1 CSO Considerations

*Izabela Wojtenko, Scott Minamyer,
Anthony N. Tafuri, Richard Field and Fu-hsiung Lai*

CONTENTS

1.1	Introduction	2
1.2	Consequences of CSOs	5
1.3	CSO Legislation	8
1.3.1	National CSO Policy	11
1.3.2	CWA Amendments of 2000	12
1.4	Characteristics of CSO/Impacts of CSO Constituents	12
1.4.1	Sediments	14
1.4.2	Suspended Solids	16
1.4.3	Oxygen-Demanding Matter	17
1.4.4	Nutrients	18
1.4.5	Toxics	19
1.4.6	Pathogens	20
1.5	Sources of Contamination	22
1.5.1	Coarse Materials and Litter	22
1.5.1.1	Sanitary Wastes	22
1.5.1.2	Natural Materials	23
1.5.1.3	Trash and Litter	23
1.5.2	Dissolved Pollutants and Pollutants Associated with Particulate Matter	24
1.5.2.1	Atmospheric Deposition	24
1.5.2.2	Runoff from Roadways, Parking Lots and Rooftops	24
1.5.2.3	Construction Materials	26
1.6	Impairment Processes	27
1.6.1	CSO Impacts Are Site Specific and Intermittent	28
1.6.2	CSO Effects Can Be Short- or Long-Term	29
1.6.3	Habitat/Biological Disruption	29
1.7	CSO Treatment/Control	31
1.8	CSO Monitoring and Modeling Considerations	32
1.8.1	CSO Monitoring	33
1.8.2	CSO Modeling	36
1.8.2.1	CSO Model Categories	37
1.8.2.2	CSO Model Selection	38
1.8.2.3	Application of Mathematical Models	39

1.8.2.4	U.S. EPA's Stormwater Management Model (SWMM).....	39
1.8.2.5	Sewer Solids Transport Models.....	42
References.....		43

2 Source Management and Control Technologies

*Richard Field, Chi-Yuan Fan, Mary Stinson
and Anthony N. Tafuri*

CONTENTS

2.1	Introduction	50
2.2	Source Control	51
2.2.1	Land Management.....	51
2.2.2	Contaminant Reduction.....	52
2.2.2.1	Product Substitution.....	52
2.2.2.2	Street Cleaning.....	53
2.2.2.3	Catchbasins	54
2.2.2.4	Multi-Chambered Treatment Train.....	58
2.3	Collection System Control.....	60
2.3.1	Sewer-Sediment Solids Characteristics	60
2.3.1.1	Origin of Sewer-Sediment Solids.....	61
2.3.1.2	Sewer-Sediment Solids Loading and Transport.....	63
2.3.1.3	Hydraulic Characteristics of Sewer-Sediment Solids	64
2.3.1.4	Impacts of Sewer-Sediment Solids.....	64
2.3.2	Sewer-Sediment Solids and Flow Control Methods	65
2.3.2.1	Improved Sewer Design	65
2.3.2.2	Sewer Flushing	67
2.3.2.3	Sediment Traps	68
2.3.3	Flow Regulator Devices.....	69
2.3.3.1	Static Regulators.....	69
2.3.3.2	Dynamic Regulators	71
2.3.4	Tide Gates	73
2.3.5	Vortex and Helical Bend Regulator/Concentrator Devices.....	74
2.3.5.1	U.S. EPA Swirl Regulator/Concentrator	75
2.3.5.2	StormKing™ and Fluidsep™ Vortex Separators	77
2.3.5.3	Swirl and Vortex Considerations	77
2.3.5.4	Helical Bend Regulator/Concentrator	79
2.4	Storage.....	80
2.4.1	In-line Storage.....	81
2.4.1.1	Real-Time Control	85

2.4.2	Off-line Storage.....	89
2.4.2.1	Flow-Balance Method of Off-line Storage in a Receiving Water	90
2.4.2.2	CSO Storage Flushing Systems	93
2.4.3	Multiple-Purpose CSO Storage/Treatment Facilities	94
	References.....	97

3 Treatment and Solids Management

Chi-Yuan Fan and Richard Field

CONTENTS

3.1	Introduction	106
3.1.1	High-Rate Treatment Processes	107
3.1.2	flowrate Considerations	108
3.1.3	Modifying Existing WWTP Treatment Processes	108
3.2	Physical Treatment with or without Chemical Addition	109
3.2.1	Screening	110
3.2.1.1	Bar Screens	110
3.2.1.2	Coarse Screens	111
3.2.1.3	Fine-Mesh or Microscreens (Drum Type)	111
3.2.2	Enhanced Inertial Separation	114
3.2.2.1	Sedimentation with Chemical Addition	114
3.2.2.2	Inclined Plate or Tube (Lamellae) Settler	116
3.2.2.3	Microcarrier (Ballasted) Sedimentation	116
3.2.2.4	Dissolved-Air Flotation (DAF)	117
3.2.3	Advanced Physical-Chemical Treatment	124
3.2.3.1	High-Gradient Magnetic Separation	124
3.2.3.2	Powdered Activated Carbon	127
3.3	Biological Treatment	129
3.3.1	Aerobic Suspended-Growth Processes	129
3.3.1.1	Activated Sludge	129
3.3.1.2	Aerated Lagoons	131
3.3.2	Attached-Film Growth Processes	131
3.3.2.1	Trickling Filter	131
3.3.2.2	Rotating Biological Contactor	132
3.3.2.3	Biological Aerated Filter	133
3.3.3	Suspended Attached-Film Growth Processes	134
3.3.3.1	Fluidized-Bed Biological Reactor	134
3.3.4	Dual DWF-WWF Biological-Treatment Demonstrations	135
3.3.4.1	Costs	136
3.4	Management of Solids Residuals (Biosolids or Sludge)	138
3.4.1	Characteristics and Implication	140
3.4.2	Treatment Processes	141

3.4.2.1	Dewatering Processes	141
3.4.2.2	Stabilization Processes.....	142
3.4.3	Pilot Studies	145
3.4.3.1	Biosolids Characteristics	145
3.4.3.2	Sludge Thickening	146
3.4.3.3	Bench-Scale Anaerobic Digestion Study	147
3.4.3.4	Biosolids Dewatering Costs.....	148
3.4.4	Handling and Disposal of Biosolids.....	148
3.4.4.1	Bleed/Pump-Back of CSO Solids Residuals to WWTP....	150
3.4.4.2	Centralized Treatment	150
3.4.4.3	Satellite Treatment Trains.....	150
References.....		151

4 Disinfection

*Izabela Wojtenko, Mary K. Stinson
and Richard Field*

CONTENTS

4.1	Introduction	157
4.2	Chlorination and Dechlorination	159
4.3	High-Rate Disinfection.....	160
4.3.1	Mixing	161
4.3.1.1	Baffled Plug Flow Contact Chambers	162
4.3.1.2	Mechanical Mixers.....	162
4.3.1.3	Comparison of Induction Mixers with Baffled Plug Flow Contact Chambers	164
4.3.2	Alternative Disinfection Agents	165
4.3.2.1	Chlorine Dioxide.....	165
4.3.2.2	Ozonation.....	171
4.3.2.3	Ultraviolet Light Irradiation.....	175
4.4	Cost of CSO Disinfection	179
4.5	Summary	181
4.6	Research Needs.....	183
	References	185

5 Effective Control Systems

Thomas P. O'Connor and Richard Field

CONTENTS

5.1	Introduction	190
5.2	Sewershed Approach: Defining Management Goals	191
5.3	Economic Analysis	192
5.3.1	Classical Storage vs. Treatment Economic Analysis	192
5.3.2	Updating Cost-Estimating and Optimization Techniques	198
5.4	Data and Measurement Needs	199
5.5	Storage	202
5.5.1	Peak Shaving or Dry-Weather Equalization	203
5.5.2	Utilization of In-Line Storage	205
5.5.3	Real-Time Control	205
5.5.4	Treatment in Overflowing Storage Tanks	206
5.5.5	Compartmentalization	207
5.6	Maximizing WWTP Capacity	208
5.6.1	Operational Changes	208
5.6.2	Retrofitting of Primary Settling Tanks	208
5.6.3	Using Abandoned Treatment Facilities	210
5.6.4	High-Rate Treatment	211
5.6.5	Parallel Processes	211
5.6.6	Solids Removal Improves Disinfection	211
5.7	Satellite Treatment Facilities	212
5.7.1	Localized vs. Centralized Sludge Treatment	212
5.8	Improving the Sewer System	213
5.8.1	Increasing Interceptor Capacity	213
5.8.2	Infiltration Control	214
5.8.3	Inflow Control	214
5.8.4	Sewer Separation	215
5.8.5	New Sewer Systems	216
5.8.6	Directly Connecting Industrial Sources	217
5.9	Sewershed Management Options	217
5.9.1	Pretreatment Programs	218
5.9.2	Disconnecting Roof Drains	218
5.9.3	Low Impact Development	219

5.9.4	Operation and Maintenance Issues	219
5.9.5	Water Conservation Programs	221
5.10	Prioritizing Retrofits and Upgrades	222
5.10.1	Research Needs	223
