<i>Table of Figures</i>	<i>ix</i>
<i>Table of Tables</i>	<i>xv</i>
<i>Introduction</i>	<i>1</i>
Chapter 1: The Environment of Plants	5
1. THE BIOTOPES	5
1.1. The atmosphere	5
1.2. The hydrosphere	8
1.3. The lithosphere	9
2. AQUATIC ENVIRONMENTS	10
2.1. Introduction	10
2.2. Photosynthesis in the aquatic environment	11
3. SOILS	15
3.1. Physicochemical properties of soils	16
3.2. Hygrometry of soils	19
3.3. pH and ions	19
4. REACTIONS OF PLANTS TO BIOTOPES	19
4.1. General characters vis-à-vis various parameters	19
4.2. Plants in normally extreme situations or exceptionally abnormal situations	24
5. THE BIOTIC ENVIRONMENT	31
5.1. Introduction	31
5.2. The environment of animals	32
5.3. The role of microorganisms	38
5.4. Effects of other plants	39
Chapter 2: Photosynthesis and Plant Production	41
1. INTRODUCTION	41
2. PHOTOSYNTHESIS WITH TWO PHOTOSYSTEMS	42
2.1. Introduction	42
2.2. Photochemical reactions	43
2.3. Movement of electrons	45
2.4. Biochemical reactions	47
2.5. Photosynthesis integrated with plant physiology: source-sink relationships	59

3. MAJOR FACTORS OF THE BIOTOPE ACTING ON PHOTOSYNTHESIS	65
3.1. Light	65
3.2. Photosynthesis and temperature	68
3.3. Photosynthesis and mineral nutrition	72
3.4. Photosynthesis and pH	80
4. INPUTS OF FLUORIMETRY	84
4.1. Analysis of rapid kinetics of fluorescence in modulated light	84
4.2. Application to the study of photoinhibition	98
4.3. Conclusions	99
5. RESPIRATION OF HIGHER PLANTS AND ITS RELATIONSHIP TO PHOTOSYNTHESIS	99
5.1. Introduction	99
5.2. Routes and controls of respiration	99
5.3. Conclusions	99
6. OVERALL PRODUCTIVITY ON THE ECOSYSTEM SCALE	109
 Chapter 3: Hydro-mineral Equilibrium	 112
1. PLANTS AND WATER	112
1.1. Introduction	112
1.2. Water that enters	114
1.3. Water that circulates	117
1.4. Water that is lost	119
1.5. Hydric equilibrium of the entire plant	127
2. MINERAL SUPPLY	134
2.1. Introduction	134
2.2. Absorption of mineral ions by plant cells	134
2.3. Absorption by roots	136
2.4. Mineral content and use of minerals by plants	139
2.5. Mineral quality of soils and plant distribution	141
3. RESULTS: DIVERSITY OF POLICIES FOR WATER MANAGEMENT DEPENDING ON SPECIES AND HABITATS	141
3.1. Introduction	141
3.2. Ligneous organisms	143
3.3. Herbaceous plants	146
 Chapter 4: Ecophysiology of Development	 150
1. INTRODUCTION	150
2. EXTERNAL FACTORS AND HORMONES IN REGULATION OF DEVELOPMENT	151
2.1. Role of light	152
2.2. The role of temperature	156
2.3. Hormones and growth regulation	160

3. DEVELOPMENT AFTER GERMINATION	163
3.1. Period of vegetative growth	163
3.2. Development during reproductive phase	164
4. SENESCENCE AND RECYCLING PHASE	168
5. SEASONAL AND MULTI-ANNUAL VARIATIONS OF DEVELOPMENT	172
5.1. Phenology	172
Chapter 5: Plants under Stress	178
1. DEFINITION	178
2. WHAT HAPPENS DURING STRESS?	180
2.1. A sequence of events	180
2.2. Evaluation of stress	180
3. THE EFFECTS OF STRESS AND ITS MANAGEMENT	185
3.1. Diversity, rhythmicity, risks, degrees of response during the plant's life	185
3.2. Cost of stress management	186
3.3. Interactions of factors and physiology	186
3.4. What solutions does the plant find?	188
4. STRESS IN PRACTICE	193
4.1. Introduction	193
4.2. Constraints and responses	193
4.3. Constraints and responses due to the biotope	194
5. STRESS CAUSED BY OTHER LIVING THINGS	242
5.1. Introduction	242
5.2. Plant-plant interaction	243
5.3. Plant-animal interactions	248
5.4. Complex interactions at the ecosystem level and incidences of evolution	255
5.5. Cost of defence for the plant	259
5.6. Mechanisms of biotic interactions	260
CONCLUSION	271
BIBLIOGRAPHY	273
INDEX	291
