<i>Preface</i>	ix
<i>Acknowledgements</i>	xii
<b>1 Introduction</b>	<b>1</b>
<b>2 Water Quality</b>	<b>4</b>
2.1 Aquaculture Farms	4
2.2 Open Waters for Stock Building and Stock Enhancement	5
<b>3 Nature of Environmental Impacts</b>	<b>7</b>
3.1 Conflicts with Other Uses	7
3.2 Sedimentation and Obstruction of Water Flows	9
3.3 Effluent Discharges	11
3.4 Hypertrophication and Eutrophication	13
3.5 Chemical Residues	18
3.6 Other Effects	19
<b>4 Extent of Environmental Impacts</b>	<b>21</b>
4.1 Quantification of Effluent Discharges	21
4.2 Assessment of Pollutive Effects	23
<b>5 Siting and Design of Farms</b>	<b>24</b>
5.1 Restrictions on the Use of Potential Sites	24
5.2 Basic Data for Site Selection	29
5.3 Siting Farms on Marshes and Mangroves	31
5.4 Selection of Water Bodies and Stocks to be Enhanced	38
5.5 Farm Design	40
<b>6 Use of Natural Resources</b>	<b>50</b>
6.1 Sources and Utilization of Land Water Resources	50
6.2 Use of Animal Wastes	51
6.3 Use of Sewage	52
6.4 Use of Heated-water Effluents	54
6.5 Recycling of Water	55
6.6 Use of Trophic Levels in Aquaculture	56

<b>7</b>	<b>Waste Production in Aquaculture</b>	<b>58</b>
7.1	Feed-derived and Metabolic Waste Products	58
7.2	Wastes from Food and Feedstuffs	62
7.3	Feed Loss	63
7.4	Methods of Measuring Waste Production	63
7.5	Fertilizer-derived Wastes	65
7.6	Residues of Biocides and Biostats	67
7.7	Algal Blooms	73
7.8	Bacterial Communities	74
<b>8</b>	<b>Pattern and Effect of Waste Discharges</b>	<b>76</b>
8.1	The Nature of Waste Discharges	76
8.2	Polyculture	79
<b>9</b>	<b>Introduction of Exotics and Escape of Farmed Species</b>	<b>80</b>
9.1	Species Diversity	80
9.2	Ecological Effects of Introductions	81
9.3	Transmission of Diseases	82
9.4	Control of Introductions	85
9.5	Genetic Dilution due to Escape of Farmed Animals	88
9.6	Guidelines for Management of Movement of Live Aquatic Animals	90
<b>10</b>	<b>Pathogens in the Aquatic Environment</b>	<b>92</b>
10.1	Occurrence of Pathogens	92
10.2	Environmental Causes of Disease	94
10.3	Controlling the Spread of Communicable Diseases	95
<b>11</b>	<b>Birds and Mammals in Aquaculture</b>	<b>97</b>
11.1	Effect of Birds on Aquaculture Farms	98
11.2	Effect of Aquaculture on Birds	99
11.3	Effect of Aquaculture on Predatory Mammals	101
<b>12</b>	<b>Safety of Aquaculture Products</b>	<b>103</b>
12.1	Breeding Programmes and Genetically Modified Food Products	103
12.2	Environmental Contaminants	104
12.3	Contamination by Trace Metals	104
12.4	Contamination by Organochlorines	106
12.5	Microbial Contamination of Shellfish	107
12.6	Contamination of Fish in Waste-water Ponds	107
12.7	Contamination by Algal Toxins	108
<b>13</b>	<b>Sustainability of Aquaculture</b>	<b>112</b>
13.1	Definition of Sustainability	112
13.2	Economic Sustainability	113
13.3	Environmental Sustainability	114

13.4	Social Aspects of Sustainability	115
13.5	Guidelines for Sustainable Aquaculture	117
<b>14</b>	<b>Economics and Environmental Impact Assessments</b>	<b>120</b>
14.1	Development Planning and Public Information	120
14.2	Aquaculture Development Zones	122
14.3	Environmental Impact Assessment	125
<b>15</b>	<b>Mitigation of Adverse Effects</b>	<b>145</b>
15.1	Land and Water Use	145
15.2	Culture Practices	150
15.3	Waste Treatment	152
<b>16</b>	<b>Research and Regulation</b>	<b>157</b>
16.1	Modelling the Environment	157
16.2	Regulatory Measures	161
	<b>References and Further Reading</b>	<b>164</b>
	<b>Index</b>	<b>189</b>
