Frederick K. Lutgens

# Contents

Preface xvii

## 1 Introduction to Earth Science 1

What Is Earth Science? 2

Earth Science, People, and the Environment 3

Resources 3

Population Growth 4

Environmental Problems 4

The Nature of Scientific Inquiry 6

Hypothesis 7

Theory 7

Scientific Methods 8

Scales of Space and Time in Earth Science 9

Early Evolution of Earth 10

Earth's Spheres 12

Hydrosphere 12

Atmosphere 13

Biosphere 13

Geosphere 14

A Closer Look at the Geosphere 14

Earth's Internal Structure 15

The Mobile Geosphere 16

The Face of Earth 18

Earth As a System 20

Earth System Science 20

The Earth System 22

Box 1.1 Earth As a System: Earth's Place  
in the Cosmos 4

Box 1.2 Understanding Earth: Studying Earth  
from Space 8

## UNIT ONE

### Earth Materials 29

### 2 Minerals: Building Blocks of Rocks 29

Minerals: The Building Blocks of Rocks 30

Elements: The Building Blocks of Minerals 32

Atoms 32

Isotopes and Radioactive Decay 34

Why Atoms Bond 34

Ionic Bonds: Electrons Transferred 35

Covalent Bonds: Electrons Shared 35

Properties of Minerals 36

Primary Diagnostic Properties 36

Other Properties of Minerals 40

Mineral Groups 40

Silicate Minerals 41

Important Nonsilicate Minerals 43

viii

Mineral Resources 45

Box 2.1 People and the Environment: Making Glass from  
Minerals 36

Box 2.1 Understanding Earth: Gemstones 44

### 3 Rocks: Materials of the Solid Earth 51

Earth As a System: The Rock Cycle 52

The Basic Cycle 54

Alternative Paths 54

Igneous Rocks: "Formed by Fire" 54

Magma Crystallizes to Form Igneous Rocks 55

Igneous Textures 56

Igneous Compositions 57

Classifying Igneous Rocks 58

How Different Igneous Rocks Form 59

Sedimentary Rocks: Compacted and

Cemented Sediment 61

Classifying Sedimentary Rocks 62

Lithification of Sediment 67

Features of Sedimentary Rocks 67

Metamorphic Rocks: New Rock from Old 69

Agents of Metamorphism 70

Metamorphic Textures 72

Common Metamorphic Rocks 72

Resources from Rocks and Minerals 74

Metallic Mineral Resources 75

Nonmetallic Mineral Resources 77

Box 3.1 Earth As a System: The Carbon Cycle  
and Sedimentary Rocks 68

Box 3.2 People and the Environment: United States Per  
Capita Use of Mineral and Energy Resources 76

## UNIT TWO

### Sculpturing Earth's Surface 83

### 4 Weathering, Soil, and Mass Wasting 83

Earth's External Processes 84

Weathering 84

<b>Mechanical Weathering</b>	85
Frost Wedging	85
Unloading	85
Biological Activity	86
<b>Chemical Weathering</b>	86
Water and Carbonic Acid	86
How Granite Weathers	87
Weathering of Silicate Minerals	88
Spheroidal Weathering	88
<b>Rates of Weathering</b>	89
Rock Characteristics	89
Climate	90
Differential Weathering	90
<b>Soil</b>	90
An Interface in the Earth System	91
What Is Soil?	91
Soil Texture and Structure	92
<b>Controls of Soil Formation</b>	93
Parent Material	93
Time	93
Climate	94
Plants and Animals	94
Topography	95
<b>The Soil Profile</b>	95
<b>Classifying Soils</b>	96
<b>Soil Erosion</b>	97
How Soil Is Eroded	98
Rates of Erosion	99
Sedimentation and Chemical Pollution	101
<b>Weathering Creates Ore Deposits</b>	101
Bauxite	102
Other Deposits	102
<b>Mass Wasting: The Work of Gravity</b>	102
<b>Mass Wasting and Landform Development</b>	103
The Role of Mass Wasting	103
Slopes Change Through Time	103
<b>Controls and Triggers of Mass Wasting</b>	103
The Role of Water	103
Oversteepened Slopes	103
Removal of Vegetation	104
Earthquakes as Triggers	104
<b>Classifying Mass-Wasting Processes</b>	105
Type of Motion	105
Rate of Movement	105
<b>Slump</b>	106
<b>Rockslide</b>	107
<b>Debris Flow</b>	107
Debris Flows in Semiarid Regions	107
Lahars	109
<b>Earthflow</b>	109

<b>Slow Movements</b>	109
Creep	111
Solifluction	111
<b>Box 4.1 Understanding Earth: The Old Man of the Mountain</b>	100
<b>Box 4.2 People and the Environment: Debris Flows on Alluvial Fans: A Case Study from Venezuela</b>	110

## 5 Running Water and Groundwater 114

<b>Earth as a System: The Hydrologic Cycle</b>	116
<b>Running Water</b>	117
Drainage Basins	118
River Systems	118
<b>Streamflow</b>	119
Gradient and Channel Characteristics	119
Discharge	120
Changes from Upstream to Downstream	120
<b>The Work of Running Water</b>	121
Erosion	121
Transportation	121
Deposition	122
<b>Stream Channels</b>	122
Bedrock Channels	123
Alluvial Channels	123
<b>Base Level and Stream Erosion</b>	124
<b>Shaping Stream Valleys</b>	126
Valley Deepening	126
Valley Widening	126
Changing Base Level and Incised Meanders	127
<b>Depositional Landforms</b>	128
Deltas	128
Natural Levees	129
Alluvial Fans	130
<b>Drainage Patterns</b>	130
<b>Floods and Flood Control</b>	131
Causes of Floods	131
Flood Control	132
<b>Groundwater: Water Beneath the Surface</b>	133
The Importance of Groundwater	134
Groundwater's Geological Roles	135
<b>Distribution and Movement of Groundwater</b>	136
Distribution	136
Factors Influencing the Storage and Movement of Groundwater	137
Groundwater Movement	137
<b>Springs</b>	138
Hot Springs	138
Geysers	139

Wells 140  
 Artesian Wells 141  
 Environmental Problems Associated with Groundwater 142  
     Treating Groundwater as a Nonrenewable Resource 142  
     Land Subsidence Caused by Groundwater Withdrawal 142  
     Groundwater Contamination 143  
 The Geologic Work of Groundwater 145  
     Caverns 145  
     Karst Topography 146  
 Box 5.1 People and the Environment: Flash Floods 134  
 Box 5.2 Understanding Earth: Measuring Groundwater Movement 139  
 Box 5.3 People and the Environment: The Case of the Disappearing Lake 148

## 6 Glaciers, Deserts, and Wind 153

Glaciers: A Part of Two Basic Cycles in the Earth System 154  
     Valley (Alpine) Glaciers 154  
     Ice Sheets 154  
     Other Types of Glaciers 155  
 How Glaciers Move 156  
     Observing and Measuring Movement 156  
     Budget of a Glacier 157  
 Glacial Erosion 159  
     How Glaciers Erode 159  
     Landforms Created by Glacial Erosion 160  
 Glacial Deposits 163  
     Types of Glacial Drift 163  
     Moraines, Outwash Plains, and Kettles 165  
     Drumlins, Eskers, and Kames 167  
 Glaciers of the Ice Age 168  
 Some Indirect Effects of Ice Age Glaciers 169  
 Causes of Glaciation 170  
     Plate Tectonics 170  
     Variations in Earth's Orbit 171  
     Other Factors 172  
 Deserts 173  
 Geologic Processes in Arid Climates 174  
     Weathering 174  
     The Role of Water 174  
 Basin and Range: The Evolution of a Mountainous Desert Landscape 175  
 Wind Erosion 178

Wind Deposits 180  
     Loess 180  
     Sand Dunes 180  
     Types of Sand Dunes 181  
 Box 6.1 Understanding Earth: Glacial Ice—A Storehouse of Climate Data 162  
 Box 6.1 People and the Environment: The Disappearing Aral Sea 176

## UNIT THREE Forces Within 187

### 7 Earthquakes and Earth's Interior 187

What Is an Earthquake? 189  
     Earthquakes and Faults 189  
     Discovering the Cause of Earthquakes 189  
     Foreshocks and Aftershocks 191  
 San Andreas Fault: An Active Earthquake Zone 192  
 Seismology: The Study of Earthquake Waves 193  
 Locating an Earthquake 194  
 Measuring the Size of Earthquakes 196  
     Intensity Scales 196  
     Magnitude Scales 197  
 Destruction from Earthquakes 199  
     Destruction from Seismic Vibrations 200  
     Tsunami 200  
     Landslides and Ground Subsidence 203  
     Fire 204  
 Can Earthquakes Be Predicted? 204  
     Short-Range Predictions 204  
     Long-Range Forecasts 205  
 Earth's Layered Structure 206  
     Layers Defined by Composition 207  
     Layers Defined by Physical Properties 207  
     Discovering Earth's Major Layers 209  
     Discovering Earth's Composition 209  
 Box 7.1 People and the Environment: Damaging Earthquakes East of the Rockies 192  
 Box 7.2 Understanding Earth: Inge Lehmann: A Pioneering Seismologist 211

### 8 Plate Tectonics: A Scientific Theory Unfolds 215

Continental Drift: An Idea Before Its Time 217  
     Evidence: The Continental Jigsaw Puzzle 217  
     Evidence: Fossils Match Across the Seas 219

- Evidence: Rock Types and Structures Match 220  
 Evidence: Ancient Climates 221
- The Great Debate 222**
- Plate Tectonics: The New Paradigm 222**  
 Earth's Major Plates 222  
 Plate Boundaries 223
- Divergent Boundaries 226**  
 Oceanic Ridges and Seafloor Spreading 226  
 Continental Rifting 227
- Convergent Boundaries 228**  
 Oceanic-Continental Convergence 229  
 Oceanic-Oceanic Convergence 230  
 Continental-Continental Convergence 231
- Transform Fault Boundaries 231**
- Testing the Plate Tectonics Model 233**  
 Evidence: Ocean Drilling 233  
 Evidence: Hot Spots 235  
 Evidence: Paleomagnetism 237
- Measuring Plate Motion 240**  
**What Drives Plate Motion? 241**  
 Forces that Drive Plate Motion 241  
 Models of Plate-Mantle Convection 243
- Plate Tectonics into the Future 243**  
 Box 8.1 Understanding Earth: The Breakup of Pangaea 218  
 Box 8.2 Understanding Earth: Susan DeBari—A Career in Geology 236

## 9 Volcanoes and Other Igneous Activity 249

- The Nature of Volcanic Eruptions 251**  
 Factors Affecting Viscosity 253  
 Importance of Dissolved Gases in Magma 253
- What Is Extruded During Eruptions? 254**  
 Lava Flows 254  
 Gases 254  
 Pyroclastic Materials 255
- Volcanic Structures and Eruptive Styles 255**  
*Anatomy of a Volcano* 255  
 Shield Volcanoes 257  
 Cinder Cones 259  
 Composite Cones 260
- Living in the Shadow of a Composite Cone 261**  
 Nuée Ardente: A Deadly Pyroclastic Flow 262  
 Lahars: Mudflows on Active and Inactive Cones 262
- Other Volcanic Landforms 263**  
 Calderas 263  
 Fissure Eruptions and Lava Plateaus 265  
 Volcanic Pipes and Necks 266

- Intrusive Igneous Activity 267**  
 Dikes 269  
 Sills and Laccoliths 269  
 Batholiths 270
- Origin of Magma 270**  
 Generating Magma from Solid Rock 271  
 Partial Melting and Magma Compositions 273
- Plate Tectonics and Igneous Activity 273**  
 Igneous Activity at Convergent Plate Boundaries 275  
 Igneous Activity at Divergent Plate Boundaries 278  
 Intraplate Igneous Activity 279
- Box 9.1 People and the Environment: Eruption of Vesuvius A.D. 79 264  
 Box 9.2 Earth As a System: Can Volcanoes Change Earth's Climate? 274

## 10 Mountain Building 283

- Rock Deformation 284**  
 Temperature and Confining Pressure 284  
 Rock Type 285  
 Time 285
- Folds 285**  
 Types of Folds 286  
 Domes and Basins 287
- Faults 288**  
 Dip-Slip Faults 288  
 Strike-Slip Faults 291
- Joints 294**
- Mountain Building 294**  
**Mountain Building at Subduction Zones 295**  
 Island Arcs 295  
 Mountain Building Along Andean-Type Margins 296
- Collisional Mountain Ranges 298**  
 Terranes and Mountain Building 298  
 Continental Collisions 300
- Fault-Block Mountains 301**  
**Vertical Movements of the Crust 302**  
 Isostasy 303  
 How High Is Too High? 304
- Box 10.1 People and the Environment: The San Andreas Fault System 292

## UNIT FOUR

### Deciphering Earth's History 309

### 11 Geologic Time 309

- Geology Needs a Time Scale 310**  
**A Brief History of Geology 311**  
 Birth of Modern Geology 311  
 Geology Today 312
- Relative Dating—Key Principles 312**  
 Law of Superposition 313

Principle of Original Horizontality 313  
 Principle of Cross-Cutting Relationships 314  
 Inclusions 314  
 Unconformities 315  
 Using Relative Dating Principles 316  
**Correlation of Rock Layers 316**  
**Fossils: Evidence of Past Life 317**  
 Types of Fossils 317  
 Conditions Favoring Preservation 321  
 Fossils and Correlation 321  
**Dating with Radioactivity 322**  
 Reviewing Basic Atomic Structure 322  
 Radioactivity 323  
 Half-Life 324  
 Radiometric Dating 324  
 Dating with Carbon-14 325  
 Importance of Radiometric Dating 327  
**The Geologic Time Scale 327**  
 Structure of the Time Scale 327  
 Precambrian Time 327  
**Difficulties in Dating the Geologic Time Scale 329**  
 Box 11.1 Understanding Earth: Deciphering the Past  
 by Understanding the Present 311  
 Box 11.2 People and the Environment: Radon—A Threat  
 to Human Health 326  
 Box 11.2 Understanding Earth: Using Tree Rings to Date  
 and Study the Recent Past 330

**12 Earth's History:  
 A Brief Summary 335**

**Precambrian Time: Vast and Enigmatic 336**  
 Precambrian Rocks 337  
 Earth's Atmosphere Evolves 338  
 Precambrian Fossils 339  
**Paleozoic Era: Life Explodes 341**  
 Early Paleozoic History 341  
 Early Paleozoic Life 342  
 Late Paleozoic History 344  
 Late Paleozoic Life 344  
**Mesozoic Era: Age of the Dinosaurs 346**  
 Mesozoic History 346  
 Mesozoic Life 348  
**Cenozoic Era: Age of Mammals 349**  
 Cenozoic North America 349  
 Cenozoic Life 352  
 Box 12.1 Understanding Earth: The Burgess Shale 340  
 Box 12.1 Earth As a System: Demise of  
 the Dinosaurs 352

UNIT FIVE

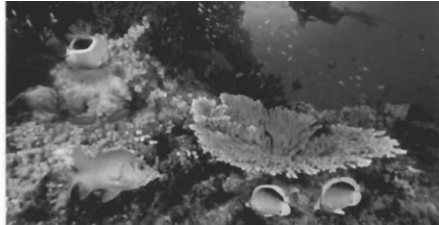

**The Global Ocean 359**

**13 The Ocean Floor 359**

**The Vast World Ocean 360**  
 Geography of the Oceans 360  
 Comparing the Oceans to the Continents 361  
**An Emerging Picture of the Ocean Floor 361**  
 Mapping the Seafloor 361  
 Viewing the Ocean Floor from Space 363  
 Provinces of the Ocean Floor 364  
**Continental Margins 364**  
 Passive Continental Margins 364  
 Active Continental Margins 367  
**The Ocean Basin Floor 369**  
 Deep-Ocean Trenches 369  
 Abyssal Plains 369  
 Seamounts, Guyots, and Oceanic Plateaus 369  
**The Oceanic Ridge 370**  
**Seafloor Sediments 374**  
 Types of Seafloor Sediments 374  
 Distribution of Seafloor Sediments 375  
 Seafloor Sediments and Climate Change 376  
**Resources from the Seafloor 377**  
 Energy Resources 377  
 Other Resources 378  
 Box 13.1 Understanding Earth: A Grand Break—Evidence  
 for Turbidity Currents 368  
 Box 13.2 Understanding Earth: Explaining Coral Atolls—  
 Darwin's Hypothesis 372  
 Box 13.3 Understanding Earth: Collecting Geologic  
 History from the Deep-Ocean Floor 377

**14 Ocean Water and  
 Ocean Life 383**

**Composition of Seawater 384**  
 Salinity 384  
 Sources of Sea Salts 384  
 Processes Affecting Seawater Salinity 385  
**Ocean Temperature Variation 386**  
 Temperature Variation with Depth 386  
 Ocean Temperature Change Over Time 387  
**Ocean Density Variation 388**  
 Factors Affecting Seawater Density 388  
 Density Variation with Depth 388  
 Ocean Layering 389

- The Diversity of Ocean Life** 389  
 Classification of Marine Organisms 390  
 Marine Life Zones 391
- Oceanic Productivity** 394  
 Productivity in Polar Oceans 394  
 Productivity in Tropical Oceans 394  
 Productivity in Temperate Oceans 395
- Oceanic Feeding Relationships** 397  
 Trophic Levels 398  
 Transfer Efficiency 398  
 Food Chains and Food Webs 398
- Box 14.1** People and the Environment: Desalination of Seawater—Fresh Water from the Sea 387
- Box 14.2** Earth As a System: Deep-Sea Hydrothermal Vent Biocommunities—Earth's First Life? 396
- Box 14.3** People and the Environment: The Iron Hypothesis—Fertilizing the Ocean to Reduce Global Warming 397

## 15 The Dynamic Ocean 402

- Surface Circulation** 404  
 Ocean Circulation Patterns 404  
 The Gulf Stream 407  
 Ocean Currents and Climate 408  
 Upwelling 408
- Deep-Ocean Circulation** 409
- The Shoreline: A Dynamic Interface** 410  
 The Coastal Zone 410
- Waves** 411  
 Wave Characteristics 412  
 Circular Orbital Motion 413  
 Waves in the Surf Zone 414
- Wave Erosion** 414
- Sand Movement on the Beach** 415  
 Movement Perpendicular to the Shoreline 416  
 Wave Refraction 417  
 Longshore Transport 417
- Shoreline Features** 417  
 Erosional Features 417  
 Depositional Features 418  
 The Evolving Shore 420
- Stabilizing the Shore** 421  
 Hard Stabilization 422  
 Alternatives to Hard Stabilization 423  
 Erosion Problems Along U.S. Coasts 424
- Coastal Classification** 425  
 Emergent Coasts 425  
 Submergent Coasts 425
- Tides** 426  
 Causes of Tides 426  
 Monthly Tidal Cycle 427

- Tidal Patterns 428  
 Tidal Currents 428
- Box 15.1** Understanding Earth: Running Shoes as Drift Meters—Just Do It 406
- Box 15.2** People and the Environment: The Move of the Century—Relocating the Cape Hatteras Lighthouse 412

## UNIT SIX

# Earth's Dynamic Atmosphere 435

## 16 The Atmosphere: Composition, Structure, and Temperature 435

- Weather and Climate** 436  
**Composition of the Atmosphere** 437  
 Major Components 438  
 Variable Components 438
- Height and Structure of the Atmosphere** 440  
 Pressure Changes 440  
 Temperature Changes 441
- Earth—Sun Relationships** 443  
 Earth's Motions 443  
 Seasons 443  
 Earth's Orientation 444  
 Solstices and Equinoxes 445
- Energy, Heat and Temperature** 448  
**Mechanisms of Heat Transfer** 448  
 Conduction 448  
 Convection 449  
 Radiation 449
- The Fate of Incoming Solar Radiation** 450  
 Reflection and Scattering 451  
 Absorption 452
- Heating the Atmosphere: The Greenhouse Effect** 452  
**For the Record: Air Temperature Data** 454
- Why Temperatures Vary: The Controls of Temperature** 455  
 Land and Water 456  
 Altitude 457  
 Geographic Position 458  
 Cloud Cover and Albedo 458

- World Distribution of Temperature** 459
- Box 16.1 People and the Environment: Altering the Atmosphere's Composition—Sources and Types of Air Pollution 438
- Box 16.2 People and the Environment: Ozone Depletion—A Global Issue 441
- Box 16.3 Understanding Earth: Blue Skies and Red Sunsets 453

## 17 Moisture, Clouds, and Precipitation 465

- Water's Changes of State** 466
- Ice, Liquid Water, and Water Vapor 466
- Latent Heat 467
- Humidity: Water Vapor in the Atmosphere** 468
- Saturation 468
- Mixing Ratio 469
- Relative Humidity 469
- Dew-Point Temperature 470
- Measuring Humidity 472
- The Basis of Cloud Formation: Adiabatic Cooling** 473
- Fog and Dew vs. Cloud Formation 473
- Adiabatic Temperature Changes 473
- Adiabatic Cooling and Condensation 473
- Processes that Lift Air** 474
- Orographic Lifting 475
- Frontal Wedging 475
- Convergence 475
- Localized Convective Lifting 476
- The Weathermaker: Atmospheric Stability** 476
- Types of Stability 476
- Stability and Daily Weather 479
- Condensation and Cloud Formation** 480
- Types of Clouds 482
- Fog** 487
- Fogs Caused by Cooling 487
- Evaporation Fogs 488
- How Precipitation Forms** 489
- Precipitation from Cold Clouds:
- The Bergeron Process 489
- Precipitation from Warm Clouds:
- The Collision-Coalescence Process 491
- Forms of Precipitation** 492
- Rain 492
- Snow 492
- Sleet and Glaze 493
- Hail 493
- Rime 494

- Measuring Precipitation** 494
- Measurement Errors 494
- Measuring Snowfall 495
- Precipitation Measurement by Weather Radar 495
- Box 17.1 People and the Environment: Atmospheric Stability and Air Pollution 480
- Box 17.2 Understanding Earth: Science and Serendipity 486

## 18 Air Pressure and Wind 501

- Understanding Air Pressure** 502
- Measuring Air Pressure** 503
- Factors Affecting Wind** 504
- Pressure-Gradient Force 504
- Coriolis Effect 505
- Friction with Earth's Surface 506
- Highs and Lows** 508
- Cyclonic and Anticyclonic Winds 508
- Weather Generalizations About Highs and Lows 509
- General Circulation of the Atmosphere** 510
- Circulation on a Nonrotating Earth 510
- Idealized Global Circulation 511
- Influence of Continents 512
- The Westerlies** 512
- Local Winds** 514
- Land and Sea Breezes 515
- Mountain Valley and Breezes 515
- Chinook and Santa Ana Winds 516
- How Wind Is Measured** 517
- El Niño and La Niña** 518
- Global Distribution of Precipitation** 522
- Box 18.1 People and the Environment: Wind Energy—An Alternative with Potential 514
- Box 18.1 Understanding Earth: Monitoring Ocean Winds from Space 520
- ## 19 Weather Patterns and Severe Storms 527
- Air Masses** 528
- What Is an Air Mass? 528
- Source Regions 529
- Weather Associated with Air Masses 529
- Fronts** 531
- Warm Fronts 532
- Cold Fronts 532
- Stationary Fronts and Occluded Fronts 533
- The Middle-Latitude Cyclone** 534
- Life Cycle 534

Idealized Weather	538
The Role of Airflow Aloft	538
<b>What's In a Name?</b>	<b>539</b>
<b>Thunderstorms</b>	<b>540</b>
Thunderstorm Occurrence	540
Stages of Thunderstorm Development	541
<b>Tornadoes</b>	<b>542</b>
Tornado Occurrence and Development	544

## 22 Touring Our Solar System **611**

<b>The Planets: An Overview</b>	<b>612</b>
The Interiors of the Planets	613
The Atmospheres of the Planets	614
<b>Earth's Moon</b>	<b>615</b>
The Lunar Surface	615
Lunar History	617

**The Planets: A Brief Tour 619**

- Mercury: The Innermost Planet 619
- Venus: The Veiled Planet 619
- Mars: The Red Planet 620
- Jupiter: Lord of the Heavens 623
- Saturn: The Elegant Planet 625
- Uranus and Neptune: The Twins 627
- Pluto: The Outermost Planet? 628
- Is Pluto Really a Planet? 629

**Minor Members of the Solar System 629**

- Asteroids: Microplanets 629
- Comets: Dirty Snowballs 630
- Meteoroids: Visitors to Earth 633

**Box 22.1 Understanding Earth: Pathfinder—The First Geologist on Mars 621****Box 22.2 Earth As a System: Is Earth on a Collision Course? 632**

## 23 Light, Astronomical Observations, and the Sun 639

**The Study of Light 640**

- Nature of Light 640
- Spectroscopy 641
- The Doppler Effect 642

**Astronomical Tools 643**

- Refracting Telescopes 643
- Reflecting Telescopes 644
- Properties of Optical Telescopes 644
- Detecting Invisible Radiation 647

**The Sun 649**

- Structure of the Sun 649
- The Active Sun 652
- The Solar Interior 654

**Box 23.1 Understanding Earth: The Largest Optical Telescopes 648****Box 23.2 Earth As a System: Variable Sun and Climatic Change 650**

## 24 Beyond Our Solar System 659

**Properties of Stars 660**

- Measuring Distances to the Stars 660
- Stellar Brightness 661

Stellar Color and Temperature 662

Binary Stars and Stellar Mass 662

**Hertzsprung-Russell Diagram 663****Variable Stars 665****Interstellar Matter 666****Stellar Evolution 667**

- Star Birth 668
- Protostar Stage 668
- Main-Sequence Stage 669
- Red Giant Stage 669
- Burnout and Death 669
- H-R Diagrams and Stellar Evolution 671

**Stellar Remnants 672**

- White Dwarfs 672
- Neutron Stars 673
- Black Holes 674

**The Milky Way Galaxy 675**

- Structure of the Milky Way Galaxy 675
- Galaxies 676
- Types of Galaxies 677
- Galactic Clusters 677

**Red Shifts 678**

- Expanding Universe 678

**The Big Bang 679****Box 24.1 Understanding Earth: Determining Distance from Magnitude 665****Box 24.2 Understanding Earth: Supernova 1987A 672****Box 24.3 Earth As a System: From Stardust to You 674**

### Appendix A: Metric and English Units Compared 683

### Appendix B: Earth's Grid System 684

### Appendix C: Relative Humidity and Dew Point Tables 686

### Appendix D: Landforms of the Conterminous United States 688
