

**5th
edition**

Engineering Materials Technology

Structures, Processing, Properties, and Selection

**James A. Jacobs
Thomas F. Kilduff**

Contents

UNIT 1 Nature & Structure

2

Module 1 Engineering Materials Technology 5

- 1.1 Engineering Materials Technology 9
- 1.2 The Materials Cycle—Life-Cycle Analysis 10
 - 1.2.1 *Extracting Raw Materials* 11
 - 1.2.2 *Creating Bulk Materials, Components, and Devices* 12
 - 1.2.3 *Manufacturing Engineered Materials* 13
 - 1.2.4 *Fabricating Products and Systems* 15
 - 1.2.5 *Service of Products and Systems* 16
 - 1.2.6 *Recycling and Disposal* 17
 - 1.2.7 *Sustainable Environmental Technologies* 17
- 1.3 Materials Selection 18
 - 1.3.1 *The Ideal Material* 19
 - 1.3.2 *Selection and Compromise* 19
 - 1.3.2.1 *Properties of Materials* 20
 - 1.3.3 *Obstacles to Change* 21
 - 1.3.4 *Materials Systems* 21
 - 1.3.5 *Materials Selection in This Book* 22
- 1.4 Technological Literacy 22
 - 1.4.1 *The Materials Consumer* 22
 - 1.4.2 *The Intelligent Citizen* 23

Module 2 Nature & the Family of Materials 31

- 2.1 Nature 35
 - 2.1.1 *Internal Structure* 35
 - 2.1.1.1 *Atomic Structure* 36
 - 2.1.1.2 *Molecular Structure and Bonding* 46
 - 2.1.2 *Solid State* 54
 - 2.1.3 *Processing and Structure* 55
- 2.2 Family of Materials 55
 - 2.2.1 *Other Systems of Grouping* 56
 - 2.2.2 *Metallics* 56
 - 2.2.2.1 *Metallic Defined* 56
 - 2.2.2.2 *Types of Metallics* 56
 - 2.2.3 *Polymeric* 59
 - 2.2.3.1 *Plastics* 59
 - 2.2.3.2 *Wood* 59
 - 2.2.3.3 *Elastomers* 59
 - 2.2.3.4 *Other Natural Polymers* 60

2.2.4	<i>Ceramics</i>	60
2.2.5	<i>Composites</i>	61
2.2.6	<i>Other Materials</i>	62
2.2.6.1	<i>Cellular Solids</i>	64

Module 3 *Synthesis, Processing, & Structure of Solid Materials* 71

3.1	<i>Synthesizing and Processing</i>	72
3.1.1	<i>Nanotechnology</i>	73
3.2	<i>Structure of Solid Materials</i>	74
3.2.1	<i>Unit Cells and Space Lattices</i>	77
3.2.2	<i>Crystal Systems</i>	78
3.2.3	<i>Crystallographic Planes, Miller Indices, and Crystal Directions</i>	84
3.2.3.1	<i>Miller Indices for Atomic Planes and Directions</i>	86
3.2.3.2	<i>Crystal Directions</i>	88
3.2.4	<i>Coordination Number</i>	89
3.2.5	<i>Allotropy/Polymorphism</i>	91
3.2.6	<i>Volume Changes and Packing Factor</i>	93
3.2.7	<i>Crystal Imperfections</i>	94
3.2.8	<i>Crystal Impurities</i>	94
3.2.9	<i>Substitutional Solid Solutions</i>	96
3.2.10	<i>Interstitial Solid Solutions</i>	97
3.2.11	<i>Crystal Defects</i>	98
3.3	<i>Phases/Phase Diagrams</i>	102
3.3.1	<i>Phases</i>	102
3.3.2	<i>Phase Diagrams</i>	104
3.3.3	<i>Phase Diagrams (Equilibrium Diagrams) for Metallic Systems</i>	109
3.3.4	<i>Solid Solution Strengthening</i>	110
3.3.5	<i>Intermediate Phases</i>	122
3.3.6	<i>Multiphase Metal Alloys</i>	125
3.3.7	<i>Phase or Structural Transformations</i>	126
3.4	<i>Single-Crystal Castings</i>	126
3.5	<i>Structures Resulting from Nonequilibrium Conditions</i>	127
3.6	<i>Laboratory Activities and Classroom Demonstrations with Processing and Structure</i>	129

UNIT 2 *Properties of Materials*

136

Module 4 *Mechanical Properties Defined* 139

4.1	<i>Properties and Environmental Variables</i>	140
4.2	<i>Mechanical Properties</i>	140
4.2.1	<i>Stress</i>	141
4.2.2	<i>Strain (Unit Deformation)</i>	142
4.2.3	<i>Stress–Strain Diagrams and Hooke’s Law</i>	143
4.2.4	<i>Ultimate Strength or Tensile Strength</i>	146
4.2.5	<i>Yield Strength</i>	146
4.2.6	<i>Resilience</i>	147

- 4.2.7 *Shear Stress* 147
- 4.2.8 *Ductility* 149
- 4.2.9 *Toughness* 152
- 4.2.10 *Processing Properties* 156
- 4.2.11 *Flexural or Bending Strength* 157
- 4.2.12 *Fatigue (Endurance) Strength* 158
- 4.2.13 *Creep* 163
- 4.2.14 *Torsional Strength* 164
- 4.2.15 *Hardness* 167

4.3 *Nanotechnology* 171

Module 5 *Chemical, Thermal and Tribological Properties & Corrosion* 175

5.1 *Electrochemistry—Electrolysis, Corrosion, and its Prevention* 176

- 5.1.1 *Chemical Properties and Reactions* 176
- 5.1.2 *Electrolysis* 177
- 5.1.3 *The Electrochemical Cell* 178
 - 5.1.3.1 *Oxidation-Reduction (Redox) Reactions and Electron Transfer Reactions* 183
- 5.1.4 *Corrosion of Metals* 184
- 5.1.5 *Types of Corrosion* 186
- 5.1.6 *Corrosion Prevention and Protection* 188
 - 5.1.6.1 *Protective Coatings* 190
 - 5.1.6.2 *Materials Selection* 192
 - 5.1.6.3 *Cathodic Protection* 193
 - 5.1.6.4 *Shot Peening* 194

5.2 *Thermal Properties* 194

- 5.2.1 *Heat Capacity—Specific Heat* 195
- 5.2.2 *Thermal Expansion* 196
- 5.2.3 *Thermal Conductivity* 198
- 5.2.4 *Thermal Resistance* 199

5.3 *Water Absorption and Biological Resistance* 200

Module 6 *Electrical, Magnetic, & Optical Properties* 205

6.1 *Electrical Properties* 206

- 6.1.1 *Resistivity* 208
- 6.1.2 *Electrical Conductivity* 211

6.2 *Dielectric Properties* 212

- 6.2.1 *Dielectrics* 212
 - 6.2.1.1 *Electronic Polarization* 213
 - 6.2.1.2 *Ionic Polarization* 213
 - 6.2.1.3 *Molecular, Dipole, or Orientation Polarization* 213
- 6.2.2 *Dielectric Constant* 215
- 6.2.3 *Dielectric Strength* 217
- 6.2.4 *Dissipation Factor/Dielectric-Loss Factor* 217

6.3 *Magnetic Properties* 217

- 6.3.1 *Magnets, Magnetic Field, Electromagnetic Force Magnetic Domains* 217
- 6.3.2 *Permeability Classes of Magnetic Materials, Magnetic Domains* 220
- 6.3.3 *B-H Hysteresis (Magnetization) Curves for Ferromagnetic Materials* 222
- 6.3.4 *Soft-Magnetic Material* 222
- 6.3.5 *Hard-Magnetic Material* 224

- 6.3.6 *Smart Electronic Materials: Electrorheological and Magnetorheological Materials* 225
- 6.4 *Optical Properties* 225
 - 6.4.1 *Characteristics of Light* 225
 - 6.4.2 *Photoelectric Effect, Photons, and Lasers* 230
 - 6.4.3 *X Rays* 236
 - 6.4.4 *Thermionic Emission* 237
 - 6.4.5 *Transmission* 237
 - 6.4.6 *Photoelasticity* 241
- 6.5 *Nanotechnology* 241

UNIT 3 Evaluation, Standards, Design, & Selection

244

Module 7 Testing, Failure Analysis, Inspection, & Standards 249

- 7.1 *Testing, Standards, and Inspection* 250
 - 7.1.1 *Testing* 250
 - 7.1.2 *Nondestructive Testing (NDT), Nondestructive Inspection (NDI), and Nondestructive Evaluation/Examination (NDE)* 250
- 7.2 *Wear, Friction, Tribology, and Wear Resistance* 252
- 7.3 *Failure Analysis* 255
 - 7.3.1 *Factors of Safety* 256
- 7.4 *Standards and Testing Organizations* 257
 - 7.4.1 *Technical Societies* 258
 - 7.4.2 *Governmental Agencies and Research Centers* 258
 - 7.4.3 *Private Laboratories* 259
 - 7.4.4 *Manufacturing Companies* 260
 - 7.4.5 *Wholesalers and Retailers* 261
 - 7.4.6 *Consumer Groups* 261
 - 7.4.7 *Individual Consumers* 261
- 7.5 *Materials Selection* 261
- 7.6 *Laboratory Activities and Classroom Demonstrations with Properties* 263

Module 8 Materials Design, Selection & Characterization 267

- 8.1 *Materials Research* 268
 - 8.1.1 *Combinatorial Materials Science* 269
 - 8.1.2 *Combinatorial Research: Terms and Techniques* 271
- 8.2 *Materials Design* 273
 - 8.2.1 *Modeling Technology* 275
 - 8.2.2 *Materials Optimization* 275
- 8.3 *Materials Selection* 275
 - 8.3.1 *Algorithm for Materials Selection* 276
 - 8.3.2 *Selection Tools* 276
 - 8.3.3 *Properties of Materials* 277

8.3.4	Materials Systems	277
8.3.5	Additional Selection Criteria	278
8.4	Determining Material Structure	281
8.4.1	Spectroscopy	282
8.4.2	X-Ray Diffraction	283
8.4.3	Optical Microscopy	285
8.4.4	Electron Microscopy	285
8.4.5	Digital Instrumentation	288
8.5	Materials Characterization	293

UNIT 4 *Metallics*

298

Module 9 *Nature & Thermal Processing of Metals* 301

9.1	Nature of Metals	305
9.2	Thermal Processing of Steel: Equilibrium Conditions	307
9.3	Thermal Processing of Steel: Near-Equilibrium Conditions	313
9.3.1	Grain Refinement	317
9.3.2	Grain Size	318
9.3.3	Grain Boundaries	319
9.3.4	Grain Shape	320
9.4	Thermal Processing of Steel: Nonequilibrium Conditions (Martensite Strengthening)	321
9.4.1	Conventional (Customary) Heat, Quench, and Temper Process	324
9.4.2	Martempering	325
9.4.3	Austempering	325
9.5	Precipitation Strengthening/Hardening (Age Hardening)	327
9.6	Hardenability	330

Module 10 *Ferrous Metals* 335

10.1	Ferrous Metals	336
10.2	Cast Iron	336
10.2.1	Gray Cast Iron	336
10.2.2	White Cast Iron	338
10.2.3	Nodular or Ductile Cast Iron	338
10.2.4	Malleable Iron	341
10.3	Steel	342
10.3.1	Carbon Steel	343
10.3.1.1	Ultrahigh-Carbon Steel	344
10.3.2	High-Strength Low-Alloy (HSLA) Steel	345
10.3.3	Alloy Steel	345
10.3.4	Corrosion-Resistant (CRES)/Stainless Steel	347
10.3.5	Other Steel Alloys	350
10.4	Ferrous Amorphous Metals	350

Module 11 Nonferrous Metals 357

- 11.1 Aluminum 358
 - 11.1.1 Superplastic Forming (SPF) and Diffusion Bonding (DB) 362
 - 11.1.2 Tube Hydroforming and Sheet Hydroforming 365
 - 11.1.3 Tailor-Welded Blanks 366
 - 11.1.4 Aluminum in MMCs 367
- 11.2 Copper 367
- 11.3 Nickel 369
- 11.4 Magnesium 372
- 11.5 Titanium 374
- 11.6 White Metals 377
 - 11.6.1 Battery Technology 378
- 11.7 Other Metals 381

Module 12 Metal Powders, Powder Metallurgy, & More Metals Technology 385

- 12.1 Metal Powders 386
 - 12.1.1 P/M Production 386
 - 12.1.2 P/M Selection 386
 - 12.1.3 Metal Powders 388
 - 12.1.3.1 Amorphous Powders 388
 - 12.1.4 P/M Cost 390
- 12.2 Advanced Metals Technology 390
 - 12.2.1 Systems 392
- 12.3 Life Cycle of Materials and Green Design 392
- 12.4 Cradle-to-Cradle Design 394
 - 12.4.1 Metallics in Computers 395

UNIT 5 Surface Science & Engineering**398****Module 13 Surface Science & Engineering 401**

- 13.1 Surface Science and Engineering 402
 - 13.1.1 Surface Science 402
 - 13.1.2 Surface Engineering 403
- 13.2 Surfaces 404
- 13.3 Surface Treatments 404
 - 13.3.1 Thermal Spray Technology 405
 - 13.3.1.1 Plasma Surface Engineering 406
 - 13.3.1.2 Cold Spray/Gas Dynamic Spraying 407
 - 13.3.1.3 Fluidized Bed Technology 407

- 13.4 Surface Hardening and Surface Modification 407
 - 13.4.1 Case Hardening 409
 - 13.4.2 Carburizing 409
 - 13.4.3 Nitriding 403
 - 13.4.4 Cyaniding and Carbonitriding 409
 - 13.4.5 Flame Hardening and Induction Hardening 411
- 13.5 Other Methods of Surface Modification 411

UNIT 6 Polymerics

418

Module 14 Nature of Polymers 421

- 14.1 Polymerics 422
- 14.2 Nature of Polymers 422
 - 14.2.1 Polymerization 423
 - 14.2.1.1 Polymer Chain Lengths 428
 - 14.2.2 Crystalline Structures 428
 - 14.2.3 Branched and Network Structures 430
- 14.3 Fibers 433
 - 14.3.1 Natural Fibers 433
 - 14.3.2 Synthetic and Manufactured Fibers 433
 - 14.3.3 Nanothreads 435
- 14.4 Green Design and Green Manufacturing 435

Module 15 Plastics 443

- 15.1 Classification of Plastics 445
- 15.2 Properties of Plastics 448
 - 15.2.1 Additives (Modifiers) 448
 - 15.2.2 Mechanical Properties 450
 - 15.2.3 Viscoelasticity 454
 - 15.2.4 Thermal Properties 456
 - 15.2.5 Chemical Properties 458
 - 15.2.6 Density 461
 - 15.2.7 Specific Gravity 461
 - 15.2.8 Optical Properties 462
 - 15.2.9 Electrical Properties 463
- 15.3 Plastic Selection 464
- 15.4 Processing Plastics 465
- 15.5 Smart Polymeric Materials 474

Module 16 Elastomers: Natural & Synthetic Rubbers 483

- 16.1 Natural Rubber and Vulcanization 484
- 16.2 Synthetic Rubber 486

- 16.2.1 *Additives (Modifiers)* 490
- 16.2.2 *Thermoplastic Rubbers or Elastoplastics* 490
- 16.3 *Classification and Properties of Elastomers* 491
- 16.4 *Selection of Elastomers* 494
- 16.5 *Nanotechnology* 495
- 16.6 *Artificial Muscle* 498

Module 17 Adhesives, Caulks, Sealants, & Other Important Polymeric 501

- 17.1 *Adhesives* 502
 - 17.1.1 *Adhesive Systems and the Bond Joint* 504
 - 17.1.1.1 *Contact Angle* 504
 - 17.1.2 *Adhesive-Bond Chain Links* 505
 - 17.1.3 *Types of Adhesives and Their Properties* 507
 - 17.1.4 *Adhesive Selection* 508
 - 17.1.5 *Biomimetics and Biologically Inspired Adhesives* 509
- 17.2 *Caulks and Sealants* 511
- 17.3 *Other Important Polymeric* 511
 - 17.3.1 *Protective Coatings and Preservatives* 511
 - 17.3.2 *Oils, Lubricants, and Fluids* 514
 - 17.3.3 *Conductive Polymers* 514
 - 17.3.4 *Geosynthetics* 514

Module 18 Wood & Related Products 519

- 18.1 *Wood* 520
 - 18.1.1 *Structure* 521
- 18.2 *Wood Products* 524
 - 18.2.1 *Commercial Lumber* 524
 - 18.2.2 *Composite Wood* 525
 - 18.2.2.1 *Laminated Timber* 526
 - 18.2.2.2 *Impreg-wood* 526
 - 18.2.2.3 *Wood and Recycled Plastics* 526
 - 18.2.2.4 *Plywood* 529
 - 18.2.2.5 *Wood-Based Fiber and Particle Panel Materials* 530
 - 18.2.2.6 *Sandwiched Materials* 532
- 18.3 *Wood By-Products* 532
- 18.4 *Physical Properties* 532
 - 18.4.1 *Appearance* 532
 - 18.4.2 *Sawing Effects* 532
 - 18.4.3 *Moisture Content* 532
 - 18.4.4 *Weatherability and Decay Resistance* 534
 - 18.4.5 *Density* 535
 - 18.4.6 *Working Qualities* 535
 - 18.4.7 *Ablation* 535
- 18.5 *Mechanical Properties* 535
- 18.6 *Laboratory Activities and Classroom Demonstrations with Polymers* 536

UNIT 7 Ceramic Materials**540****Module 19 Nature & Design of Ceramics 543**

- 19.1 Nature of Ceramics 548
 - 19.1.1 Porosity and Density 550
 - 19.1.2 Structure, Bonding, and Properties 553
 - 19.1.3 Ceramic Phase Diagrams 555
 - 19.1.4 Wear Resistance 556
 - 19.1.5 Stress Concentrations and Fracture Toughness 557
 - 19.1.6 Thermal Shock Resistance 562
 - 19.1.7 Emissivity 565
- 19.2 Designing Ceramics 566
- 19.3 Improving Toughness 567

Module 20 Ceramic Processing 577

- 20.1 Thermal Processing—Sintering/Densification/Firing 578
- 20.2 Traditional Processing 580
- 20.3 Advanced Ceramic Processing 583
 - 20.3.1 Chemical Processes 585
 - 20.3.2 Melt Processing 586
 - 20.3.3 Producing Single-Crystal Materials 587
 - 20.3.4 Vapor Processing 589
 - 20.3.5 Directed Metal Oxygen Process 595
 - 20.3.6 Finishing (Machining) 597

Module 21 Refractories, Cement, Concrete, Clay, Abrasives, & Protective Coatings 601

- 21.1 Refractories 602
- 21.2 Cement and Concrete 603
 - 21.2.1 Chemically Bonded Ceramics 603
 - 21.2.2 Improved Cements 609
- 21.3 Clay 610
- 21.4 Radioactivity and Nuclear Fuel 610
 - 21.4.1 Disposing of Nuclear and Chemical Waste 613
- 21.5 Abrasives 613
- 21.6 Protective Coatings 614

Module 22 Electronic and Magnetic Ceramics & Smart Ceramics 617

- 22.1 Electronic and Magnetic Ceramics 618
 - 22.1.1 Ceramic Magnets 618
 - 22.1.2 Thick-Film and Thin-Film Ceramic Devices 619

- 22.2 Smart Ceramics Materials 619
- 22.3 Electroceramics 620
- 22.4 Nanotechnology 620

Module 23 Glass, Radioactive Materials & Nuclear Fuels 623

- 23.1 Glass 624
 - 23.1.1 Nature of Glass 624
 - 23.1.2 Types and Properties of Glass 628
 - 23.1.2.1 Specialty Glasses 629
 - 23.1.2.2 Chemically Toughened Glasses 629
 - 23.1.2.3 Glazing 629
 - 23.1.2.4 Glass Fibers 630
- 23.2 Glass-Ceramics 632
- 23.3 Glass and Green Manufacturing 634
- 23.4 Materials Selection 636
- 23.5 Laboratory Activities and Classroom Demonstrations with Ceramics 636

UNIT 8 Composite Materials

642

Module 24 Fiber Structures & Properties 645

- 24.1 Introduction 645
 - 24.1.1 Development of Composites 647
- 24.2 Constituents of Fiber-Reinforced Composites 650
 - 24.2.1 Fiber 650
 - 24.2.2 Matrix 651
 - 24.2.2.1 Interface and Interphase 653
 - 24.2.3 Fiber/Matrix Consolidation 653
- 24.3 Reinforcing Fibers 657
 - 24.3.1 Glass Fiber 657
 - 24.3.2 Boron Fiber 659
 - 24.3.3 Carbon and Graphite Fibers 659
 - 24.3.3.1 Nano Composites 664
 - 24.3.4 Kevlar™ Fiber 665
 - 24.3.5 Ceramic Fibers 666
 - 24.3.6 High-Performance Manufactured Polymeric Fibers 666
- 24.4 Fiber Properties 667
 - 24.4.1 Fiber Strength 667
 - 24.4.2 Specific Tensile Strength 668
 - 24.4.3 Specific Stiffness—Specific Modulus 668
 - 24.4.4 Fiber Loading 671
 - 24.4.5 Fiber Orientation 671
 - 24.4.6 Smart Fibers 672

Module 25 Composite Types, Structures, & Properties 679

- 25.1 Structure and Properties of Composites 680
 - 25.1.1 Rule of Mixtures 681
 - 25.1.2 Design and Fatigue 685
 - 25.1.3 Toughness and Impact Strength 686
 - 25.1.4 Fire Resistance 687
- 25.2 Types of Composites 688
 - 25.2.1 Fiber-Reinforced Composites 688
 - 25.2.1.1 Polymer-Matrix Composites (PMCs) and Glass-Reinforced Plastics (GRPs) 688
 - 25.2.1.2 Metal-Matrix Composites (MMCs) and Ceramic Matrix Composites (CMCs) 692
 - 25.2.2 Laminar Composites 701
 - 25.2.3 Sandwich (Stressed-Skin) Composites 706
 - 25.2.4 Particulate (Particle) Composites 707
 - 25.2.4.1 Cermeis 709
 - 25.2.4.2 Dispersion-Strengthened Alloys/Composites 709
 - 25.2.5 Flake Composites 712
 - 25.2.6 Filled Composites 712
 - 25.2.7 Hybrid Composites 713
 - 25.2.8 Smart Composite Materials 714
 - 25.2.9 Foam Composite Materials 716

Module 26 Composite Processing, Fastening, Machining, Repair, & Evaluation 721

- 26.1 Composite Processing 722
 - 26.1.1 Contact Molding, Open Molding, and Lamination Molding Processes 722
 - 26.1.2 Closed Molding 723
 - 26.1.3 Resin Transfer Molding 727
 - 26.1.4 Filament Winding and Tape Winding 729
 - 26.1.5 Pultrusion 729
- 26.2 Fasteners 733
- 26.3 Machining of Composite Materials 733
- 26.4 Repair of Composite Materials 735
- 26.5 Nondestructive Evaluation 736
- 26.6 Composite Selection: Database for Composites 737
 - 26.6.1 Integrated Design for Manufacturing 739
 - 26.6.2 Composite Design and Selection 739
- 26.7 Microscopy of Composite Materials 740
 - 26.7.1 Lightning Strike Analysis 740
- 26.8 Green Manufacturing 742
 - 26.8.1 Composites Recycling/Green Manufacturing 742
- 26.9 Composites Glossary 744

UNIT 9 Electronic and Other Important Materials & Materials Systems Technology

750

Module 27 Electrical, Electronic & Optical Materials 755

- 27.1 Microelectronics/Semiconductors/Donor Doping/Band Theory/Computer Chip Technology 758
 - 27.1.1 Electrically Charged Particles 761
 - 27.1.2 Donor Doping 762
 - 27.1.3 Holes 763
 - 27.1.4 Conduction In Solids 764
 - 27.1.5 Acceptor Doping 765
 - 27.1.6 Computer Chip Technology 770
- 27.2 Electroceramics 771
- 27.3 Optoelectronic Devices 772
 - 27.3.1 Photoconductive Devices 772
 - 27.3.2 Photovoltaic Devices 772
 - 27.3.3 Photoemissive Devices 775
 - 27.3.3.1 Light-Emitting Diode 776
 - 27.3.4 Silicon Technology 777
- 27.4 Piezoelectric Materials 779
- 27.5 Liquid-Phase Epitaxy and Molecular-Beam Epitaxy 782
- 27.6 Liquid Crystals 783
 - 27.6.1 Liquid-Crystal (LC) Cell 785
 - 27.6.2 Homeotropic and Homogeneous Orientations 785
 - 27.6.3 Reflective-Type LC Cell Operation 786
- 27.7 Superconductors 788

Module 28 Advanced Materials, Processes & Manufacturing 796

- 28.1 Smart Materials and Intelligent Structures Technology 797
- 28.2 Biotechnology 799
 - 28.2.1 Biologically Inspired Materials 799
 - 28.2.2 Biomaterials 801
- 28.3 Microtechnology/Microelectromechanical Systems (MEMS) 807
- 28.4 Molecular Nanotechnology, Molecular Systems Engineering, or Molecular Manufacturing 809
- 28.5 Challenges in Materials Science and Technology 816
- 28.6 Advanced Processing Technologies 817
 - 28.6.1 3DP (Three-Dimensional Printing) 817
 - 28.6.2 Ultrasonic Consolidation (UC) 818
- 28.7 Into the Future 819

Appendix 823
