

SERVICE DESIGN
FOR

SIX SIGMA

A ROADMAP
FOR EXCELLENCE

BASEM EL-HAIK AND DAVID M. ROY

CONTENTS

1. Service Design	1
1.1 Introduction	1
1.2 What is Quality?	2
1.3 Quality Operating System and Service Life Cycle	4
1.3.1 Stage 1: Idea Creation	4
1.3.2 Stage 2: Voice of the Customer and Business	4
1.3.3 Stage 3: Concept Development	5
1.3.4 Stage 4: Preliminary Design	6
1.3.5 Stage 5: Design Optimization	7
1.3.6 Stage 6: Verification	7
1.3.7 Stage 7: Launch Readiness	7
1.3.8 Stage 8: Production	8
1.3.9 Stage 9: Service Consumption	8
1.3.10 Stage 10: Phase-Out	8
1.3.11 Service Life Cycle and Quality Operating System	8
1.4 Developments of Quality in Service	8
1.4.1 Statistical Analysis and Control	11
1.4.2 Root Cause Analysis	11
1.4.3 Total Quality Management/Control Analysis	12
1.4.4 Design Quality	12
1.4.5 Process Simplification	13
1.4.6 Six Sigma and Design For Six Sigma (DFSS)	13
1.5 Business Excellence: A Value Proposition?	14
1.5.1 Business Operation Model	14
1.5.2 Quality and Cost	15
1.5.3 Quality and Time to Market	16
1.6 Introduction to the Supply Chain	16
1.7 Summary	17

2. What Is Six Sigma	19
2.1 Introduction	19
2.2 What Is Six Sigma?	19
2.3 Introduction to Process Modeling	20
2.3.1 Process Mapping	20
2.3.2 Value Stream Mapping	21
2.4 Introduction to Business Process Management	22
2.5 Measurement Systems Analysis	24
2.6 Process Capability and Six Sigma Process Performance	25
2.6.1 Motorola's Six Sigma Quality	26
2.7 Overview of Six Sigma Improvement (DMAIC)	28
2.7.1 Phase 1: Define	29
2.7.2 Phase 2: Measure	29
2.7.3 Phase 3: Analyze	29
2.7.4 Phase 4: Improve	30
2.7.5 Phase 5: Control	30
2.8 Six Sigma Goes Upstream—Design For Six Sigma	30
2.9 Summary	31
3. Introduction to Service Design for Six Sigma (DFSS)	33
3.1 Introduction	33
3.2 Why Use Service Design for Six Sigma?	34
3.3 What Is Service Design For Six Sigma?	37
3.4 Service DFSS: The ICOV Process	39
3.5 Service DFSS: The ICOV Process In Service Development	41
3.6 Other DFSS Approaches	42
3.7 Summary	43
4. Service Design for Six Sigma Deployment	45
4.1 Introduction	45
4.2 Service Six Sigma Deployment	45
4.3 Service Six Sigma Deployment Phases	46
4.3.1 Predeployment	46
4.3.2 Predeployment considerations	48
4.3.3 Deployment	66
4.3.3.1 Training	67
4.3.3.2 Six Sigma Project Financial Aspects	68
4.3.4 Postdeployment Phase	69
4.3.4.1 DFSS Sustainability Factors	70
4.4 Black Belt and DFSS Team: Cultural Change	72
5. Service DFSS Project Road Map	77
5.1 Introduction	77
5.2 The Service Design For Six Sigma Team	79
5.3 Service Design For Six Sigma Road Map	81

5.3.1	Service DFSS Phase I: Identify Requirements	83
5.3.1.1	Identify Phase Road Map	84
5.3.1.2	Service Company Growth & Innovation Strategy: Multigeneration Planning	85
5.3.1.3	Research Customer Activities	86
5.3.2	Service DFSS Phase 2: Characterize Design	86
5.3.3	Service DFSS Phase 3: Optimize Phase	89
5.3.4	Service DFSS Phase 4: Validate Phase	90
5.4	Summary	92
6.	Service DFSS Transfer Function and Scorecards	93
6.1	Introduction	93
6.2	Design mappings	94
6.2.1	Functional Mapping	95
6.2.2	Process Mapping	96
6.2.3	Design Mapping Steps	96
6.3	Design Scorecards and Transfer Function	97
6.3.1	DFSS Scorecard Development	98
6.3.2	Transfer Function Life Cycle	99
6.4	Transfer Function	102
6.5	Transfer Functions and Optimization	105
6.6	Monte Carlo Simulation	107
6.7	Summary	109
7.	Quality Function Deployment (QFD)	111
7.1	Introduction	111
7.2	History of QFD	112
7.3	QFD Overview	113
7.4	QFD Methodology	113
7.5	HOQ Evaluation	116
7.6	HOQ 1—"The Customer's House"	117
7.7	Kano Model	118
7.8	QFD HOQ 2—"Translation House"	121
7.9	QFD HOQ 3—"Design House"	122
7.10	QFD HOQ 4—"Process House"	122
7.11	QFD Example	122
7.11.1	HOQ 1	123
7.11.2	HOQ 2	126
7.11.3	HOQ 3	127
7.11.4	HOQ 4	134
7.12	Summary	140
8.	Process Modeling and Process Management	141
8.1	Introduction	141
8.2	Process Modeling Techniques	142

8.2.1	SIPOC	142
8.2.2	Process Mapping	142
8.2.3	Value Stream Mapping	148
8.2.3.1	Value Stream Mapping Process Steps	150
8.3	Business Process Management System (BPMS)	155
8.3.1	What is BPMS?	155
8.3.2	How is BPMS Implemented?	156
8.4	Relationship of Process Modeling to Discrete Event Simulation	156
8.5	Functional Mapping	158
8.5.1	Value Analysis/Engineering FAST Technique	159
8.5.2	Axiomatic Method	164
8.5.2.1	Axiomatic Design Software (ftp://ftp-wiley.com/public/sci_tech_med/six_sigma)	170
8.5.2.2	Axiomatic Design Mapping Example	171
8.6	Pugh Concept Selection	177
8.7	Summary	181
Appendix 8.A:	IDEF Mapping Technique	181
8.A.1	IDEF0 Technique	183
Appendix 8.B:	Matrix Review	187
9.	Theory of Inventive Problem Solving (TRIZ) for Service	189
9.1	Introduction	189
9.2	TRIZ History	189
9.3	TRIZ Foundations	191
9.3.1	Overview	191
9.3.2	Analytical Tools	195
9.3.3	Knowledge-Base Tools	195
9.4	TRIZ Problem Solving Flowchart	200
9.5	Ideal Final Result	201
9.5.1	Itself	202
9.5.2	Ideality Checklist	202
9.5.3	Ideality Equation	203
9.6	Build Sufficient Functions	203
9.7	Harmful Function Elimination	203
9.8	Inventive Principles	205
9.9	Detection and Measurement	211
9.10	TRIZ Root Cause Analysis	211
9.11	Evolutionary Trends of Technological Systems	212
9.12	Transitions from TRIZ Examples	215
9.13	Summary	216
Appendix 9.A		218
10.	Introduction to Design For Transactional DFX	223
10.1	Introduction	223
10.2	History and Evolution	224

10.3	Design for X for Transactional Processes	227
10.3.1	Design for Product Service (DFPS)	227
10.4	Design for Processability and Assembly	230
10.4.1	The DFMA Approach	233
10.5	Design for Testability and Inspectability	236
10.6	Summary	240
11.	Failure Mode and Effect Analysis (FMEA)	241
11.1	Introduction	241
11.2	FMEA Fundamentals	243
11.3	Service Design FMEA (DFMEA)	249
11.4	Process FMEA (PFMEA)	257
11.5	FMEA Interfaces with Other Tools	258
11.5.1	Cause-and-Effect Tools	259
11.5.2	Quality Systems and Control Plans	259
12	Fundamentals of Experimental Design	263
12.1	Introduction	263
12.2	Hypothesis Testing	266
12.3	Classical DOE Basics	269
12.3.1	DOE Study Definition	270
12.3.2	Selection of the Response	271
12.3.3	Choice of DOE Factors, Levels, and Ranges	272
12.3.4	Select DOE Strategy	273
12.3.5	Develop a Measurement Strategy for DOE	274
12.3.6	Experimental Design Selection	275
12.3.7	Conduct the Experiment	276
12.3.8	Analysis of DOE Raw Data	277
12.3.9	Conclusions and Recommendations	278
12.4	Factorial Experiment	279
12.5	Mathematical Transfer Function Models	280
12.6	What is Interaction?	280
12.7	<i>ANalysis Of VAriance (ANOVA)</i>	283
12.7.1	ANOVA Steps For Two factors Completely Randomized Experiment	284
12.8	Full 2^k Factorial Designs	289
12.8.1	Full 2^k Factorial Design Layout	290
12.8.2	2^k Data Analysis	291
12.8.3	The 2^3 Design	297
12.8.4	The 2^3 Design with Center Points	299
12.9	Fractional Factorial Designs	300
12.9.1	The 2^{3-1} Design	301
12.9.2	Half Fractional 2^k Design	302
12.9.3	Design Resolution	303
12.9.4	Quarter Fraction of 2^k Design	304

12.10	Other Factorial Designs	309
12.10.1	Three-Level Factorial design	309
12.10.2	Box–Behnken Designs	310
12.11	Summary	310
	Appendix	311
13	Service Design Robustness	313
13.1	Introduction	313
13.2	Robustness Overview	314
13.3	Robustness Concept #1: Quality Loss Function	315
13.3.1	Larger-the-Better Loss Function	317
13.3.2	Smaller-the-Better Loss Function	318
13.4	Robustness Concept #2: Signal, Noise and Control Factors	319
13.5	Robustness Concept #3: Signal-to-Noise Ratios	319
13.6	Robustness Concept #4: The Accumulation Analysis	321
13.6.1	Accumulation Analysis Example	321
13.7	Robustness Concept #5: Orthogonal Arrays	325
13.8	Robustness Concept #6: Parameter Design Analysis	327
13.9	Summary	329
14	Discrete Event Simulation	331
14.1	Introduction	331
14.2	System Modeling	332
14.2.1	System Concept	332
14.2.2	Modeling Concept	334
14.2.3	Types of Models	335
14.3	System Modeling With Discrete Event Simulation (DES)	337
14.3.1	System Structure	338
14.3.2	System Layout	339
14.3.3	System Data	339
14.3.4	System Logic	341
14.3.5	System Statistics	341
14.4	Elements of Discrete Event Simulation	342
14.4.1	System Entities	342
14.4.2	System State	343
14.4.3	State Variables	343
14.4.4	System Events	344
14.4.5	System Activities	345
14.4.6	System Resources	346
14.4.7	System Delay	348
14.4.8	System Logic	348
14.5	DES Mechanisms	348
14.5.1	Discrete-Event Mechanism	350
14.5.2	Time-Advancement Mechanism	351
14.5.3	Random Sampling Mechanism	352

14.5.4	Statistical Accumulation Mechanism	353
14.5.5	Animation Mechanism	354
14.6	Manual Simulation Example	355
14.7	Variability in Simulation Outputs	360
14.7.1.	Variance Reduction Techniques	361
14.8	Service Processes Simulation Implications	363
14.9	Summary	364
15	Design Validation	365
15.1	Introduction	365
15.2	Design Validation Steps	365
15.3	Prototype Building	367
15.4	Testing	368
15.5	Confidence Interval of Small Sample Validation	370
15.6	Control Plans and Statistical Process Control	370
15.7	Statistical Process Control	371
15.7.1	Choosing the Control Chart	373
15.7.2	Interpreting the Control Chart	375
15.7.3	Taking Action	376
15.8	Process Capability	376
15.9	Summary	377
16	Supply Chain Process	379
16.1	Introduction	379
16.2	Supply Chain Definition	379
16.2.1	Demand Forecasting	380
16.2.2	Planning and Scheduling	380
16.2.3	Strategic Sourcing	380
16.2.4	Processing	380
16.2.5	Asset and Inventory Management	381
16.2.6	Distribution and Logistics	381
16.2.7	Postservice Support	381
16.3	Summary	381
17	DFSS in the Supply Chain	383
17.1	Introduction	383
17.2	The Process	383
17.3	Stage 1—Idea Creation	383
17.4	Stage 2—Voice of the Customer and the Business	385
17.4.1	Voices	385
17.4.2	Risk Assessment	386
17.5	Stage 3—Concept Design	389
17.5.1	Concept Development	395

xiv **CONTENTS**

17.6	Stage 4—Preliminary Design	399
17.7	Stage 5—Design Optimization	403
17.8	Stage 6—Verification	405
17.9	Stage 7—Launch Readiness	406
17.10	Production	406
17.11	Summary	407
