## Understanding Earth: An Introduction to Physical Geology 2

Introduction to Earth Systems	4
What Is Geology?	5
<b>GEO-FOCUS 1.1: The Aral Sea</b>	<b>6</b>
Geology and the Human Experience	8
How Geology Affects Our Everyday Lives	9
Natural Events	9
Economics and Politics	9
Our Role as Decision Makers	9
Consumers and Citizens	9
Sustainable Development	11
Global Geologic and Environmental Issues	11
The Origin of the Solar System and the Differentiation of Early Earth	13
Earth as a Dynamic Planet	14
Geology and the Formulation of Theories	15
Plate Tectonic Theory	16
The Rock Cycle	17
Groups of Rocks	17
The Rock Cycle and Plate Tectonics	18
Geologic Time and Uniformitarianism	19
How the Study of Geology Benefits Us	21
Geo-Recap	23

## Plate Tectonics: A Unifying Theory 26

Introduction	28
Early Ideas about Continental Drift	28
Edward Suess and <i>Glossopteris</i> Flora	29
Alfred Wegener and the Continental Drift Hypothesis	29

Evidence for Continental Drift	30
Continental Fit	30
Similarity of Rock Sequences and Mountain Ranges	30
Glacial Evidence	30
Fossil Evidence	31

### **CULTURAL CONNECTIONS: The Struggle toward Scientific Progress 33**

Paleomagnetism and Polar Wandering	33
Magnetic Reversals Related to Seafloor Spreading	35
Plate Tectonic Theory	38
The Supercontinent Cycle	39
Three Types of Plate Boundaries	39
Divergent Boundaries	39
Convergent Boundaries	41
Transform Boundaries	43
Plate Movement and Motion	43
Relative Motion and Average Rate	45
Absolute Motion	45
The Driving Mechanism of Plate Tectonics	46

### **GEO-FOCUS 2.1: Oil, Plate Tectonics, and Politics 48**

Tectonics and Natural Resources	48
Geo-Recap	49

## Minerals— The Building Blocks of Rocks 52

Introduction	54
Solid Matter	54
Elements and Atoms	54
Bonding and Compounds	56
Getting Started with Minerals	58
Naturally Occurring, Inorganic Substances	59
Mineral Crystals	59
Chemical Composition of Minerals	59
<b>GEO-FOCUS 3.1: Gold and Silver</b>	<b>60</b>
Physical Properties of Minerals	60

The Multitude of Minerals	60
Mineral Groups	61
The Silicate Minerals	63
Other Mineral Groups	65
Mineral Identification	65
Color and Luster	65
Crystal Form	66
Cleavage and Fracture	66
Hardness	67
Specific Gravity	67
Other Useful Mineral Properties	68
Where and How Minerals Form	68
The Rock-Forming Minerals	68

**CULTURAL CONNECTIONS: Human History and Minerals 69**

Mineral Resources and Reserves	70
Geo-Recap	72

## Igneous Rocks and Intrusive Igneous Activity 74

Introduction	76
The Properties and Behavior of Magma and Lava	76
Composition of Magma	76
Magma and Lava Temperatures	77
Viscosity—Resistance to Flow	77
How Magma Originates and Changes	78
Bowen's Reaction Series	78
The Origin of Magma at Spreading Ridges	79
Subduction Zones and the Origin of Magma	80
Processes That Result in Chemical Changes in Magma	81
Characteristics of Igneous Rocks	81
Igneous Rock Textures	82

**CULTURAL CONNECTIONS: Hell Helped Early Earth Science 83**

The Composition of Igneous Rocks	84
Classifying Igneous Rocks	84

**GEO-FOCUS 4.1: Little Rock, Big Story 88**

Intrusive Igneous Bodies: Plutons—Characteristics and Origins	89
Dikes and Sills	89
Laccoliths	90
Volcanic Pipes and Necks	90
Batholiths and Stocks	90
How Batholiths Are Emplaced in Earth's Crust	91
Geo-Recap	93

## Volcanism and Volcanoes 96

Introduction	98
Volcanism	98
Volcanic Gases	98

**CULTURAL CONNECTIONS: Vulcan Shapes Roman History 99**

Lava Flows	101
Pyroclastic Materials	102
Types of Volcanoes	104
Shield Volcanoes	105
Cinder Cones	106
Composite Volcanoes	107
Lava Domes	108

**GEO-FOCUS 5.1: Eruptions of Cascade Range Volcanoes 110**

Other Types of Eruptions	110
Fissure Eruptions and Basalt Plateaus	110
Pyroclastic Sheet Deposits	112
Size and Duration of Eruptions	113
Predicting Eruptions	113
Distribution of Volcanoes	115
Plate Tectonics, Volcanoes, and Plutons	116
Divergent Plate Boundaries and Igneous Activity	116
Igneous Activity at Convergent Plate Boundaries	117
Intraplate Volcanism	117
Geo-Recap	119

## Weathering, Erosion, and Soil 122

Introduction	124
Mechanical Weathering	125
Frost Action	125
Pressure Release	125
Thermal Expansion and Contraction	125
Organisms and Mechanical Weathering	126
Chemical Weathering—Decomposition of Earth Materials	127
Solution	127
Oxidation	128
Hydrolysis	129

Rates of Chemical Weathering	129
Particle Size and the Rate of Chemical Weathering	129
Climate and Chemical Weathering	129
The Importance of Parent Material	129

### **GEO-FOCUS 6.1: Industrialization and Acid Rain 130**

Soil Composition	131
The Soil Profile	133
Factors in Soil Formation	134
Climate and Soil	134
Parent Material	136
Activities of Organisms	136
The Lay of the Land—Relief and Slope	136
Time	136
Soil Degradation	136

### **CULTURAL CONNECTIONS: The Agricultural Revolution 137**

Weathering and Natural Resources	140
Geo-Recap	141

## **Sediment and Sedimentary Rocks 144**

Introduction	146
Sediment Transport and Deposition	147
From Sediment to Sedimentary Rock	148
Types of Sedimentary Rocks	149
Detrital Sedimentary Rocks	150
Chemical and Biochemical Sedimentary Rocks	151
Sedimentary Facies	152

### **CULTURAL CONNECTIONS: Deep Time 154**

Reading the Story in Sedimentary Rocks	155
Sedimentary Structures	155

### **GEO-FOCUS 7.1: Sandstone Lion 158**

Fossils	159
Determining the Depositional Environment	160
Resources in Sediments and Sedimentary Rocks	161
Petroleum and Natural Gas	161
Banded Iron Formation	162
Geo-Recap	163

## **Metamorphism and Metamorphic Rocks 166**

Introduction	168
The Agents of Metamorphism	169
Heat	169
Pressure	169
Fluid Activity	170
The Three Types of Metamorphism	170
Contact Metamorphism	170

### **CULTURAL CONNECTIONS: The Real Face of the Scientific Method 171**

Dynamic Metamorphism	173
Regional Metamorphism	173
The Classification of Metamorphic Rocks	175
Foliated Metamorphic Rocks	175

### **GEO-FOCUS 8.1: Starting Off with a Clean Slate 177**

Nonfoliated Metamorphic Rocks	178
Metamorphic Zones	179
Metamorphism and Plate Tectonics	180
Metamorphism and Natural Resources	182
Geo-Recap	183

## **Earthquakes and Earth's Interior 186**

Introduction	188
The Elastic Rebound Theory	189
Seismology	190
Where Earthquakes Occur	191
Seismic Waves	193
Body Waves	193
Surface Waves	193
How an Earthquake's Epicenter Is Located	194
Size and Strength of an Earthquake	194
Intensity	196
Magnitude	196
Effects of Earthquakes	198
Ground Shaking	198
Fire	199
Tsunami: Killer Waves	199

### **GEO-FOCUS 9.1: Designing Earthquake-Resistant Structures 200**

- Ground Failure 203
- Predicting Earthquakes 203
  - Earthquake Precursors 203
  - Earthquake Prediction Programs 204

### **CULTURAL CONNECTIONS: Responding to Earthquakes 205**

- Can Earthquakes Be Controlled? 206
- Earth's Interior 207
  - The Behavior of Seismic Waves 208
  - The Core 209
  - The Mantle 210
  - Seismic Tomography 211
  - The Crust 212
- Earth's Internal Heat 212
- Geo-Recap 213

## **Deformation and Mountain Building 216**

- Introduction 218
- Rock Deformation 219
- Strike and Dip—Determining the Orientation of Rock Layers 220
- Deformation and Geologic Structures 221
  - Folded Rock Layers 221
  - Joints 224
  - Faults 226

### **GEO-FOCUS 10.1: Geologic Maps—Their Construction and Uses 230**

- Deformation and the Origin of Mountains 232
  - Definition of Mountain 232
  - Types of Mountains 232
- Plate Tectonics and the Origin of Mountains 233
  - Plate Boundaries and Mountain Building 234
  - Terranes and the Origin of Mountains 236
- Earth's Continental Crust 237
  - Floating Continents? 237
  - The Principle of Isostasy 239
  - Isostatic Rebound 240
- Geo-Recap 241

## **Mass Wasting 244**

- Introduction 246
- Factors That Influence Mass Wasting 247
  - Slope Angle 247
  - Weathering and Climate 248
  - Water Content 248
  - Vegetation 248
  - Overloading 249

### **GEO-FOCUS 11.1: The Tragedy at Aberfan, Wales 250**

- Geology and Slope Stability 257
- Triggering Mechanisms 252
- Types of Mass Wasting 252
  - Falls 252
  - Slides 253
  - Flows 255
  - Complex Movements 259
- Recognizing and Minimizing the Effects of Mass Movements 261
- Geo-Recap 266

## **Running Water 268**

- Introduction 270
- The Hydrologic Cycle 271
- Running Water 271

### **GEO-FOCUS 12.1: Dams, Reservoirs, and Hydroelectric Power 272**

- Sheet Flow and Channel Flow 272
- Gradient, Velocity, and Discharge 272
- How Running Water Erodes and Transports Sediment 275
- Deposition by Running Water 276
  - Deposits of Braided and Meandering Channels 276
  - Floodplain Deposits 278
  - Deltas 280
  - Alluvial Fans 280
- Drainage Basins and Drainage Patterns 283

### **CULTURAL CONNECTIONS: Flood Stories from Around the World 284**

Base Level	286
Graded Streams	287
Valley Evolution	287
Stages in Valley and Stream Formation	289
Stream Terraces	290
Incised Meanders	290
Geo-Recap	292

## Groundwater 294

Introduction	296
Groundwater and the Hydrologic Cycle	296
How Earth Materials Absorb Water	296
The Water Table	297
How Groundwater Moves	298
Springs, Water Wells, and Artesian Systems	298
Springs	299
Water Wells	300
Artesian Systems	300
<b>CULTURAL CONNECTIONS:</b>	
<b>Dowsing</b>	<b>301</b>
How Groundwater Erodes and Deposits Materials	302
Sinkholes and Karst Topography	302
Caves and Cave Deposits	303
How Humans Affect the Groundwater System	304
Lowering the Water Table	305
Saltwater Incursion	307
Subsidence	308
Groundwater Contamination	308
Groundwater Quality	310
Hydrothermal Activity and Groundwater	311
<b>GEO-FOCUS 13.1: Arsenic and Old Lace</b>	
<b>Lace</b>	<b>312</b>
Hot Springs	314
Geysers	314
Geothermal Energy	316
Geo-Recap	317

## Glaciers and Glaciation 320

Introduction	322
Glaciers—Part of the Hydrologic Cycle	322

How Glaciers Form and Move	323
Types of Glaciers	324
Valley Glaciers	324
Continental Glaciers	325
Accumulation and Wastage—The Glacial Budget	325
<b>CULTURAL CONNECTIONS: The Ice Man</b>	
<b>Man</b>	<b>326</b>
Glacial Movement	327
Erosion and Transport by Glaciers	328
Erosion by Valley Glaciers	328
<b>GEO-FOCUS 14.1: Glaciers in the National Parks</b>	
<b>Parks</b>	<b>330</b>
Continental Glaciers and Erosional Landforms	333
Glacial Deposits	334
Landforms Composed of Till	335
Landforms Composed of Stratified Drift	336
Deposits in Glacial Lakes	338
Causes of Ice Ages	340
The Milankovitch Theory	341
Short-Term Climatic Events	342
Geo-Recap	343

## The Work of Wind and Deserts 346

Introduction	348
How Wind Transports Sediment	348
Bed Load	348
Suspended Load	349
How Wind Erodes Landforms	349
Abrasion	349
Deflation	350
Types of Wind Deposits	350
The Formation and Migration of Dunes	351
Dune Types	352
Loess	354
Air-Pressure Belts and Global Wind Patterns	354
Location of Deserts	356
Characteristics of Deserts	356
Temperature and Vegetation	356
Weathering and Soils	357
<b>GEO-FOCUS 15.1: Radioactive Waste Disposal—Safe or Sorry?</b>	
<b>Disposal</b>	<b>358</b>
Mass Wasting, Streams, and Groundwater	358
Wind	359
<b>CULTURAL CONNECTIONS: Living in the Desert</b>	
<b>Desert</b>	<b>360</b>
Types of Landforms in Deserts	361
Geo-Recap	364

## The Seafloor, Shorelines, and Shoreline Processes 366

- Introduction 368
- Exploration of the Oceans 368
- Features of the Seafloor 368
  - Continental Margins 369
  - Deep-Ocean Basins 371
- Deep-Sea Sediments and Reefs 373
- Shorelines and Shoreline Processes 374
  - Tides 375

### **GEO-FOCUS 16.1: Energy from the Oceans 376**

- Waves 377
- Nearshore Currents 379
- Deposition along Shorelines 380
  - Beaches 380
  - Spits, Baymouth Bars, and Tombolos 382
  - Barrier Islands 383
  - The Nearshore Sediment Budget 383
- Erosion of Shorelines 385
- Types of Coasts 385
  - Depositional and Erosional Coasts 386
  - Submergent and Emergent Coasts 387
- Resources from the Sea 388
- Geo-Recap 390

## Geologic Time: Concepts and Principles 392

- Introduction 394
- The Start of the Concept of Geologic Time 395
- James Hutton's Contributions 395
- Relative-Dating Methods 395
  - Fundamental Principles of Relative Dating 395

### **CULTURAL CONNECTIONS: Earth's Age and Christian Traditions 396**

- Unconformities 398
- The Correlation of Rock Units 402
- Absolute-Dating Methods 405
  - Radioactive Decay and Half-Lives 405
- GEO-FOCUS 17.1: Radon: The Silent Killer 406**

- Sources of Uncertainty 407
- Long-Lived Radioactive Isotope Pairs 409
- Carbon 14 Dating Method 410
- How the Geologic Time Scale Was Developed 411
- Geo-Recap 412

## Earth History 416

- Introduction 418
- Precambrian Earth History 418
  - The Origin and Evolution of Continents 418
  - Shields, Platforms, and Cratons 420
  - Archean Earth History 420
  - Proterozoic Earth History 421
- The Paleozoic Geography of Earth 424
- Paleozoic Evolution of North America 425
  - The Sauk Sequence 428
  - The Tippecanoe Sequence 428
  - The Kaskaskia Sequence 428
  - The Absaroka Sequence 428
- The History of the Paleozoic Mobile Belts 432
  - The Appalachian Mobile Belt 432
  - The Cordilleran Mobile Belt 434
  - The Ouachita Mobile Belt 435
- The Role of Microplates 435
- The Breakup of Pangaea 435
- The Mesozoic History of North America 435
  - Eastern Coastal Region 437
  - Gulf Coastal Region 438
  - Western Region 439

### **GEO-FOCUS 18.1: Petrified Forest National Park 442**

- Cenozoic Earth History 443
  - Cenozoic Plate Tectonics and Orogeny 444
  - The North American Cordillera 444
  - The Continental Interior and the Gulf Coastal Plain 446
  - Eastern North America 447
  - Pleistocene Glaciation 447
- Geo-Recap 450

## Life History 454

Introduction	456
Precambrian Life History	456
Paleozoic Life	458
Marine Invertebrates	458
The Permian Mass Extinction	460
Vertebrates	461
Plants	463
Mesozoic Life	463
Marine Invertebrates	464
The Diversification of Reptiles	464
<b>GEO-FOCUS 19.1: Dinosaur Behavior</b>	<b>466</b>
Birds	471
Mammals	472
Plants	472
Cretaceous Mass Extinctions	473

Cenozoic Life History	474
Marine Invertebrates and Phytoplankton	474
Diversification of Mammals	474
Cenozoic Mammals	475
Pleistocene Faunas	475
Primate Evolution	477

## **CULTURAL CONNECTIONS: The Lessons of Earth History 481**

Geo-Recap	482
-----------	-----

## Appendices

A: English–Metric Conversion Chart	485
B: Periodic Table of the Elements	486

## Answers

Multiple-Choice Review Questions	488
----------------------------------	-----

## Glossary 489

## Index 496
