

# Manufacturing Planning and Control for Supply Chain Management

Fifth Edition

**Vollmann / Berry / Whybark / Jacobs**

McGraw-Hill INTERNATIONAL EDITION

# Table of Contents

---

**Preface** xiv

**Acknowledgments** xxi

## **Chapter 1**

### **Manufacturing Planning and Control** 1

The Context for MPC 2

*Internationalization* 2

*The Role of the Customer* 3

*Increasing Use of Information Technology* 3

The MPC System Defined 4

*Typical MPC Support Activities* 4

*Costs and Benefits of MPC Systems* 5

An MPC System Framework 7

*MPC System Activities* 7

Matching the MPC System with the Needs  
of the Firm 9

*An MPC Classification Schema* 10

Evolution of the MPC System 11

*The Changing Competitive World* 12

*Reacting to the Changes* 12

Concluding Principles 13

References 13

Discussion Questions 16

## **Chapter 2**

### **Demand Management** 17

Demand Management in MPC Systems 18

Demand Management and the MPC

Environment 20

*The Make-to-Stock (MTS) Environment* 21

*The Assemble-to-Order (ATO) Environment* 22

*The Make (Engineer)-to-Order (MTO)*

*Environment* 23

Communicating with Other MPC Modules  
and Customers 24

*Sales and Operations Planning* 24

*Master Production Scheduling* 25

*Dealing with Customers on a Day-to-Day Basis* 26

Information Use in Demand Management 27

*Make-to-Knowledge* 27

*Data Capture and Monitoring* 28

*Customer Relationship Management* 28

*Outbound Product Flow* 29

Providing Appropriate Forecast Information 29

*A Forecasting Framework* 29

*Forecasting for Strategic Business Planning* 30

*Forecasting for Sales and Operations Planning* 31

*Forecasting for Master Production Scheduling  
and Control* 31

Producing and Evaluating Detailed Forecasts 32

*Moving-Average Forecasting* 32

*Exponential Smoothing Forecasting* 34

*Evaluating Forecasts* 36

Using the Forecasts 39

*Considerations for Aggregating Forecasts* 39

*Pyramid Forecasting* 40

*Incorporating External Information* 42

Managing Demand 43

*Organizing for Demand Management* 43

*Monitoring the Demand Management Systems* 44

*Balancing Supply and Demand* 45

Company Examples 45

*Configuration Management at Dell Computer  
Corporation* 45

*Forecasting at Ross Products* 47

*Customer Order Promising at Kirk Motors, Ltd.* 48

Concluding Principles 51

References 52

Discussion Questions 54

Problems 54

## **Chapter 3**

### **Sales and Operations Planning** 60

Sales and Operations Planning in the Firm 60

*Sales and Operations Planning Fundamentals* 61

*Sales and Operations Planning and  
Management* 62

<i>Operations Planning and MPC Systems</i>	63
<i>Payoffs</i>	65
The Sales and Operations Planning Process	66
<i>The Monthly Sales and Operations Planning Process</i>	66
<i>Sales and Operations Planning Displays</i>	68
<i>Modifying the Sales and Operations Plan</i>	70
<i>The Basic Trade-offs</i>	72
<i>Evaluating Alternatives</i>	74
The New Management Obligations	77
<i>Top Management Role</i>	77
<i>Functional Roles</i>	77
<i>Integrating Strategic Planning</i>	80
<i>Controlling the Operations Plan</i>	81
Operating with Sales and Operations Planning	82
<i>Sales and Operations Planning at Compugraphic</i>	82
<i>Delta Manufacturing Company's Integrated Sales and Operations Planning Process</i>	85
<i>Hill-Rom's Use of Planning Bills of Materials</i>	96
Concluding Principles	97
References	98
Discussion Questions	98
Problems	99

## Chapter 4

### Enterprise Resource Planning (ERP)—Integrated Systems 108

What Is ERP?	109
<i>Consistent Numbers</i>	109
<i>Software Imperatives</i>	110
<i>Routine Decision Making</i>	110
<i>Choosing ERP Software</i>	111
How ERP Connects the Functional Units	111
<i>Finance</i>	112
<i>Manufacturing and Logistics</i>	112
<i>Sales and Marketing</i>	113
<i>Human Resources</i>	113
<i>Customized Software</i>	113
<i>Data Integration</i>	113
How Manufacturing Planning and Control (MPC)	
<i>Fits within ERP</i>	114
<i>Simplified Example</i>	115
<i>Supply Chain Planning with mySAP SCM</i>	116
<i>Supply Chain Execution with mySAP SCM</i>	116

<i>Supply Chain Collaboration with mySAP SCM</i>	117
<i>Supply Chain Coordination with mySAP SCM</i>	117
What Performance Metrics Evaluate ERP System Effectiveness?	118
<i>The "Functional Silo" Approach</i>	118
<i>Integrated Supply Chain Metrics</i>	119
<i>Calculating the Cash-to-Cash Time</i>	121
What Is the Experience with ERP?	123
<i>Eli Lilly and Company—Operational Standards for Manufacturing Excellence</i>	123
<i>The Journey at "United Computer"</i>	126
<i>Lessons Learned at Scotts</i>	129
Concluding Principles	130
References	130
Discussion Questions	131
Problems	131

## Chapter 5

### Supply Chain Inventory Management—Independent-Demand Items 133

Basic Concepts	134
<i>Independent- versus Dependent-Demand Items</i>	134
<i>Functions of Inventory</i>	134
Management Issues	136
<i>Routine Inventory Decisions</i>	136
<i>Determining Inventory System Performance</i>	137
<i>Implementing Changes in Managing Inventory</i>	137
Inventory-Related Costs	138
<i>Order Preparation Costs</i>	138
<i>Inventory Carrying Costs</i>	138
<i>Shortage and Customer Service Costs</i>	139
<i>Incremental Inventory Costs</i>	139
<i>An Example Cost Trade-off</i>	140
Economic Order Quantity Model	141
<i>Determining the EOQ</i>	141
Order Timing Decisions	143
<i>Using Safety Stock for Uncertainty</i>	143
<i>The Introduction of Safety Stock</i>	144
<i>Continuous Distributions</i>	146
<i>Probability of Stocking out Criterion</i>	147
<i>Customer Service Criterion</i>	148
<i>Time Period Correction Factor</i>	149
<i>Forecast Error Distribution</i>	151
<i>Order Quantity and Reorder Point Interactions</i>	152

<i>Service Levels and Order Quantities</i>	152
<i>Total Cost Criterion</i>	154
<i>The Iterative Q, R Procedure</i>	156
<b>Multi-Item Management</b>	157
<i>Single-Criterion ABC Analysis</i>	157
<i>Multiple-Criteria ABC Analysis</i>	157
<b>Concluding Principles</b>	162
<b>References</b>	162
<b>Discussion Questions</b>	163
<b>Problems</b>	164

## Chapter 6

### Master Production Scheduling 168

<b>The Master Production Scheduling Activity</b>	169
<i>The MPS Is a Statement of Future Output</i>	169
<i>The Business Environment for the MPS</i>	170
<i>Linkages to Other Company Activities</i>	171
<b>Master Production Scheduling Techniques</b>	173
<i>The Time-Phased Record</i>	173
<i>Rolling through Time</i>	175
<i>Order Promising</i>	176
<i>Consuming the Forecast</i>	179
<i>Mitel Corporation: Order Promising with ATP</i>	181
<b>Bill of Materials Structuring for the MPS</b>	183
<i>Key Definitions</i>	183
<i>The Modular Bill of Materials</i>	184
<i>The Planning Bill of Materials</i>	186
<b>The Final Assembly Schedule</b>	188
<i>Relation to the MPS</i>	188
<i>The Hill-Rom FAS</i>	189
<b>The Master Production Scheduler</b>	192
<i>The MPS as a Set of Firm Planned Orders</i>	192
<i>The Job</i>	192
<b>Company Examples</b>	195
<i>The Ethan Allen Master Production Schedule</i>	195
<i>Master Production Scheduling at Jet Spray</i>	197
<b>Master Production Schedule Stability</b>	200
<i>Ethan Allen Stability</i>	200
<i>Freezing and Time Fencing</i>	201
<b>Managing the MPS</b>	202
<i>The Overstated MPS</i>	202
<i>MPS Measures</i>	203
<i>Monitoring the MPS at Ethan Allen</i>	203
<b>Concluding Principles</b>	206
<b>References</b>	206

<b>Discussion Questions</b>	208
<b>Problems</b>	208

## Chapter 7

### Material Requirements Planning 222

<b>Material Requirements Planning in Manufacturing Planning and Control</b>	223
<b>Record Processing</b>	224
<i>The Basic MRP Record</i>	224
<i>Linking the MRP Records</i>	232
<b>Technical Issues</b>	235
<i>Processing Frequency</i>	235
<i>Bucketless Systems</i>	236
<i>Lot Sizing</i>	236
<i>Safety Stock and Safety Lead Time</i>	237
<i>Low-Level Coding</i>	238
<i>Pegging</i>	238
<i>Firm Planned Orders</i>	238
<i>Service Parts</i>	239
<i>Planning Horizon</i>	239
<i>Scheduled Receipts versus Planned Order Releases</i>	240
<b>Using the MRP System</b>	240
<i>The MRP Planner</i>	240
<i>Exception Codes</i>	242
<i>Bottom-up Replanning</i>	243
<i>An MRP System Output</i>	245
<b>System Dynamics</b>	245
<i>Transactions During a Period</i>	246
<i>Rescheduling</i>	247
<i>Complex Transaction Processing</i>	247
<i>Procedural Inadequacies</i>	248
<b>Concluding Principles</b>	249
<b>References</b>	250
<b>Discussion Questions</b>	250
<b>Problems</b>	250

## Chapter 8

### Distribution Requirements Planning 260

<b>Distribution Requirements Planning in the Supply Chain</b>	261
<i>DRP and the MPC System Linkages</i>	261
<i>DRP and the Marketplace</i>	263
<i>DRP and Demand Management</i>	264
<i>DRP and Master Production Scheduling</i>	265

**DRP Techniques 265**

- The Basic DRP Record* 266
- Time-Phased Order Point (TPOP)* 267
- Linking Several Warehouse Records* 268
- Managing Day-to-Day Variations from Plan* 270
- Safety Stock in DRP* 275
- Management Issues with DRP 276**
  - Data Integrity and Completeness* 277
  - Organizational Support* 278
  - Problem Solving* 279
- Company Example 282**
- Concluding Principles 288**
- References 288**
- Discussion Questions 289**
- Problems 290**

**Chapter 9**

**Just-in-Time 300**

- JIT in Manufacturing Planning and Control 301**
  - Major Elements of Just-in-Time* 301
  - JIT's Impact on Manufacturing Planning and Control* 303
  - The Hidden Factory* 304
  - JIT Building Blocks in MPC* 305
- A JIT Example 307**
  - Leveling the Production* 307
  - Pull System Introduction* 309
  - Product Design* 313
  - Process Design* 313
  - Bill of Materials Implications* 314
- JIT Applications 316**
  - Single-Card Kanban* 316
  - Toyota* 317
  - Hewlett-Packard* 319
- Nonrepetitive JIT 321**
  - A Service-Enhanced View of Manufacturing* 321
  - Flexible Systems* 321
  - Simplified Systems and Routine Execution* 322
- Joint-Firm JIT 322**
  - The Basics* 323
  - Tightly Coupled JIT Supply* 324
  - Less Tightly Coupled JIT Supply* 324
  - "JIT" Coordination through Hubs* 325
  - Lessons* 325

**JIT Software 325**

- The MRP-JIT Separation* 326
- JIT Planning and Execution* 326
- An Example* 327
- JIT Execution with SAP Software* 327
- Managerial Implications 328**
  - Information System Implications* 328
  - Manufacturing Planning and Control* 328
  - Scorekeeping* 328
  - Pros and Cons* 329
- Concluding Principles 330**
- References 330**
- Discussion Questions 331**
- Problems 331**

**Chapter 10**

**Capacity Planning and Utilization 336**

- The Role of Capacity-Planning in MPC Systems 337**
  - Hierarchy of Capacity Planning Decisions* 337
  - Links to Other MPC System Modules* 338
- Capacity Planning and Control Techniques 339**
  - Capacity Planning Using Overall Factors (CPOF)* 339
  - Capacity Bills* 341
  - Resource Profiles* 343
  - Capacity Requirements Planning (CRP)* 344
- Scheduling Capacity and Materials Simultaneously 347**
  - Finite Capacity Scheduling* 347
  - Finite Scheduling with Product Structures: Using APS Systems* 350
- Management and Capacity Planning/Utilization 352**
  - Capacity Monitoring with Input/Output Control* 353
  - Managing Bottleneck Capacity* 355
  - Capacity Planning in the MPC System* 356
  - Choosing the Measure of Capacity* 357
  - Choice of a Specific Technique* 358
  - Using the Capacity Plan* 359
- Example Applications 360**
  - Capacity Planning at Montell USA, Inc.* 360
  - Capacity Planning at Applicon* 360
  - Capacity Planning with APS at a Consumer Products Company* 363

Concluding Principles	364
References	365
Discussion Questions	365
Problems	366

## Chapter 11

### Production Activity Control 370

A Framework for Production	
Activity Control	370
MPC System Linkages	371
The Linkages between MRP and PAC	372
Just-in-Time Effect on PAC	372
The Company Environment	373
Production Activity Control Techniques	373
Basic Shop-Floor Control Concepts	374
Lead-Time Management	376
Gantt Charts	377
Priority Sequencing Rules	377
Theory of Constraints (TOC) Systems	379
Vendor Scheduling and Follow-up	389
The Internet and Vendor Scheduling	390
Production Activity Control Examples	391
TOC Scheduling at TOSOH	392
Vendor Scheduling at Liebert	393
Vendor Scheduling at Caterpillar	396
Concluding Principles	401
References	401
Discussion Questions	403
Problems	403

## Chapter 12

### Advanced Concepts in Sales and Operations Planning 412

Mathematical Programming Approaches	413
Linear Programming	413
Mixed Integer Programming	415
Other Approaches	417
The Linear Decision Rule	417
Search Decision Rules	418
Disaggregation	419
The Disaggregation Problem	419
Hierarchical Production Planning	419
Disaggregation through Mathematical Programming	421

Company Example: Lawn King, Inc.	424
Company Background	425
Deciding on a Planning Model	425
The Linear Programming Model	426
Developing the Planning Parameters	427
Solving the Linear Programming Model and Understanding the Results	431
Sales and Operations Planning Issues	432
Using Microsoft Excel Solver	433

Applications Potential	436
------------------------	-----

Data Issues	436
-------------	-----

The Future	437
------------	-----

Concluding Principles	438
-----------------------	-----

References	438
------------	-----

Discussion Questions	439
----------------------	-----

Problems	439
----------	-----

## Chapter 13

### Strategy and MPC System Design 447

MPC Design Options	447
--------------------	-----

Master Production Scheduling Options	447
--------------------------------------	-----

Detailed Material Planning Options	449
------------------------------------	-----

Shop-Floor System Options	451
---------------------------	-----

Choosing the Options	453
----------------------	-----

Market Requirements	453
---------------------	-----

The Manufacturing Task	454
------------------------	-----

Manufacturing Process Design	454
------------------------------	-----

MPC System Design	455
-------------------	-----

The Choices in Practice	459
-------------------------	-----

Moog, Inc., Space Products Division	460
-------------------------------------	-----

Kawasaki, U.S.A.	461
------------------	-----

Applicon	463
----------	-----

The Driver Is the Marketplace	464
-------------------------------	-----

Integrating MRP and JIT	465
-------------------------	-----

The Need to Integrate	466
-----------------------	-----

Physical Changes That Support	
-------------------------------	--

Integration	466
-------------	-----

Some Techniques for Integrating MRP and JIT	467
---	-----

Strategy for Combining MRP and JIT	467
------------------------------------	-----

Extending MPC Integration to Customers and Suppliers	467
--	-----

TelTech	468
---------	-----

Customer-Supplier MPC Integration at TelTech	468
--	-----

Concluding Principles	469
References	470
Discussion Questions	471
Problems	471

## Chapter 14

### Advanced Concepts in Material Requirements Planning 478

Determining Manufacturing Order Quantities	479
<i>Economic Order Quantities (EOQ)</i>	480
<i>Periodic Order Quantities (POQ)</i>	481
<i>Part Period Balancing (PPB)</i>	481
<i>Wagner-Whitin Algorithm</i>	482
<i>Simulation Experiments</i>	483
Buffering Concepts	484
<i>Categories of Uncertainty</i>	484
<i>Safety Stock and Safety Lead Time</i>	485
<i>Safety Stock and Safety Lead Time</i>	
<i>Performance Comparisons</i>	487
<i>Scrap Allowances</i>	488
<i>Other Buffering Mechanisms</i>	488
Nervousness	489
<i>Sources of MRP System Nervousness</i>	489
<i>Reducing MRP System Nervousness</i>	491
Concluding Principles	491
References	492
Discussion Questions	494
Problems	494

## Chapter 15

### Advanced Concepts in Just-in-Time 502

A JIT Research Framework	503
Scheduling	503
<i>Scheduling Mixed Model Assembly Lines</i>	
<i>under JIT</i>	503
<i>Schedule Stability in Implementing JIT</i>	509
Supply Chain Coordination	510
Production Floor Management	516
<i>Setup Time Reduction</i>	516
<i>Determining the Optimal Number of Kanbans</i>	520
JIT Performance and Operating Conditions	524
<i>Variability in Operating Conditions</i>	525
<i>Lot Size</i>	526
<i>Comparing MPC System Approaches</i>	528

Concluding Principles	530
References	531
Discussion Questions	533
Problems	533

## Chapter 16

### Advanced Concepts in Scheduling 539

Basic Scheduling Research	539
<i>The One-Machine Case</i>	540
<i>The Two-Machine Case</i>	540
<i>Dispatching Approaches</i>	542
<i>Sequencing Rules</i>	542
Advanced Research Findings	545
<i>Due Date Setting Procedures</i>	545
<i>Dynamic Due Dates</i>	546
<i>Labor-Limited Systems</i>	549
<i>Group Scheduling and Transfer Batches</i>	550
<i>Scheduling Manned Cellular Manufacturing</i>	
<i>Systems</i>	553
Multiple-Constraint Scheduling	555
<i>Buffers between Constraint Operations:</i>	
<i>Rods</i>	555
<i>Multiple-Constraint Scheduling Algorithm</i>	556
<i>Example Multiple Constraint Scheduling</i>	
<i>Problem</i>	560
Concluding Principles	565
References	566
Discussion Questions	567
Problems	567

## Chapter 17

### Supply Chain Management 577

Supply Chain Management and MPC	
Systems	578
<i>New MPC Linkages</i>	580
<i>Strategic Thinking</i>	583
<i>The Bullwhip Effect</i>	583
<i>Orchestration</i>	586
Supply Chain Optimization—Examples	
and Supporting MPC Systems	590
<i>Suboptimal MPC Design in a Paint Supply</i>	
<i>Chain</i>	590
<i>An Interfirm MPC Example for Coordinated</i>	
<i>Packaging</i>	591

<i>Interfirm Reengineering Drives MPC Design for Airline Catering</i>	593
<i>Nokia's Superior MPC Systems for Supply Chain Management</i>	596
<i>MPC Enhancements to Support Outsourcing</i>	600
<i>MPC Systems to Support Quality in Complex Supply Chains</i>	601
Enhancements to Basic MPC Systems	603
<i>MPC Design Issues</i>	603
<i>Enhancing ERP Systems</i>	605
<i>Enhancing JIT-Based Systems</i>	608
<i>Dyad-Based MPC Systems</i>	610
<i>Mass Customization</i>	615
Concluding Principles	619
References	620
Discussion Questions	621
Problems	622

## **Chapter 18**

### **Implementation 627**

Internal Integration	628
<i>From Lean Manufacturing to Lean Organization to Lean Enterprise</i>	628
<i>MPC Implementation for Lean Manufacturing</i>	630
<i>MPC Implementation for Lean Organization</i>	632
<i>MPC Implementation for Lean Enterprise</i>	633
<i>Component and Database Commonality/Rationalization</i>	635
Interfirm Integration	638
<i>A New Paradigm</i>	638
<i>Dyad Relationships</i>	638
<i>Partnership/Trust</i>	641
<i>Third-Party Logistics Providers</i>	642
Transformation	643
<i>Stair-Step Transformations</i>	644
<i>Moving up the Value Chain</i>	648
Project Management	650
<i>Continuous MPC Enhancements</i>	650
<i>MPC Project Justification</i>	651
<i>Project Planning and Resource Commitment</i>	653
<i>Goldratt's Critical Chain Concepts</i>	654

Benchmarking and Auditing	656
<i>Flawless Execution and Database Integrity</i>	656
<i>Evolution and Revolution</i>	657
<i>Benchmarking versus Industrial Tourism</i>	658
<i>Auditing</i>	658
Concluding Principles	660
References	661
Discussion Questions	661
Problems	661

## **Chapter 19**

### **MPC: The Next Frontier 665**

A Supply Chain Development Framework	666
<i>Historical Perspective for MPC Development</i>	666
<i>Interorganizational (Chain) Design</i>	668
<i>Chain Strategy Development</i>	669
<i>Chain Infrastructure Development: Work</i>	671
<i>Chain Infrastructure Development: Infrastructure</i>	674
Competitive Drivers/Challenges	676
<i>Outsourcing</i>	676
<i>Regionalization/Globalization</i>	678
<i>Customer Concentration</i>	679
<i>Lock-on</i>	680
Cross-Firm MPC Design	680
<i>E-Based Systems</i>	681
<i>Orchestration</i>	683
<i>Hubs</i>	684
Examples and Techniques	686
<i>ChemUnity</i>	686
<i>SourcingParts</i>	687
<i>Dyator</i>	688
Concluding Principles	690
References	690
Discussion Questions	691
Problems	691

## **Appendix 694**

## **Index 697**
