

for Technologists, Engineers, and Managers

David L. Goetsch

CONTENTS

CHAPTER 1

Safety and Health Movement, Then and Now 1

- Developments Before the Industrial Revolution 2
- Milestones in the Safety Movement 3
- Tragedies That Have Changed the Safety Movement 5
- Role of Organized Labor 8
- Role of Specific Health Problems 9
- Development of Accident Prevention Programs 11
- Development of Safety Organizations 12
- Safety and Health Movement Today 14
- Integrated Approach to Safety and Health 14
- New Materials, New Processes, and New Problems 15
- Rapid Growth in the Profession 16

CHAPTER 2

Accidents and Their Effects 19

- Costs of Accidents 20
- Accidental Deaths in the United States 21
- Accidents versus Other Causes of Death 22
- Work Accident Costs and Rates 22
- Time Lost Because of Work Injuries 23
- Deaths in Work Accidents 24
- Work Injuries by Type of Accident 24
- Death Rates by Industry 25
- Parts of the Body Injured on the Job 26

Contents

Chemical Burn Injuries	26
Heat Burn Injuries	27
Repetitive Strain/Soft-Tissue Injuries	28
Estimating the Cost of Accidents	29

CHAPTER 3

Theories of Accident Causation 36

Domino Theory of Accident Causation	37
Human Factors Theory of Accident Causation	39
Accident/Incident Theory of Accident Causation	42
Epidemiological Theory of Accident Causation	45
Systems Theory of Causation	47
Combination Theory of Accident Causation	50
Behavioral Theory of Accident Causation	52
Drugs and Accident Causation	53
Depression and Accident Causation	54
Management Failures and Accident Causation	55

CHAPTER 4

The OSH Act, Standards, and Liability 61

Rationale for the OSH Act	62
OSHA's Mission and Purpose	62
OSH Act Coverage	63
OSHA Standards	64
OSHA's Record Keeping and Reporting	70
Keeping Employees Informed	77
Workplace Inspections and Enforcement	78
OSHA's Enhanced Enforcement Policy	79
Citations and Penalties	80
Appeals Process	82
State-Level OSHA Programs	83
Services Available from OSHA	86
Employer Rights and Responsibilities	89
Employee Rights and Responsibilities	80
Keeping Up to Date on OSHA	92
Problems with OSHA	92
Other Agencies and Organizations	93

OSHA's General Industry Standards	99
OSHA's Maritime Standards	108
OSHA's Construction Standards	111
Standards and Codes	112
Laws and Liability	112

CHAPTER 5

Workers' Compensation 123

Overview of Workers' Compensation	123
Historical Perspective	126
Workers' Compensation Legislation	128
Modern Workers' Compensation	129
Workers' Compensation Insurance	132
Resolution of Workers' Compensation Disputes	134
Injuries and Workers' Compensation	134
Disabilities and Workers' Compensation	136
Monetary Benefits of Workers' Compensation	141
Medical Treatment and Rehabilitation	143
Medical Management of Workplace Injuries	144
Administration and Case Management	145
Cost Allocation	146
Problems with Workers' Compensation	147
Spotting Workers' Compensation Fraud and Abuse	148
Future of Workers' Compensation	149
Cost-Reduction Strategies	151

CHAPTER 6

Ergonomic Hazards: Musculoskeletal Disorders (MSDs) and Cumulative Trauma Disorders (CTDs) 159

Ergonomics Defined	160
Human Factors and Ergonomic Hazards	161
Factors Associated with Physical Stress	162
Ergonomics: A Political Football	164
OSHA's Voluntary Ergonomics Guidelines	165
Worksite Analysis Program for Ergonomics	170
Hazard Prevention and Control	174
Medical Management Program	175

Contents

Training and Education	179
Common Indicators of Problems	180
Identifying Specific Ergonomic Problems	181
Ergonomic Problem-Solving Strategies	183
Economics of Ergonomics	189
Cumulative Trauma Disorders (CTDs)	191

CHAPTER 7

Stress and Safety 199

Workplace Stress Defined	199
Sources of Workplace Stress	200
Human Reactions to Workplace Stress	203
Measurement of Workplace Stress	204
Shift Work, Stress, and Safety	205
Improving Safety by Reducing Workplace Stress	206
Stress in Safety Managers	208
Stress and Workers' Compensation	209

CHAPTER 8

Mechanical Hazards and Machine Safeguarding 213

Common Mechanical Injuries	214
Safeguarding Defined	217
OSHA's Requirements for Machine Guarding	218
Risk Assessment in Machine Operation	218
Requirements for All Safeguards	220
Point-of-Operation Guards	221
Point-of-Operation Devices	222
Machine Guarding Self-Assessment	224
Feeding and Ejection Systems	228
Robot Safeguards	228
Control of Hazardous Energy (Lockout/Tagout Systems)	229
General Precautions	235
Basic Program Content	235
Taking Corrective Action	236

CHAPTER 9

Falling, Impact, Acceleration, Lifting, and Vision Hazards 239

Causes of Falls	240
-----------------	-----

Kinds of Falls	240
Walking and Slipping	241
Slip and Fall Prevention Programs	243
OSHA Fall Protection Standards	245
Ladder Safety	248
Impact and Acceleration Hazards	251
Lifting Hazards	259
Standing Hazards	262
Hand Protection	265
Personal Protective Equipment	267
Forklift Safety (Powered Industrial Trucks)	269

CHAPTER 10

Hazards of Temperature Extremes 277

Thermal Comfort	277
Heat Stress and Strain	278
Cold Stress	282
Burns and Their Effects	286
Chemical Burns	288

CHAPTER 11

Pressure Hazards 294

Pressure Hazards Defined	294
Sources of Pressure Hazards	296
Boilers and Pressure Hazards	297
High-Temperature Water Hazards	297
Hazards of Unfired Pressure Vessels	298
Hazards of High-Pressure Systems	299
Cracking Hazards in Pressure Vessels	299
Nondestructive Testing of Pressure Vessels	301
Pressure Dangers to Humans	302
Decompression Procedures	303
Measurement of Pressure Hazards	304
Reducing Pressure Hazards	306

CHAPTER 12

Electrical Hazards 311

Electrical Hazards Defined	312
----------------------------	-----

Contents

Sources of Electrical Hazards	315
Electrical Hazards to Humans	319
Detection of Electrical Hazards	320
Reducing Electrical Hazards	321
OSHA's Electrical Standards	325
Electrical Safety Program	326
Electrical Hazards Self-Assessment	327

CHAPTER 13

Fire Hazards and Life Safety 333

Fire Hazards Defined	334
Sources of Fire Hazards	338
Fire Dangers to Humans	342
Detection of Fire Hazards	342
Reducing Fire Hazards	343
Development of Fire Safety Standards	349
OSHA Fire Standards	350
Life Safety	350
Flame-Resistant Clothing	354
Fire Safety Programs	355
Explosive Hazards	357
OSHA's Firefighting Options	359
Self-Assessment in Fire Protection	360

CHAPTER 14

Industrial Hygiene: Toxic Substances and Confined Spaces 366

Overview of Industrial Hygiene	367
Industrial Hygiene Standards	368
OSH Act and Industrial Hygiene	368
Hazards in the Workplace	372
Toxic Substances Defined	375
Entry Points for Toxic Agents	375
Effects of Toxic Substances	377
Relationship of Doses and Responses	378
Airborne Contaminants	380
Effects of Airborne Toxics	381
Effects of Carcinogens	383

Asbestos Hazards	383
Indoor Air Quality and the “Sick-Building” Syndrome	387
Toxic Mold and Indoor Air Quality	389
Threshold Limit Values	390
Hazard Recognition and Evaluation	393
Prevention and Control	394
NIOSH and Industrial Hygiene	399
NIOSH Guidelines for Respirators	399
Standards and Regulations	402
General Safety Precautions	406
Confined Spaces Hazards	406
OSHA Confined Space Standard	409
OSHA Standards for Toxic and Hazardous Materials	414
OSHA’s Hazard Communication Standard	415

CHAPTER 15

Radiation Hazards 423

Ionizing Radiation: Terms and Concepts	424
Exposure of Employees to Radiation	425
Precautions and Personal Monitoring	426
Caution Signs and Labels	427
Evacuation Warning Signal	427
Instructing and Informing Personnel	428
Storage and Disposal of Radioactive Material	429
Notification of Incidents	429
Reports and Records of Overexposure	430
Notice to Employees	431
Nonionizing Radiation	434
Electromagnetic Fields in the Workplace	437
OSHA Standards for Health and Environmental Controls	440

CHAPTER 16

Noise and Vibration Hazards 445

Hearing Loss Prevention Terms	446
Characteristics of Sound	447
Hazard Levels and Risks	449
Standards and Regulations	450

Contents

Workers' Compensation and Noise Hazards	457
Identifying and Assessing Hazardous Noise Conditions	457
Noise Control Strategies	459
Vibration Hazards	464
Other Effects of Noise Hazards	467
Corporate Policy	468
Evaluating Hearing Loss Prevention Programs	470

CHAPTER 17

Preparing for Emergencies and Terrorism 478

Rationale for Emergency Preparation	479
Emergency Planning and Community Right-to-Know Act	480
Organization and Coordination	481
OSHA Standards	482
First Aid in Emergencies	483
How to Plan for Emergencies	486
Evacuation Planning	489
Customizing Plans to Meet Local Needs	493
Emergency Response	493
Computers and Emergency Response	494
Dealing with the Psychological Trauma of Emergencies	496
Recovering from Disasters	498
Terrorism in the Workplace	500

CHAPTER 18

Computers, Automation, and Robots 508

Impact of Automation on the Workplace	508
VDTs in Offices and Factories	509
Human–Robot Interaction	512
Safety and Health Problems Associated with Robots	513
Safety and Health in Office Automation	515
Industrial Medicine and Robots	519
Technological Alienation in the Automated Workplace	521
Minimizing the Problems of Automation	522
Challenge for the Future	524

CHAPTER 19

Ethics and Safety 531

An Ethical Dilemma 532

Ethics Defined 533

Ethical Behavior in Organizations 535

Safety and Health Professionals' Role in Ethics 535

Company's Role in Ethics 537

Handling Ethical Dilemmas 540

Questions to Ask When Making Decisions 541

Ethics and Whistle-Blowing 542

CHAPTER 20

Bloodborne Pathogens in the Workplace 549

Facts about AIDS 550

Symptoms of AIDS 550

AIDS in the Workplace 552

Legal Concerns 554

AIDS Education 558

Counseling Infected Employees 559

Easing Employees' Fears about AIDS 561

Protecting Employees from AIDS 562

Hepatitis B (HBV) and Hepatitis C (HCV) in the Workplace 564

OSHA's Standard on Occupational Exposure to Bloodborne Pathogens 568

Preventing and Responding to Needlestick Injuries 572

CHAPTER 21

Safety Analysis, Prevention, and Management 577

Overview of Hazard Analysis 578

Preliminary Hazard Analysis 579

Detailed Hazard Analysis 580

Hazard Prevention and Deterrence 590

OSHA Process Safety Standard 592

Risk Assessment 595

Safety Management Concerns 597

Best Practices in Safety Management 600

CHAPTER 22

Accident Investigation and Reporting 606

Types of Accident Investigations 607

When to Investigate 607

What to Investigate 608

Who Should Investigate 611

Conducting the Investigation 611

Interviewing Witnesses 614

Reporting Accidents 617

CHAPTER 23

Promoting Safety 626

Company Safety Policy 627

Safety Rules and Regulations 628

Employee Participation in Promoting Safety 629

Safety Training 629

Suggestion Programs 630

Visual Awareness 630

Safety Committees 633

Gaining a Personal Commitment 635

Employee-Management Participation 636

Incentives 637

Competition 638

Company-Sponsored Wellness Programs 639

Teamwork Approach to Promoting Safety 640

CHAPTER 24

Safety and Health Training 647

Rationale for Safety and Health Training 648

Education and Training Requirements 652

Safety and Health Professionals as Trainers 656

Preparing Safety and Health Instruction 658

Presenting Safety and Health Instruction 661

Applying Safety and Health Instruction 658

Evaluating Safety and Health Instruction 668

Training Supervisors 669

Training New and Transferred Employees 670

Job Safety Analysis as a Training Technique	673
Training Opportunities Available	676
Illiteracy and Safety	678
English as a Second Language Training Issues	681
OSHA Standards and Training	683

CHAPTER 25

Environmental Safety and ISO 14000 (Environmental Management) 688

Safety, Health, and the Environment	689
Legislation and Regulation	690
Types of Environments	693
Role of Safety and Health Professionals	694
Hazards of the Environment	695
Hazardous Waste Reduction	699
Environmental Management System (EMS)	707
International Organization for Standardization (ISO)	713
ISO 14000	714
ISO 14000 Series of Standards	714
ISO 14001 Standard	716
ISO 14000 Success Story	728

CHAPTER 26

Product Safety and Liability 734

Product Liability and the Law	735
Developing a Product Safety Program	740
Evaluating the Product Safety Program	742
Role of the Safety and Health Professional	743
Quality Management and Product Safety	744
Product Safety Program Record Keeping	746
User Feedback Collection and Analysis	747
Product Literature and Safety	748

CHAPTER 27

Roles and Professional Certifications for Safety and Health Personnel 753

Modern Safety and Health Teams	754
--------------------------------	-----

Contents

Safety and Health Manager	754
Engineers and Safety	762
Health Physicist	772
Occupational Physician	772
Occupational Health Nurse and Nurse Practitioner	774
Risk Manager	776
Certification of Safety and Health Professionals	776

CHAPTER 28

TSM: Safety Management in a Quality Management Setting 785

What Is QM?	786
How Does QM Relate to Safety?	787
Safety Management in a QM Setting	789
What Is TSM?	789
Translating TSM into Action	791
Fundamental Elements of TSM	792
Rationale for TSM	798
Implementing TSM: The Model	798

CHAPTER 29

Safety, Health, and Competition in the Global Marketplace 802

Competitiveness Defined	803
Productivity and Competitiveness	804
Quality and Competitiveness	807
How Safety and Health Can Improve Competitiveness	808

CHAPTER 30

Violence in the Workplace 814

Occupational Safety and Workplace Violence: The Relationship	815
Workplace Violence: Definitions	815
Workplace Violence: Cases	816
Size of the Problem	818
Legal Considerations	819
Risk-Reduction Strategies	822
Contributing Social and Cultural Factors	824
OSHA's Voluntary Guidelines	826

Conflict Resolution and Workplace Violence 834

Do's and Don'ts for Supervisors 839

Emergency Preparedness Plan 839

Glossary 843

Index 865
