Basic Immunology

*Functions and Disorders
of the Immune System*

SAUNDERS

Contents

1	Introduction to the Immune System <i>The Nomenclature, General Properties, and Components of the Immune System</i>1	9	Immunologic Tolerance and Autoimmunity <i>Self–Nonself Discrimination in the Immune System and Its Failure</i>161
2	Innate Immunity <i>The Early Defense Against Infections</i>21	10	Immune Responses Against Tumors and Transplants <i>Immunity to Noninfectious Transformed and Foreign Cells</i>177
3	Antigen Capture and Presentation to Lymphocytes <i>What Lymphocytes See</i>41	11	Hypersensitivity Diseases <i>Disorders Caused by Immune Responses</i>193
4	Antigen Recognition in the Adaptive Immune System <i>Structure of Lymphocyte Antigen Receptors and the Development of Immune Repertoires</i>63	12	Congenital and Acquired Immunodeficiencies <i>Diseases Caused by Defective Immune Responses</i>209
5	Cell-Mediated Immune Responses <i>Activation of T Lymphocytes by Cell-Associated Microbes</i>83		Suggested Readings225
6	Effector Mechanisms of Cell-Mediated Immunity <i>Eradication of Intracellular Microbes</i>105		APPENDIX I Principal Features of CD Molecules229
7	Humoral Immune Responses <i>Activation of B Lymphocytes and Production of Antibodies</i>123		APPENDIX II Glossary263
8	Effector Mechanisms of Humoral Immunity <i>The Elimination of Extracellular Microbes and Toxins</i>143		APPENDIX III Clinical Cases291
