OCEAN MARGIN SYSTEMS

HANSE
CONFERENCE
REPORT

Springer

Contents

Introductory Paper

McCave I.N. Sedimentary Settings on Continental Margins - an Overview	1-14
Wollast R. Continental Margins - Review of Geochemical Settings	15-31
Ristow D., K. Hinz, J. Hauschild, T. Gindler, A. Berhorst and C. Bönnemann Imaging the Subsurface with 2-D and 3-D Seismic Data	33-55
Hebbeln D. State of the Art and Future Prospect of Scientific Coring and Drilling of Marine Sediments	57-66
Waldmann C. and R. Lampitt New Technologies for Ocean Margin Studies - Autonomous Instrument Carrier Systems	67-77
McPhail S. Autonomous Underwater Vehicles: Are they the Ideal Sensor Platforms for Ocean Margin Science?	79-97

Margin Building - Regulating Processes

Neves R., H. Coelho, R. Taborda and P. Pina Physical Processes and Modelling at Ocean Margins	99-123
Blondel Ph. Seabed Classification at Ocean Margins	125-141
Thomsen L. The Benthic Boundary Layer	143-155
Soetaert K., J. Middelburg, J. Wijsman, P. Herman and C. Heip Ocean Margin Early Diagenetic Processes and Models	157-177
Mienert J., C. Berndt, J.S. Laberg and T.O. Vorren Slope Instability of Continental Margins	179-193
Thomsen L., T. van Weering, P. Blondel, R. Lampitt, F. Lamy, N. McCave, S. McPhail, J. Mienert, R. Neves, L. d'Ozouville, D. Ristow, C. Waldmann and R. Wollast Margin Building - Regulating Processes	195-203

Fluid Flow and Subsurface Material Transport

Schlüter M. Fluid Flow in Continental Margin Sediments	205-217
Haese R.R. Macrobenthic Activity and its Effects on Biogeochemical Reactions and Fluxes	219-234
Sibuet M. and K. Olu-Le Roy Cold Seep Communities on Continental Margins: Structure and Quantitative Distribution Relative to Geological and Fluid Venting Patterns	235-251
Zabel M. and C. Hensen The Importance of Mineralization Processes in Surface Sediments of Continental Margins	253-267
Hinkelmann R. and R. Helmig Numerical Modelling of Transport Processes in the Subsurface	269-294
Kukowski N., M. Schlüter, R.R. Haese, C. Hensen, R. Hinkelmann, M. Sibuet and M. Zabel Subsurface Fluid Flow and Material Transport	295-306

Benthic Population Dynamics and Relationship to Sedimentary Settings

Gage J.D. Benthic Biodiversity Across and Along the Continental Margin: Patterns, Ecological and Historical Determinants, and Anthropogenic Threats	307-321
Rogers A.D. Molecular Ecology and Evolution of Slope Species	323-337
Tyler P.A. and E. Ramirez-Llodra Larval and Reproductive Strategies on European Continental Margins	339-350
Flach E.C. Factors Controlling Soft Bottom Macrofauna Along and Across European Continental Margins	351-363
Freiwald A. Reef-Forming Cold-Water Corals	365-385

- Rogers A., D. Billett, W. Berger, E. Flach, A. Freiwald, J. Gage, D. Hebbeln, C. Heip
O. Pfannkuche, E. Ramirez-Llodra, L. Medlin, M. Sibuet, K. Soetaert, O. Tendal,
A. Vanreusel and M. Wlodarska-Kowalczuk
Life at the Edge:
Achieving Prediction from Environmental Variability and Biological Variety 387-404

Microbial Systems in Sedimentary Environments

- Lochte K. and O. Pfannkuche
Processes driven by the Small Sized Organisms at the Water-Sediment Interface 405-418
- MacGregor B.J., K. Ravensschlag and R. Amann
Nucleic Acid-Based Techniques for Analyzing the Diversity, Structure, and Function of
Microbial Communities in Marine Waters and Sediments 419-438
- Henriet J.P., S. Guidard and the ODP "Proposal 573" Team
Carbonate Mounds as a Possible Example for Microbial Activity in Geological Processes 439-455
- Hinrichs K.-U. and A. Boetius
The Anaerobic Oxidation of Methane:
New Insights in Microbial Ecology and Biogeochemistry 457-477
- Boetius A., B.B. Jørgensen, R. Amann, J.P. Henriet, K.-U. Hinrichs, K. Lochte,
B.J. MacGregor and G. Voordouw
Microbial Systems in Sedimentary Environments of Continental Margins 479-495
