

Concrete

Second Edition

Sidney Mindess

J. Francis Young

David Darwin

Contents

| | |
|---|----|
| Preface | ix |
| CHAPTER 1 | |
| Concrete as a Material | 1 |
| 1.1 The Nature of Concrete | 1 |
| 1.2 Advantages of Concrete | 3 |
| 1.3 Limitations of Concrete | 6 |
| Bibliography | 6 |
| CHAPTER 2 | |
| Historical Development of Cement and Concrete | 7 |
| 2.1 Nonhydraulic Cements | 7 |
| 2.2 Hydraulic Limes | 9 |
| 2.3 Development of Portland Cement | 9 |
| 2.4 Concrete Admixtures | 13 |
| 2.5 Summary | 13 |
| Bibliography | 14 |
| CHAPTER 3 | |
| Cements | 15 |
| 3.1 Manufacture of Portland Cement | 15 |
| 3.2 Composition of Portland Cement | 21 |
| 3.3 Modified Portland Cements | 31 |
| 3.4 Non-Portland Inorganic Cements | 41 |
| 3.5 Specifications and Tests of Portland Cement | 44 |
| Bibliography | 54 |
| Problems | 55 |
| CHAPTER 4 | |
| Hydration of Portland Cement | 57 |
| 4.1 Chemistry of Hydration | 57 |
| 4.2 Properties of the Hydration Products | 65 |
| 4.3 Microstructure of Hydrated Cement Pastes | 69 |
| 4.4 Properties of Hydrated Cement Pastes | 80 |
| Bibliography | 90 |
| Problems | 91 |

CHAPTER 5

| | |
|---|-----|
| Mineral Admixtures and Blended Cements | 93 |
| 5.1 Pozzolanic Materials | 94 |
| 5.2 Blast Furnace Slag | 102 |
| 5.3 Blended Cements | 104 |
| 5.4 Proportioning with Mineral Admixtures | 106 |
| 5.5 Effects on Properties of Fresh and Hardening Concrete | 107 |
| Bibliography | 113 |
| Problems | 114 |

CHAPTER 6

| | |
|-------------------------|-----|
| Water | 115 |
| 6.1 Water as a Material | 115 |
| 6.2 Water Quality | 117 |
| Bibliography | 120 |
| Problems | 120 |

CHAPTER 7

| | |
|--|-----|
| Aggregates | 121 |
| 7.1 Properties Required for Mix Design | 122 |
| 7.2 Durability of Aggregates | 140 |
| 7.3 Nonstandard Aggregates | 155 |
| Chapter Appendix | 161 |
| Bibliography | 162 |
| Problems | 163 |

CHAPTER 8

| | |
|-------------------------------------|-----|
| Chemical Admixtures | 165 |
| 8.1 Definitions and Classifications | 165 |
| 8.2 Use of Admixtures | 166 |
| 8.3 Air-Entraining Admixtures | 168 |
| 8.4 Water-Reducing Admixtures | 176 |
| 8.5 Admixtures for Set Control | 182 |
| 8.6 Miscellaneous Admixtures | 187 |
| Bibliography | 190 |
| Problems | 191 |

CHAPTER 9

| | |
|--------------------------------|-----|
| Fresh Concrete | 193 |
| 9.1 Workability | 194 |
| 9.2 Measurement of Workability | 202 |
| 9.3 Setting of Concrete | 210 |
| 9.4 Tests of Fresh Concrete | 213 |
| Bibliography | 219 |
| Problems | 219 |

CHAPTER 10

| | |
|---------------------------------|-----|
| Proportioning Concrete Mixes | 221 |
| 10.1 Basic Considerations | 221 |
| 10.2 Fundamentals of Mix Design | 222 |
| 10.3 ACI Method of Mix Design | 226 |
| Bibliography | 240 |
| Problems | 241 |

CHAPTER 11

| | |
|---|-----|
| Concrete Construction Practices | 243 |
| 11.1 Batching and Mixing | 243 |
| 11.2 Transportation | 250 |
| 11.3 Placement of Concrete | 256 |
| 11.4 Finishing Concrete | 276 |
| 11.5 Special Aspects of Handling Concrete | 279 |
| Bibliography | 284 |
| Problems | 286 |

CHAPTER 12

| | |
|--------------------------------------|-----|
| Curing | 287 |
| 12.1 Curing at Ambient Temperatures | 287 |
| 12.2 Curing at Elevated Temperatures | 295 |
| Bibliography | 300 |
| Problems | 301 |

CHAPTER 13

| | |
|--|-----|
| Response of Concrete to Stress | 303 |
| 13.1 Interfacial Transition Zone (ITZ) | 304 |
| 13.2 Modulus of Elasticity | 306 |
| 13.3 Tension and Fracture | 315 |
| 13.4 Compression | 327 |
| 13.5 Cyclic Loading | 338 |
| 13.6 Multiaxial States of Stress | 346 |
| 13.7 Factors Affecting Strength | 350 |
| Bibliography | 359 |
| Problems | 361 |

CHAPTER 14

| | |
|-------------------------------------|-----|
| Testing of Hardened Concrete | 363 |
| 14.1 Need for "Standard" Tests | 363 |
| 14.2 Significance of Tests | 364 |
| 14.3 Tests for Compressive Strength | 366 |
| 14.4 Other Concrete Tests | 375 |
| 14.5 Assessment of Concrete Quality | 384 |
| Bibliography | 398 |
| Problems | 399 |

CHAPTER 15

| | |
|---|-----|
| Quality Control | 401 |
| 15.1 Measurement of Variability | 402 |
| 15.2 Quality-Control Charts | 409 |
| 15.3 Failure to Meet Specified Requirements | 412 |
| Bibliography | 414 |
| Problems | 415 |

CHAPTER 16

| | |
|--|-----|
| Time-Dependent Deformation | 417 |
| 16.1 Plastic Shrinkage | 417 |
| 16.2 Drying Shrinkage | 418 |
| 16.3 Strain-Rate Effects | 432 |
| 16.4 Creep of Concrete | 440 |
| 16.5 Prediction of Shrinkage and Creep | 453 |
| Bibliography | 456 |
| Problems | 457 |

CHAPTER 17

| | |
|------------------------------|-----|
| Other Properties of Concrete | 459 |
| 17.1 Thermal Properties | 459 |
| 17.2 Resistance to Wear | 470 |
| 17.3 Other properties | 473 |
| Bibliography | 476 |
| Problems | 476 |

CHAPTER 18

| | |
|---|-----|
| Durability | 477 |
| 18.1 Permeability of Concrete | 477 |
| 18.2 Chemical Transport | 483 |
| 18.3 Chemical Attack | 485 |
| 18.4 Physical Attack | 499 |
| 18.5 Cracking in Concrete | 505 |
| 18.6 Repair and Maintenance of Concrete | 509 |
| Bibliography | 513 |
| Problems | 514 |

CHAPTER 19

| | |
|--|-----|
| High-Strength Concrete | 517 |
| 19.1 Materials Selection and Proportioning | 518 |
| 19.2 Construction | 534 |
| 19.3 Properties | 535 |
| Bibliography | 544 |
| Problems | 545 |

CHAPTER 20

| | |
|------------------------------------|-----|
| Concretes for Special Applications | 547 |
| 20.1 Lightweight Concretes | 547 |
| 20.2 Heavyweight Concretes | 562 |
| 20.3 Architectural Concretes | 564 |
| 20.4 Other Types of Concretes | 576 |
| Bibliography | 581 |
| Problems | 582 |

CHAPTER 21

| | |
|-----------------------------------|-----|
| Cement–Polymer Composites | 583 |
| 21.1 Latex-Modified Concrete | 584 |
| 21.2 Polymer-Impregnated Concrete | 589 |
| 21.3 Organoceramics | 595 |
| Bibliography | 598 |
| Problems | 598 |

CHAPTER 22

| | |
|---|-----|
| Fiber Reinforced Concrete | 599 |
| 22.1 Definitions | 602 |
| 22.2 Fiber-Matrix Bond | 603 |
| 22.3 Mechanics of Fiber Reinforcement | 604 |
| 22.4 Fabrication of FRC | 606 |
| 22.5 Properties of Fiber Reinforced Concrete | 607 |
| 22.6 Applications of FRC | 616 |
| Bibliography | 617 |
| Problems | 617 |
| Appendix—Tests and Specifications for Concrete and Its Constituents | 619 |
| Solutions to Numerical Problems | 625 |
| Index | 629 |
