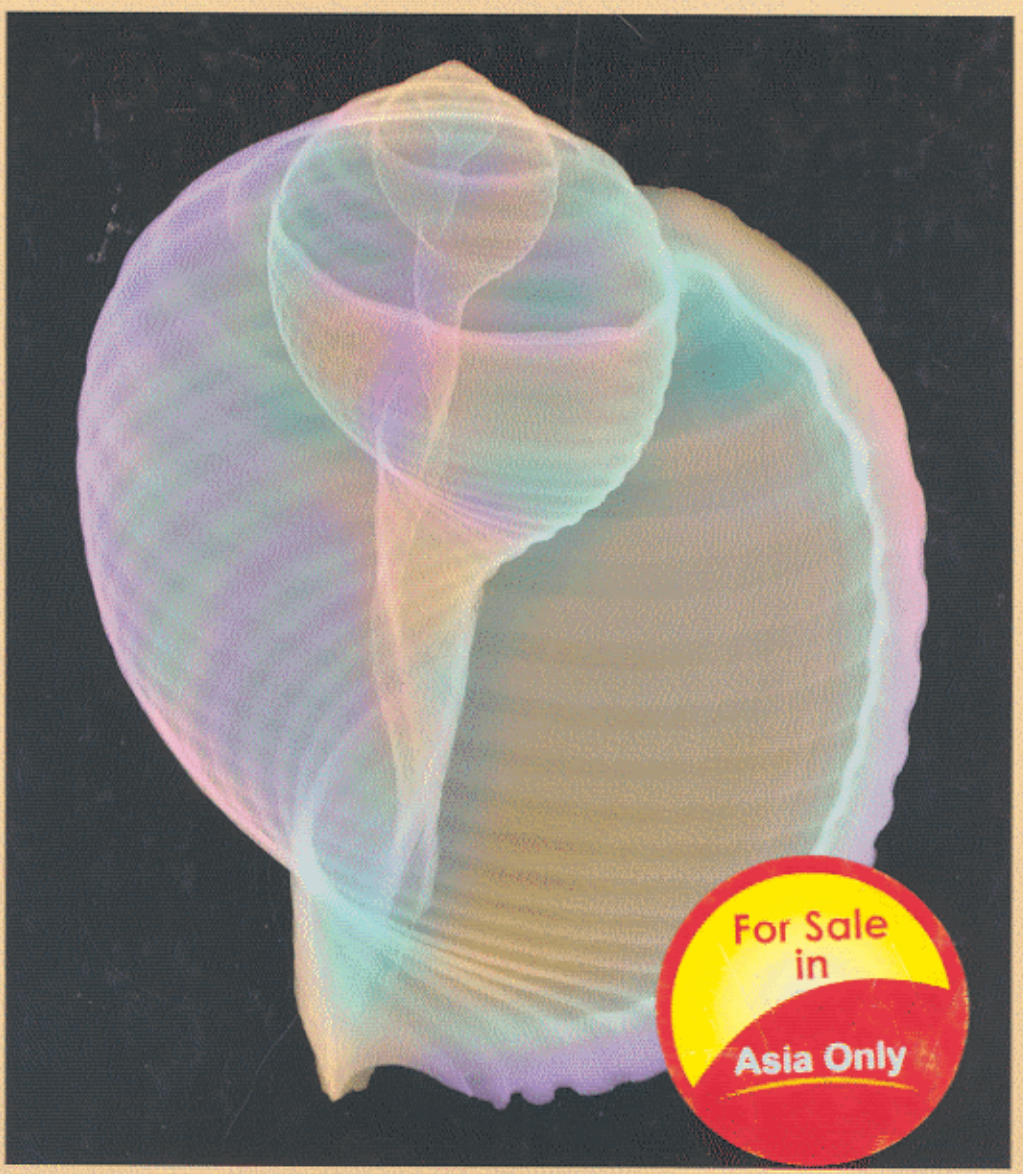
Introduction to Mathematical Statistics

Sixth Edition



Hogg · McKean · Craig

Contents

Preface **xi**

1 Probability and Distributions **1**
1.1 Introduction 1
1.2 Set Theory 3
1.3 The Probability Set Function 11
1.4 Conditional Probability and Independence 22
1.5 Random Variables 33
1.6 Discrete Random Variables 41
1.6.1 Transformations 43
1.7 Continuous Random Variables 45
1.7.1 Transformations 47
1.8 Expectation of a Random Variable 53
1.9 Some Special Expectations 59
1.10 Important Inequalities 68

2 Multivariate Distributions **73**
2.1 Distributions of Two Random Variables 73
2.1.1 Expectation 79
2.2 Transformations: Bivariate Random Variables 84
2.3 Conditional Distributions and Expectations 93
2.4 The Correlation Coefficient 101
2.5 Independent Random Variables 108
2.6 Extension to Several Random Variables 115
2.6.1 *Variance-Covariance 121
2.7 Transformations: Random Vectors 124

3 Some Special Distributions **133**
3.1 The Binomial and Related Distributions 133
3.2 The Poisson Distribution 143
3.3 The Γ, χ^2, and β Distributions 149
3.4 The Normal Distribution 160
3.4.1 Contaminated Normals 167
3.5 The Multivariate Normal Distribution 171

3.5.1 *Applications . . . 177
3.6 t and F-Distributions . . . 182
3.6.1 The t-distribution . . . 182
3.6.2 The F-distribution . . . 184
3.6.3 Student's Theorem . . . 186
3.7 Mixture Distributions . . . 189

4 Unbiasedness, Consistency, and Limiting Distributions 197
4.1 Expectations of Functions . . . 198
4.2 Convergence in Probability . . . 203
4.3 Convergence in Distribution . . . 207
4.3.1 Bounded in Probability . . . 213
4.3.2 Δ-Method . . . 214
4.3.3 Moment Generating Function Technique . . . 216
4.4 Central Limit Theorem . . . 220
4.5 *Asymptotics for Multivariate Distributions . . . 226

5 Some Elementary Statistical Inferences 233
5.1 Sampling and Statistics . . . 233
5.2 Order Statistics . . . 238
5.2.1 Quantiles . . . 242
5.2.2 Confidence Intervals of Quantiles . . . 245
5.3 *Tolerance Limits for Distributions . . . 250
5.4 More on Confidence Intervals . . . 254
5.4.1 Confidence Intervals for Differences in Means . . . 257
5.4.2 Confidence Interval for Difference in Proportions . . . 260
5.5 Introduction to Hypothesis Testing . . . 263
5.6 Additional Comments About Statistical Tests . . . 272
5.7 Chi-Square Tests . . . 278
5.8 The Method of Monte Carlo . . . 286
5.8.1 Accept-Reject Generation Algorithm . . . 292
5.9 Bootstrap Procedures . . . 297
5.9.1 Percentile Bootstrap Confidence Intervals . . . 297
5.9.2 Bootstrap Testing Procedures . . . 301

6 Maximum Likelihood Methods 311
6.1 Maximum Likelihood Estimation . . . 311
6.2 Rao-Cramér Lower Bound and Efficiency . . . 319
6.3 Maximum Likelihood Tests . . . 333
6.4 Multiparameter Case: Estimation . . . 342
6.5 Multiparameter Case: Testing . . . 351
6.6 The EM Algorithm . . . 359

7 Sufficiency **367**
7.1 Measures of Quality of Estimators 367
7.2 A Sufficient Statistic for a Parameter 373
7.3 Properties of a Sufficient Statistic 380
7.4 Completeness and Uniqueness 385
7.5 The Exponential Class of Distributions 389
7.6 Functions of a Parameter 394
7.7 The Case of Several Parameters 398
7.8 Minimal Sufficiency and Ancillary Statistics 406
7.9 Sufficiency, Completeness and Independence 411

8 Optimal Tests of Hypotheses **419**
8.1 Most Powerful Tests 419
8.2 Uniformly Most Powerful Tests 429
8.3 Likelihood Ratio Tests 437
8.4 The Sequential Probability Ratio Test 448
8.5 Minimax and Classification Procedures 455
8.5.1 Minimax Procedures 456
8.5.2 Classification 458

9 Inferences about Normal Models **463**
9.1 Quadratic Forms 463
9.2 One-way ANOVA 468
9.3 Noncentral χ^2 and F Distributions 475
9.4 Multiple Comparisons 477
9.5 The Analysis of Variance 482
9.6 A Regression Problem 488
9.7 A Test of Independence 498
9.8 The Distributions of Certain Quadratic Forms 501
9.9 The Independence of Certain Quadratic Forms 508

10 Nonparametric Statistics **515**
10.1 Location Models 515
10.2 Sample Median and Sign Test 518
10.2.1 Asymptotic Relative Efficiency 523
10.2.2 Estimating Equations Based on Sign Test 528
10.2.3 Confidence Interval for the Median 529
10.3 Signed-Rank Wilcoxon 531
10.3.1 Asymptotic Relative Efficiency 536
10.3.2 Estimating Equations Based on Signed-rank Wilcoxon 539
10.3.3 Confidence Interval for the Median 539
10.4 Mann-Whitney-Wilcoxon Procedure 541
10.4.1 Asymptotic Relative Efficiency 545
10.4.2 Estimating Equations Based on the Mann-Whitney-Wilcoxon 547
10.4.3 Confidence Interval for the Shift Parameter Δ 547
10.5 General Rank Scores 549

10.5.1 Efficacy . . . 552
10.5.2 Estimating Equations Based on General Scores . . . 553
10.5.3 Optimization: Best Estimates . . . 554
10.6 Adaptive Procedures . . . 561
10.7 Simple Linear Model . . . 565
10.8 Measures of Association . . . 570
10.8.1 Kendall's τ . . . 571
10.8.2 Spearman's Rho . . . 574

11 Bayesian Statistics **579**
11.1 Subjective Probability . . . 579
11.2 Bayesian Procedures . . . 582
11.2.1 Prior and Posterior Distributions . . . 583
11.2.2 Bayesian Point Estimation . . . 586
11.2.3 Bayesian Interval Estimation . . . 589
11.2.4 Bayesian Testing Procedures . . . 590
11.2.5 Bayesian Sequential Procedures . . . 592
11.3 More Bayesian Terminology and Ideas . . . 593
11.4 Gibbs Sampler . . . 600
11.5 Modern Bayesian Methods . . . 606
11.5.1 Empirical Bayes . . . 610

12 Linear Models **615**
12.1 Robust Concepts . . . 615
12.1.1 Norms and Estimating Equations . . . 616
12.1.2 Influence Functions . . . 617
12.1.3 Breakdown Point of an Estimator . . . 621
12.2 LS and Wilcoxon Estimators of Slope . . . 624
12.2.1 Norms and Estimating Equations . . . 625
12.2.2 Influence Functions . . . 626
12.2.3 Intercept . . . 629
12.3 LS Estimation for Linear Models . . . 631
12.3.1 Least Squares . . . 633
12.3.2 Basics of LS Inference under Normal Errors . . . 635
12.4 Wilcoxon Estimation for Linear Models . . . 640
12.4.1 Norms and Estimating Equations . . . 641
12.4.2 Influence Functions . . . 641
12.4.3 Asymptotic Distribution Theory . . . 643
12.4.4 Estimates of the Intercept Parameter . . . 645
12.5 Tests of General Linear Hypotheses . . . 647
12.5.1 Distribution Theory for the LS Test for Normal Errors . . . 650
12.5.2 Asymptotic Results . . . 651
12.5.3 Examples . . . 652

A Mathematics 661
A.1 Regularity Conditions 661
A.2 Sequences 662

B R and S-PLUS Functions 665

C Tables of Distributions 671

D References 679

E Answers to Selected Exercises 683

Index 693
