

Ruminant Physiology

**DIGESTION,
METABOLISM,
GROWTH AND
REPRODUCTION**

Edited by P.B. Cronjé

CABI Publishing

Contents

Contributors	ix
Foreword	xiii
Part I Regulation of Feed Intake	1
1 Integration of Learning and Metabolic Signals into a Theory of Dietary Choice and Food Intake	3
<i>J.M. Forbes and F.D. Provenza</i>	
2 Mathematical Models of Food Intake and Metabolism in Ruminants	21
<i>A.W. Illius, N.S. Jessop and M. Gill</i>	
3 Control of Salivation and Motility of the Reticulorumen by the Brain in Sheep	41
<i>W.L. Grovum and J.S. Gonzalez</i>	
Part II Rumen Microbiology and Fermentation	59
4 Molecular Ecology and Diversity in Gut Microbial Ecosystems	61
<i>R.I. Mackie, R.I. Aminov, B.A. White and C.S. McSweeney</i>	
5 Microbial Adherence to the Plant Cell Wall and Enzymatic Hydrolysis	79
<i>C.W. Forsberg, E. Forano and A. Chesson</i>	
6 The Microbial Ecology and Physiology of Ruminal Nitrogen Metabolism	99
<i>M. Morrison</i>	
Part III Nutrient Absorption and Splanchnic Metabolism	115
7 Tissue, Cellular and Molecular Aspects of Peptide Absorption and Utilization	117
<i>K.E. Webb, Jr</i>	

8	Influence of Gastrointestinal Metabolism on Substrate Supply to the Liver <i>C.J. Seal and D.S. Parker</i>	131
9	The Liver: Integrator of Nitrogen Metabolism <i>G.E. Lobley, G.D. Milano and J.G. van der Walt</i>	149
Part IV Tissue Maintenance and Utilization of Endogenous Body Reserves		169
10	Adipose Tissue: Beyond an Energy Reserve <i>R.G. Vernon and K.L. Houseknecht</i>	171
11	Regulation of Growth and Metabolism During Postnatal Development <i>B.H. Breier, M.H. Oliver and B.W. Gallaher</i>	187
12	Direct Effects of Photoperiod on Lipid Metabolism, Leptin Synthesis and Milk Secretion in Adult Sheep <i>Y. Chilliard and F. Bocquier</i>	205
Part V Tissue Growth		225
13	Muscle Growth and Genetic Regulation <i>J.J. Bass, M. Sharma, J. Oldham and R. Kambadur</i>	227
14	Control and Manipulation of Hyperplasia and Hypertrophy in Muscle Tissue <i>P.J. Buttery, J.M. Brameld and J.M. Dawson</i>	237
15	Regulation of Protein Synthesis for Wool Growth <i>N.R. Adams, S. Liu and D.G. Masters</i>	255
Part VI Reproduction, Pregnancy and Lactation		273
16	Regulation of Macronutrient Partitioning between Maternal and Conceptus Tissues in the Pregnant Ruminant <i>A.W. Bell and R.A. Ehrhardt</i>	275
17	The Thermal Physiology of the Ruminant Fetus <i>H. Laburn, A. Faurie and D. Mitchell</i>	295
18	Regulation of Nutrient Partitioning During Lactation: Homeostasis and Homeorhesis Revisited <i>D.E. Bauman</i>	311
19	The Insulin-like Growth Factor (IGF) System in the Mammary Gland: Role for IGFBP-3 Binding Protein <i>C.R. Baumrucker</i>	329
20	Integrating the Effects of Genotype and Nutrition on Utilization of Body Reserves During Lactation of Dairy Cattle <i>J.P. McNamara</i>	353

Part VII Ruminant Physiology and Genetics	371
21 Genetic Manipulation of Ruminant Biochemistry and Physiology for Improved Productivity: Current Status and Future Potential <i>K.A. Ward</i>	373
22 Genetics of Rumen Microorganisms: Gene Transfer, Genetic Analysis and Strain Manipulation <i>H.J. Flint and K.P. Scott</i>	389
23 Nutrient–Gene Interactions: Future Potential and Applications <i>P.B. Cronjé</i>	409
Part VIII Host Resistance to Parasites and Pathogens	423
24 Host Resistance to Gastrointestinal Parasites of Sheep <i>S.J. McClure, D.L. Emery and J.W. Steel</i>	425
25 Host Resistance to Fleece Rot and Blowfly Strike <i>I.G. Colditz and R.L. Tellam</i>	437
26 Host Resistance to Mastitis <i>K. Persson Waller</i>	449
Index	463
