)	16-3
16.4	SIMPAK Scheduler (SCHED)	16-3
16.5	Event Remover (REMOVER).....	16-3
16.6	Example Problem 1.....	16-4
16.7	List Processing Initializer (LISTINIT).....	16-6
16.8	List Creator (GRAB).....	16-7
16.9	List Inserter (LISTPUT)	16-7
16.10	List Retriever (LISTR V)	16-7
16.11	List Extender (LISTEXTN)	16-8
16.12	List Remover (LISTFREE).....	16-8
16.13	Example Problem 2	16-9
16.14	Discussion	16-12
16.15	SIMPAK Reference Sheet	16-12

Appendix 1 Statistical Tables.....	A1-1
Appendix 2 Course Outline	A2-1
Lecture 1: Introduction	A2-1
Lecture 2: Basic Simulation Process	A2-2
Lecture 3: Introduction to Models	A2-4
Lecture 4: Problem Formulation	A2-8
Lecture 5: Project Planning I	A2-12
Lecture 6: Project Planning II	A2-15
Lecture 7: System Definition	A2-17
Lecture 8: Input Data Collection and Analysis	A2-24
Lecture 9: Model Translation	A2-32
Lecture 10: Verification	A2-35
Lecture 11: Validation	A2-36
Lecture 12: Experimental Design	A2-41
Lecture 13: Analysis I	A2-43
Lecture 14: Analysis II	A2-46
Lecture 15: Analysis III	A2-47
Lecture 16: Analysis IV	A2-49
Lecture 17: Analysis V	A2-51
Lecture 18: Reports and Presentations	A2-52
Index	I-1
