

## **Contents**

Preface		x
Acknowledgements		xi
1	History of Genetic Biotechnology in Aquaculture and Fisheries	1
2	Phenotypic Variation and Environmental Effects	7
	Stocking Density and Mortality	8
	Age, Temperature and Water Quality	8
	Biology and Physiology	9
	Maternal Effects	10
	Correction of Growth Data	13
	Skewness and Feeding Practices	15
	Compensatory Gain	17
	Communal Stocking/Evaluation	19
3	Polyploidy	22
	Polyploid Induction in Fish	22
	Polyploid Induction in Shellfish	26
	Triploid Cells	28
	Ploidy Determination	28
	Triploid Fish Performance	30
	Ĝrowth	30
	Feed conversion and consumption	32
	Morphology, meristics and identification	33
	Carcass traits and flesh quality	33
	Survival	35
	Tolerance of low oxygen	36
	Disease resistance	38
	Reproduction	38
	Embryonic development	41
	Sex ratio	<b>4</b> 1
	Hybrid viability	41
	Heterozygosity in triploids	43
	Behaviour	43
	Invertebrate Triploid Performance	43
	Growth	43
	Energy storage and bioenergetics	44
	Survival and disease resistance	45
	Reproduction	45

vi Contents

	Reversion to diploidy	46
	Sex ratio	47
	Flesh quality	47
	Tetraploids	47
	Tetraploid induction	48
	Fertility and performance	48
	Hexaploid Fish	50
	Tetraploid Shellfish	50
	Limitations and Constraints	50
	Fisheries Management Applications	51
	Environmental Protection	52
	Conclusions	52
	Gynogenesis, Androgenesis, Cloned Populations and Nuclear Transplantation	54
4	Induction of Gynogenesis and Androgenesis	54
	Performance of Compagns and Androgens	57
	Performance of Gynogens and Androgens	57
	Reproduction	58
	Monosex Populations	59
	Cloned Populations	59
	Phenotypic variability Regeneration of genetic variation in salmonids	60
	Growth	60
	Disease resistance	60
		61
	Clonal hybrids Nuclear Transplantation – Nucleocytoplasmic Hybrids	61
	Nuclear transplantation - Nucleocy to place the try of the	
5	Sex Reversal and Breeding	65
	Sexual Dimorphism	66
	Chemical and Mechanical Sterilization	68
	Hormonal Sex Reversal	71
	Anabolic Effect	73
	Health Issues	74
	Sex Reversal and Breeding	74
	All-female XX systems	75
	All-male ZZ systems	78
	All-male YY systems	79
	Genetics of Sex Determination	79
	Effects of temperature	82
	Genetics of temperature effects on sex determination	82
	YY system in channel catfish	83
	Constraints and Sex Markers	83
6	Biochemical and Molecular Markers	85
Ü	Isozymes and Enzymes	85
	Restriction Fragment Length Polymorphism	88
	Mitochondrial DNA	89
	Randomly Amplified Polymorphic DNA	90
	Amplified Fragment Length Polymorphism	92
	Microsatellites	97
	Expressed Sequence Tags	99
	Single Nucleotide Polymorphisms	100
	Relative Costs of Different Markers	100
	Relative Effectiveness of Markers	101

Contents

7	Population Genetics and Interactions of Hatchery and Wild Fish	104
	Genetic Variation, Population Structure and Biodiversity	104
	Effects of Geography and Environment on Population Variation	109
	Factors Affecting the Establishment of New Genotypes in Established	
	Natural Populations	112
	Interspecific Hybridization	113
	Interactions between Domestic and Wild Fish	115
	Integrated Management Strategy	120
8	Gene Mapping, Quantitative Trait Locus Mapping and	
Ü	Marker-assisted Selection	122
	Choice of Markers	122
	Mapping Systems	123
	Linkage Disequilibrium	124
	Isozyme Maps	124
	DNA Markers and Maps	129
	The Major Histocompatibility Complex and Oncogenes	133
	Effects of Karyotypes, Clustering and Distortion	133
	QTL Mapping	135
	QTL markers in agriculture	136
	QTLs of aquatic organisms	137
	Marker-assisted Selection	139
	Marker-assisted selection in agriculture	139
	Marker-assisted selection in fish	140
9	Gene Expression, Isolation and Cloning	141
_	Gene Expression and Expressed Sequence Tags	141
	Growth	143
	Ovulation and Reproduction	146
	Diseases	148
	Brain	150
	Cold Tolerance	151
	Osmoregulation	151
	Genetic Imprinting and Paternal Predominance	152
	Transposable Elements	153
	Ribosomes	156
	Proteomics	159
10	Gene-transfer Technology	160
10	Gene-transfer Technique in Fish	161
	Promoters	164
	Integration	166
	Transmission of Transgenes	169
	Transgene Expression of Growth-hormone and Reporter Genes	169
	Performance of Transgenic Fish	172
	Growth	172
	Dramatic growth of transgenic fish: explanations and limitations	177
	Cold tolerance	177
	Disease resistance	179
	Transgenic Production of Pharmaceuticals	181
	Gene Knockout Technology	181
	Pleiotropic Effects of Transferred Genes	184
	Potential Role of Mitochondrial DNA in Gene Transfer	190
	TOTO OF THE OWNER, DATE AND THE STREET	170

viii Contents

11	Combining Genetic Enhancement Programmes Sex Reversal and Triploidy Genetic Engineering and Crossbreeding	<b>193</b> 194 194
	Genetic Engineering, Selection, Crossbreeding, Strains and Hybrids	194
	Selection, Crossbreeding and Sex Reversal	194
	Gynogenesis, Selection and Hybridization	195
12	Genotype-Environment Interactions	198
	Traditional Breeding	199
	Polyploidy and Transgenics	200
13	Environmental Risk of Aquatic Organisms from Genetic Biotechnology	203
	Theoretical Risks	203
	Environmental Risk Data on Transgenic Fish	207 211
	Common Goals of Aquaculture and Genetic Conservation Genetic Sterilization	211
	Genetic Stermzation	211
14	Food Safety of Transgenic Aquatic Organisms	219
	International Guidelines	220
	Labelling	220
15	A Case Example: Safety of Consumption of Transgenic Salmon	
	Potentially Containing Elevated Levels of Growth Hormone and	222
	Insulin-like Growth Factor	222 222
	Growth Hormone/Salmonid Growth Hormone	222
	IGF/Salmonid IGF GH Levels in Non-transgenic Salmon and Fish	224
	IGF Levels in Non-transgenic Salmon and Fish	224
	GH Levels in Transgenic Salmon and Fish	225
	IGF Levels in Transgenic Salmon and Fish	226
	GH and IGF Levels in Humans	226
	GH and IGF Levels in Mammals	226
	Bioavailability of sGH and sIGF in the Upper GI Tract	226
	Dosage from Consumption	229
	Bioactivity of Salmon/Non-primate GH in Humans	230
	Bioactivity of Fish IGF	231
	Explanation for Primate Specificity for GH Bioactivity	231
	Potential Toxic Effects of GH/IGF and Food Safety	233
	Studies on Transgenic GH Fish Food Safety	233
	Conclusions on Human Food Safety	234
16	Government Regulation of Transgenic Fish	235
	US Performance Standards	237
	International Performance Standards	238
