

GEOLOGY

and the ENVIRONMENT

fourth edition

Bernard W. Pipkin ~ *D. D. Trent* ~ *Richard Hazlett*

Contents

Chapter 1

Humans, Geology, and the Environment 1

What Is Environmental Geology? 2

- The Environmental Geologist 3
- Tools of the Trade 4
- Geographic Information System (GIS) 4
- Case Histories 5

Too Many People 6

- Exponential Growth and the Population Explosion 6
- U.S. Population Growth and Immigration 7
- World Population Growth, Resources, and the Environment 8

Toward a Sustainable Society 8

Too Many People and Signs of a Stressed Earth 9

- Global Warming and Energy 9
- Rising Sea Level 10
- The Land 10
- Water—A Limiting Resource 11
- Forests 11
- Other Resources 11

Case Study 1.1 THE ROAD TO SEVEN BILLION 127

Case Study 1.2 RIO + 10 13

Case Study 1.3 TWENTY-FIVE YEARS OF “THINKING GREEN” 13

Gallery *Overpopulation Problems* 14

Summary 15

Key Terms 15

Study Questions 16

For Further Information 16

Chapter 2

Getting Around in Geology 17

The Earth System 18

Earth Materials 21

- Elements, Atoms, and Atomic Structure 21
- Minerals 22
- Rock-Forming Silicates 24
- Mineral Identification 24
- Rocks 25
- Rock Defects 32

Geologic Time 32

Age of the Earth 35

Case Study 2.1 MINERALS, CANCER, AND OSHA—FACT AND FICTION 39

Case Study 2.2 A GIRL'S BEST FRIEND AND OTHER GEMS 40

Case Study 2.3 MINERALS, CATS, AND THE LITTER BELT 42

Gallery *A Rock Collection* 43

Summary 45

Key Terms 46

Study Questions 46

For Further Information 46

Chapter 3

Plate Tectonics 47

Continental Drift 49

- Wegener Vindicated 50

Plate Tectonics 53

- How Fast Do the Plates Move? 55
- What's Causing All This Restlessness? 56
- The Dance of the Continents 59
- Plate Tectonics and the Rock Cycle 62

Plate Tectonics and the Environment 64
 Plate Tectonics and the Human Environment 65

**Case Study 3.1 EXOTIC TERRANES—A CONTINENTAL
 MOSAIC 66**

Gallery Visions of How the Earth Works 68

Summary 70
 Key Terms 70
 Study Questions 71
 For Further Information 71

Chapter 4

Earthquakes and Human Activities 72

The Nature of Earthquakes 73

Locating the Epicenter 75
 Earthquake Measurement 75

Fault Creep, the “Nonearthquake” 79

Forensic Use of Scientific Records 79

Seismic Design Considerations 80

Ground Shaking 80
 Landslides 82
 Ground or Foundation Failure 82
 Ground Rupture and Changes in Ground Level 84
 Fires 85
 Tsunamis 85

Four Earthquakes That Make a Point 85

Gujarat, India, 2001 86
 Alaska, 2002 88
 Colima, Mexico, 2003 88
 Northridge, California, 1994 89
 What We Can Learn 91
 Does Earthquake Country Include Idaho, Missouri,
 and New York? 91
 The Pacific Northwest 95

Prediction 96

Forecasts 97
 Statistical Approach 97
 Geological Methods 99

Mitigation 99

Survival Tips 101

Case Study 4.1 EARTHQUAKES, LANDSLIDES, AND DISEASE 103

Case Study 4.2 PREDICTABLE “FUTURE SHOCKS” 103

Case Study 4.3 RX FOR FAILED FREEWAYS 104

**Case Study 4.4 DEPRESSED TIGERS, RESTLESS TURTLES, AND
 EARTHQUAKES! 106**

Gallery Earthquakes Are Hard on Cars 107

Summary 109
 Key Terms 109
 Study Questions 110
 For Further Information 110

Chapter 5

Volcanoes 111

Who Should Worry 113

The Nature of the Problem 115

Types of Eruptions and Volcanic Cones 117

Effusive Eruptions 117
 Explosive Eruptions 120
 Benefits of Volcanic Action 124
 Geothermal Energy 124

Volcanic Hazards 125

Lava Flows 125
 Ash Falls 126
 Pyroclastic Flows 127
 Lahars 128
 Tsunamis 128
 Weather and Climate 130
 Gases 131

Mitigation and Prediction 131

Diversion 131
 Volcano Hazard Zones and Risk 133
 Eruption Forecasting 134
 What To Do When an Eruption Occurs 136

**Case Study 5.1 NEW ZEALAND’S BLAST IN THE PAST, A
 SKIFIELD, AND FLUIDIZATION 137**

Case Study 5.2 MONTSERRAT, PARADISE LOST 140

**Case Study 5.3 CARBON DIOXIDE, EARTHQUAKES, AND THE
 LOS ANGELES WATER SUPPLY 141**

Case Study 5.4 VOLCANIC CO₂ AND FOUNTAINING LAKES 143

Gallery Volcanic Wonders 144

Summary 146
 Key Terms 147
 Study Questions 147
 For Further Information 147

<i>Chapter 6</i>	
Soils, Weathering, and Erosion	148
Weathering	149
Physical Weathering	150
Chemical Weathering	150
The Rate of Weathering	151
Geologic Features of Weathering	153
Soils	153
Soil Profile	153
Soil Color and Texture	155
Soil Classification	157
Soil Problems	159
Soil Erosion	159
The Impact of Cropland Loss on Humans	160
Expansive Soils	162
Permafrost	164
Settlement	166
Other Soil Problems	167
Case Study 6.1	SALINIZATION AND WATERLOGGING 168
Case Study 6.2	SOILS, HEALTH, AND LOCOWEED 168
Case Study 6.3	RX FOR CONTAMINATED SOILS 170
Gallery	<i>A Few Inches between Humanity and Starvation</i> 172
Summary	173
Key Terms	174
Study Questions	174
For Further Information	174
<i>Chapter 7</i>	
Mass Wasting and Subsidence	175
Flows	177
Types of Flows	177
Causes of Debris Flows and Debris Avalanches	178
Landslides That Move as a Unit	180
Types	180
Falls	183
The Mechanics of Slides	183
Lateral Spreading	185
Factors That Lead to Landslides	185
Reducing Losses from Mass Wasting	187
Landslide Hazard Zonation	187
Building Codes and Regulations	187
Control and Stabilization	188
Water Drainage and Control	188
Excavation and Redistribution	188
Retaining Devices	189
Diversion Techniques	189
Snow Avalanches	189
Subsidence	192
Human-Induced Subsidence	193
Natural Subsidence	193
A Classification of Subsidence	193
Deep Subsidence	193
Shallow Subsidence	195
Mitigation	196
Case Study 7.1	DYNAMIC REAL ESTATE IN OREGON 197
Case Study 7.2	COLORADO'S SLUMGULLION LANDSLIDE—A MOVING STORY 300 YEARS OLD 198
Case Study 7.3	A RESCUE PLAN FOR THE MERCHANTS OF VENICE 200
Gallery	<i>Slip, Slide, and Fall</i> 201
Summary	202
Key Terms	203
Study Questions	203
For Further Information	204
<i>Chapter 8</i>	
Fresh-Water Resources	205
Water as a Resource	206
Fresh Water at the Earth's Surface	207
Rivers	207
Lakes	209
Fresh Water Underground	210
Ground-Water Supply	211
Location and Distribution	211
Static Water Table	212
Pressurized Underground Water	214
Ground-Water Storage and Management	215
Ground-Water Mining	216
Ground Water–Saltwater Interaction	217
Ground Water–Surface Water Interaction and Usage	
Trends	218

Geologic Work by Underground Water 219

Water Quality 221

Dissolved Substances 221

Ground-Water Pollutants 222

Conservation and Alternative Sources 224

Case Study 8.1 WHO SHRUNK THE ARAL SEA? 226

Case Study 8.2 FLUID FLOW IN POROUS ROCKS 228

Case Study 8.3 GROUND-WATER LAW 229

Case Study 8.4 THE EDWARDS AQUIFER, A TEXAS BONANZA 230

Case Study 8.5 LONG ISLAND, NEW YORK—SALTWATER OR
FRESH WATER FOR THE FUTURE? 231

Gallery *Ground-Water Wonders* 233

Summary 234

Key Terms 235

Study Questions 235

For Further Information 236

Chapter 9

Hydrologic Hazards at the Earth's Surface 237

River Systems 238

Stream Features 239

When There Is Too Much Water 242

Flood Measurement 244

Flood Frequency 244

The Flood of 1993 248

Mitigation 248

Options 248

When There Is Too Little Water 252

Flood Facts and Flood Planning 252

Case Study 9.1 THE NILE RIVER—THREE CUBITS BETWEEN
SECURITY AND DISASTER 253

Case Study 9.2 WATER, WATER EVERYWHERE 254

Case Study 9.3 DAMS—NO LONGER IN VOGUE? 255

Case Study 9.4 RIVERS, GORGES, AND NATIONAL PARKS 256

Gallery *Going...going...gone!* 258

Summary 259

Key Terms 260

Study Questions 260

For Further Information 260

Chapter 10

Coastal Environments and Humans 261

Wind Waves 262

Waves in Deep Water and at the Shore 262

Wave Refraction 264

Impulsively Generated Waves 265

Tsunamis 265

Shorelines 266

Beaches 266

Sea Cliffs 274

Mitigation of Beach Erosion 275

Estuaries 277

Hurricanes and Coastal Flooding 278

El Niño and the Coastal Zone 279

Hurricane Predictors 282

Case Study 10.1 DISTANT TSUNAMIS—THE SILENT THREAT 283

Case Study 10.2 A MOVING EXPERIENCE 284

Gallery *Reminders of Nature's Force* 285

Summary 286

Key Terms 287

Study Questions 287

For Further Information 287

Chapter 11

Glaciation and Long-Term Climate Change 289

Glaciation 290

Origin and Distribution of

Glaciers 291

Glacier Budget 291

Glacial Features 292

The Effects of Glaciation 292

Distribution of Soils 292

Ground-Water Resources 293

- Sea-Level Changes 293
- Isostatic Rebound 294
- Human Transportation Routes 296
- Pleistocene Lakes 297
- Glaciation and Climate Change 298

Climate 299

- Factors That Control Climate 299
- Causes of Climate Change 303
- Glacier Evidence of Climate Change 308

Today's Global Warming 309

- Evidence of Global Warming 309
- Causes of Today's Global Warming 311
- Living with Uncertainty 312

Implications for the Future 313

- What Individuals Can Do 315
- What Industry and Governments Can Do 315

Case Study 11.1 WHEN A GLACIER SURGES IT'S A MOVING EXPERIENCE 317

Case Study 11.2 THE CARBON CYCLE 318

Case Study 11.3 IS THERE A NEW BEAT TO THE RHYTHM OF THE ICE AGES? 320

Case Study 11.4 EARLY EFFECTS OF GLOBAL WARMING ON PLANTS AND ANIMALS 321

Gallery *Wonders of Glaciation* 323

- Summary 324
- Key Terms 325
- Study Questions 325
- For Further Information 325

Chapter 12

Arid Lands and Desertification 328

Deserts 328

- Kinds of Deserts 328

Desertification 329

Wind as a Geologic Agent in Deserts 332

Arid Regions, Winds, and Human Health 332

Case Study 12.1 SAHEL'S SEVENTEEN-YEAR DROUGHT: EVIDENCE OF CLIMATE CHANGE, MISUSE OF THE LAND, OR WESTERN POLLUTION? 335

Case Study 12.2 IS DESERTIFICATION SWALLOWING CHINA? 338

Gallery *Desert Oddities* 340

- Summary 341
- Key Terms 341
- Study Questions 341
- For Further Information 341

Chapter 13

Mineral Resources and Society 343

Mineral Abundances and Distribution 345

- Economic Mineral Concentration 345
- Factors That Change Reserves 346
- Distribution of Mineral Resources 347

Origin of Mineral Deposits 348

- Igneous Processes 349
- Sedimentary Processes 351
- Weathering Deposits 352
- Metamorphic Processes 353

Mineral Reserves 354

- Metallic Mineral Reserves 354
- Nonmetallic Mineral Reserves 354

Mineral Resources for the Future 356

Mining and Its Environmental Impacts 358

- Impacts of Coal Mining 360
- Impacts of Underground Mining 362
- Impacts of Surface Mining 362
- Impacts of Mineral Processing 364

Mine Land Reclamation 368

- Surface- and Ground-Water Protection 368
- Mill and Smelter Waste Contamination 369
- Revegetation and Wildlife Restoration 370

The Future of Mining 371

- Mining Legislation in the United States 371

Case Study 13.1 MINING THE CALIFORNIA MOTHER LODE 373

Case Study 13.2 ACID MINE DRAINAGE AND EARTH SYSTEMS 375

Case Study 13.3 CLEANING UP HISTORIC MINING SITES IN COLORADO 375

Case Study 13.4 THE MIKE HORSE MINE—A CLEAN UP OR DILEMMA? 377

Case Study 13.5 IS A COMPANY'S WORD AS GOOD AS ITS BOND? 380

Gallery *The Legacy of Mines and Mining* 381

- Summary 383
- Key Terms 384
- Study Questions 384
- For Further Information 385

*Chapter 14***Energy and the Environment** 386**Petroleum** 388

- Origin and Accumulation of Hydrocarbon Deposits 389
- Geologic Traps—Oil and Gas Stop Here 390
- Oil Production 391
- Quality and Price 393
- The Future for Oil 393
- Arctic National Wildlife Refuge 394
- Energy Gases and the Future 395

Coal 395

- Coalification and Rank 395
- Reserves and Production 396

Nonconventional Fossil Fuels 397

- Tar Sands 397
- Oil Shales 398

Problems of Fossil Fuel Combustion 398

- Air Pollution 398
- Mine Collapse 401

Energy for the Future 401

- Direct Solar Energy 401
- Indirect Solar Energy 402
- Geothermal Energy 404

Nuclear Energy 405

- Geological Considerations 406
- Nuclear Waste Disposal 406

Energy from the Sea 406

- Ocean Thermal Energy Conversion 406
- Wave Energy 406
- Tidal Currents 406

Case Study 14.1 ROCK OIL AND THE COLONIAL 409**Case Study 14.2** THE TRAGEDY IN THE SOUND 410**Case Study 14.3** BAKING SODA, VINEGAR, AND ACID RAIN 411**Gallery** *Energy Is Where You Find It* 412

- Summary 414
- Key Terms 415
- Study Questions 415
- For Further Information 415

*Chapter 15***Waste Management and Geology** 417**Municipal Waste Disposal** 419

- Municipal Waste Disposal Methods 419
- Problems of Municipal Waste Isolation 423

The Completed Landfill 424

- Recycling 425
- Multiple Land Use Strategies 427

Hazardous-Waste**Disposal** 428

- Hazardous-Waste Disposal Methods 428
- Superfund 429

Nuclear Waste Disposal 430

- Types of Nuclear Waste 430
- Isolation of Nuclear Waste 432
- Health and Safety Standards for Nuclear Waste 433
- Is There a Future for Nuclear Energy? 434

Private Sewage Disposal 434**Case Study 15.1** THE SOCIOLOGY OF WASTE DISPOSAL 436**Case Study 15.2** THE HIGHEST POINT BETWEEN MAINE AND FLORIDA 436**Case Study 15.3** DEEP-WELL INJECTION AND HUMAN-CAUSED EARTHQUAKES 437**Case Study 15.4** LOVE CANAL: A PRECEDENT IN HUMAN-CAUSED ENVIRONMENTAL POLLUTION 438**Case Study 15.5** RADON AND INDOOR AIR POLLUTION 439**Gallery** *Waste Disposal Then and Now* 441

- Summary 442
- Key Terms 442
- Study Questions 443
- For Further Information 443

Appendix 1 *Periodic Table of the Elements* 444**Appendix 2** *Some Important Minerals* 445**Appendix 3** *Planes in Space: Dip and Strike* 447**Appendix 4** *Modified Mercalli Scale* 448**Glossary** 449**Credits** 460**Index** 463
