

The background of the cover is a photograph of a steep, forested hillside. A large section of the hillside has eroded, revealing a mass of brown soil and rocks. In the foreground, a gravel road curves to the right. A white SUV is parked on the road with its rear door open. Two people are standing on the gravel near the SUV, looking towards the landslide. The sky is overcast.

# **GEO TECHNICAL ENGINEERING INVESTIGATION HANDBOOK**

**Second Edition**

<b>Chapter 1. Introduction</b> .....	1
1.1 Basic Considerations .....	1
1.1.1 Human Activities and the Geologic Interface .....	1
1.1.2 Investigation .....	2
1.1.3 Objectives .....	2
1.2 Scope.....	3
1.2.1 General.....	3
1.2.2 Investigation Methods and Procedures (Part I) .....	3
1.2.3 Characteristics of Geologic Materials and Formations (Part II) .....	5
1.2.4 Geologic Hazards (Part III).....	7
1.2.5 Appendices .....	8
1.3 Geotechnical Investigation: Objectives, Stages, Scope, and Planning .....	9
1.3.1 Basic Objectives .....	9
1.3.2 Stages of Investigation .....	9
1.3.3 Phases of Investigation .....	9
1.3.4 Study Planning .....	11
<b>PART I: Investigation Methods and Procedures</b> .....	13
<b>Chapter 2. Exploration</b> .....	15
2.1 Introduction.....	15
2.1.1 Objectives .....	15
2.1.2 Methodology.....	15
2.1.3 Scope .....	15
2.2 Surface Mapping.....	17
2.2.1 General.....	17
2.2.2 Research Data .....	17
2.2.3 Remotely Sensed Imagery .....	21
2.2.4 Terrain Analysis .....	28
2.2.5 Site Reconnaissance .....	41
2.2.6 Preparation of Subsurface Exploration Program .....	43
2.3 Subsurface Exploration .....	43
2.3.1 General.....	43
2.3.2 Geophysical methods .....	44
2.3.3 Reconnaissance Methods .....	66
2.3.4 Continuous CPT(ASTM D5778).....	66
2.3.5 Test and Core Borings .....	74
2.3.6 Borehole Remote-Sensing and Logging .....	93
2.3.7 Groundwater and Seepage Detection.....	96
2.4 Recovery of Samples and Cores .....	99
2.4.1 General.....	99
2.4.2 Test Boring Soil Sampling.....	101

2.4.3	Miscellaneous Soil-Sampling Methods.....	109
2.4.4	Subaqueous Sampling .....	111
2.4.5	Rock Coring .....	114
2.4.6	Sample and Core Treatment.....	126
2.4.7	Data Presentation.....	131
References	.....	135
Further Reading	.....	137

**Chapter 3. Measurement of Properties** .....139

3.1	Introduction.....	139
3.1.1	Objectives .....	139
3.1.2	Geotechnical Properties .....	139
3.1.3	Testing Methods Summarized .....	140
3.2	Basic and Index Properties .....	147
3.2.1	Intact Rock .....	147
3.2.2	Rock Masses .....	150
3.2.3	Soils .....	151
3.3	Hydraulic Properties (Permeability) .....	163
3.3.1	Introduction .....	163
3.3.2	Estimating the Permeability Coefficient $k$ .....	164
3.3.3	Laboratory Tests.....	166
3.3.4	<i>In Situ</i> Testing.....	170
3.4	Rupture Strength.....	174
3.4.1	Introduction .....	174
3.4.2	Shear Strength Relationships .....	179
3.4.3	Rock Strength Measurements .....	191
3.4.4	Soil Strength Measurements.....	199
3.4.5	Soil Penetration Tests.....	211
3.5	Deformation without Rupture .....	218
3.5.1	Introduction .....	218
3.5.2	Deformation Relationships.....	223
3.5.3	Rock Deformation Measurements.....	227
3.5.4	Soil Deformation Measurements (Static) .....	235
3.5.5	Dynamic Deformation Moduli (Soils) .....	251
3.6	Typical Values of Basic, Index, and Engineering Properties .....	254
3.6.1	Rock Masses .....	254
3.6.2	Weathered Rock and Residual Soil .....	255
3.6.3	Cohesionless Soils .....	255
3.6.4	Clay Soils.....	255
3.6.5	Compacted Materials .....	263
References	.....	263
Further Reading	.....	269

**Chapter 4. Field Instrumentation** .....271

4.1	Introduction.....	271
4.1.1	Methods and Instruments Summarized.....	271
4.1.2	Objectives .....	271
4.1.3	Applications .....	271
4.1.4	Program Elements .....	275
4.1.5	Transducers.....	277

4.2	Surface Movements .....	279
4.2.1	Forms and Significance .....	279
4.2.2	Surveying .....	281
4.2.3	Tiltmeters.....	285
4.2.4	Extensometers.....	287
4.2.5	Vibration Monitoring.....	290
4.3	Subsurface Deformations .....	291
4.3.1	Forms and Significance .....	291
4.3.2	Vertical Displacement .....	292
4.3.3	Lateral Displacement.....	297
4.3.4	Linear Strain Gradients.....	302
4.3.5	Acoustical Emissions.....	304
4.4	<i>In Situ</i> Pressures and Stresses .....	308
4.4.1	General.....	308
4.4.2	Pore-Water Pressures.....	309
4.4.3	Loads and Stresses.....	314
4.4.4	Residual Rock Stresses .....	317
4.5	Instrumentation Arrays for Typical Problems .....	320
4.5.1	Importance .....	320
4.5.2	Settlement of Structures .....	320
4.5.3	Excavation Retention.....	323
4.5.4	Earth Dams .....	324
4.5.5	Tunnels, Caverns, and Mines.....	326
4.5.6	Natural and Cut Slopes.....	329
4.5.7	Fault Movements .....	332
	References .....	332
	Further Reading .....	334
	Catalogs .....	334

**PART II: Characteristics of Geologic Materials and Formations .....** 335

<b>Chapter 5. Rock and Soil: Identification and Classification .....</b>	<b>337</b>
5.1 Introduction.....	337
5.1.1 The Geologic Materials .....	337
5.1.2 Rock Groups and Classes .....	338
5.1.3 Soil Groups and Classes .....	339
5.2 Rocks.....	339
5.2.1 The Three Groups .....	339
5.2.2 Petrographic Identification.....	340
5.2.3 Igneous Rocks.....	346
5.2.4 Sedimentary Rocks .....	348
5.2.5 Metamorphic Rocks.....	361
5.2.6 Engineering Characteristics of Rock Masses .....	364
5.2.7 Rock-Mass Description and Classification.....	368
5.3 Soils.....	383
5.3.1 Components .....	383
5.3.2 Granular or Cohesionless Soils .....	384
5.3.3 Clays.....	385
5.3.4 Organic Materials.....	390

5.3.5	Related Engineering Properties .....	391
5.3.6	Classification and Description of Soils .....	395
References	.....	403
Further Reading	.....	404

<b>Chapter 6. Rock-Mass Characteristics</b> .....	<b>405</b>
6.1 Introduction.....	405
6.1.1 Characteristics Summarized.....	405
6.1.2 Terrain Analysis .....	406
6.1.3 Mapping and Presenting Structural Features .....	411
6.2 Original Rock-Mass Forms .....	418
6.2.1 Significance .....	418
6.2.2 Igneous Rocks.....	419
6.2.3 Sedimentary Rocks .....	420
6.2.4 Metamorphic Rock.....	428
6.3 Deformation by Folding .....	430
6.3.1 General.....	430
6.3.2 Fracture Cleavage .....	432
6.3.3 Landforms .....	433
6.4 Jointing .....	437
6.4.1 General.....	437
6.4.2 Forms and Characteristics .....	438
6.4.3 Jointing in Various Rock Types .....	441
6.4.4 Block Behavior .....	446
6.5 Faults.....	451
6.5.1 General.....	451
6.5.2 Terminology .....	451
6.5.3 Characteristics and Identification .....	453
6.5.4 Engineering Significance.....	454
6.5.5 Investigation Methodology Summarized .....	460
6.6 Residual Stresses.....	462
6.6.1 General.....	462
6.6.2 Tensile Straining.....	463
6.6.3 Rock Bursts .....	463
6.6.4 Anticipating Unstable Conditions.....	464
6.7 Alteration of Rock.....	465
6.7.1 General.....	465
6.7.2 Factors Affecting Decomposition .....	467
6.7.3 Weathering Profile in Various Rock Types.....	475
References .....	489
Further Reading .....	491

<b>Chapter 7. Soil Formations: Geologic Classes and Characteristics</b> .....	<b>493</b>
7.1 Introduction .....	493
7.1.1 Geologic Classification of Soil Formations .....	493
7.1.2 Terrain Analysis .....	496
7.2 Residual Soils .....	500
7.2.1 Introduction .....	500
7.2.2 Igneous and Metamorphic Rocks .....	503
7.2.3 Sedimentary Rocks .....	508

7.3	Colluvial Deposits.....	511
7.3.1	Introduction .....	511
7.3.2	Recognition .....	512
7.3.3	Engineering Significance.....	514
7.4	Alluvial Deposits .....	516
7.4.1	Fluvial Environment .....	516
7.4.2	Estuarine Environment .....	529
7.4.3	Coastline Environment .....	534
7.4.4	Coastal Plain Deposits.....	542
7.4.5	Lacustrine Environment (Nonglacial) .....	550
7.4.6	Marine Environment .....	556
7.5	Eolian Deposits .....	557
7.5.1	Eolian Processes .....	557
7.5.2	Dunes and Sand Sheets.....	559
7.5.3	Loess.....	563
7.5.4	Volcanic Clays.....	568
7.6	Glacial Deposits .....	568
7.6.1	Glacial Activity.....	568
7.6.2	Till.....	572
7.6.3	Glacial–Fluvial Stratified Drift.....	577
7.6.4	Glacial–Lacustrine Soils .....	580
7.6.5	Glacial–Marine Clays .....	590
7.7	Secondary Deposits .....	593
7.7.1	Introduction .....	593
7.7.2	Duricrusts .....	593
7.7.3	Permafrost and Seasonal Frost.....	599
7.8	Pedological Soils and Plant Indicators .....	602
7.8.1	Introduction .....	602
7.8.2	Pedological Classifications .....	603
7.8.3	Plant Indicators .....	610
	References .....	612
	Further Reading .....	615
<b>Chapter 8. Water: Surface and Subsurface .....</b>		<b>617</b>
8.1	Introduction.....	617
8.1.1	General.....	617
8.1.2	Engineering Aspects .....	617
8.2	Surface Water.....	618
8.2.1	Surface Hydrology.....	618
8.2.2	Erosion.....	621
8.2.3	Flooding.....	627
8.3	Subsurface Water (Groundwater).....	632
8.3.1	Occurrence .....	632
8.3.2	Subsurface Flow .....	638
8.3.3	Flow Systems and Analysis .....	646
8.3.4	Practical Aspects of Groundwater.....	653
8.4	Groundwater and Seepage Control .....	659
8.4.1	Introduction .....	659
8.4.2	Cutoffs and Barriers.....	661
8.4.3	Dewatering .....	669
8.4.4	Drains.....	674

8.4.5	Filters .....	676
8.4.6	Surface Treatments.....	677
8.4.7	Typical Solutions to Engineering Problems .....	677
8.5	Environmental Conservation .....	687
8.5.1	Water Conservation and Flood Control .....	687
8.5.2	Groundwater Pollution Control .....	690
8.5.3	Environmental Planning Aspects Summarized .....	692
References	.....	693
Further Reading	.....	695

**PART III: Geologic Hazards .....** 697

**Chapter 9. Landslides and Other Slope Failures .....** 699

9.1	Introduction.....	699
9.1.1	General.....	699
9.1.2	Hazard Recognition.....	700
9.1.3	Rating the Hazard and the Risk .....	705
9.1.4	Elements of Slope Stability .....	707
9.2	Slope Failure Form Characteristics .....	714
9.2.1	Creep .....	714
9.2.2	Falls .....	715
9.2.3	Planar Slides in Rock Masses.....	716
9.2.4	Rotational Slides in Rock .....	723
9.2.5	Rotational Slides in Soils.....	723
9.2.6	Lateral Spreading and Progressive Failure .....	725
9.2.7	Debris Slides .....	741
9.2.8	Debris Avalanches .....	743
9.2.9	Debris Flows .....	748
9.2.10	Rock-Fragment Flows .....	748
9.2.11	Soil and Mud Flows.....	749
9.2.12	Seafloor Instability .....	753
9.3	Assessment of Slopes .....	755
9.3.1	General.....	755
9.3.2	Stability Analysis: A Brief Review .....	755
9.3.3	Slope Characteristics .....	772
9.3.4	Weather Factors .....	783
9.3.5	Hazard Maps and Risk Assessment .....	786
9.4	Treatment of Slopes .....	788
9.4.1	General Concepts .....	788
9.4.2	Changing Slope Geometry .....	793
9.4.3	Surface Water Control .....	797
9.4.4	Internal Seepage Control .....	798
9.4.5	Side-Hill Fills .....	802
9.4.6	Retention .....	804
9.5	Investigation: A Review.....	813
9.5.1	General.....	813
9.5.2	Regional and Total Slope Studies .....	819
9.5.3	Detailed Study of Cut, Fill, or Failure Area .....	822
9.5.4	Case Study .....	823
9.5.5	Instrumentation and Monitoring.....	826

References .....	828
Further Reading .....	831
<b>Chapter 10. Ground Subsidence, Collapse, and Heave .....</b>	<b>833</b>
10.1 Introduction .....	833
10.1.1 General.....	833
10.1.2 The Hazards .....	833
10.1.3 Scope and Objectives.....	833
10.2 Groundwater and Oil Extraction .....	834
10.2.1 Subsurface Effects .....	834
10.2.2 Surface Effects.....	835
10.2.3 Physiographic Occurrence .....	836
10.2.4 Significant Examples .....	837
10.2.5 Subsidence Prevention and Control .....	840
10.3 Subsurface Mining .....	844
10.3.1 Subsidence Occurrence .....	844
10.3.2 Longwall Panel Extraction .....	847
10.3.3 Room and Pillar Method (Also "Breast and Heading" Method) .....	848
10.3.4 Strength Properties of Coal .....	851
10.3.5 Investigation of Existing Mines .....	852
10.3.6 Subsidence Prevention and Control and Foundation Support.....	855
10.4 Solution of Rock .....	856
10.4.1 General.....	856
10.4.2 Solution Phenomenon and Development .....	856
10.4.3 Investigation .....	861
10.4.4 Support of Surface Structures .....	864
10.5 Soil Subsidence and Collapse .....	865
10.5.1 General.....	865
10.5.2 Collapsible or Metastable Soils .....	865
10.5.3 Predicting Collapse Potential.....	872
10.5.4 Treatment and Support of Structures .....	874
10.5.5 Piping Soils and Dispersive Clays.....	876
10.6 Heave in Soil and Rock .....	879
10.6.1 General.....	879
10.6.2 Swelling in Soils .....	880
10.6.3 Swelling in Rock Masses.....	883
10.6.4 Treatments to Prevent or Minimize Swelling and Heave .....	886
References .....	887
Further Reading .....	891
<b>Chapter 11. Earthquakes .....</b>	<b>893</b>
11.1 Introduction .....	893
11.1.1 General.....	893
11.1.2 Geographic Distribution .....	894
11.1.3 Objectives and Scope.....	899
11.2 Earthquake Elements .....	899
11.2.1 The Source.....	899
11.2.2 Seismic Waves.....	902
11.2.3 Ground Motion.....	905
11.2.4 Intensity and Magnitude .....	910

11.2.5	Attenuation .....	916
11.2.6	Amplification .....	919
11.2.7	Duration .....	923
11.2.8	Recurrence and Forecasting .....	924
11.3	Surface Effects on the Geologic Environment .....	929
11.3.1	Faulting .....	929
11.3.2	Soil Behavior .....	941
11.3.3	Subsidence and Liquefaction .....	944
11.3.4	Slope Failures .....	951
11.3.5	Tsunamis and Seiches: Response of Large Water Bodies.....	956
11.3.6	The Volcano Hazard .....	958
11.4	Earthquake-Resistant Design: An Overview .....	959
11.4.1	Introduction .....	959
11.4.2	Structural Response .....	961
11.4.3	Site Ground-Response Factors .....	965
11.4.4	Response Spectra .....	967
11.4.5	Seismic Hazard Analysis .....	970
11.4.6	The Design Earthquake.....	972
11.4.7	Soil-Structure Interaction Analysis (SSI) .....	978
11.5	Investigation: Important Structures in High-Hazard Areas .....	983
11.5.1	Introduction .....	983
11.5.2	Preliminary Phase .....	983
11.5.3	Detailed Study of Regional and Local Geologic Conditions.....	986
11.5.4	Evaluation and Analysis .....	988
11.5.5	Limitations in the Present State of the Art.....	989
	References .....	991
	Further Reading .....	995
<b>APPENDICES .....</b>		<b>997</b>
<b>Appendix A. The Earth and Geologic History .....</b>		<b>997</b>
A.1	Significance to the Engineer .....	997
A.2	The Earth .....	997
A.2.1	General.....	997
A.2.2	Cross Section.....	997
A.3	Global Tectonics .....	998
A.3.1	General.....	998
A.3.2	The Hypotheses .....	998
A.4	Geologic History .....	999
A.4.1	North America: Provides a General Illustration .....	999
