

INTERNATIONAL EDITION

DISCRETE MATHEMATICS

Richard Johnsonbaugh

CONTENTS

Preface XI

1 → Logic and Proofs 1

- 1.1 Propositions 2
- 1.2 Conditional Propositions and Logical Equivalence 8
- 1.3 Quantifiers 17
- 1.4 Nested Quantifiers 29
- 1.5 Proofs 36
- 1.6 Resolution Proofs[†] 50
- 1.7 Mathematical Induction 53
 - Problem-Solving Corner:** Mathematical Induction 63
- 1.8 Strong Form of Induction and the Well-Ordering Property 65
 - Notes 70
 - Chapter Review 71
 - Chapter Self-Test 73
 - Computer Exercises 75

2 → The Language of Mathematics 76

- 2.1 Sets 76
- 2.2 Functions 87
 - Problem-Solving Corner:** Functions 102
- 2.3 Sequences and Strings 103
 - Notes 112
 - Chapter Review 112
 - Chapter Self-Test 114
 - Computer Exercises 115

3 → Relations 116

- 3.1 Relations 116
- 3.2 Equivalence Relations 125
 - Problem-Solving Corner:** Equivalence Relations 131
- 3.3 Matrices of Relations 132
- 3.4 Relational Databases[†] 137
 - Notes 142
 - Chapter Review 142
 - Chapter Self-Test 142
 - Computer Exercises 144

4 → Algorithms 145

- 4.1 Introduction 145
- 4.2 Examples of Algorithms 149
- 4.3 Analysis of Algorithms 156
 - Problem-Solving Corner:** Design and Analysis of an Algorithm 171
- 4.4 Recursive Algorithms 173
 - Notes 180
 - Chapter Review 180
 - Chapter Self-Test 181
 - Computer Exercises 182

5 → Introduction to Number Theory 183

- 5.1 Divisors 183
- 5.2 Representations of Integers and Integer Algorithms 192
- 5.3 The Euclidean Algorithm 205
 - Problem-Solving Corner:** Making Postage 214
- 5.4 The RSA Public-Key Cryptosystem 215
 - Notes 217
 - Chapter Review 217
 - Chapter Self-Test 218
 - Computer Exercises 219

6 → Counting Methods and the Pigeonhole Principle 220

- 6.1 Basic Principles 220
 - Problem-Solving Corner:** Counting 228
- 6.2 Permutations and Combinations 229
 - Problem-Solving Corner:** Combinations 240
- 6.3 Algorithms for Generating Permutations and Combinations 241
- 6.4 Introduction to Discrete Probability[†] 247
- 6.5 Discrete Probability Theory[†] 250
- 6.6 Generalized Permutations and Combinations 261
- 6.7 Binomial Coefficients and Combinatorial Identities 266

- 6.8** The Pigeonhole Principle 271
 - Notes 275
 - Chapter Review 275
 - Chapter Self-Test 276
 - Computer Exercises 278

7 → **Recurrence Relations** 279

- 7.1** Introduction 279
- 7.2** Solving Recurrence Relations 290
 - Problem-Solving Corner:** Recurrence Relations 302
- 7.3** Applications to the Analysis of Algorithms 305
 - Notes 315
 - Chapter Review 315
 - Chapter Self-Test 316
 - Computer Exercises 317

8 → **Graph Theory** 318

- 8.1** Introduction 318
- 8.2** Paths and Cycles 329
 - Problem-Solving Corner:** Graphs 339
- 8.3** Hamiltonian Cycles and the Traveling Salesperson Problem 340
- 8.4** A Shortest-Path Algorithm 347
- 8.5** Representations of Graphs 352
- 8.6** Isomorphisms of Graphs 356
- 8.7** Planar Graphs 363
- 8.8** Instant Insanity[†] 369
 - Notes 373
 - Chapter Review 373
 - Chapter Self-Test 375
 - Computer Exercises 377

9 → **Trees** 379

- 9.1** Introduction 379
- 9.2** Terminology and Characterizations of Trees 386
 - Problem-Solving Corner:** Trees 391
- 9.3** Spanning Trees 392
- 9.4** Minimal Spanning Trees 398
- 9.5** Binary Trees 403
- 9.6** Tree Traversals 409
- 9.7** Decision Trees and the Minimum Time for Sorting 414
- 9.8** Isomorphisms of Trees 420
- 9.9** Game Trees[†] 429
 - Notes 437
 - Chapter Review 437
 - Chapter Self-Test 439
 - Computer Exercises 442

10 → Network Models 444

- 10.1 Introduction 444
- 10.2 A Maximal Flow Algorithm 449
- 10.3 The Max Flow, Min Cut Theorem 457
- 10.4 Matching 461
 - Problem-Solving Corner:** Matching 466
 - Notes 467
 - Chapter Review 467
 - Chapter Self-Test 468
 - Computer Exercises 469

11 → Boolean Algebras and Combinatorial Circuits 470

- 11.1 Combinatorial Circuits 470
- 11.2 Properties of Combinatorial Circuits 477
- 11.3 Boolean Algebras 482
 - Problem-Solving Corner:** Boolean Algebras 486
- 11.4 Boolean Functions and Synthesis of Circuits 488
- 11.5 Applications 493
 - Notes 501
 - Chapter Review 501
 - Chapter Self-Test 502
 - Computer Exercises 504

12 → Automata, Grammars, and Languages 506

- 12.1 Sequential Circuits and Finite-State Machines 506
- 12.2 Finite-State Automata 511
- 12.3 Languages and Grammars 517
- 12.4 Nondeterministic Finite-State Automata 525
- 12.5 Relationships Between Languages and Automata 531
 - Notes 537
 - Chapter Review 538
 - Chapter Self-Test 539
 - Computer Exercises 540

13 → Computational Geometry 542

- 13.1 The Closest-Pair Problem 542
- 13.2 An Algorithm to Compute the Convex Hull 547
 - Notes 554
 - Chapter Review 554
 - Chapter Self-Test 554
 - Computer Exercises 555

A → Matrices 556

B → Algebra Review 560

C → Pseudocode 571

References 577

Hints and Solutions to Selected Exercises 582
