

FOURTH EDITION

# Arboriculture

Integrated Management of Landscape Trees, Shrubs, and Vines

Richard W. Harris • James R. Clark • Nelda P. Matheny

# Contents

Preface

xi

## 1 Introduction to Arboriculture 1

---

Arboriculture	1	<i>Arboriculture and Sustainable Urban</i>	
Arboriculture in Practice	2	<i>Forests</i>	7
<i>Regulation of Tree Care Activities</i>	4	The Guiding Principles of Arboriculture	8
Relationship of Arboriculture to Urban		Review	12
Forests and Urban Forestry	6	Further Reading	12
<i>Urban Forestry</i>	6		

## 2 Plant Structure and Function 13

---

Mechanical Design of Trees	14	Branch Attachment	36
Crown Development	15	Palms	38
<i>Shoots</i>	15	Reproductive Development	40
<i>Buds</i>	15	<i>Angiosperm Flowers</i>	40
<i>Shoot Elongation</i>	16	<i>Gymnosperm Flowers</i>	41
<i>Patterns of Shoot Elongation</i>	18	Tree Death	42
The Leaf	19	<i>How Trees Die</i>	42
The Crown	20	Overview of Basic Physiological	
<i>Form: Excurrent, Decurrent, and Apical</i>		Processes	43
<i>Control</i>	20	<i>Photosynthesis</i>	43
The Root	23	<i>Respiration</i>	43
<i>Roots and Soil Organisms</i>	24	<i>Transpiration</i>	44
<i>Root Development</i>	26	Control Mechanisms of Growth and	
<i>Size of Root Systems</i>	27	Development	44
<i>Roots and Underground Pipes</i>	28	<i>Genetic Controls</i>	44
<i>Girdling Roots</i>	28	<i>Environmental Controls</i>	45
The Trunk	29	<i>Time</i>	46
<i>Xylem</i>	30	<i>Plant Growth Regulators</i>	48
<i>Phloem and Bark</i>	31	Integration of Growth over Time	49
<i>Trunk Taper</i>	31	<i>Root-Shoot Ratio</i>	50
<i>Compartmentalization</i>	34	Review	51
<i>Wood Decay</i>	35	Further Reading	51

## 3 Site Evaluation: Climate and Environment 52

---

Plant Climates: Temperature	53	Dew	68
<i>Cold Temperatures</i>	55	<i>Drought</i>	68
<i>Lowest Temperature Expectable</i>	57	<i>Excess Moisture</i>	68
<i>Spring and Fall Cold</i>	58	<i>Hail</i>	69
<i>Protecting against Frosts</i>	60	<i>Snow and Glaze Ice</i>	69
<i>Winter Chilling and Rest</i>	62	Wind	69
<i>High Temperatures</i>	64	<i>Plant Damage</i>	70
Light: Radiation	64	<i>Transpiration</i>	70
<i>Photosynthesis</i>	65	<i>Photosynthesis</i>	71
<i>Phototropism</i>	65	<i>Windchill Factor</i>	71
<i>Photoperiodism</i>	65	Urban Climate	71
<i>Night Lighting</i>	66	Review	72
<i>Transpiration</i>	67	Further Reading	73
Moisture	67		
<i>Rain</i>	67		
<i>Fog</i>	67		

## 4 Planting Site: Soil and Water 74

---

Evaluation of Soils	75	<i>Evaluating Site Soils</i>	91
<i>Soil Formation</i>	75	Water Quality	96
<i>Soil Physical Characteristics</i>	77	<i>Evaluating Water Quality</i>	97
<i>Chemical Properties of Soils</i>	80	<i>Selection of Sites Suitable for Irrigation</i>	
<i>Biological Properties of Soil</i>	83	<i>with Recycled Water</i>	99
<i>Soil Organic Matter</i>	85	Review	100
<i>Soil Quality and Health</i>	87	Further Reading	101
<i>Urban Soils</i>	88		

## 5 Benefits of Trees 102

---

Air Quality	103	<i>Energy Conservation through Strategic</i>	
<i>Primary Atmospheric Contaminants</i>	103	<i>Tree Planting</i>	109
<i>Pollutants from Trees—Biogenic Volatile</i>		Storm Water Runoff and Erosion	
<i>Organic Compounds</i>	103	Control	110
<i>Air Purification by Trees</i>	103	Noise Reduction	111
<i>Carbon Uptake and Storage</i>	104	Psychological and Social Benefits of Trees	111
Air Temperature, Wind, and Energy		<i>The Restorative Power of Nature</i>	111
Savings	105	<i>Urban Forests and Human Behavior</i>	112
<i>Trees and Wind</i>	105	<i>Summary of Psychological and Social</i>	
<i>Energy Conservation—Direct Benefits</i>	106	<i>Benefits of Trees</i>	113
<i>Energy Conservation—Indirect Benefits</i>	108	Economic Values	113
<i>Energy Conservation—Deferred Costs</i>		<i>Appraisal of the Value of Landscape Trees</i>	114
<i>of Energy Production</i>	109	<i>Other Approaches to Value</i>	114

The True and Full Accounting of the Urban Forest—Cost—Benefit Analysis	115	Further Reading	116
Review	116	A Final Note	118

## 6 Plant Selection 118

---

Selecting the Right Plant	118	<i>Root Characteristics</i>	126
<i>Inherent Characteristics</i>	119	<i>The Future</i>	130
<i>Growth Habit and Size</i>	119	<i>Top and Trunk Characteristics</i>	130
<i>Plant Features</i>	122	<i>Top-to-Root Relationships</i>	130
<i>Native Plants</i>	123	<i>Health</i>	133
<i>Plant Selection Programs</i>	124	<i>Inspecting Plants</i>	133
Sources and Size of Planting Stock	124	<i>Additional Thoughts</i>	134
Performance Following Planting	125	Review	135
Selecting Quality Plants	126	Further Reading	136

## 7 Modifying and Managing the Site 137

---

Modifying Soil Physical Properties	137	Enhancing and Maintaining Soil Organic Matter	158
<i>Modifying Soil Texture and Improving Structure</i>	138	<i>Organic Soil Amendments</i>	159
<i>Improving Surface Drainage</i>	146	<i>Mulches</i>	162
<i>Improving Internal Drainage</i>	147	Improving the Biological Activity of Soil	175
<i>Improving Soil Moisture Conditions</i>	151	<i>Improving Symbiotic Associations</i>	175
Modifying Soil Chemical Properties	152	<i>Applying Mycorrhizal Fungi to the Landscape</i>	178
<i>Adjusting Soil Reaction</i>	152	Review	180
<i>Reclaiming Saline Soils</i>	153	Further Reading	181
<i>Reclaiming Sodic and Saline-Sodic Soils</i>	157		

## 8 Planting 182

---

Seeds, Liner Plants, and Cuttings	182	<i>Pruning</i>	191
<i>Planting Seed</i>	182	<i>Staking</i>	192
<i>Planting Liner Plants</i>	183	<i>Alternatives to Support Staking</i>	198
<i>Sticking Cuttings</i>	184	<i>Treeselters</i>	199
Young Plants	184	Care Following Planting	201
<i>Season to Plant</i>	184	<i>Water</i>	201
<i>Handling Plants before Planting</i>	185	<i>Turf</i>	202
<i>Preparing the Planting Hole</i>	185	<i>Bedding and Ground-Cover Plants</i>	204
<i>Pruning Roots</i>	186	<i>Weed Management</i>	204
<i>Setting the Plant</i>	188	<i>Cultivation</i>	205
<i>Backfilling</i>	189	<i>Effects of Bare Soil around Plants</i>	206
<i>Treatments That May Enhance Rooting</i>	189	Review	206
<i>Wire Baskets</i>	190	Further Reading	207

## 9 Transplanting Large Plants 208

---

Selection of Plants	208	Planting	216
<i>Species</i>	208	<i>Protecting the Trunk</i>	217
<i>Size and Quality</i>	209	<i>Watering and Mulching</i>	217
Site Characteristics	209	<i>Pruning</i>	218
Season of Transplanting	209	Transplanting Palms	218
Methods of Transplanting	210	<i>Preparing to Move</i>	218
<i>Bare Root</i>	210	<i>Planting</i>	220
<i>Ball-in-Burlap</i>	210	<i>Postplanting Care</i>	220
<i>Frozen Root Ball</i>	212	Evaluating Success	220
<i>Bare Root Ball</i>	213	Review	221
<i>Box</i>	213	Further Reading	221
<i>Mechanical Tree Movers</i>	215		

## 10 Special Management Situations 222

---

Trees in Pavement	222	Managing Fire-Safe Landscapes	241
<i>Providing an Environment Adequate     for Tree Growth</i>	222	<i>Basic Elements of Fire Behavior</i>	242
Root-Pavement Conflicts	227	<i>Managing Fire Fuels</i>	242
<i>Preventing Root-Pavement Conflicts</i>	228	<i>Evaluating Fire-Damaged Plants</i>	242
<i>Remedial Treatment for Existing     Root-Pavement Conflicts</i>	232	<i>Community Education and Awareness</i>	244
<i>Roots and Pavement—The Future?</i>	234	Managing Forest Remnants	245
Tree Roots in Sewers	234	<i>Function of Forest Remnants</i>	246
<i>Sewer Design and Construction</i>	234	<i>Guiding Principles</i>	246
<i>Tree Planting Practices—Species     Selection and Placement</i>	134	<i>Management Goals</i>	246
<i>Mechanical Treatment to Control Roots     in Sewers</i>	236	<i>Summary of Managing Forest Remnants</i>	248
<i>Chemical Treatment to Control Roots     in Sewers</i>	236	Roots and Buildings	248
<i>Remedial Treatments to Sewer     Line</i>	237	<i>The Role of Trees in Structural Damage</i>	248
Recycling Wood Waste	237	<i>Diagnosing Tree Contribution to     Structural Damage</i>	249
<i>Material Generated</i>	237	<i>Soil Expansion</i>	250
<i>Recycling of Wood Waste</i>	237	<i>Correcting and Avoiding Problem     Situations</i>	251
<i>Composting</i>	238	Other Special Management Situations	252
<i>Recycling Tree Trunks</i>	239	<i>Planters without Natural Drainage</i>	252
<i>The Future</i>	241	<i>Areas That Are Periodically Flooded</i>	253
		<i>Landfill Sites</i>	254
		<i>Coastal Locations</i>	254
		Review	255
		Further Reading	255

## 11 Preserving Existing Trees 256

---

Why Trees Are Preserved	256	An Overview of the Land Development Process	257
Goals of Tree Preservation	256		

The Tree Preservation Process	258	<i>Construction Specifications</i>	276
<i>Conducting a Tree Survey</i>	258	Preconstruction Treatments	276
<i>Suitability for Preservation</i>	258	<i>Arboricultural Treatments to Improve</i>	
<i>Identifying a Tree Protection Zone</i>	260	<i>Health</i>	276
<i>Locating Trees on Plans</i>	261	<i>Provide Clearance for Construction</i>	
<i>Assessing Construction Impacts to Trees</i>	263	<i>Activities</i>	277
Designs to Minimize Impacts to Trees	265	<i>Protect Tree from Damage</i>	277
<i>Grading Considerations</i>	266	<i>Clear Unwanted Vegetation</i>	278
<i>Footing and Foundation Design</i>	271	Tree Protection During Construction	278
<i>Structure Design</i>	272	Review	278
<i>Utilities and Services</i>	272	Further Reading	279
<i>Installing Pavement</i>	274		

## 12 Nutrient Management 280

---

Relationships among Soil, Nutrients, and Plants	280	Nitrogen and Phosphorus and Root and Shoot Growth	300
<i>Physical Properties of Soil</i>	280	<i>Determining Nutrient Needs</i>	
<i>Chemical Properties of Soil</i>	280	<i>and Toxicity Problems</i>	301
Organic and Inorganic Sources of Nutrients	281	Fertilizer Application Methods	303
Essential Plant Nutrients	282	Time of Application	305
<i>Macronutrients</i>	282	Fertilizing Young Plants	306
<i>Micronutrients</i>	289	Fertilizing Root-Damaged Mature Trees	307
Fertilizing and Fertilizers	299	Fertilizing Palms	307
<i>Complete Fertilizers</i>	299	Potential Fertilizer Pollution	307
Plant Adaptation to Low Nutrient Levels	299	Review	308
		Further Reading	308

## 13 Water Management 309

---

Soil Water	309	Establishing a Water Management Program	323
<i>Movement of Water</i>	312	<i>Adjustments to Reference</i>	
Water Use by Plants	313	<i>Evapotranspiration (E<sub>t</sub>)</i>	324
<i>Atmospheric Demand</i>	313	<i>Putting It All Together to Start a</i>	
<i>Plant Restriction of Water Loss</i>	313	<i>Management Program</i>	326
<i>Soil Moisture Reservoir</i>	315	<i>Additional Comments</i>	327
Plant Adaptations to Natural Water Supply	315	Landscape Water Conservation	328
<i>Drought</i>	317	<i>Managing Landscapes during a</i>	
Supplying Additional Water Through Irrigation	319	<i>Drought</i>	330
<i>Determining When and How Much</i>		<i>Irrigating with Recycled Water</i>	330
<i>to Irrigate</i>	319	Antitranspirants	331
<i>Applying Water</i>	320	Review	332
<i>Managing Water for Young Trees</i>	322	Further Reading	334

## 14 Pruning 335

General Principles of Pruning	335	<i>Bonsai</i>	374
<i>Purposes of Pruning</i>	335	Coniferous Trees	375
<i>Reasons for Pruning</i>	335	<i>Whorl-Branching Species</i>	378
<i>Pruning Responses</i>	336	<i>Random-Branching Species</i>	379
<i>Pruning Techniques</i>	340	<i>Pruning Severity</i>	379
<i>Making the Pruning Cut</i>	344	<i>Columnar Conifers</i>	379
<i>Protecting Pruning Cuts</i>	347	<i>Nursery-Grown Trees</i>	380
Pruning Trees	348	<i>Young Conifers in the Landscape</i>	380
<i>Structural Strength</i>	348	Palm Trees	380
<i>Long and Short Pruning</i>	350	Shrubs	383
<i>Long Pruning: Natural</i>	351	<i>General Shrub Pruning Considerations</i>	383
<i>Training Young Trees</i>	351	<i>Pruning Deciduous Shrubs</i>	383
<i>Pruning at Planting</i>	354	<i>Pruning Evergreen Shrubs</i>	384
<i>Training in the Landscape</i>	354	<i>Shrubs into Small Trees</i>	385
<i>Pruning Mature Trees</i>	360	<i>Hedges</i>	385
Short Pruning	369	<i>Roses (Rosa)</i>	387
<i>Screen (Curtain) Pruning</i>	369	Vines	387
<i>Pollard</i>	370	Review	390
<i>Topiary</i>	373	Further Reading	391
<i>Pleach</i>	374		

## 15 Control of Plant Growth 392

Stimulation of Growth	392	Killing Woody Plants	401
Chemical Control of Plant Height	392	Chemical Control of Flowering, Fruit Set, and Mistletoes	403
<i>Growth Control Mechanisms</i>	392	Review	404
Chemical Control of Trunk Sprouts	400		

## 16 Tree Hazard Management 405

Components of Hazard Evaluations	405	<i>Frost Cracks and Lightning Scars</i>	415
<i>Inspection Period</i>	408	<i>Dead Trees and Branches</i>	415
Factors Influencing Tree Failure	409	<i>Root Defects</i>	415
<i>Species</i>	409	<i>Cankers</i>	416
<i>Size and Age</i>	411	<i>Decay</i>	417
<i>Site</i>	411	Evaluating the Potential for Failure	
<i>Maintenance Practices</i>	412	Caused by Decay	418
<i>Defects</i>	412	<i>Direct Methods of Decay Detection</i>	418
Evaluating Defects	412	<i>Selecting Sampling Locations</i>	425
<i>Visual Tree Assessment</i>	412	<i>Evaluating Strength Loss from Decay</i>	425
<i>Tree Structure</i>	413	Evaluating the Potential for Windthrow	426
<i>Increased Exposure</i>	415	Evaluating the Potential for Summer Branch Drop	428
<i>Leaning Trees</i>	415		

Evaluating Targets	429	Hazard Abatement	430
Tree Hazard Management	429	Review	432
<i>Hazard Rating Systems</i>	430	Further Reading	432

## 17 Preventive Maintenance and Repair 434

---

Tree Support Systems	434	Care of Wounds and Cavities	449
<i>A Note of Caution on Use of Support</i>		<i>Injection Wounds</i>	451
<i>Systems</i>	435	<i>Caring for Trees with Wounds</i>	452
<i>Cabling</i>	437	Cavities	454
<i>Bracing</i>	442	<i>Treating Cavities</i>	454
<i>Sling Systems</i>	444	Review	455
<i>Guying</i>	444	Further Reading	455
<i>Propping</i>	446		
<i>Lightning Protection</i>	447		

## 18 Diagnosing Plant Problems 456

---

The Diagnosis	456	<i>Lightning</i>	470
Evaluating Symptoms and Signs	456	<i>Nutrient Deficiency</i>	471
<i>Distinguishing What Is Normal and</i>		<i>Problems Related to Soil and Roots</i>	472
<i>Abnormal</i>	459	<i>Air Quality</i>	474
<i>A Diagnostic Approach</i>	462	Biotic Agents	476
<i>Diagnostic Tools</i>	463	<i>Leaf Diseases</i>	478
<i>Collecting Samples</i>	465	<i>Cankers</i>	478
Identifying Common Plant Problems	465	<i>Causal Agents</i>	479
Abiotic Agents	466	Sources of Help	486
<i>Mechanical Injury</i>	466	Review	487
<i>Chemical Injury</i>	467	Further Reading	488
<i>Thermal Injury</i>	470		

## 19 Plant Health Care: The Integrated Management of Landscape Trees, Shrubs, and Vines 501

---

Integrated Pest Management	502	Control Options	506
Integrated Pest Management and its		<i>Regulatory Control</i>	506
Application to Arboriculture	504	<i>Genetic Control</i>	506
<i>Key Pest—Key Plant—Key Stress</i>	504	<i>Biological Control</i>	506
<i>Action Thresholds</i>	504	<i>Cultural Control</i>	507
<i>Monitoring</i>	505	<i>Chemical Control</i>	508

Plant Health Care in Practice	511	<i>The Management of Mature Trees</i>	516
<i>The Integrated Management of Oak Wilt</i>	511	Review	518
<i>The Integrated Management of Vegetation along Transmission Rights-of-Way</i>	514	Further Reading	518

---

## Appendices

---

I. Specifications for Acceptance of Landscape Nursery Trees	519	II. Pruning Specifications	521
		III. Measurement Conversions	523
		IV. Representative Cold Resistant Plants for Different Climate Zones	524

---

## Glossary 525

---

---

## Bibliography 535

---

---

## Index 563

---
