| FOREWORD | ix | 2.6.2 Deformulation of rubbers | 48 |
| PREFACE | xi | 2.6.3 Deformulation of polymers | 48 |
| ABOUT THE AUTHOR | xiii | 2.7 References | 48 |
| ACKNOWLEDGEMENTS | xv | CHAPTER 3 Sample Preparation Perspectives | 51 |
| CHAPTER 1 Introduction | 1 | 3.1 Solvents | 54 |
| 1.1 Additives | 2 | 3.1.1 Polymer solubility criteria | 55 |
| 1.1.1 Additive functionality | 3 | 3.1.2 Solubility parameters | 55 |
| 1.2 Plastics formulations | 5 | 3.1.3 Polymer solutions | 56 |
| 1.2.1 Supply forms | 7 | 3.2 Extraction strategy | 57 |
| 1.2.2 Additive delivery | 9 | 3.3 Conventional extraction technologies ... | 59 |
| 1.3 Economic impact of polymer additives ... | 9 | 3.3.1 Liquid-liquid extraction | 60 |
| 1.4 Analysis of plastics | 11 | 3.3.2 Liquid-solid extraction | 60 |
| 1.4.1 Regulations and standardisation ... | 15 | 3.3.3 Classical solvent extractions of additives from polymers | 61 |
| 1.4.2 Prior art | 17 | 3.3.4 Sonication | 75 |
| 1.4.3 Databases | 19 | 3.4 High-pressure solvent extraction methods | 81 |
| 1.4.4 Scope | 20 | 3.4.1 Supercritical fluid technology ... | 81 |
| 1.4.5 Chapter overview | 22 | 3.4.2 Analytical SFE | 85 |
| 1.5 Bibliography | 23 | 3.4.3 Subcritical water extraction | 100 |
| 1.5.1 Plastics additives | 23 | 3.4.4 Microwave technology | 101 |
| 1.5.2 Processing technologies | 23 | 3.4.5 Microwave-assisted extractions ... | 104 |
| 1.5.3 Instrumental analysis | 23 | 3.4.6 Pressurised fluid extraction | 117 |
| 1.5.4 Polymer analysis | 24 | 3.5 Sorbent extraction | 123 |
| 1.5.5 Polymer/additive analysis | 24 | 3.5.1 Solid-phase extraction | 124 |
| 1.6 References | 24 | 3.5.2 Solid-phase microextraction | 129 |
| CHAPTER 2 Deformulation Principles ... | 29 | 3.5.3 Stir bar sorptive extraction | 133 |
| 2.1 Polymer identification | 30 | 3.6 Methodological comparison of extraction methods | 134 |
| 2.2 Additive analysis of rubbers: 'Best Practice' | 32 | 3.6.1 Experimental comparisons | 136 |
| 2.3 Polymer extract analysis | 42 | 3.6.2 Extraction selectivity | 138 |
| 2.4 <i>In situ</i> polymer/additive analysis | 46 | 3.6.3 'Nonextractable' additive analysis | 140 |
| 2.5 Class-specific polymer/additive analysis ... | 47 | 3.7 Polymer/additive dissolution methods ... | 146 |
| 2.6 Bibliography | 48 | 3.8 Hydrolysis | 152 |
| 2.6.1 Polymer identification | 48 | 3.9 Bibliography | 155 |
| | | 3.9.1 Sampling and sample preparation | 155 |
| | | 3.9.2 Solvents/solubility | 156 |
| | | 3.9.3 Extraction methods | 156 |
| | | 3.10 References | 156 |

| | | | | |
|------------------|---|------------|---|--|
| CHAPTER 4 | Separation Techniques | 171 | 6.1.2 Modes of detection | 353 |
| 4.1 | Analytical detectors | 177 | 6.1.3 Mass resolution | 354 |
| 4.2 | Gas chromatography | 181 | 6.1.4 Isotope distributions | 354 |
| 4.2.1 | High-temperature gas chromatography | 200 | 6.1.5 Accurate mass measurements | 355 |
| 4.2.2 | Headspace gas chromatography | 202 | 6.2 Ion sources | 357 |
| 4.3 | Supercritical fluid chromatography | 205 | 6.2.1 Electron impact ionisation | 360 |
| 4.4 | Liquid chromatography techniques | 217 | 6.2.2 Chemical ionisation | 362 |
| 4.4.1 | Planar chromatographies | 218 | 6.2.3 Metastable atom bombardment | 367 |
| 4.4.2 | Column chromatographies | 230 | 6.2.4 Fast atom bombardment | 367 |
| 4.5 | Capillary electrophoretic techniques | 273 | 6.2.5 Field ionisation | 372 |
| 4.6 | Bibliography | 278 | 6.2.6 Field desorption | 374 |
| 4.6.1 | General texts | 278 | 6.2.7 Thermospray ionisation | 376 |
| 4.6.2 | Detectors | 279 | 6.2.8 Atmospheric pressure ionisation techniques | 378 |
| 4.6.3 | Gas chromatography | 279 | 6.2.9 Desorption/ionisation methods | 383 |
| 4.6.4 | Supercritical fluid chromatography | 279 | 6.2.10 Photoionisation techniques | 385 |
| 4.6.5 | Thin-layer chromatography | 279 | 6.3 Mass analysers | 386 |
| 4.6.6 | Liquid chromatography | 280 | 6.3.1 Sector analysers | 387 |
| 4.6.7 | Size-exclusion chromatography | 280 | 6.3.2 Quadrupole mass spectrometers | 389 |
| 4.6.8 | Ion chromatography | 280 | 6.3.3 Time-of-flight mass spectrometry | 390 |
| 4.6.9 | Capillary electrophoretic techniques | 280 | 6.3.4 Quadrupole ion trap | 393 |
| 4.7 | References | 281 | 6.3.5 Fourier-transform ion-cyclotron resonance mass spectrometry | 395 |
| | | | 6.3.6 Tandem mass spectrometry | 398 |
| CHAPTER 5 | Polymer/Additive Analysis: The Spectroscopic Alternative | 299 | 6.4 Direct mass-spectrometric polymer compound analysis | 407 |
| 5.1 | Ultraviolet/visible spectrophotometry | 302 | 6.5 Ion mobility spectrometry | 415 |
| 5.2 | Infrared spectroscopy | 311 | 6.6 Bibliography | 417 |
| 5.3 | Luminescence spectroscopy | 318 | 6.6.1 Mass spectrometry (General) | 417 |
| 5.4 | High-resolution nuclear magnetic resonance spectroscopy | 323 | 6.6.2 Mass spectrometers | 417 |
| 5.4.1 | Multidimensional NMR spectroscopy | 336 | 6.6.3 Ionisation modes | 417 |
| 5.5 | Bibliography | 342 | 6.7 References | 418 |
| 5.5.1 | General spectroscopy | 342 | CHAPTER 7 | Multihyphenation and Multidimensionality in Polymer/Additive Analysis |
| 5.5.2 | Ultraviolet/visible spectrophotometry | 342 | 7.1 | Precolumn hyphenation |
| 5.5.3 | Infrared spectroscopy | 342 | 7.1.1 | Chromatographic sampling methods |
| 5.5.4 | Luminescence spectroscopy | 342 | 7.2 | Coupled sample preparation – spectroscopy/spectrometry |
| 5.5.5 | Nuclear magnetic resonance spectroscopy | 342 | 7.3 | Postcolumn hyphenation |
| 5.6 | References | 342 | 7.3.1 | (Multi)hyphenated GC techniques |
| | | | 7.3.2 | (Multi)hyphenated SFC techniques |
| | | | 7.3.3 | (Multi)hyphenated HPLC techniques |
| | | | 7.3.4 | Hyphenated SEC techniques |
| | | | 7.3.5 | Hyphenated TLC techniques |
| | | | 7.3.6 | Hyphenated CE techniques |
| CHAPTER 6 | Organic Mass-Spectrometric Methods | 349 | | |
| 6.1 | Basic instrumentation | 351 | | |
| 6.1.1 | Inlet systems | 352 | | |

| | | | | | |
|------------------|---|------------|-------------------|---|------------|
| 7.4 | Multidimensional chromatography | 545 | 8.6 | Radioanalytical and nuclear analytical methods | 662 |
| 7.4.1 | Multidimensional gas chromatography | 548 | 8.6.1 | Activation analysis | 663 |
| 7.4.2 | Multidimensional supercritical fluid chromatography | 550 | 8.7 | Electroanalytical techniques | 666 |
| 7.4.3 | Multidimensional liquid chromatography | 550 | 8.7.1 | Potentiometric methods | 668 |
| 7.4.4 | Multidimensional thin-layer chromatography | 558 | 8.7.2 | Voltammetric methods | 669 |
| 7.5 | Multidimensional spectroscopy | 560 | 8.7.3 | Coulometric methods | 673 |
| 7.6 | Bibliography | 562 | 8.8 | Solid-state speciation analysis | 674 |
| 7.6.1 | General | 562 | 8.9 | Bibliography | 677 |
| 7.6.2 | Multihyphenation and multidimensionality | 563 | 8.9.1 | Sampling and sample preparation | 677 |
| 7.6.3 | Precolumn hyphenation | 563 | 8.9.2 | Atomic spectrometry | 677 |
| 7.6.4 | Postcolumn hyphenation | 563 | 8.9.3 | X-ray spectrometry | 678 |
| 7.6.5 | Multidimensional chromatography | 563 | 8.9.4 | Inorganic mass spectrometry | 678 |
| 7.6.6 | Multidimensional spectroscopy | 563 | 8.9.5 | Nuclear analytical methods | 679 |
| 7.7 | References | 564 | 8.9.6 | Trace-element analysis | 679 |
| | | | 8.9.7 | Electroanalysis | 679 |
| | | | 8.9.8 | Speciation analysis | 679 |
| | | | 8.10 | References | 679 |
| CHAPTER 8 | Inorganic and Element Analytical Methods | 585 | CHAPTER 9 | Direct Methods of Deformulation of Polymer/Additive Dissolutions | 691 |
| 8.1 | Element analytical protocols | 587 | 9.1 | Chromatographic methods | 692 |
| 8.1.1 | Element analytical pretreatment protocols | 588 | 9.1.1 | Size-exclusion chromatography | 693 |
| 8.1.2 | Elemental analysis methods | 589 | 9.2 | Spectroscopic techniques | 696 |
| 8.2 | Sample destruction for classical elemental analysis | 591 | 9.2.1 | Nuclear magnetic resonance spectroscopy | 696 |
| 8.2.1 | Combustion analysis | 593 | 9.3 | Mass-spectrometric methods | 701 |
| 8.2.2 | Wet matrix digestion | 597 | 9.3.1 | MALDI-MS analysis of polymer/additive dissolutions | 702 |
| 8.2.3 | Fusion methods | 604 | 9.4 | References | 709 |
| 8.3 | Analytical atomic spectrometry | 605 | CHAPTER 10 | A Vision for the Future | 711 |
| 8.3.1 | Atomic absorption spectrometry | 608 | 10.1 | Trends in polymer technology | 712 |
| 8.3.2 | Atomic emission spectrometry | 613 | 10.2 | Trends in additive technology | 715 |
| 8.3.3 | Atomic fluorescence spectrometry | 624 | 10.2.1 | Advances in additives | 717 |
| 8.3.4 | Direct spectrometric analysis of solid samples | 625 | 10.3 | Environmental, legislative and regulatory constraints | 723 |
| 8.4 | X-ray spectrometry | 627 | 10.3.1 | Trends in manufacturing, processing and formulation | 724 |
| 8.4.1 | X-ray fluorescence spectrometry | 628 | 10.4 | Analytical consequences | 725 |
| 8.4.2 | Particle-induced X-ray emission spectrometry | 639 | 10.4.1 | General analytical tool development | 728 |
| 8.4.3 | X-ray absorption spectrometry | 642 | 10.4.2 | Future trends in polymer/additive analysis | 729 |
| 8.4.4 | X-ray diffraction | 644 | 10.4.3 | Analytical challenges | 739 |
| 8.5 | Inorganic mass spectrometry | 648 | 10.4.4 | Polymer/additive analysis at the extremes | 740 |
| 8.5.1 | Spark-source mass spectrometry | 650 | | | |
| 8.5.2 | Glow-discharge mass spectrometry | 651 | | | |
| 8.5.3 | Inductively coupled plasma-mass spectrometry | 652 | | | |
| 8.5.4 | Isotope dilution mass spectrometry | 659 | | | |
